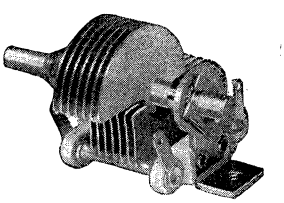
The lower minimum capacities of these units make them especially suitable for multi band applications where a high maximum-to-minimum capacity is required. Panel space for mounting, only 2¾" by 2⅞".

These are available in practically all capacities commonly used, with various air-gaps for various voltages.

BUD JUNIOR DUAL SECTION CONDENSERS

Rotor contact is made by a four fingered plate pressure spring placed at the center of the rotor shaft between the two sections, thereby providing perfect balance and improving the high frequency characteristics. The tie-rods are insulated at both ends with Steatite insulators to prevent the development of inductive loops in condenser frame.

BUD MIDGET CONDENSERS

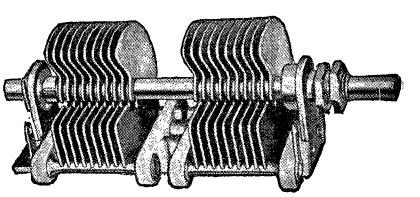


In high frequency and ultra high frequency receivers, low power transmitters, wave meters, monitors and many other electronic devices the small size of this unit makes it ideal.

Embodies such noteworthy features as: Steatite insulation; long, accurately fitted bearings which eliminate side motion; spring cup washers, large surface silver plated beryllium copper wiper contacts, which insure smooth, noise-free operation; Cadmium-plated electro-soldered brass rotor and stator plate assemblies, which ensure perfect plate spacing, and minimize series resistance; rigid construction, which minimizes vibration.

BUD DOUBLE BEARING MIDGET CONDENSERS may be had in either the mid-line type plates (straight line wave length) or semi-circular plates (straight line capacity). They can be single hole panel mounted or chassis mounted. The double and triple spaced units are ideally suited for use in exciter and low-power transmitter applications.

BUD DOUBLE GANG MIDGET CONDENSERS



Where space is at a premium and split-stator capacitors are called for by circuit layout, BUD DOUBLE GANG MIDGETS are desirable.

Plate construction and finish, workmanship and materials, are identical with other Midget Condensers. Panel mounting and chassis mounting are provided for in the design of the DOUBLE GANG MIDGETS. They are built in either mid-line or Semi-Circular type plates. These condensers are available in all commonly used capacities and in various air gaps.

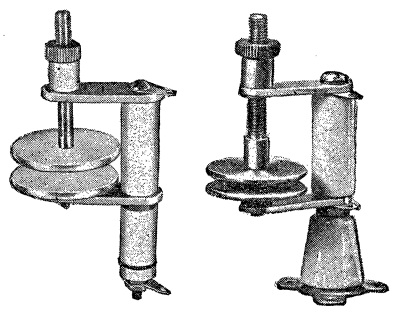
BUD UNIVERSAL NEUTRALIZING AND HIGH FREQUENCY CONDENSERS

This type condenser is applicable to many neutralizing and high frequency tuning circuits. The advanced two pillar construction eliminates any capacity variation due to vibration. The movable plate is adjusted by means of a threaded shaft to which it is attached and is permanently locked in any position by a knurled lock nut. Eeach turn of the screw will advance plate $\frac{1}{32}$ inch.

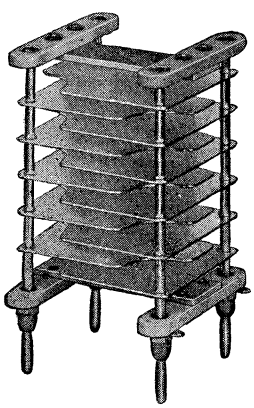
Cat. No.	Plate dia.	Overall Length	MMFD Max.	Capacity Min.	Your Cost
NC-1000	$1\frac{27}{32}$	$3\frac{31}{32}$	11	.5	$2.49
NC-1001	$2\frac{13}{16}$	$4\frac{23}{32}$	24	1	3.60
NC-1002	$4\frac{3}{4}$	$6\frac{11}{16}$	27	6	5.04



BUD FEED-THROUGH AND BASE MOUNTED NEUTRALIZING CONDENSERS

Feed through and base mounted neutralizing condensers particularly suited in circuits utilizing tubes with the grid leads terminating in the base. One hole required for mounting. Threaded brass rod holding condenser in place also brings the connection to the bottom plate through the chassis, thus simplifying wiring. Number 890 and number 852 are ideal neutralizers for popular low powered beam tubes. Number 890 base mounted only.

Cat. No.	Plate dia.	Size Hole For Mtg.	—MMFD. CAPACITY— Max.	Min.	Your Cost
NC-852	1″	$\frac{5}{16}$	6	.5	$1.08
NC-853	$1\frac{27}{32}$″	$\frac{13}{32}$	11	.5	2.49
NC-890	1″		6	.5	1.14



BUD STAT-AIR CONDENSERS

The difficulty of designing a radio frequency amplifier to cover any large frequency range and maintain a proper L/C ratio, is overcome by paralleling the proper Stat-Air Condenser with the tank condenser.

Soldered brass plates, bright cadmium plated and Steatite insulation insures maximum operating efficiency.

BUD COMPACT NEUTRALIZING CONDENSERS

In applications where space is the prime factor, these units are ideal for neutralizing and high frequency tuning. Low loss steatite is used for dielectric. Mounting of these condensers features either one hole mounting or fastening to solder lugs provided. All brass parts are nickel plated. A knurled locknut permits locking of movable plate.

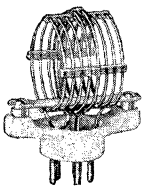
BUD 75 WATT OSCILLATOR AND BUFFER COILS



The ceramic mounting base keeps the coil a safe distance from the chassis when the coil socket is mounted on the chassis. It also permits easy coil removal without disturbing the winding. All coils are air-wound with bright tinned copper wire and mount in 5-prong tube sockets.

OEL Coils have fixed end link and are NOT center tapped. OCL Coils have fixed center link with main winding center tapped. OLS Coils have adjustable center link with main winding center tapped.

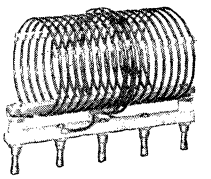
*TOTAL CIRCUIT capacity required to resonate at low frequency end of the band.

BUD AIR-WOUND TRANSMITTER COILS



The power ratings of these coils indicate the maximum input power allowable to the stage in which they are to be used. The "Air-wound" construction of all these coils, together with the bright tinned copper windings and Steatite mounting bars, make all three series unusually efficient. Coils are self-supporting but are rigidly held in place by fire-resistant locking strips. All units are center tapped and have semi-adjustable link at center.

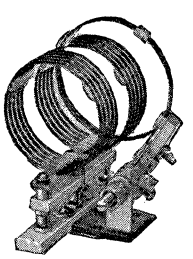
ADJUSTABLE LINK TRANSMITTER COILS

Since one of the most effective means of varying the loading of an R. F. Stage is by the use of a variable link to the plate tank, these three lines of inductances have this feature incorporated in them. In each series the link winding is connected to the jack bar into which the coils are plugged. The one link may thus be used with any of the coils. This link winding is of the helical type and is so arranged that it may be readily controlled from the panel by means of an extension shaft if required.



All coils in this series are of the "Air-wound" type, making them very efficient. Windings are made of bright tinned copper wire, and the mounting and plug bars are made of Steatite to ensure a minimum of loss. Windings are held firmly and positively in place by fire-resistant locking strips to ensure constant inductance. The links couple to the coils at the center and all inductances are center tapped.

BUD ANTENNA MATCHING NETWORK COILS

The low frequency coil in each rating is designed for operation from 160 meters to 40 meters, and the high frequency coil in each rating is designed for operation from 20 to 10 meters.

All coils and links have a sufficient number of taps provided to allow both the inductance and the coupling to be varied over a wide range.

The coils are supported on Steatite insulators, which are mounted on a **Black Crackled** base. This base is provided with two holes for convenience in mounting.

Cat. No.	Height	Range in Meters	Mtg. Hole Dim.	Length Base	Overall Width	Overall Height	Your Cost

ACM-2	1 Kilowatt	20-10	7½"	8½"	4¾"	5¼"	8.16

BUD ADJUSTABLE LINKED ANTENNA COILS

When the final amplifier plate coil has a fixed link, it is desirable to use adjustable linked coils in the antenna matching network. These coils are made in 500 watt and 1 kw. ratings. Two sizes of inductances are made in both ratings. Mounting hardware and complete instructions are included with each coil.

BUD CODE PRACTICE OSCILLATOR

This audio oscillator has a built-in dynamic speaker. Operates up to twenty earphones. Speaker is automatically cut out of the circuit when earphones are inserted. Ten phones may be connected in parallel. More than ten earphones, connect in series-parallel.

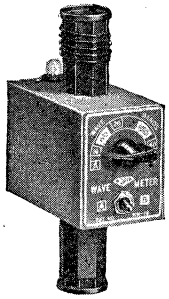
A volume control and a pitch control are provided. Any number of keys may be connected in parallel for group practice. Operates on 110 volts, A.C. or D.C.

Size 7⅛" x 4½" x 3¾".

No. CPO-124—Sh. wt. 6 lbs. **Your Cost $12.50**

BUD WAVE METER

The new Bud Wavemeter offers radio amateurs and experimenters positive wave-band identification and ease of line-up of frequency multiplier and amplifier R. F. units in multi-stage transmitters. The sensitivity of this unit makes it useful as a neutralization indicator and for detecting weak R.F. currents when closely coupled to a circuit. Antenna tuning adjustments are simplified if this wave meter is used to determine position of standing waves on antenna feeder systems.



Wired and assembled in an attractive black crackled enameled steel case, this wavemeter is complete with indicator bulb and neat calibrated name plates with seven plotted bands from 160 meters to 5 meters, including the new 15 meter band.

Cat. No.	Ship. Wt.	Your Cost
WM-78	4 lbs.	$8.25

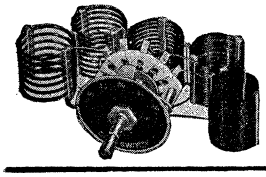
BUD WIRELESS PHONOGRAPH OSCILLATOR

Any standard record player easily converted to wireless operation. Record reproduction is then possible through a regular radio receiver without the necessity of cumbersome interconnecting wires. Easily installed. Instructions furnished.

Faithful reproduction. Unit wired and tested, includes tube. **Black Crackle** Enamel. Operates from 115 volts A.C. or D.C. Frequency range, approx. 1100 to 2150 K.C. 4½"x2½"x2⅛".

Cat. No. WO-6—Ship. wt. 5 lbs.....**Your Cost $7.85**

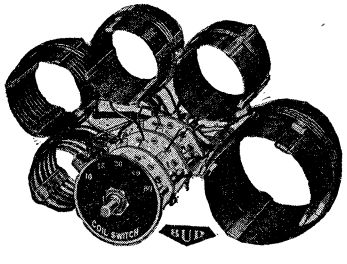
BUD 50 WATT BANDSWITCH ASSEMBLIES



This 50 watt bandswitch assembly with 10-15-20-40-80 meter coils is excellent for use in capacity coupled oscillator, buffer, or amplifier stages. The coils are mounted on a low-loss ceramic switch which is furnished with a suitable maker plate.

Cat. No. ONS-1 .....**Your Cost $4.29**

BUD 100 WATT BANDSWITCH ASSEMBLIES



For pushpull plate or grid circuits or where plate neutralization is intended, use a Bud XCS-1 bandswitch coil assembly. Either a single section 100 mmfd condenser such as Bud C-1534, or a dual section 200 mmfd condenser, Bud JC-1569, should be used to tune all bands. Coils are center tapped and center linked and cover all bands 80 to 10 meters.

For single ended circuits use the Bud XES-2 end linked coil assembly with a Bud JC-1534 100 mmfd condenser.

Each assembly supplied complete with a band-marked dial plate and installation instruction.

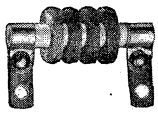
Cat. No.	Width	Height	Depth	Ship. Wt.	Your Cost
ONS-1	5½"	2½"	3"	2 lbs.	$4.29
XCS-1	8"	4¼"	5"	3 lbs.	9.06
XES-2	8"	4¼"	5"	3 lbs.	7.92

BUD 5 METER INTERRUPTER COIL

An interrupter coil for use in the low frequency oscillator in 5 meter superregenerative circuits. Lattice wound on a ceramic form. Shipping weight, 4 oz. Size, 1¼" x 1⅛".

Cat. No. CH-452.....**Your Cost $1.14**

PIE-WOUND R.F. CHOKES With Strap Leads



For radio receivers and transmitters. No. CH-876 is a heavy duty choke for transmitter plate circuits. 1½" x ⅝".

BUD IRON CORE R.F. CHOKES

Circuit improves by use of these chokes. The improved "Q" results from the D.C. resistance being from 40 to 50% less for a given inductance than for regular air-core types. D.C. voltage drop through the choke is considerably less, yet the choking action is equally as good. Mounted in square shield cans 1⅜" x 1⅜" x 1 7/16".

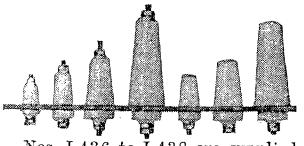
BUD CONE FEED-THROUGH INSULATORS



In bringing high voltage and R. F. leads through panels and chassis, and for numerous other uses, this line of two-piece insulators will be found indispensable. Made of the same ceramic material as the Stand-Off Insulators.

Nos. I-436 to I-438 are supplied with threaded rod and necessary hardware, while Nos. I-453 to I-455 are supplied with No. PJ-949 jack top attached to appropriate threaded rod.

BUD REGULAR CONE FEED-THROUGH INSULATORS

Cat. No.	Top Height	Bottom Height	Mounting Hole Dia.	Approx. Ship. Wt.-25	Your Cost

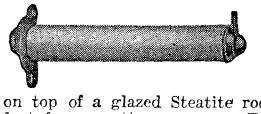
BUD PILLAR INSULATORS



The need for a firm support for high voltage leads such as those going to plates of rectifier tubes or large transmitting tubes is adequately filled by these two numbers.

Each unit consists of a heavy lug on top of a glazed Steatite rod 7/16" in diameter, with a convenient foot for mounting purposes. Fittings are nickel plated.

Cat. No.	Length	Approx. Ship. Wt.-25	Your Cost
I-738	1 3/8"	3 1/2 lbs.	$0.21
I-739	2 7/8"	5 1/2 lbs.	.30

BUD NEW TYPE FEED-THRU INSULATOR BUSHINGS

I-457

I-456

New type Bud feed-thru insulator bushing made from LUCITE, in two sizes to simplify insulation problems when high voltage wires are fed through chassis or panels. If wires are insulated, it is not necessary to remove insulation as the center holes are large enough to pass it. If larger size hole is required, material can be easily drilled. Each bushing supplied with nut for mounting on material up to 1/8" thick.

Cat. No.	Description	Your Cost
I-456	Diameter 1/2" with 1/8" wire hole	$0.11
I-457	Diameter 3/4" with 3/16" wire hole	.14

BUD CERAMIC RODS

These convenient sizes are available in glazed Steatite. Both ends of all rods are tapped for standard machine screws, to simplify mounting condensers, coils, and similar components.

Cat. No.	Length	Diam.	Tapped	Approx. Ship. Wt.-25	Your Cost
I-7569	2 3/4"	5/8"	8-32	3 1/2 lbs.	$0.42

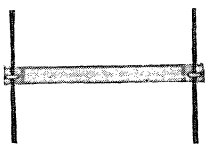
BUD LUCITE INSULATORS

Here is a new series of feeder spreaders, stand-off insulators, and feed-through insulators designed for applications that demand the finest type of insulation. They are made of DuPont Lucite, a new plastic that has extremely low losses at radio frequencies. It is water-clear, and all outside surfaces are highly polished.

In addition to their remarkable electrical properties, these insulators will greatly add to the finished appearance of any piece of equipment in which they are used.

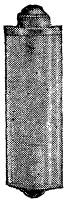
BUD LUCITE FEEDER SPREADERS



Designed for all average feeder requirements. A 600 ohm line can be made with any size wire from No. 12 to No. 18 by using one of the spreaders listed below. The spreader used for this application depends on the wire size. Further data on this subject is available in any antenna handbook. These spreaders are furnished with locking screws to clamp the wire in place. All spreaders are 3/8" in diameter, and are drilled for No. 12 wire.

Cat. No.	Wire Spacing	Standard Package	Approx. Ship. Wt. Std. Pkg.	Your Cost
I-1900	2"	25	3 1/2 lbs.	$0.21
I-1901	4"	25	4 lbs.	.27
I-1902	5"	25	4 1/2 lbs.	.30
I-1903	6"	25	5 lbs.	.33

BUD LUCITE STAND-OFF INSULATORS



The Lucite pillar-type stand-off insulators listed below are made in a convenient number of sizes to fit a variety of applications. They are intended for chassis mounting in a single mounting hole. The 1/2" diameter insulators are supplied with 6-32 mounting screws. The 3/4" diameter insulators are supplied with 10-32 mounting screws.

Cat. No.	H	Dia.	Std. Pkg.	App. Ship. Wt. Std. Pkg.	Your Cost
I-1904	1 1/4"	1/2"	25	3 lbs.	$0.21

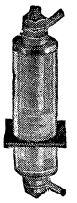
I-1907	4 1/4"	3/4"	25	4 lbs.	.60
I-1908	6 1/4"	3/4"	25	5 lbs.	.84

BUD LUCITE FEED-THROUGH INSULATORS



These Lucite feed-through insulators are made in two diameters, and five convenient heights. They are ideal for bringing high-frequency leads through a chassis or shield and are superior to ceramic insulators for this purpose. The 1/2" diameter insulators are furnished with 6-32 hardware. The 3/4" diameter insulators are furnished with 10-32 hardware.

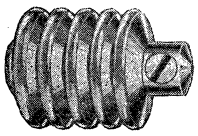
Net

HEAT RADIATING CONNECTORS



These connectors have been scientifically designed to aid dissipation of heat generated at the plate and grid terminals of transmitting tubes and to protect the glass seal at these points. TC-488 and TC-489 are for wire leads. TC-1920 and TC-1921 are for cap type leads.

Lead size indicated in column is the maximum for each type.

Cat. No.	Tube Lead Size in.	Len. in.	Dia. in.	Ship. Wt. 10 lbs.	Your Cost
TC-488	.049	13/16	5/8	1 1/2	$0.36
TC-489	.069	13/16	5/8	1 1/2	.36
TC-1920	.360	15/16	15/16	2	.60

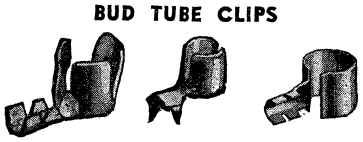
TC-1923	.110	15/16	15/16	2	.60

BUD TUBE CLIPS



TC-107 TC-108 TC-490

Uses to which these clips may be put are clearly listed below. Made of heavy gauge spring brass, cadmium plated.

Cat. No.	Type Tube	Your Cost
TC-490	—Transmitting	$0.06
TC-107	—Glass	per C 1.29
TC-108	—Metal	per C 1.29

BUD SOLDERING IRON TIPS

This tip is made of a special copper base rod. It is 3/8" diameter x 4" long and is made particularly as a replacement for American Beauty Irons. However, it will fit many other types of irons that are designed to accommodate 3/8" diameter tips. Fits American Beauty No. 3183.

Cat. No. IT-372.....Your Cost $0.42

BUD WALL LEAD-IN

This Lead-In is used to facilitate bringing antennas or feeders through a wall or window casing with ease and safety. Unit consists of a 12" threaded brass rod insulated with heavy fibre sleeving and two heavy ceramic insulators. Rod and insulation may be readily cut to any desired length.

Cat. No. I-742.....Your Cost $0.60

SLOTTED MOUNTING BRACKET

This bracket is designed to permit the mounting of Midget Condensers, volume controls, etc., at any desired position under or on top of a chassis, at the proper distance from the chassis. Bracket is made of steel, cadmium-plated.

Cat. No. AB-549—Approx. ship. wt. 100 —10 lbs. .....Your Cost $0.06

INSULATED ALIGNMENT TOOLS

Nos. AT-254 to AT-256 are hard fibre trimmer wrenches with 1/4" hex. broaching through the entire length. Ends can be easily cut off as they become frayed or broken from wear.

No. AT-235 is a 1/4" diameter rod of a special tough fibre, beveled at each end to form screw-driver blades.

Nos. AT-236 to AT-237 are combination tools consisting of No. AT-235 driver inserted in an extra-heavy fibre tube which is hex. broached the entire length. Tools may be held at any length between specified limits by set screw provided.

AT-254 to AT-256

Top illus., AT-235; bottom AT-236, AT-237

Cat. No.	Length	Your Cost
AT-254	5 1/2"	$0.21
AT-255	8"	.25
AT-256	12"	.33
AT-235	7"	.30
AT-236	7" to 10"	.60
AT-237	11" to 17"	.72

BUD ALIGNMENT TOOLS

No. AT-285 has a metal screw-driver tip at one end, and a metal alligator jaw at the other end for hex. head and knurled nuts.

No. AT-287 has a hard fibre handle with metal screw-driver at one end.

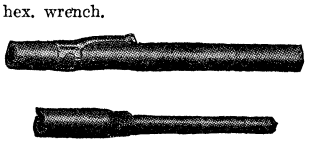
AT-285

AT-287

Cat. No.	Your Cost
AT-285	$0.36
AT-287	.30

BUD 4-IN-1 TOOL

This handy alignment tool should be in the vest pocket of every service man. Consists of (1) insulated screw-driver, (2) Fin-type adjustment slot, (3) 5/16" hex. wrench, and (4) 1/4" hex. wrench.



Cat. No. AT-118.....Your Cost $0.54

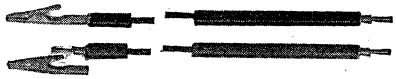
BUD TEST PRODS

These tapered test prods are made of cast phenol resin. Tips screw into handle. Specify either Red or Black.

Cat. No.	Length	Your Cost
TL-187	5"	$0.30
PT-188	2"	.15
PT-189	2 3/8"	.15
PT-190	1 1/2"	.15

BUD DE LUXE TEST LEADS

TL-620 TEST LEADS illustrated are the New BUD Superior type Test Leads made from the finest type of very flexible kinkless rubber covered wire, with polished plastic handles at both ends. Also supplied with this pair of Test Leads are two alligator clips that can be slipped on the end of the phone tips.



TL-621 TEST LEADS are supplied with two sets of prods so that the user can interchange from needle point to phone tip point.

TL-186—Same as TL-620 less Alligator Clips.

TL-397S and TL-397P. Have Plastic Handles with special chuck points holding removable needle tips for piercing through insulation.

TL-398S and TL-398P. Are supplied with Plastic Handles and Standard Phone Tip Plugs that can be removed from insulated handle in case of wire breakage.

Cat. No.	Prod End	Terminals	Your Cost
TL-620	Phone Tip	Alligator Clip or Phone Tip	$1.05
TL-621	Needle Point or Phone Tip	Phone Tip	1.05
TL-186	Phone Tip	Phone Tip	.96

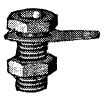
BANANA PLUGS & JACKS

Intended for all purposes where it is desirable to make a coil, condenser, etc., easily removable. Plugs have heavy spring contacts which fit snugly into the jacks. No. PL-470 plug has $\frac{7}{16}$" shank, threaded 6-32, and No. PL-469 is tapped to accommodate a 6 - 32 screw. No. PJ - 949 Jack fits into $\frac{1}{4}$" hole. All types packed 25 to a box.



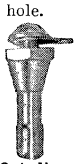
Cat. No.	Your Cost
PL-470	$0.09
PL-469	.09
PJ-949	.09

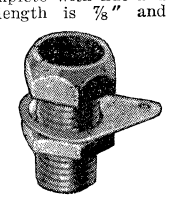
GIANT PLUGS AND JACKS

For applications requiring a heavy duty plug and jack having a large contact area. Same jacks and plugs used with BUD Kilowatt coils.

No. PL-962 plug is made from one-piece spring brass with bright nickel plated finish. Spring action assures firm contact with the jack. Overall length is $1\frac{3}{16}$".

No. PJ-963 jack also made from brass, bright nickel plated. Each jack comes complete with nut and lug. Overall length is $\frac{7}{8}$" and jack fits in $\frac{3}{8}$" hole.



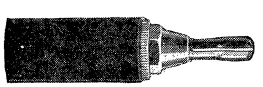


Cat. No.	Your Cost
PL-962	$0.23
PJ-963	.20

INSULATED GIANT PLUG

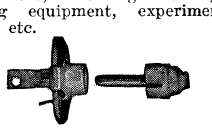
A substantial, insulated plug for terminating heavy single wire leads such as found on diathermy pads. Consists of a No. PL-962 Giant Plug attached to a removable bakelite handle and large soldering lug terminal. Overall length 2⅞". Plugs into No. PJ-963 jack.

Cat. No. PL-977..Your Cost $0.48



BUD PIN-PLUG AND JACK

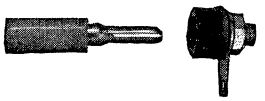
This is a pin plug and jack combination that will fit into a multitude of applications: receivers, auto radio, recording and reproducing equipment, experimental units, etc.



Cat. No.	Description	Your Cost
PL-247	Plug	$0.09
JP-248	Jack	.15

BUD INSULATED BANANA PLUG AND JACK

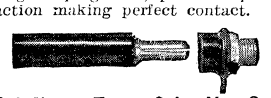
Positive spring action insures perfect contact.



Cat. No.	Type	Color	Your Cost
PL-477R	Plug	Red	$0.13
PL-477B	Plug	Black	.13
PJ-478R	Jack	Red	.12
PJ-478B	Jack	Black	.12

BUD GIANT INSULATED BANANA PLUG AND JACK

Excellent Plug and Jack for all heavy duty purposes. Plug has large wiping area, positive spring action making perfect contact.



Cat. No.	Type	Color	Your Cost
PL-475R	Plug	Red	$0.30
PL-475B	Plug	Black	.30
PJ-476R	Jack	Red	.24
PJ-476B	Jack	Black	.24

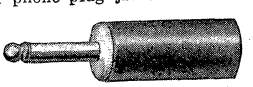
BUD MICROPHONE JACKS

These panel mounting jacks for control panels and similar applications where space is at a premium. Nickel plated finish, contacts of spring brass. Jacks come complete with insulated washers. Will accommodate standard plugs.

Cat. No.	Contacts	Your Cost
J-1038	2	$0.27
J-1038	3	.42

BUD PHONE PLUGS

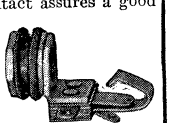
Metal parts machined from brass, and nickel plated. Unshielded plugs have handles of black bakelite, and shielded types brass knurled handles, nickel plated. No. FP-1946 Without Handle, is used as an adapter between a female microphone cable connector and a regular phone plug jack.



Cat. No.	Contacts	Handle	Your Cost
FP-230	2	Bakelite	$0.33
FP-282	2	Shielded	.54
FP-1057	3	Bakelite	.66
FP-284	3	Shielded	.99
FP-1946	2	None	.24

BUD MIDGET JACK

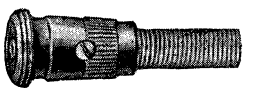
This jack has applications where there's limited space behind panel. Spring brass contact assures a good connection. Supplied with insulating washers. Accommodates standard phone plugs.



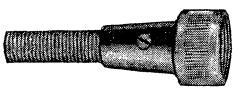
Cat. No.	Type	Your Cost
J-232	Open Circuit	$0.24
J-233	Closed Circuit	.30

BUD SINGLE CONTACT CABLE CONNECTORS

Unbreakable contacts for single-conductor microphone cable are provided by these shielded connectors. Made of brass, nickel plated. Accidental disconnections impossible by coupling ring which, when tightened, insures perfect contact between soldered connections. Cord protectors of steel spring wire will take cables up to ¼" in diameter.



CN-245

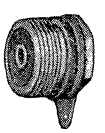


CN-244

Cat. No.	Description	Your Cost
CN-244	S. C. Female	$0.33
CN-245	S. C. Male	.30

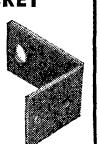
BUD CHASSIS UNITS

Male Connector designed for chassis mounting in connection with CN-244. Where ground to chassis is desired, mount in $\frac{13}{32}$" hole; for two circuits independent of chassis, mount in ½" hole; insulating washers are furnished.



Cat. No. CN-246..Your Cost $0.21

BUD INTERLOCK SWITCH-BRACKET

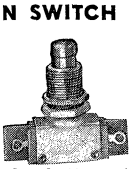


Every installation of high voltage equipment in a cabinet should be wired with interlock switches to break the primary current whenever the cabinet is opened for repair, adjustment or alteration. These brackets are supplied with mounting holes and a $\frac{15}{32}$" hole for the shank of a power switch such as the Bud SW-1270 switch.

Cat. No.	Your Cost
SB-1348	$0.39

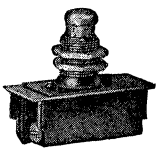
PUSH-BUTTON SWITCH

Two - circuit slow-make and quick-break momentary contact switch. One circuit is "ON" and the other is normally "OFF." Pushing the button reverses the position of the circuits. Same switch is used on a number of commercial test sets. Shank is ⅝" long.



Cat. No. SW-743..Your Cost $0.57

BUD POWER SWITCHES



Designed for interrupting heavy currents too great for ordinary switches. Both are double pole, single throw. Rated at 12 amps. at 125 volts or 6 amps. at 250 volts. By paralleling the contacts, making the switch single pole single throw, these ratings may be doubled. Made for BUD by H. & H. No. SW-1269 is a regular toggle type switch for all standard applications. No. SW-1270 is a push-button type with both contacts normally in the open position. Intended as a safety switch to be used in an interlock connection on rack cabinets, etc., to interrupt the primary current whenever the door is opened. Both switches are 1¾" long, ¾" wide, and ¾" high and have a threaded shank $\frac{15}{32}$" in diameter and $\frac{7}{16}$" long. No. SB-1348 is a bracket for holding No. SW-1270 switch in position in any rack cabinet.

Cat. No.	Your Cost
SW-1269	$0.90
SW-1270	1.50
SB-1348—Bracket	.39

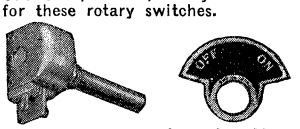
BAT-HANDLED TOGGLE SWITCHES

Identical with the regular line of toggle switches listed below except that handle is longer and shaped like a baseball bat. Available only in nickel plated finish with $\frac{7}{16}$" shank. Packed 5 to a carton. Contacts are silver plated.

Cat. No.	Description	Your Cost
SW-1115	S. P. S. T.	$0.36
SW-1118	S. P. D. T.	.45
SW-1119	D. P. S. T.	.57
SW-1120	D. P. D. T.	.69

BUD ROTARY SWITCHES

Used where rotary action with a knob is desired instead of toggle action. Underwriter approved. Ratings same as for toggle switches. No. DP-1230 listed below is an OFF-ON plate especially intended for these rotary switches.



Cat. No.	Des.	L Shank	L Shaft	Your Cost
SW-499	SPST	⅜"	1⅛"	$0.45

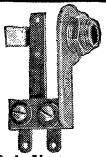
DP-1230	OFF-ON Plate			.09

BUD ROTARY SWITCH Off-On Plate

This plate serves as an indicator for a rotary type power switch when used with a small bar knob.

Cat. No. DP-1230, Your Cost $0.09

BUD GENERAL PURPOSE JACKS



Although small in size, careful design and high quality materials assure dependable service. Spring is nickel silver; permits snap action and positive tension. Circuit opening contacts made of pure silver. Laminated bakelite insulation prevents breakdown between springs at all ordinary voltages. Supplied with panel insulating washers.

Cat. No.	Contact Arrangement	Your Cost
J-1324	Open circuit	$0.30
J-1325	Closed circuit	.36
J-1326	3-contact open circuit	.39

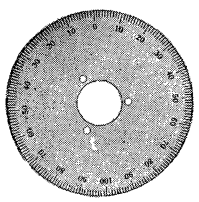
DIAL PLATES

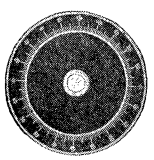


For making up special types of tuning and indicating equipment. Numerals and divisions are die-stamped and filled with black enamel.

DP-719 and DP-721 are Universal Scale running 0 to 100 and 100 to 0.

Cat. No.	Dia.	Arc	Calibrated	Your Cost
DP-716	2¾"	360°	0 to 100	$0.35
DP-719	2¾"	360°	{0 to 100 / 100 to 0}	.60
DP-721	4"	360°	{0 to 100 / 100 to 0}	.85

BUD UNIVERSAL DIAL PLATES



Black enameled background on aluminum, etched plates, popular for all types of installations. Universal application; calibration over the whole 360° in two divisions—clockwise over 180° from 0 to 100, and counter-clockwise from 0 to 100, over the other 180°. Center hole is ⅜" in diam.

Cat. No.	Dia.	Arc	Calibrated	Your Cost
DP-714	2"	360°	0 to 100 to 0	$0.18
DP-715	3"	360°	0 to 100 to 0	.24

BUD RECTANGULAR DIAL PLATES

These Etched Dial Plates, can be used when a more "streamlined" effect is desired. All plates are calibrated for 300° rotation, measure 1 1/16" x 2 1/4".

Cat. No.	Marking	Your Cost
DP-978	Record	$0.18
DP-979	Microphone	.18
DP-980	Gain	.18
DP-981	Tone	.18
DP-982		.18

JACK NAME PLATES

For identifying input and output circuits. Nos. DP-1262 and DP-1271 are toggle switch identification nameplates. Polished letters on black enameled background. Diameter of all plates 1⅛".

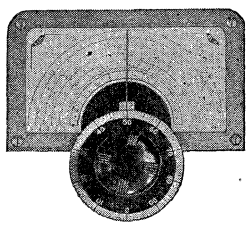
DP-1262	High—Low	.475"	.12

BUD VERNIER DIAL—*GEARED TYPE*

This new and improved precision-built, vernier dial of attractive appearance, has been designed for industrial, laboratory and amateur radio applications. Many uses can be found for this gear-driven dial on electron-coupled oscillators, frequency meters, receivers and many other types of instruments and laboratory equipment which requires ease of tuning and accuracy of calibration.



Freedom from back-lash is obtained by the use of spring-loaded laminated steel gears which are of the ratio ten to one. Each dial comes furnished with three paper dial scales upon which calibration marks can be imprinted. These dial scales are printed with five calibration arcs for wave band identification and each arc is divided into five equal sections over 180 degrees, which makes each section the equivalent of one rotation of the circular dial or 100 dial divisions. This enables a calibration of 500 divisions over the entire scale.

The dial is furnished complete with all hardware. An attractive gray crackle frame outlines the dial scale which is further protected by a "Plastacele" window. The whole dial scale assembly mounts independent of the gear unit and may be removed any time desired without disturbing the dial drive. Mounting area of the dial is 5¼" x 5¾". Depth behind panel is 1½".

Cat. No. D-1729.....Your Cost $3.18

BUD DE LUXE STREAMLINED PROFESSIONAL RELAY RACKS

Ideal for housing your **Transmitter, P. A. System,** or other **Electronic Equipment,** this large, sturdy cabinet is of modern design, featuring rounded vertical front corners and handsome red-striped, chrome-trim at bottom. Top has louvres in front and rear for additional ventilation.

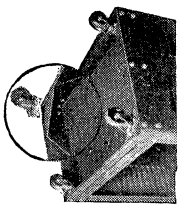
These **Relay Racks** are of **rugged construction** being fabricated from 16-gauge ($\frac{1}{16}$") cold rolled steel; the panel mounting supports, which are welded to each side of the cabinet, are of $\frac{1}{8}$" steel, accurately punched to accommodate rack panels. The holes are tapped 10-32. These panel mounting supports are recessed so that no edges are exposed.

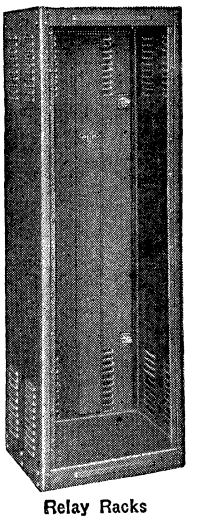
The rear door is hung on loose-joint hinges, and is held securely in place by two snap catches. The construction and application of this door enables it to be easily removed when equipment repairs are necessary. An **Interlocking Switch Bracket** is provided with each cabinet.

The cabinets are shipped "knocked down," all necessary hardware for easy assembly being supplied. The cabinets are available in either **Black or Grey Crackle** finish. When color is not specified, Black will be furnished.

The cabinet can be supplied without louvres on one or both sides at no extra cost. This is a desirable feature when two or more cabinets are to be placed side by side.

Base of cabinet has four supports welded into each corner. These supports are tapped so that our RC-7756 casters can be easily attached to these cabinets and thereby eliminating the necessity for using cabinet rack Dollies. Casters are not included in price of these cabinets.





Relay Racks

Catalog Number	Overall Height	Panel Space	Ship. Wt.	Your Cost

BUD DE LUXE STREAMLINED PROFESSIONAL CABINET RACKS

Builders of Commercial and Amateur **Transmitters, P. A. Systems** and other apparatus requiring one or more chassis and panel units will find this series of modernistic **Cabinets** the most handsome line available.

In keeping with **De Luxe Relay Racks** the front vertical corners are attractively rounded. Top and bottom are trimmed with red-striped chrome-finished moldings. Panels fit into a recess so that no edges are exposed. All **Cabinets** have recessed hinged door on top, provided with a snap catch. The three large sizes have hinged rear doors, making all equipment on shelves readily accessible. Panel mounting holes are accurately drilled and tapped. The back is terminated two inches above the bottom to give access to various terminals, and to permit switching, keying, and A. C. leads to be brought out. These **Cabinets** are constructed from 16-gauge ($\frac{1}{16}$") thick cold rolled steel, with all joints electrically welded, then smoothly ground. **Cabinets** shipped set up ready for use, available in either **Black or Grey Crackle** Enamel finish. Ample ventilation is possible by louvres and opening in back. Panel mounting screws and cup washers for fastening panels to cabinet are furnished.

ALL CABINETS IN THIS SERIES ARE PROVIDED WITH EXTENDED METAL FEET, ENABLING CABINETS TO BE PLACED ON DESK OR TABLE, WITHOUT FEAR OF ENDANGERING OR INJURING THE FINISH ON TABLE OR DESK.

BUD IMPROVED WALL OR TABLE TYPE SPEAKER CABINETS

Bud Radio Engineers have developed a distinctive line of new metal speaker cabinets with reproduction capabilities equal to the finest wood housings. All troubles with wood warping and splitting are eliminated.

Keyway Holes are provided for wall mounting, and four embossed feet on the bottom to prevent damaging table surfaces. Finish, **Brown** Enamel.

Sizes available to house 4" to 12" speakers.

BUD STEEL RELAY RACK PANELS

Made of high grade steel $\frac{1}{8}$" thick, 19" long, and finished in beautiful baked **Black** or **Grey Crackle** Enamel, these panels afford rigid support for all types of relay rack units. Available in **Western Electric Notching** (first notch $\frac{1}{4}$" or 1 1/2" from edge). **Black Crackle** finish supplied unless **Grey** is specified.

BUD MASONITE RELAY RACK PANELS

Where light, non-magnetic, insulated panels are desirable, this line, made of Tempered Masonite, may be utilized to good advantage. While strong and tough, these panels are readily worked with ordinary wood-working tools. Panels are $\frac{3}{16}$" thick and 19" long, and are finished in beautiful and durable baked **Black** or **Grey Crackle** Enamel. **Available in Western Electric notching. Black** finish will be supplied unless **Grey** is specified.

BUD PROFESSIONAL RELAY RACKS

Professional appearance will be added to any **Transmitter, P. A. System** or any **Electronic Equipment** when housed in one of these excellent Cabinet Relay Racks. Complete protection from damage and dust is provided for equipment.

The enclosed rack is substantially constructed from 16-gauge ($\frac{1}{16}$") cold rolled steel. Panel mounting supports which are welded to the sides are $\frac{1}{8}$" thick, and are accurately punched; holes are tapped 10-32. Holes are spaced to accommodate either **Western Electric** or **Amateur Standard Notched Panels**. The panels fit into a recess, so that the edges are not exposed. The removable rear door is provided with two snap catches. An interlock switch bracket is provided with each cabinet.

These Relay Racks are painted in either **Black** or **Grey Crackle** Enamel finish. They are shipped **"Knocked Down,"** supplied with all necessary hardware for assembly. We also supply a sufficient number of 10-32 screws and cup washers for mounting of panels.

Cat. No.	Overall Size Height	Width	Depth	Panel Space Height	Width	Ship. Wt.	Your Cost

BUD GENERAL CABINET RACKS

For **Electronic, Amateur** and **Commercial** applications requiring neat housing at reasonable costs, this unusually fine line of cabinets is recommended. Constructed from 16-gauge ($\frac{1}{16}$") cold rolled steel, all joints welded, and ground smooth. Cabinets shipped set up and ready for use, available in either **Black** or **Grey Crackle** Enamel finish.

Ample ventilation is provided by louvres and opening in back. Hinged rear door with snap catch is furnished on three larger sizes. All others have solid back welded to sides. Hinged top door with snap catch lock is supplied on all cabinets of this line.

These cabinets are designed so that they will accommodate either **Western Electric** or **Amateur Standard Notched** Panels. Screws and cup washers are furnished to fasten panels to cabinets.

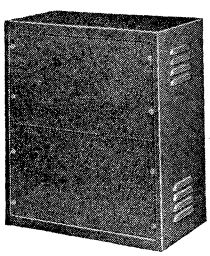
BUD SMALL CABINET RACK

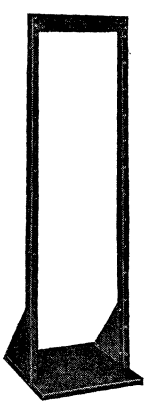
The long-felt need for a small and inexpensive cabinet rack to house low power transmitters and similar apparatus is filled with the introduction of this new addition to the **Bud** line. This cabinet is constructed to accommodate two panels, one 10 1/2" and one 8 3/4". Cabinet height 20 1/4", width 19 1/8", depth 10 1/2".

The rear of the cabinet is covered by a hinged door with an efficient locking device, and the sides are louvred for ventilation. The entire unit is formed from **Black Crackled** steel and is furnished complete with panels.



Cat. No. RC-1749.....Ship. Wt. 25 lbs.....**Your Cost $14.10**

BUD STANDARD RELAY RACKS



Where a sturdy mounting for a number of panel and chassis units such as in a transmitter, public address system, etc., is desired, allowing complete accessibility to all parts, this line of **Relay Racks** is indispensable. The one-eighth inch steel channels, three inches deep, are held together by angle cross-pieces of the same material. The base design has been improved to incorporate a chassis-type bottom, together with the usual side angles, making the rack stronger and more stable.

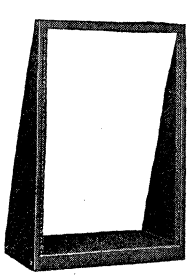
These units are intended to accommodate standard 19-inch panels with either **Western Electric** or **Amateur Notching.** Holes are drilled and tapped for 10-32 thread. The finish of these racks is baked **Black Crackle** Enamel, and they are shipped "knocked down." Assembly is very easy, and all necessary nuts, bolts, and washers are included.

The No. RR-1265 **Rack** is a professional heavy duty rack for heavier types of commercial installations. Uprights are heavy channel iron, supported by a heavy $\frac{3}{8}$" thick angle-iron base. Finish and drilling same as above.

Cat. No.	Overall Size H	W	D	Panel Size H	W	Ship.Wt.	Your Cost
RR-1263	35 1/2"	20"	22"	31 1/2"	19"	38 lbs.	$15.00
RR-1264	70 1/2"	20"	22"	66 1/2"	19"	48 lbs.	18.00
RR-1265	72 1/2"	20"	15"	66 1/2"	19"	104 lbs.	31.50

BUD DESK TYPE RELAY RACKS

These small relay racks are perfectly suited for table mounting of low and medium power transmitters, public address systems, and other electronic instruments. Each rack is built around a heavy chassis on which the side uprights mount. This type construction permits the rack to hold great weights. Racks come "knocked down" but are complete with all necessary hardware and are easily assembled. Finish is **Black Crackle** Enamel. Either **Western Electric** or **Amateur Standard** notched panels can be used. Panels set in a recess so that no edges are exposed.



Cat. No.	Overall Size H	W	D	Panel Size H	W	Ship.Wt.	Your Cost
RR-1248	24"	20 3/8"	12"	21"	19"	15 lbs.	$5.76
RR-1249	31"	20 3/8"	12"	28"	19"	20 lbs.	7.20

NOTE: H—Denotes Height; D—Depth; L—Length; W—Width.

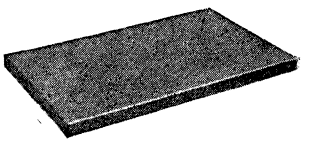
BUD RACK SHELVES

Heavy power supplies, modulator units, etc., can be mounted on these rack shelves which are supported in the cabinet by the chassis-supporting angles listed below. They are designed to slide in from the rear of the cabinet. Made of heavy gauge steel and finished in **Black Crackle** Enamel.

Cat. No.	H	L	D	Ship. Wt.	Your Cost
CB-1976	1″	19″	15″	6 lbs.	$2.94
CB-1977	1″	19″	12″	5 lbs.	2.55

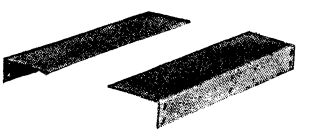


Rack Shelf

BUD CHASSIS SUPPORTING ANGLES

In a relay rack it is frequently desirable to have some support in addition to the panel for an unusually heavy panel-an-chassis unit. To fill this need, these Supporting Brackets may be screwed on the sides of a relay rack cabinet in such a manner that the chassis may slide and rest on them in much the same way as a desk drawer does. The angles No. SA-1349 are 14½″ long and project 3″ from each side of cabinet. The angles No. SA-1350 are 12″ long and project 3″ from each side of cabinet. Afford ample support for a standard 17″ width chassis. These brackets are sold in pairs, finished in durable Black Crackle Enamel, and come complete with necessary mounting hardware.

Cat. No.	Ship. Wt.	Your Cost
SA-1349	4 lbs.	$1.29
SA-1350	4 lbs.	1.29

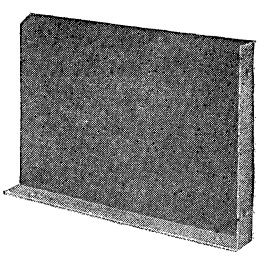


Chassis Supporting Angles

BUD INTERSTAGE SHIELDS

These shields find many uses on receiver and transmitter chassis for eliminating interstage coupling and isolating individual circuits. Construction is of 20-gauge steel. Formed angles on front and bottom facilitate mounting on either chassis or panel. Both angles punched with two mounting holes.

Cat. No.	H	D	Ship. Wt.	Your Cost
IS-1246	5½″	7″	1 lb.	$0.36
IS-1247	5½″	10″	1 lb.	.42
IS-1245	6½″	10″	1 lb.	.45



Interstage Shield

BUD STEEL CHASSIS BASES

These rugged steel chassis are made from one piece of steel, and all corners are spot-welded. The sides are folded over on the bottom for additional strength, and this also permits bottom plates to be attached to the chassis if desired. These bases are furnished in either **Black Crackle** Enamel or **Electro-zinc** Plated Finish.

Steel Chassis Base

* Indicates chassis which are punched to accommodate Chassis Mounting Brackets.

BUD HEAVY DUTY CHASSIS BASES

(FURNISHED WITH BOTTOM PLATES)

The construction of this line of bases is identical with the line of regular Steel Chassis Bases with the exception that they are formed from heavy 1/16″ steel and intended for applications requiring unusual sturdiness and where large weights are involved. All sizes are available in either **Black Crackle** or **Electro-zinc** Plated Finishes and come complete with bottom plates and mounting screws.

Streamlined Speaker Case

BUD STREAMLINED SPEAKER CASES

Since many communications receivers are furnished with external and unmounted speakers, this line of speaker housings was introduced to provide an attractive enclosure for such units. In addition, these cabinets are ideally suited for many more types of installations where speakers must be placed in a conspicuous place. Each cabinet has the front vertical corners rounded, and the speaker opening is covered with an artistic metal grille. Two strips of chromium trim are located vertically on each side of the speaker opening, and each case is furnished with a carrying handle which may be removed if desired. These cases are available with either **Black** or **Grey Crackle** finish. **Black** will be supplied unless **Grey** is specified.

Metal Carrying Case

BUD METAL CARRYING CASE

Designed primarily for all types of small portable equipment, this line of Carrying Cases finds many uses in housing transceivers, field strength meters, oscilloscopes, test oscillators, etc. An easy-grip handle is riveted on the top. The removable front and rear panels are fastened to the case by means of 6-32 screws. The steel welded construction assures maximum strength at a minimum weight—very important for portable work. Finish is **Black Crackle.**

The line of Chassis Decks contains an appropriate size for each of these cabinets.

De Luxe Streamlined Cabinet

BUD STREAMLINED CABINETS

This latest development in housings for receivers, electronic instruments, etc., is this new line of metal cabinets. Their distinctive features are the rounded front vertical corners and the recessed hinged tops. These two factors make a unit built in one of these cabinets very modern in appearance. All parts are completely accessible. The panel of each cabinet is removable and fits flush with the rounded corners. The rear of the cabinet is stopped 2" above the bottom, allowing all necessary leads to the chassis to be readily brought out without drilling the cabinet itself. Both sides are louvred for ventilation, and the bottom of each cabinet has four embossed feet. These cabinets are furnished in **Black Crackle** Enamel finish.

Cat. No.	W Panel In.	W In.	Ship. Wt. lbs.	Your Cost

Streamlined Amplifier Foundation

BUD STREAMLINED AMPLIFIER FOUNDATIONS

The utility of these new Amplifier Foundations can be appreciated only after they have been seen. Intended to house public address amplifiers, speech amplifiers, and similar apparatus, these units present a handsome appearance heretofore not available for such apparatus.

Each of these foundations consists of a standard chassis on which is mounted a removable cover held on by screws. This cover has the front and rear horizontal corners rounded; sides and ends are attractively louvred; and top contains grilled cutouts. Chromium trim is used on top and sides, and handles are used on ends of chassis. All chassis are 3" high, and all units are 9" overall height.

Standard finish for this series is either **Black** or **Grey Crackle** Enamel. **Black** will be supplied unless **Grey** is specified.

Amplifier Foundation

BUD AMPLIFIER FOUNDATIONS

Almost all types of speech and amplifier equipment are readily adapted to this very neat line of ventilated housings. Each unit consists of a regular chassis on which is attached the shield cover. This shield cover has cane design sides and top and solid ends, assuring strong construction and, at the same time, adequate protection and ventilation. Material used is cold rolled steel, **Black Crackled,** and all joints are spot welded.

Sloping Panel Amplifier Foundation

BUD SLOPING PANEL AMPLIFIER FOUNDATIONS

These foundations add a real "Commercial" appearance to any amplifier. The 4" sloping front on the amplifier chassis provides adequate space and easy visibility for controls and indicators.

Each foundation consists of a sloping front chassis on which is mounted a removable top cover. The top horizontal corners of this cover are rounded and the sides and ends are louvred. The top contains grilled cutouts for adequate ventilation. This cover is attractively finished with red striped chromium trim. Handles are placed on both ends of the chassis. All chassis are 3 1/2" high and all units are 9 1/2" over-all height.

The appearance of these foundations is further enhanced by the two-tone finish. The cover is finished in **Grey Crackle** Enamel and the chassis is finished in **Black Crackle** Enamel.

SPECIAL SIZE CABINETS AND CHASSIS MADE TO MANUFACTURERS' SPECIFICATIONS—ABOVE PRICES INDICATE SUGGESTED DEALER NET PRICES—ALL PRICES SUBJECT TO CHANGE WITHOUT NOTICE

PAR-METAL RACKS · CHASSIS · CABINETS *for* ELECTRONIC APPARATUS

TYPE "C" CABINET RACKS

These are professional type racks that have been used on many commercial installations, and make a DeLuxe job of any amateur or broadcast transmitter. The racks are of all-steel construction, welded into an integral unit, to give a lifetime of service.

All panel mounting screws are concealed by means of a full length corner trim on each side at the front. In keeping with modern design, this front trim is rounded on the vertical corners. The rear corners are finished with regular angle trim. The front of the rack is trimmed with chrome moulding top and bottom. The door has a grille at top and bottom, and is hung on sturdy loose-joint hinges; it is held closed by two flush snap-action catches. Additional ventilation is provided by louvres at the sides. The panel mounting angle irons are 3/16" thick, with mounting holes accurately drilled and tapped 12/24 thread on multiple 1¼"—½" spacings. The rack is made from 1/16" thick cold rolled steel, rigidly braced and reinforced throughout; the bottom is $\frac{7}{64}$" thick steel. A rectangular opening is provided in the bottom for conduits, leads, etc. A duplex receptacle and outlet box are provided in the back under the door.

FINISHES: Either black ripple or slate grey ripple enamel. Corner trims are supplied in dull black or slate grey smooth enamel to match.

RACKS WITHOUT LOUVRES: To permit racks to be set up in gangs or rows of two or more, the louvres at sides are omitted. Racks may be joined by a flat trim fastened to front of adjacent racks, overlapping both racks. Shipped with corner trim as illustrated; where specified, front joining trim will be substituted in place of corner trim at same price. Front joining Trims cannot be used on racks with front doors.

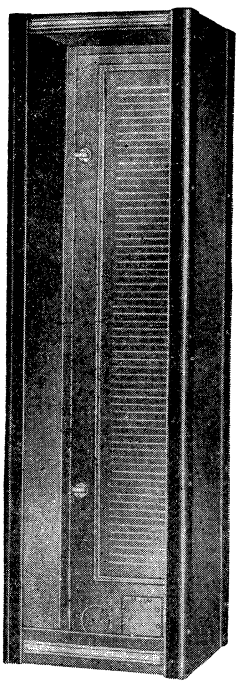
TYPE "C" TRANSMITTER RACKS

STANDARD TYPE



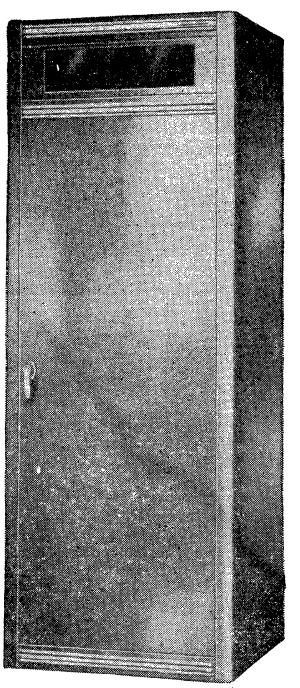
Similar to standard type "C" racks listed on page J-98 except that they have been reinforced at rear corners for use with heavier apparatus. At the rear, knockouts are provided for conduit and 4" square duct, as well as a double convenience outlet with receptacle. Knockouts are also supplied at sides for conduit, suitable for entry of cables when units are ganged. The rear door, which is removable, has ample louvres for ventilation, and is covered on the inside with mesh screening. Front trim rounded on vertical corners. Racks are regularly supplied with corner trim for use as a single unit, but will be furnished with suitable front connecting strips for ganging in rows of two or more without additional charge.

FINISH: Black ripple enamel with dull black corner trim is standard. Slate grey ripple enamel furnished without additional charge, if so specified. For grey lacquer finish, add 8% to prices.

PANELS: Type "C" panels to fit the G-2218 and G-2219 racks are listed on page J-102. For cost of 30" blank panels to fit the G-3024 rack, add 100% to prices of 19" panels on page J-102.

Catalog No.	Overall Size	Panel Space	Clear Depth	Ship. Wt. Lbs.	Net Price
G-2218	76⅛ x 22 x 18"	70 x 19"	16⅞"	270	$91.50
G-2219	83⅛ x 22 x 18"	77 x 19"	16⅞"	290	102.00
G-3024	76⅛ x 33 x 24"	70 x 30"	22⅞"	450	153.00

DELUXE TYPE



This rack is undoubtedly the finest standard transmitter rack which we have ever made. It is constructed of 1/16" sheet steel, with a base of ⅛" steel, and is reinforced for use with heavy duty apparatus. The meter panel at the top is 7" high, has a glass front, and is provided with a blank bakelite sub-panel. The inner sides of the rack are reinforced with ⅛" steel channels, to which may be attached angle brackets to support the chassis. These channels may also be used as wiring ducts.

The rack will accommodate panels 24" wide; the front panel mounting angles are recessed to allow 2" clearance behind the front door for dials, knobs, etc. The front door is mounted on concealed hinges; the rear door has loose-joint hinges so that it may be removed. Both doors are equipped with handles, and the front door also has a lock. The rack will accommodate chassis up to and including those 26" wide by 22" deep, listed on page J-103. Blank panels 24" wide can be supplied at prices listed on page J-102 plus 50%.

No. G-8024

Overall dimensions: 83⅛" x 30½" x 27".
Available panel space: 70" x 24".
Clear inside width at front: 24"
Clear inside width at rear: 26½".
Clear inside depth behind front panels: 23".
Shipping weight: 540 lbs.
Net Price: **$213.00.**

Black ripple enamel finish is optional.

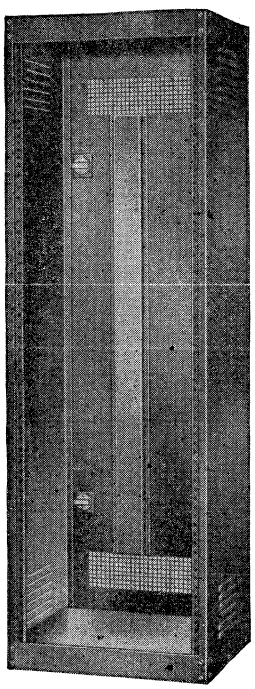
PAR-METAL RACKS · CHASSIS · CABINETS *for* ELECTRONIC APPARATUS

TYPE "A" ENCLOSED RELAY RACKS

All of the racks on this page are shipped "knocked-down" for easy assembly with all necessary bolts supplied. Made for standard 19" wide panels, they are substantially constructed from 1/16" cold rolled steel; panel mounting angles are of $\frac{7}{64}$" steel, accurately drilled on universal centers for either "Amateur" or type "C" panels, tapped for 10/32 machine screws. Panels fit into a recess, so that edges are not exposed. Louvres in sides and screen sections in rear door provide ample ventilation. Rear door is hung on sturdy loose-joint hinges, and closed by a flush snap catch. Ample panel mounting screws and washers supplied with each rack.

STANDARD TYPE



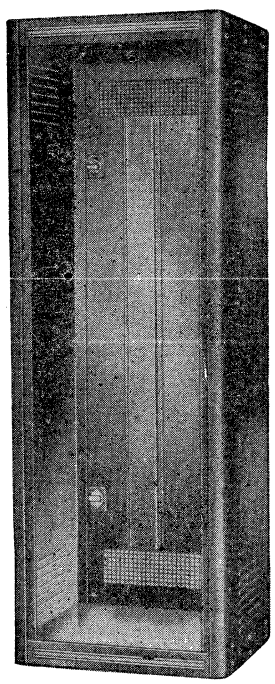
This completely enclosed rack will give your job the "professional appearance" so desirable on transmitters, test equipment, public address systems, etc. It is made in three heights in accordance with specifications below:

*BLACK RIPPLE ENAMEL

Cat. No.	Overall Size	Panel Space	Shpg. Wt. lbs.	Net Price
ER203	42 x21x16½"	36¾"	75	$24.00
ER205	66½x21x16½"	61¼"	135	34.50
ER207	82¼x21x16½"	77	165	42.00

*Slate grey ripple is optional

ROUNDED CORNER TYPE



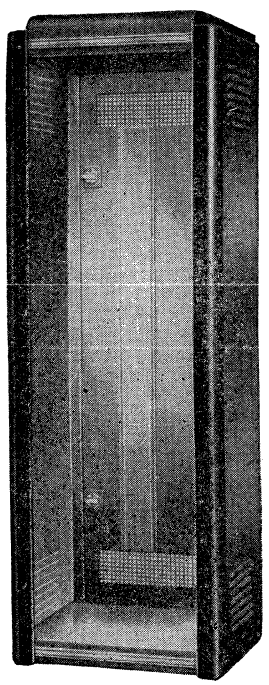
The ideal streamlined rack for your next transmitter or P.A. system. The vertical corners at the front of the rack are rounded, and the top and bottom are nicely trimmed with red striped chrome finished mouldings. The uniform slate grey ripple finish gives the assembly a superb exterior appearance. Combines modern styling and an attractive price.

*SLATE GREY RIPPLE ENAMEL

Cat. No.	Overall Size	Panel Space	Shpg. Wt. lbs.	Net Price
ER213	42 x22x16½"	36¼"	100	$28.50
ER215	66½x22x16½"	61¼"	150	40.50
ER217	82¼x22x16½"	77"	175	48.00

*Black ripple is optional.

DELUXE TYPE



Produced in the new "streamlined" style, this rack is fully in keeping with modern design. The removable vertical corner mouldings are rounded and cover the panel mounting screws, the same as is used on our Type "C" commercial racks. The top, which has also been "streamlined," is perforated at the back to provide additional ventilation. The top and bottom are trimmed with red striped chrome finished mouldings.

*SLATE GREY RIPPLE ENAMEL

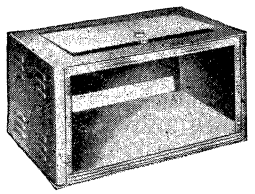
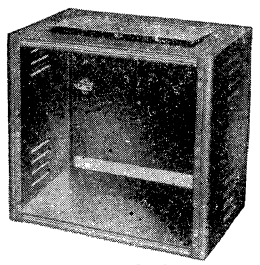
PAR-METAL RACKS · CHASSIS · CABINETS for ELECTRONIC APPARATUS

DELUXE TYPE "A" DESK PANEL CABINET RACKS

For Standard 19″ Rack Panels
Black Ripple Finish





Streamlined styling. In keeping with our other Deluxe racks, the vertical front corners are rounded and the top and bottom are trimmed with chrome finished mouldings. Panels fit into a recess, so that the edges are not exposed. Panel mounting holes accurately drilled on universal centers, for either "Amateur" or type "C" panels; holes are tapped for 10/32 machine screws. May be used with any chassis up to 13″ x 17″ in size. All cabinets constructed of $\frac{1}{16}$″ thick sheet steel. Louvres provide ample ventilation through sides and back. Piano type hinges are used on the top doors, which are provided with snap catches. Panel mounting screws and washers are furnished. Black ripple enamel is standard. Slate grey is optional at same price.

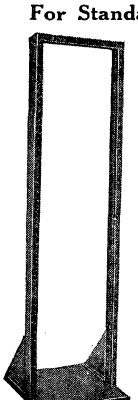
DL3513	36¾ x 21½ x 15″ deep	35″	20.70

TYPE "A" CHANNEL RELAY RACKS

For Standard 19″ Rack Panels

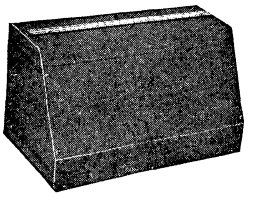
Black Ripple Finish



Ideal for use on all types of transmitters and public address systems. Substantially constructed of $\frac{7}{64}$″ pressed steel. Vertical members and top crossbrace securely welded together. Base is 22″ deep and extends both front and rear on the RR-195 rack; it is 19″ deep on the RR-193 rack. Panel mounting holes accurately drilled on universal centers for either "Amateur" or type "C" panels, tapped for 10/32 machine screws. Ample supply of panel mounting screws and finishing washers supplied.

Cat. No.	Overall Size	Panel Space	Shpg. Wt. lbs.	Net Price
RR-195	73¼ x 20 x 22″	71¾″	85	$16.50
RR-193	38¼ x 20 x 19″	36¾″	57	13.20

SLOPING FRONT CABINETS



May be readily adapted as instrument cases for use in studios, laboratories, etc. Top corner is rounded and trimmed with a chrome moulding, and with the slate grey ripple finish makes a very attractive case. A chassis may be mounted to front panel and removed as a unit. Rear of case is ventilated, with an opening for connections. Prices do not include chassis.

Cat. No.	H. W. D.	Size of Chassis	Net Price
SF-500	8 x 8 x 8″	7 x 7 x 2″	$3.15
SF-501	8 x 10 x 8″	7 x 9 x 2″	3.39
SF-502	8 x 14 x 8″	7 x 13 x 2″	3.75

PAR-METAL RACKS · CHASSIS · CABINETS *for* ELECTRONIC APPARATUS

TYPE "C" RACK PANELS - 19" WIDE

Unless otherwise indicated, these panels are made from 1/8" thick steel and are uniformly slotted to fit type "C" cabinet racks and all type "A" racks. They will also fit any other rack equipment having multiple 1 1/4" - 1/2" spacings or what is commonly termed as "W.E. spacing." They may be obtained in either black ripple enamel or slate grey ripple enamel.

BLANK PANELS 1/8" STEEL

These panels are made from 1/8" thick steel and are uniformly slotted to fit type "C" cabinet racks made for 19" panels, and all type "A" racks. They will also fit any other rack equipment having multiple 1 1/4"x1/2" spacings or what is commonly termed as "W.E. spacing." They may be obtained in either black ripple enamel or slate grey ripple enamel.

PAR-METAL RACKS · CHASSIS · CABINETS for ELECTRONIC APPARATUS

BLANK STEEL CHASSIS BASES

STANDARD TYPE

Construction is the same as our heavy-duty chassis. Stamped from one piece of cold rolled steel, and have four solid sides with welded corners. Bottom edges are flanged in on four sides to provide additional reinforcement, and they are drilled for bottom plates. The chassis are made from #20 gauge steel, except those marked (*) which are stamped from $\frac{1}{16}$" steel exactly like our heavy-duty type.

MIDDLETOWN MANUFACTURING CO.

METAL PRODUCTS — ELECTRONIC DIVISION

CABINETS • CHASSIS • CASES • PANELS

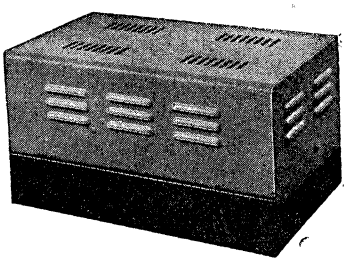
AMPLIFIER FOUNDATIONS—DeLuxe Models

This unit is designed to meet the most critical requirements. It has rounded corners, special Middletown designed louvres on all 4 sides and elongated holes on top to give maximum ventilation. Chassis are finished in Black wrnkle. Covers are finished in Grey wrinkle. Chassis are drilled for bottom plates which are listed separately Covers all have a depth of 6".



Cat. No.	Size	List Price
A.F.-5103	5 x 10 x 3"	$3.70
A.F.-6143	6 x 14 x 3"	4.15
A.F.-7173	7 x 17 x 3"	5.15
A.F.-10123	10 x 12 x 3"	5.35

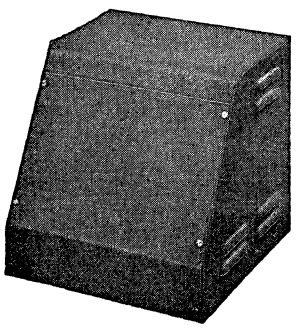
A.F.-13173	13 x 17 x 3"	7.35

SLOPING FRONT PANEL CABINETS



Sloping front panel cabinets have a wide application in the electronic field snce they are adaptable for various uses. They are constructed of heavy gauge steel electrically spot-welded. Top corner is rounded, front panel is removable, and louvres on sides provide ventilation.

Back panel is ventilated on top and an opening is provided on the bottom so that connections can be made directly to the rear of the chassis. Finished in Grey wrinkle.

Cat.No.	H.W.D.	Chassis Size	List Price
S.F.-888	8 x 8 x 8"	7 x 7 x 2"	$5.00

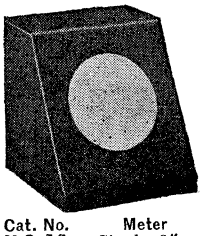
R.P. 21	21"	17 lbs.	4.55

When Ordering Specify Black or Grey.

METER PANELS

Middletown Meter Panels are made 5¼" high and are made to the same specifications as our Rack Panels — are available to fit 3" meters.

Cat. No.	Holes	Hole Size	List
R.P.M. 33	3	2 3/16"	$2.00
R.P.M. 35	5	2 5/16"	2.75

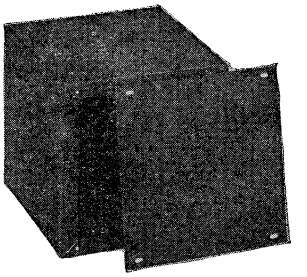


METER CASES

These cases have sloping front panel with rounded top corner which blends with streamline equipment. They are sturdily constructed from sheet steel with welded joints.

Cat. No.	Meter	Hole Size	H.W.D.	List Price
M.C. 13	Single 3"	2 13/16"	4½ x 4 x 4	$1.70
M.C. 33	3-3" Meters	2 13/16"	4½ x 11¼ x 4	4.00

STEEL CASES — STANDARD



These cases are similar to our standard steel utility cans except they have flat tops and bottoms which are held in place with self tapping screws and are removable. These cases are of sturdy construction and have spot welded corners. Case has flanges on all edges. Furnished in black wrinkle.

Cat. No.	Size	Weight	List Price

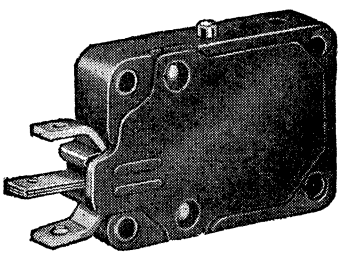
RADIO'S MASTER

Acro Snap SWITCHES

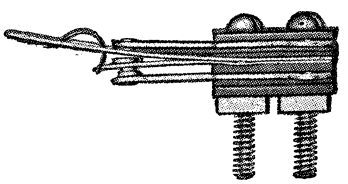
FOR PRECISION CONTROL

ACRO ELECTRIC COMPANY • 1436 SUPERIOR AVENUE • CLEVELAND 14, OHIO



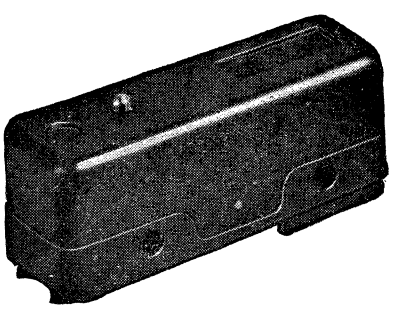
ACRO MODEL "M" SNAP ACTION SWITCH

Built with the patented Beryllium Rolling Spring. New, stronger molded case with four 3/32" mounting holes. Sturdier barriers between terminals, affording generous electrical clearances. Heavier solder terminals with .082" terminal holes for easier wiring. Greater compactness for multiple assemblies—four can be mounted in a space of less than 1⅛". Size: 17/64" thick, 1-13/64" long and 53/64" high. Made with single pole, single or double throw contacts. Rated at 10 amps. 125 volts A.C. May be fitted with leaf actuators.

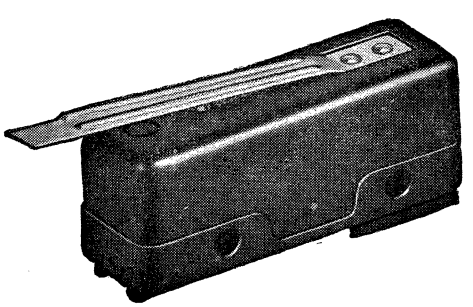


MIDGET SINGLE POLE OPEN BLADE

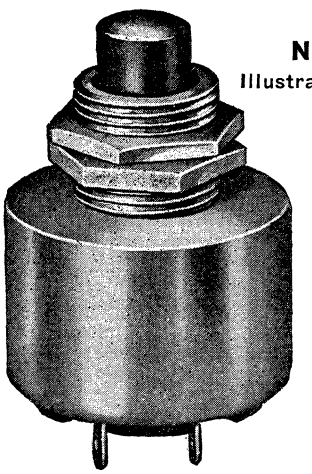
Designed for compactness and long life. Operating pressure 3 to 6 ounces. Overall dimensions 2-1/32" x 3/8" x 23/64". Normally open, normally closed and double throw circuits. Rated at 10 amps. 125 volts A.C.



Pin Plunger Type 1A Actuator



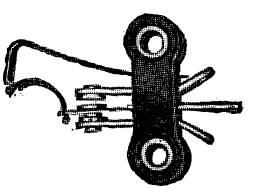
5L Leaf Actuator



NUT TYPE SWITCH

Illustration 1½ Times Actual Size

A new push-button type switch with a double break shorting bar feature for panel mounting applications. $\frac{29}{32}$" diam. Cadmium plated brass case with a sturdy threaded sleeve $\frac{15}{32}$-32. Normally open and normally closed circuits. Rating is 15 amps. at 125 volts A.C.



OPEN BLADE MODEL "M"

This ACRO switch fills the need for a compact, low priced, sturdy switch for vertical mounting singly or in multiples. Operation pressure 6 to 10 ounces. Dimensions 1-13/32" x 1-1/64" x 5/16". Normally open, normally closed and double throw. Rated at 10 amps. 125 volts A.C.

These three standard enclosed snap-action Acro switches operate on the rolling spring principle giving instantaneous make and break. Features of this switch are: Frictionless operation, long life, low operating pressure, high contact pressure, small size, unaffected by ordinary vibration, easy installation. Weighs less than one ounce, plastic case drilled for two 6/32 screws Comes with a variety of actuators, actuation pressures, gaps, overtravel, movement differential, to meet various applications. Normally open, normally closed or double throw. Rated 125 v. 10 amps. A.C.

Size: $1\frac{15}{16}$" x $\frac{11}{16}$" x $\frac{27}{32}$"

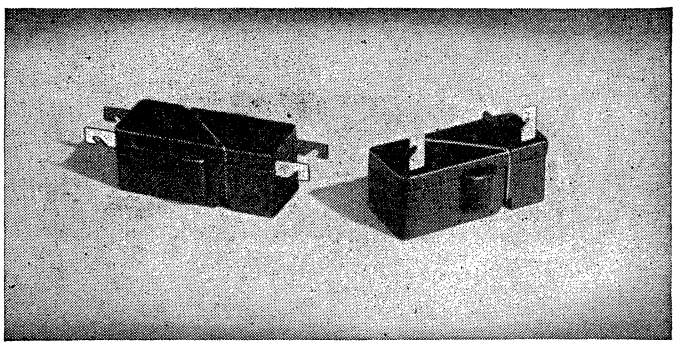
SMALL SWITCHES, LIMIT SWITCHES, AND MAGNETIC RELAYS

SMALL SNAP-ACTION SWITCH, G-E SWITCHETTE CR1070-C103

This new, lightweight switch mechanism lends itself especially to applications where space is limited and long life is required.

The Switchette is operated by movement of the spring-return button located in the housing. This button can be actuated by a lever, bellows, or other means. Snap-action, double-break-contact construction gives the G-E Switchette a high current rating and makes it suitable for applications where the vibration is severe.



Switchettes having two terminal arrangements

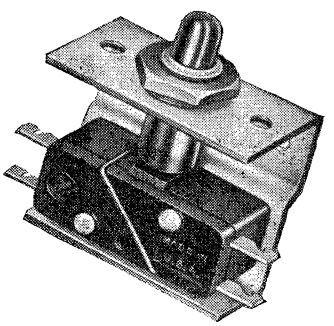
FEATURES AND ADVANTAGES

1. Small (approximately 1¼ in. by ½ in. by ½ in.) and weighs only 9 grams (0.02 lb).
2. Resists vibration and corrosion.
3. Phenolic-resin operating button provides safety from live parts during operation.
4. Contact tips are 99.95 per cent pure silver.
5. Particularly suited to electronic applications because of negligible amount of contact bounce.
6. Two terminal arrangements are available, as shown above.
7. Wide variety of forms available, for example, three basic contact arrangements: single-circuit, normally open; single-circuit, normally closed; and two-circuit, normally open and normally closed. Also many special forms.

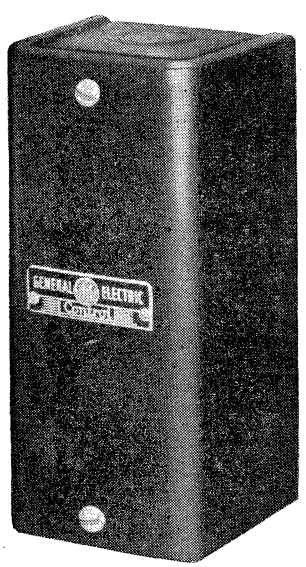
Switchettes are available in ratings up to 10 amperes at 115 or 230 volts a-c. Write for Bulletin GEA-3818.

LIMIT SWITCH, CR1070-D101

This sturdy, open-type limit switch is operated by a plunger which provides $\frac{7}{32}$-inch overtravel. The contact mechanism of this device is the G-E Switchette, which can be wired to control one normally open circuit and one normally closed circuit. Rated 10 amperes at 230 volts a-c. Write for Bulletin GEA—3821.



Open-type limit switch with push-rod operation



Enclosed magnetic relay

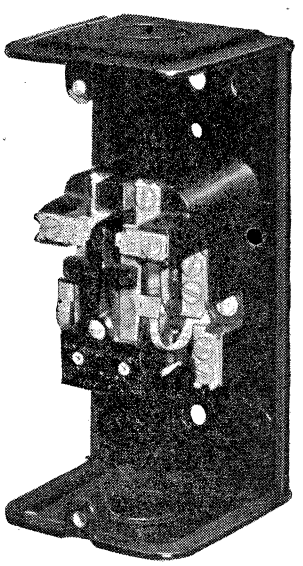
MAGNETIC RELAY, CR2790-E

The CR2790 relay is a compact, attractively finished device for use either as a motor starter or a relaying unit. Available in either an open form or enclosed in a general-purpose housing. Three contact arrangements available: single-pole, single-throw; double-pole single-throw; and double-pole, double-throw. In the open form, all three contact arrangements use the same base, which facilitates mounting. In the enclosed form, the U-shaped cover makes wiring and servicing convenient. Rated 10 amp. continuous, 110/120 volts a-c.

Applications

Control of pilot circuits in response to remote control switch or thermostat, or for direct control of small motors.

As a fractional-horsepower motor starter, or in conjunction with a magnetic switch controlling larger motors, heating or lighting circuits, and signal systems.



Enclosed relay with cover removed

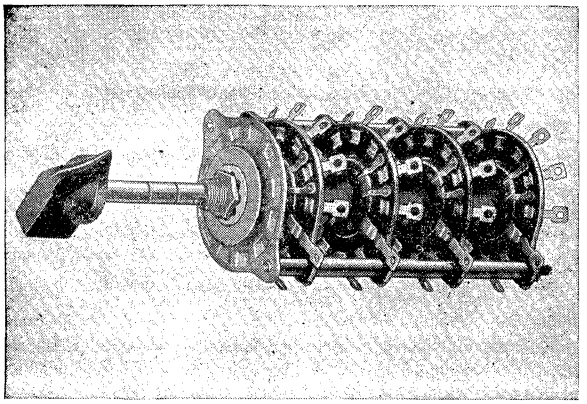
MALLORY CIRCUIT SELECTOR SWITCHES



1200L · 1300L MULTI-GANG SWITCHES

● All contacting members of the 1200L and 1300L series of switches are silver plated except rotor contact slugs, which are solid silver. This insures low contact resistance. The high lift of the contact springs provides a wiping and self-cleaning action.

A new and improved index spring gives long-life operation. The adjustable stop feature permits extreme flexibility . . . a wider variety of circuit combinations. All switches supplied with ⅜-inch diameter ⅜-inch long brass bushing, and 2-inch long shaft—grooved for easy cutting at popular lengths.

Three- and four-gang switches have one-inch spacing between sections, all others one-half inch. If necessary, these switches can be disassembled, the spacers cut down to meet the requirements as to length of the switch and the spacing of the sections.

(Prices include Mallory No. 366 Knob, one No. 232 Nut and one No. 227 Lockwasher, but do not include Dial Plates. See page 32 for special Dial Plates.)

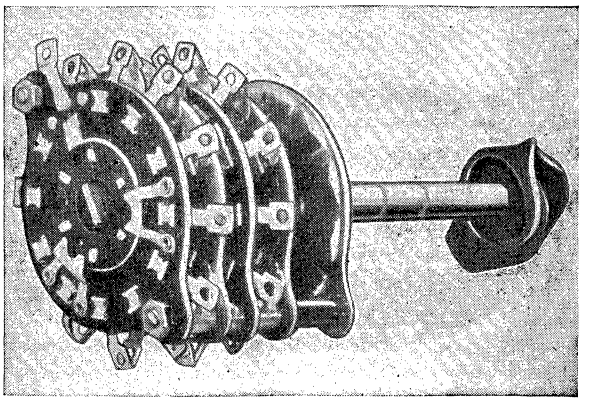
*These switches are provided with an "off" position which is in addition to the number of positions listed in third column.



1400L CIRCUIT OPENING SWITCH

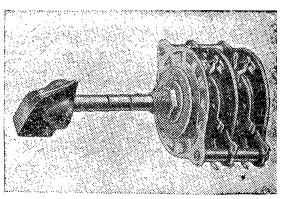
● Mallory No. 1400L Switch will "open" any one of twelv "lines" for the insertion of a current reading meter an maintain a "through" circuit on the other eleven lines. Thi switch has found wide application in the construction o test sets, tube checkers, analyzers, and other apparatu where it is desirable to use only one meter.

Multiplying resistors can be wired to the switch, so tha the switch not only opens the line but also automatically cuts in the proper multiplying resistor.

Special Circuit Opening Switch complete with Mallor Bar Type Knob No. 366, one No. 232 Nut, one No. 22 Lockwasher, and Mallory Etched Dial Plate No. 382—

No. 1400L. List Price..... $5.9

13124L 24-POINT TAP SWITCH

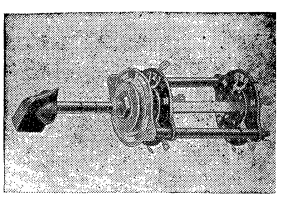


● A special single circuit, 24-point non-shorting switch witl ⅜" bushing and 2" grooved shaft, particularly useful in tes equipment applications. No stops—switch is capable of con tinuous rotation.

Complete with Mallory Bar Type Knob No. 366, one No 232 Nut, one No. 227 Lockwasher, and Mallory Dial Plat No. 394—

No. 13124L. List Price..... $3.5

151L "HAMSWITCH"



● Provides a method of using a single meter to measur currents or voltages up to and including five circuits of a Amateur Transmitter. High insulating qualities and low los construction permit a conservative rating of 1000 volts RM AC or 1500 volts DC.

Two-gang construction with 2¼" spacing between section permitting multiplying resistors to be soldered directly t switch terminals. Has 2-inch grooved shaft, ⅜" bushing one each No. 366 Knob, No. 232 Nut and No. 227 Lock washer.

"Hamswitch" **No. 151L.** List Price..... $2.7

Dial Plate for above, numbered 1 to 5, with markings spaced 60°. **No. 487.** List Price..... $0.2

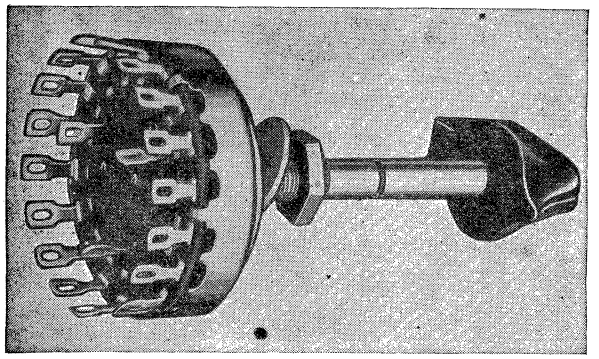
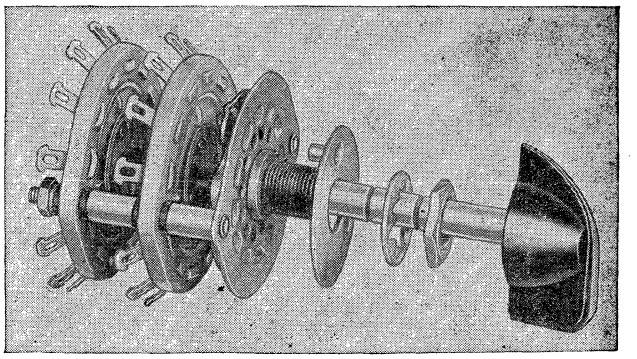
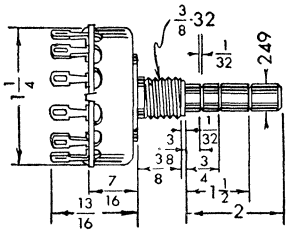
MALLORY CIRCUIT SELECTOR SWITCHES





3100J · 3200J SINGLE GANG SWITCHES



3100J-3200J SERIES
1-1/4 Inch Base

● Compact, enclosed, low-voltage switches, ideally suited for radio frequency, tone control, antennae switching, intercommunication, test equipment and many other electronic devices where space is at a premium.

Available in single section only, and in two sizes—1¼-inch and 1 11/16-inch diameter base. The circuit combinations shown below indicate respective sizes. All combinations made in both shorting and positive non-shorting action. Adjustable stop feature is available only in the 1 11/16-inch base.

All 3100J-3200J series are equipped with universal shaft, 2 inches long and grooved to provide easy cutting at popular lengths.

(Prices include one Mallory No. 366 Knob, one No. 232 Nut, and one No. 227 Lockwasher, but no Dial Plate. See page 32 for special Dial Plates.)

UNIVERSAL MOUNTING BRACKET RB254

● For baseboard or rear support mounting of all Mallory circuit selector switches, volume controls and jacks. Universal Mounting Bracket No. RB254 packed five to the carton.

List price each.....$0.25

170C CERAMIC SECTION SELECTOR SWITCHES

● These are new Mallory circuit selector switches, especially useful in high frequency circuits where the ceramic insulation minimizes RF losses as well as moisture absorption. An adjustable stop permits choice of from two to eleven positions and may be adjusted without removing switches completely from the panel. Features are heavily impregnated ceramic stators and rotors, heavy silver plating on all current carrying parts, low-resistance self-cleaning contacts and, in addition, a special silver-indium surface treatment of rotor segments, providing low torque, long life, and low contact resistance over an extended temperature range.

The new series is finding widespread use in laboratories, by manufacturers of transmitters, receivers, test equipment and other electronic apparatus, by experimenters, and radio amateurs. Prices include 2-inch grooved shaft and one each No. 366 Knob, No. 232 Nut and No. 227 Washer.

"HAMSWITCH" No. 152L

● The 152L Switch is a two-gang unit, carrying two circuits through six positions, similar to 1326L, but with 330° shorting shoes which automatically connect together and short all unused terminals. Supplied with ⅜" bushing, 2" grooved shaft, one each No. 366 Knob, No. 232 Nut, and No. 227 Lockwasher.

"Hamswitch" No. 152L. List Price.....$3.25

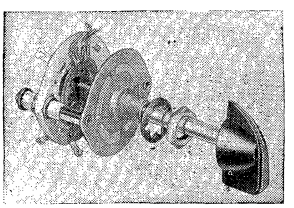
160C CERAMIC SECTION "HAMBAND" SWITCHES



● For transmitter band switching.

HamBand Switches are rated for use in transmitter plate circuits using up to 1000 Volts DC with power up to 100 watts inclusive.

Impregnated magnesium silicate ceramic provides low losses at high frequencies. No stops; switch shaft is capable of continuous rotation. 90° indexing. Technical data sheet. Form Y-646 available on request. Prices include 2″ grooved shaft, ⅜″ bushing and one each 366 Knob, No. 232 Nut and No. 227 Lockwasher.

2000 PUSH-BUTTON SWITCHES (SINGLE)

● Eight different circuit combinations permit a wide variety of applications for Mallory 2000 Series Push-Button Switches. They are especially adapted for use in laboratories, on test panels, in meter circuits and other equipment where permanent or momentary contact is desired.

Each circuit combination of this Mallory switch is available in either a locking or a non-locking type. Locking types keep the circuit closed until the button is pulled out. Non-locking types maintain contact only while the button is depressed. Special construction features provide improved electrical characteristics and assure long operating life. The switch frame and bushing are nickel-plated brass. Low-resistance contacts are silver. Contact springs are nickel-plated phosphor bronze.

Furnished with polished black Bakelite Knob, one each No. 232 Nut, No. 225 Washer and Set Screw. Mounts in single hole 7/16″ diameter on panels up to ¼″ thick.

JACK SWITCHES STANDARD AND JUNIOR TYPES

● Quality construction throughout; frame, bushing and other parts are nickel-plated brass; contacts are fine silver; springs are nickel-plated phosphor bronze.

Mallory Jack Switches and Junior Jack Switches are furnished complete with Black Knob and one each No. 232 Nut and No. 225 Washer. Mount in a single hole, 7/16" diameter, on panels up to 1/4" thick.

Circuit Arrangement	Two Position

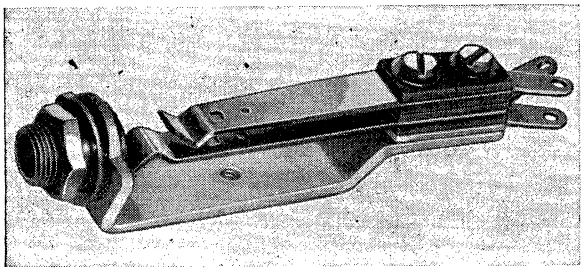
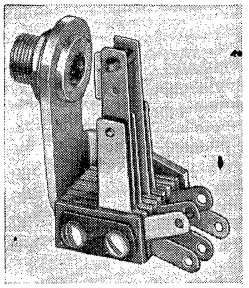
MALLORY LONG FRAME, JUNIOR, MIDGET, TYPE XP JACKS

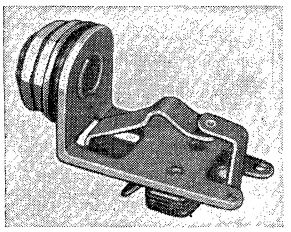


JACKS LONG FRAME, JUNIOR AND MIDGET TYPES

● All Mallory Jacks—long frame, junior and midget—mount in a single $\frac{3}{8}$-inch hole in panels up to $\frac{5}{16}$-inch thick. They fit all standard Mallory plugs of two and three-conductor types as shown at right. Nickel-plated phosphor bronze, specially selected for its spring qualities, gives uniform tension and wiping action of contacts in all spring assemblies. Contacts between springs are fine silver, giving minimum contact resistance. All frames and bushings are nickel-plated brass. Junior Jacks are small and compact; extend only $1\frac{5}{16}$-inch back of panel.

Spring combinations are illustrated below. All Long Frame, Junior and A1 (Infant) Jacks are supplied with one each No. 232 Nut and No. 225 Washer. All Midget Jacks have two No. 232 Nuts and one No. 225 Washer.





Above — Midget Jack
At Left — Junior Jack

	Long Frame		Junior Jacks		Infant and Midget

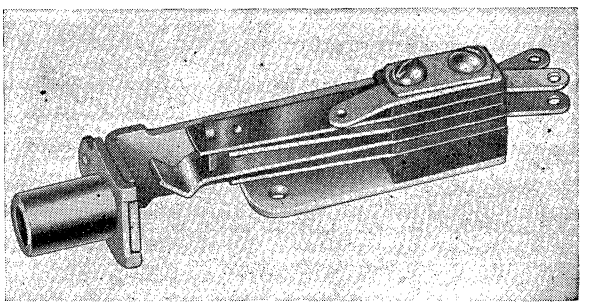
*Commonly referred to as "Infant" Jack.



JACKS TYPE XP LONG FRAME

● Type XP Jacks are similar to the Long Frame types listed at left, except for plain bushing and special dust protector frame construction commonly used in telephone and industrial applications. Type XP's have nickel-plated phosphor bronze springs, fine silver contacts, nickel-plated brass frame, bushing and mounting plate. Fit the standard Mallory phone plugs.

LEVER ACTION SWITCHES

A line of lever action switches with spring return index is also being designed. Time did not permit their listing in this catalog. Full details will be sent on request.

● Mallory Series 5000 Lever Action Switches are suited to a wide range of industrial and test equipment applications, but are particularly adapted to intercommunication, centralized radio, sound distribution and public address equipment. They are available in six different circuit combinations, all with positive indexing, with either shorting or non-shorting contacts.

Indexing is two, three or four positions with 20° between positions. Dimension between mounting hole centers on bracket is 1⅝ inches. Switches may be mounted singly or grouped in multiple mounting with ¾-inch spacing between levers on conventional rack and panel installations. Standard push-button type knob, two 6-32 bolts and nuts are included.

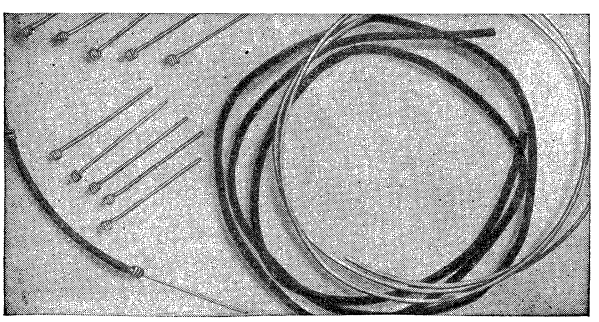
4	3	**6143**	**6243**	**1.15**



YO YARD-OHM RESISTANCE KITS

● Each Yard-Ohm Resistance Kit consists of an envelope containing all necessary materials to construct flexible resistors of a wide range of values. The Yard-Ohm Kit provides a real solution to the odd-value resistor problem. In addition to replacement applications, resistors made from the Yard-Ohm Kit are ideal for meter shunts, and for use wherever a high quality flexible resistor is desired.

Each Mallory Yard-Ohm Kit consists of an envelope containing the following:

1 yard spiral wound resistance wire
1 yard insulated braid
24 spiral wire leads
The kit is available in eight resistance values
Dissipation—all types: ½ watt per inch.

Catalog Number	Resistance Value (Ohms per Inch)	Carrying Capacity in amperes	List Price
YO-1	1	.707	**$0.75**
YO-5	5	.315	**.75**
YO-10	10	.223	**.75**
YO-25	25	.141	**.75**

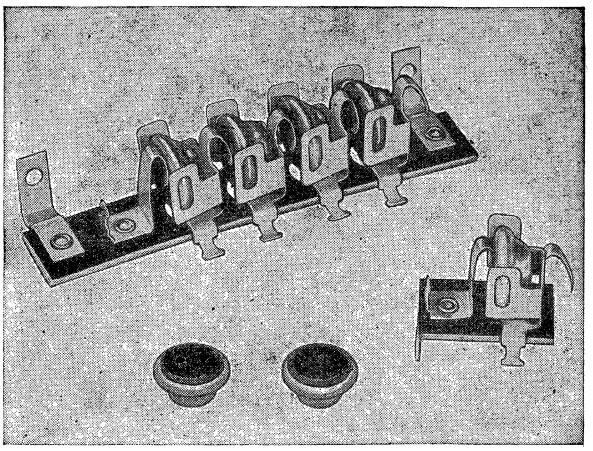
YO-250	250	.044	**.75**
YO-500	500	.031	**.75**



GRID BIAS CELLS

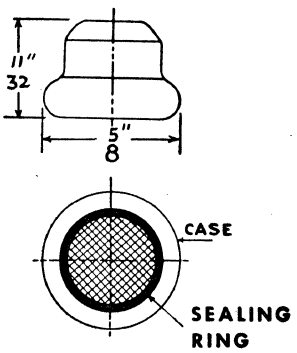
● The Mallory Grid Bias Cell is a small acorn-shaped, self-contained device. The metal container or cup is the negative electrode. The black disc is the positive electrode. Available in two types—the original 1-volt cells and the new 1¼-volt cells. For new installations, the choice of Bias Cell types will depend on the voltage deisred. Replacements should be made with the type of Bias Cell used as original equipment.

The 1¼-volt Bias Cells may be distinguished from the 1-volt unit by the concave depressions in both the upper electrode and bottom of the shell case.

Application

The principal use of Mallory Grid Bias Cells is in the biasing of the first audio amplifier tube in modern high-gain receivers. Diagram of a typical circuit is shown at right. The bias cell does not need to be bypassed to ground.

Correspondence is invited regarding the application of Mallory Grid Bias Cells. Special Technical Bulletin No. B-303 may be obtained on request.

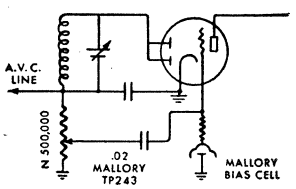


Characteristics

The no-current potential of Mallory Grid Bias Cells is within plus or minus 10% of their rated voltage.

Current—The cell is strictly a potential or voltage cell for biasing class "A" amplifier tubes and should not be used for biasing power tubes or oscillators; or for any circuit where direct current may flow through, or be drawn from, the cell.

Temperature—The cells may be used in ambient temperatures from 14° above zero to 120° F. The voltage of the cell remains reasonably constant throughout this wide temperature range. It is recommended, however, that wherever possible the bias cell be placed in the coolest location.



Humidity—The cell exhibits no change in characteristics when exposed to a relative humidity of 90% at 120° F.

Impedance—Mallory Grid Bias Cells are non-reactive at audio frequencies. For the 1-volt cell, the DC resistance ranges between 11,000 and 50,000 ohms. The DC resistance of the 1¼-volt cell ranges between 10,000 and 40,000 ohms.

Noise—The cells do not cause the development of any noise.

Description	Cat. No.	List Price

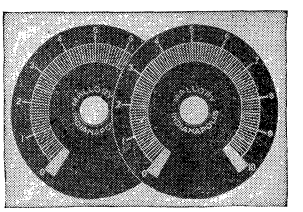
SOLDERING IRON TIPS

No. 311—Replacement tip for soldering irons that are turned on for short periods only. Heats quicker than No. 312, but is not as long wearing. Made of a special Mallory copper alloy long in use as a welding tip material. Nickel plated to resist corrosion. Size—⅜" diameter, 4" length. Plunger style with "screw driver" point. List price each..... **$0.70**

No. 312—Replacement tip for soldering irons that are used continuously for long periods of time. Made of a special Mallory copper alloy of great hardness and high electrical conductivity. Nickel plated to resist corrosion. Size—⅜" diameter, 4" length. Plunger style, with "screw driver" point . . . List price each..... **$0.80**

DIAL PLATES

For Mallory Circuit Selector, Tap and All-Wave Switches. (Plates to match rotation of Mallory Variable Resistors on page 20.)



Neat-appearing Dial Plates with easy-to-read aluminum figures clearly etched on solid black background. Dimensions are 1 13/16" in diameter with 7/16" hole, with figures 7/64" high. .020" aluminum stock.

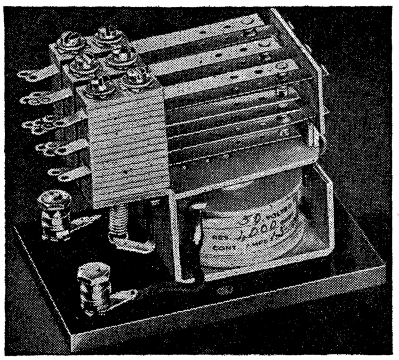
Advance RELAYS

GENERAL CIRCUIT CONTROL RELAYS
Alternating and Direct Current

These sturdy, compact General Circuit Controls are available for operation on both alternating and direct current — Series 100 and 200 respectively—and incorporate many superior construction features not usually found in economically priced lines. "Full Floating" armature suspension, "wiping" contacts, and more than adequate insulation are but a few of their highly desirable qualities.

The switch stacks, composed of die-cut, spring phosphor-bronze blades, Bakelite spacers, and hard rubber sleeving, have a break-down test of 2500 volts, and will give a lifetime of service.



Dimensions—3¼" x 2¼"

Each unit, mounted on a Bakelite base and equipped with binding posts for the coil connections, is entirely "above ground" and all current carrying screws and terminals are fully countersunk to prevent any possibility of "short-circuiting."

PRICE CHART—For Series 100 (A.C.) and Series 200 (D.C.) Relays

The above chart, listing A.C. Relays, may also be used when ordering D.C. Relays by Changing the Series Number from 100 to 200. To avoid possible errors, always specify the correct A.C. or D.C. input voltage. The Series 100 Coils are obtainable for any voltage from 1 to 115 A.C.—Series 200 Coils for any Voltage from 2 to 60 D.C. Prices for other voltages will be furnished on request.

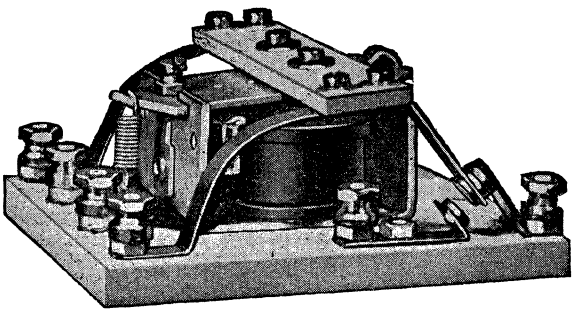
Advance RELAYS

TRANSMITTER RELAYS

Isolantite model Antenna Change-Over. Designed for use in Amateur Transmitters.

The contact system is Double Pole-Double Throw, using ¼" Pure Silver contacts, with exceptional wiping action. Three and four pole arrangements are available on special order.

For high radio frequency control. Entirely hum-free where intended for A.C. operation, and highly efficient on D.C. supplies. All metallic parts are cadmium and chromium plated.

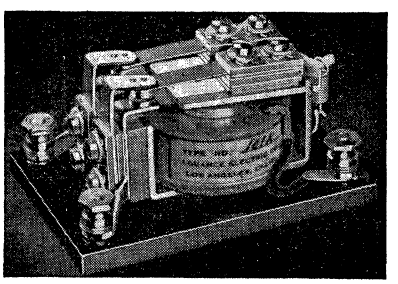


Type 400

Standard coils are for 110V A.C. and may also be used for 24V D.C. However, they will also be supplied for lower A.C. or D.C. voltages at no increase in price.

List Price **$9.90**

KEYING RELAYS



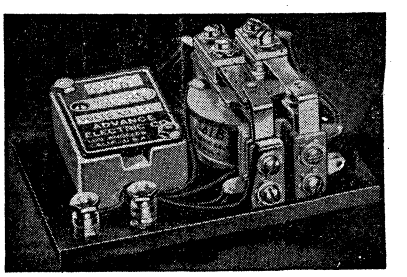
Type 101K—A.C.
Type 201K—D.C.

Designed expressly for use in Keying Circuits where it is desired to use low voltage across the key to control high voltage transmission through the Relay contacts. The heavy duty coil and strong return spring makes possible an exceptional keying speed. Two sets of ¼" Pure Silver contacts in series allow a carrying capacity of 2500 volts. The complete unit, mounted on a 3/16" Bakelite base with binding posts for coil connections, has over-all dimensions of 3" x 2" x 1⅜" and is obtainable for A.C. operation to 115 volts or D.C. operation to 60 volts.

List Price **$5.50**

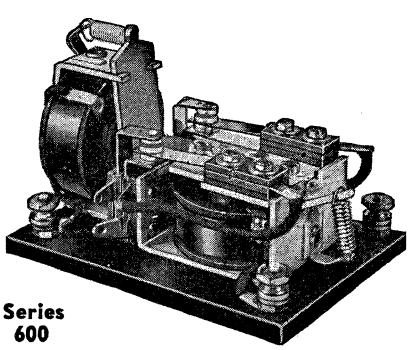
TIME DELAY RELAYS

Type 300—N.O.
Type 350—N.C.



Particularly suited for use where short time delays (10 sec. to 1 min.) are required, these Relays are available with both normally open and normally closed thermostats. Types 300 and 350 respectively, the former being widely used for pre-heating tube filaments, etc. The contact combination on both models is Double Pole Single Throw with ¼" Pure Silver contacts. Mounted on 3/16" Bakelite bases measuring 3¾" x 2⅜" x 1½" with binding posts for coil connections. Standard operating voltage is 110 A.C. ..... **List Price $8.25**

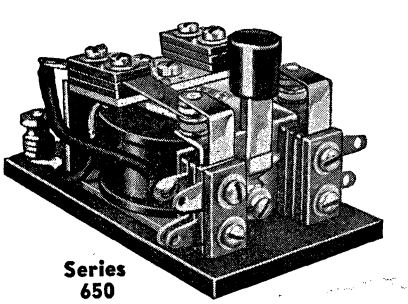
Low voltage units are available on special order.



Series 600

LATCHING RELAYS

These Relays are highly desirable for applications where it is impractical to have the holding coil in constant service. When the coil actuating the contact arrangement is momentarily energized, the armature is locked in the closed position, and may be released electrically (Type 600) or manually (Type 650).



Series 650

	List			List
Type 604B	$9.60	Double Pole-Double Throw	Type 654B	$7.15
Type 605B	9.35	Double Pole-Single Throw (N. O.)	Type 655B	6.85
Type 606B	9.35	Double Pole-Single Throw (N. C.)	Type 656B	6.85

The above list prices are for ¼" contacts. For 3/16" points deduct 25c—for ⅛" points deduct 50c. When ordering these types SPECIFY THE VOLTAGE.

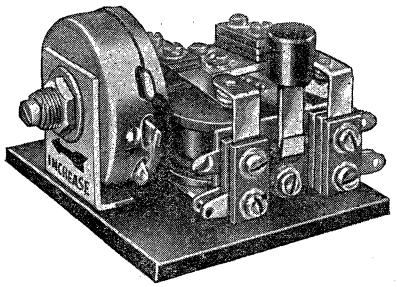
Advance RELAYS

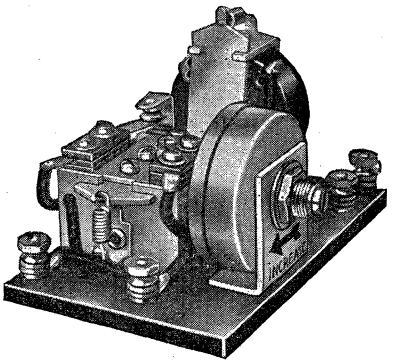


Type 700

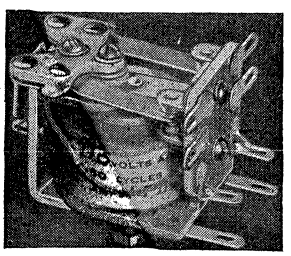
OVERLOAD RELAYS

These Relays are designed to provide accurate and positive protection against current surges and continuous overloads, and both the Manual Reset (Type 700) and Electrical Reset (Type 750) are divided into two classifications: Type "A" allows the Relay to attract on any current value between 250 and 500 mills, and Type "B" for any setting between 500 mills and 1 ampere. When the current flow passes the safety setting, the Double Pole-Single Throw ¼" Pure Silver contacts are opened, breaking the power supply circuit until reset.

	List Price
Type 700—Base dimensions 3" x 2½"	$10.15
Type 750—Base dimensions 4" x 2½"	13.20



Type 750



Series K1500 and K1600

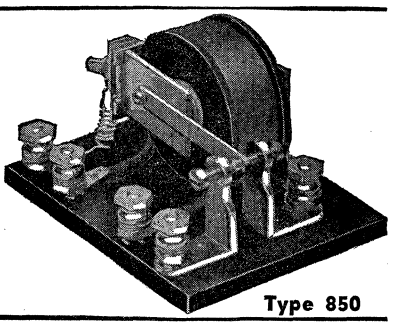
MIDGET RELAY

Of particular interest where size and cost are factors, this new series of Midget Relays, of improved design, incorporates all of the fine construction features typical of the ADVANCE line. This unit measures only 1½" x ¾" x 1⅛" high. Pure Silver contacts are used, ⅛" in diameter. Standard coils are obtainable from 2 to 32 V D.C. and 1 to 115 V A.C. The following switch combinations can be supplied:

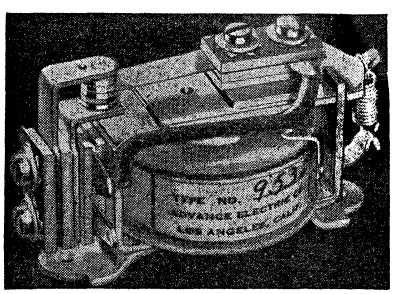
TYPE A.C.	TYPE D.C.	CONTACT COMBINATION	LIST PRICES
K1505	K1605	DP-ST NOR. OPEN	$3.25
K1506	K1606	DP-ST NOR. CLOSED	3.25
K1504	K1604	DP-DT	3.50

ELECTRONIC RELAY

An ultra-sensitive unit for use in electronic tube circuits, providing positive, dependable control on as little as 12 milliwatts. Adjustment screws to change the air-gap between the armature and the pole face, allow operation on a voltage differential of 30%, a condition ideal for electronic applications. The contact combination is Single Pole-Double Throw, employing ⅛" Pure Silver points to safely handle 100 watt non-inductive loads. Obtainable in resistances of 2500, 3000, 5000 and 10,000 ohms at no increase in price.....List Price....$7.15



Type 850



GENERAL PURPOSE RELAYS

Types 951B — 952B — 953B

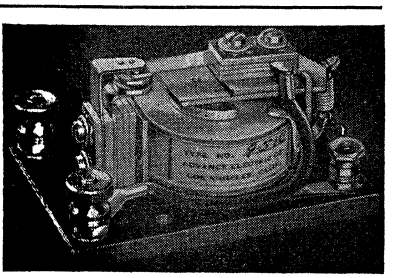
These Relays afford maximum power and efficiency at very low cost. ¼" Pure Silver contacts are standard on the Single Pole-Single Throw (N. O.) Type 951B—Single Pole-Single Throw (N. C.)—952B—and Single Pole- Double Throw—953B—switch combinations. Adequately insulated and entirely above "ground," these Relays may be mounted on any type of panel, quickly and easily, by means of the metal mounting bracket. Coils are obtainable to 115V A. C. or 60V D. C.

List Price $3.85

GEN-E-MOTOR STARTING RELAY

Type 951C

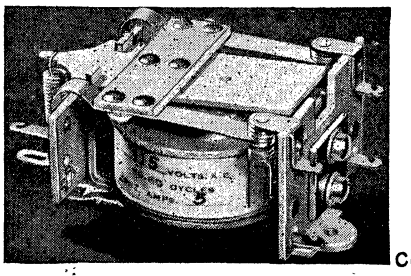
An exceptionally sturdy power transfer Relay, easily capable of handling the heavy current surge encountered on "cold" starts in motor-generator systems. The contacts are ⅜" Pure Silver and have ample carrying capacity for the usual 200-500V converters. Heavy-duty in every phase of construction, this unit is not to be compared with the common five and ten ampere circuit controls. Base dimensions are 3" x 2" and each unit is complete with a braided generator-cable pig-tail and binding posts for all connections. Coils for 5½ to 32V D. C. or 1 to 115 A. C. .....List Price....$6.60



Copyright by U. C. P., Inc.

Advance RELAYS

MIDGET TYPE CIRCUIT CONTROLS

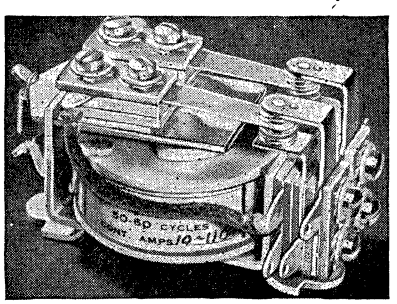


These Relays are designed for general circuit control applications where the space for mounting is limited, and measure only 2½" in length, 1½" in width, and 1¼" in height. A.C. operated Relays in this series require but 4 watts on 50/60 cycle current, and the D. C. models from 1..5 to 2 watts, affording maximum efficiency without sacrifice of power and dependability. Metal brackets (not shown in the illustration) are supplied with all Relays of this type, and except on special order, these models are limited to the following contact arrangements and the usual standard operating voltages:

Contact Combinations	Type Numbers 3/16"	List	1/4"	List
Double Pole-Double Throw	104AM	$5.50	104BM	$6.05
Double Pole-Single Throw (N. O.)	105AM	5.20	105BM	5.75
Double Pole-Single Throw (N. C.)	106AM	5.20	106BM	5.75

The above chart lists type numbers for A.C. operated Relays. D. C. coils may be obtained by changing the series number from 100 to 200. Prices apply to both.

INDUSTRIAL CONTROL RELAYS

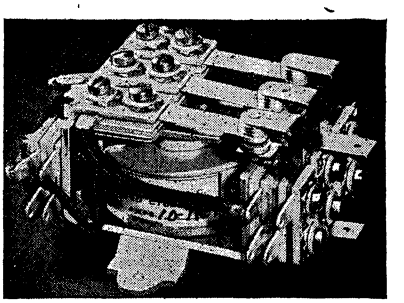


Series 960

Designed mainly for industrial applications — air conditioning, lighting, and power transfer systems, the Series 960 Relays embody all of the rugged construction features demanded in units of this type without sacrificing the desirable qualities of the midget style. Available in the following contact combinations, and to operate on standard A. C. and D. C. voltages.

	List
Type 964B—Double Pole-Double Throw	$5.50
Type 965B—Double Pole-Single Throw (N. O.)	5.20
Type 966B—Double Pole-Single Throw (N. C.)	5.20

For smaller contacts, deduct 25c for 3/16" or 50c for ⅛" points, from the above list prices.



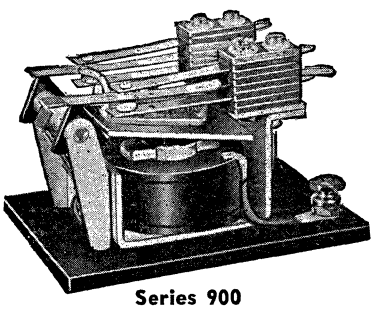
Series 970

Having the same characteristics as the Series 960 Relays, these Three Pole units, Series 970, may be used for fractional h/p 3-phase motor controls, etc. The area required for mounting 2⅝" x 1⅞" for Type 970 Relays, as against 2½" x 1¼" for the Type 960's, is due to the slightly larger frame. The metal brackets are the same in both instances—2-5/16" long, and 2" between centers of the 6/32 mounting holes. Available in the voltages indicated in the preceding series, and in the following contact combinations:

	List
Type 977B—Three Pole-Single Throw (N. O.)	$5.75
Type 978B—Three Pole-Single Throw (N. C.)	5.75
Type 979B—Three Pole-Double Throw	6.60

For smaller contacts, deduct 50c for 3/16" or 75c for ⅛" points from the above list prices.

IMPULSE RELAYS



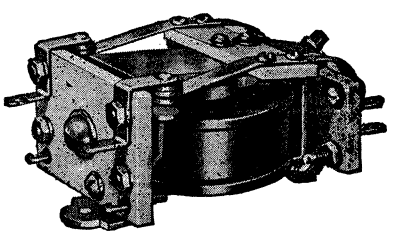
Series 900

This is another type of Relay for use where it is not feasible to have the holding coil in constant service, but differs from the latching types in that it may be controlled with a single push-button. Coils to operate this type of unit are extremely heavy-duty, and are for intermittent (impulse) use only. Available for standard A. C. and D. C. voltages in the following combinations:

	D.P.S.T. List	D.P.D.T. List
With ⅛" Pure Silver contacts	$9.35	$9.90
With 3/16" Pure Silver contacts	9.90	10.45
With ¼" Pure Silver contacts	10.45	11.55

When ordering these type, be sure to specify the input voltage, contact combination, and size of points.

MIDGET TYPE R.F. RELAYS



Series 1000—A.C. Series 2000—D.C.

These models are sturdy, compact Double Pole - Double Throw Transmitter Relays, designed expressly for use in all types of mobile-portable communications equipment where space is at a premium. The insulation on this, as on the Type 400's, is Isolantite for both the cross-arm and end pieces, with all holes adequately well spaced to prevent structural weakness and possible "creepage." Coils are obtainable for all A. C. and D. C. voltages, and will operate in any position, the former consuming approximately four watts—the latter, two watts of power. Dimensions are 2¾" x 1½" x 1¼".

List Price **$8.25**

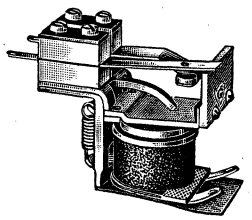
RELAYS BY GUARDIAN

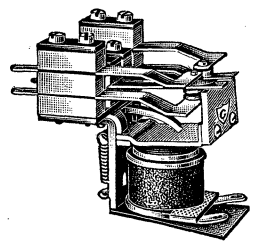
A COMPLETE LINE OF AMATEUR AND INDUSTRIAL RELAYS



SERIES R-100
H.F. RELAY

HIGH FREQUENCY RELAYS

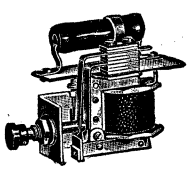
The Series R-100 and A-100 are primarily designed for high frequency applications. They are low loss AlSiMag insulated, compact, economical and sturdily constructed. For single wire fed installations, specify the A-100-C which is a single pole, double throw unit. Two A-100-C in place of one A-100 in open wire line systems will avoid possible impedance mismatch.
Radio Applications—Antenna changeover, break-in, high voltage keying, grid controlled rectifier keying, remote control of receiver and transmitter, and other high frequency applications.
Industrial Applications—Oven control, remote motor control, short wave therapy and diathermy, heating equipment.



SERIES A-100
H.F. RELAY

	Length	Width	Height	Shp. Wt. (oz.)	List Price	Net Price
A-100—D.P.D.T.	2¾"	1⅞"	2 7/16"	7	**$7.63**	**$4.58**
A-100-C—S.P.D.T.	2¾"	1⅛"	2 7/16"	6	**4.25**	**2.55**
R-100—S.P.S.T. (normally open)	2¾"	1⅛"	2⅛"	6	**3.53**	**2.12**
R-100-B—S.P.S.T. (normally closed)	2¾"	1⅛"	2 7/16"	6	**3.53**	**2.12**

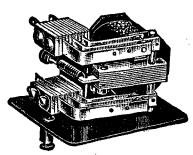
X-100 ADJUSTABLE OVERLOAD RELAYS



This relay provides low cost, accurate, dependable protection against current surges and overloads. Adjustable to operate on any current flow from 150 to 650 mils. Silver contacts rated at 1500 watts on 110 volts, 60 cycle AC, non-inductive, and in AC primary circuits of any inductive power supply up to 1 KW. Positive locking action of contacts cannot be reset or points held in contact until overload is removed.

X-100—4 1/16" long, 2 5/16" wide, 3⅛" high. Shipping Weight 12 oz.
List Price ..... **$12.85 ea.**
Net Price ..... **$ 7.71 ea.**

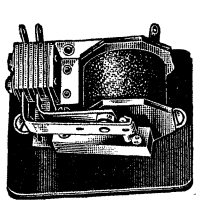
B-100 BREAK-IN RELAY



Specially designed for break-in operation on amateur transmitters. Low current drain and compact construction, plus the use of a laminated field piece and armature insuring efficient operation, make the B-100 an ideal relay for this application. Standard coil operates on 110 50-60 cycle AC. Silver contacts rated at 1500 watts, 60 cycles AC non-inductive, and in AC primary circuits of any inductive power supply delivering up to 1 KW.

B-100—2 21/32" long, 2¼" high, 2 9/32" wide. Shipping weight 11 oz.
List Price ..... **$9.60 ea.**
Net Price ..... **$5.76 ea.**

K-100 KEYING RELAYS



A low voltage relay controlling high voltage transmission, the K-100 relay will follow key or bug at highest WPM rate attainable. High speed response, plus a strong magnet and return spring, gives a clean make and break, producing the best CW note.
A standard coil operates on 1½ to 4 volts DC, 5 to 16 volts AC. Coils for other voltages and currents on specification at 10% addition to list price. Contacts—Oversize silver. Will handle 1500 watts 60 cycles and in AC primary circuits of any inductive power supply up to 1 KW.
Control capacity—up to 2000 volts with clean make or break.
Applications—Control of battery receivers, transmitters using filament center tap keying of any stage having up to 2000 volts on plate, primary keying or control of power supplies up to and including 500 watts and grid-controlled rectifier keying of 3000 volt power supplies.

K-100—2 21/32" long, 2 9/32" wide, 1 15/16" high. Shipping weight 10 oz.
List Price ..... **$7.03 ea.**
Net Price ..... **$4.22 ea.**

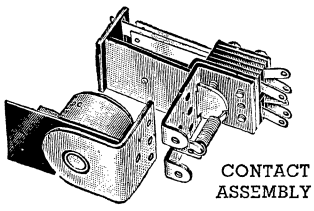
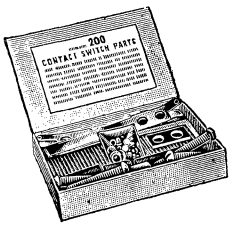
RELAYS BY GUARDIAN

A COMPLETE LINE OF AMATEUR AND INDUSTRIAL RELAYS



SERIES 200—INTERCHANGEABLE

Two basic interchangeable parts, a coil assembly and a contact assembly, are combined in a versatile universal relay. Coil assembly consists of coil and field piece. Contact assembly consists of switch blades, armature, return spring and mounting bracket. The two contact assemblies listed below can be used with any one of 9 coils to make a required relay. Contact points are rated at 8 amps, 115 V, 60 cycle AC, non-inductive load.



GUARDIAN SERIES 200-3
Contact Switch Parts Kit

Type 200-1—Relay Frame with SPDT Contact Assembly.
List Price ..... **$1.63 ea.**
Net Price ..... **$0.98 ea.**

Type 200-2—Relay Frame with DPDT Contact Assembly.
List Price ..... **$2.25 ea.**
Net Price ..... **$1.35 ea.**

AC COILS	List Price ea.	Net Price ea.
6 Volt	$2.00	$1.20
12 Volt	2.00	1.20
24 Volt	2.00	1.20
115 Volt	2.50	1.50
DC COILS

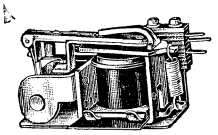
12 Volt	2.00	1.20
24 Volt	2.00	1.20
32 Volt	2.00	1.20
110 Volt	2.50	1.50

CONTACT PARTS KIT 200-3. Assortment of contact parts to make other switch combinations. May be used with SPDT or DPDT contact assemblies to make 3PST, 4PST, 4PDT combinations, etc. Either contact assembly takes any combination up to four pole double throw. Includes complete assembly and wiring information for all possible combinations. Complete with all necessary hardware. Shipping weight 4 oz.

List Price ..... **$1.63 ea.**
Net Price ..... **$0.98 ea.**

RC-100 REMOTE LOCKING CONTROL RELAY

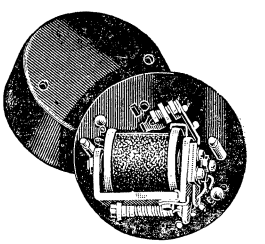


A Guardian development of the momentary impulse locking control relay. The circuit to the coil needs to be energized only long enough to close armature; contacts lock automatically. Each impulse reverses position of contacts. Standard coils operate on 115 volts, 50-60 cycles AC. Coils for other voltage and currents on specifications. Contacts, 1/4" fine silver metal rated at 1500 watts at 115 volts, 60 cycle, non-inductive. Can also be used in AC primary circuits of any inductive power supply delivering up to 1 KW. 3" long, 2 1/8" wide, 1 17/32" high.

Applications—break-in control and phone to CW switching. Any circuit control where locking circuits are used.

	Shp. Wt.	List Price	Net Price
RC-100-AR—(4PST)	8 oz.	**$6.40**	**$3.84**
RC-100-BR— (3 PDT) (SPDT) (DPST).....	8 oz.	**7.03**	4.22

U-100 AND U-200 ADJUSTABLE UNDERLOAD RELAYS



Sensitive, precise, designed and constructed for long, trouble-free service. Relays are encased in attractive black finished metal containers, protecting them from dirt, dust and maladjustment. Normal current through the coil on the U-100 is 300 amperes with an adjustable range of 100 to 200 milliamperes DC. Normal current through the coil on the U-200 is 600 milliamperes with an adjustable range of 200 to 400 milliamperes. Oversize contacts of fine silver, rated on the AC primary of any power supply delivering up to 500 watts.

Radio Application—protection of class "B" audio equipment in case of class "C" load failure.

Industrial Application—Any DC circuit where it is desirable to maintain currents above a set value.

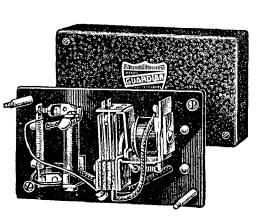
U-100 and U-200 are 3 5/16" in diameter, 2 1/4" high. Shipping weight 14 oz.

List Price ..... **$9.75 ea.**
Net Price ..... **$5.85 ea.**

T-100 AND T-110 TIME DELAY RELAYS

Standard coils operate on 115 volts, 50-60 cycles non-inductive AC. Coils available on other voltages on specification. Oversize contacts rated at 1500 watts on 115 volts, 50-60 cycles non-inductive. Can also be used in the AC primary of any inductive power supply delivering up to 1 KW. Adjustable time delay for any period between 10 and 60 seconds.

Applications—Radio. In transmitter circuits to prevent damage of rectifiers and tube filaments by application of plate current before filaments are sufficiently heated. **Industrial.** Any control problem requiring the changing of circuits after a predetermined interval.



T-100—5 1/4" long, 3" wide, 2 1/4" high. Shipping weight 1 1/4 lbs. **List Price** ....**$15.40 ea.**
Net Price ..... **$9.24 ea.**

The T-110 is a compact, sturdy, economical time delay relay for use in applications not requiring the capacities of the T-100. Contact capacty—1250 watts on 110 volt, 60 cycle non-inductive AC. Can also be used in the AC primary circuit of any inductive power supply delivering up to, and including, 1 KW.

T-110—5 5/32" long, 3 1/16" wide, 2 7/16" high. Shipping Weight 8 oz. **List Price**.....**$9.60 ea.**
Net Price ..... **$5.76 ea.**

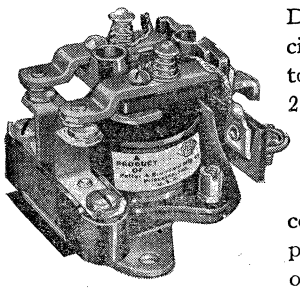
Potter & Brumfield

On these pages we list a few of the relay types we class as standard. Stocks of either completed relays or component parts are kept on hand for quick assembly, resulting in unusually prompt delivery and lower prices. From these relays a type can be selected for almost any application where the contact load does not exceed 20 amperes.

PR Series HEAVY DUTY POWER RELAYS



Designed for such power circuits as motor starting up to 1 HP., heater loads up to 20 amperes, remote break-in control of transmitters, electro plating devices, elevator controls, or any control circuit requiring fast positive switching. AC types operate on approximately 4 volt amperes. DC types require approximately 3 watts. Relay contacts on PR3A, PR3D, PR4A and PR4D rated at 20 A, non-inductive load 110V AC or 1 HP, AC. All other relay contacts rated at 15 A, non-inductive at 110V AC. Size approx. 2⅝″ x 2 9/16″ x 2¼″ high. When ordering, specify coil voltage and frequency.

Description	A.C. RELAYS 6-12-24-110-220 Volts				D.C. RELAYS 6-12-24-110 Volts

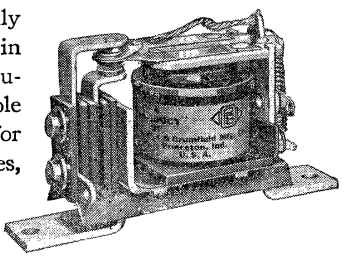
DPDT	PR11A			4.60	PR11D			4.60
	Add 60c to prices above for coils over 150 volts.				Add 60c to prices above for coils over 50 volts.			

MR Series MEDIUM DUTY POWER RELAYS



Sturdy, compact, highly efficient, for mounting in confined spaces. Particularly adapted to multiple panel mounting. Ideal for safety and signal devices, call systems, heater loads, radio protective circuits, transmitter keying circuits, burglar alarms, photographic applications, electric sign controls, etc. Available in all contact arrangements up to and including double pole double throw. AC types operate on approximately 3 volt amperes and DC types on approximately 2 watts. Contacts rated at 8 A, 110V, 60 cycles non-inductive load. Approximate size single pole units 2 15/16″ x 1½″ x 1⅝″ high. Double pole units 2¾″ x 2⅛″ x 1⅞″ high.

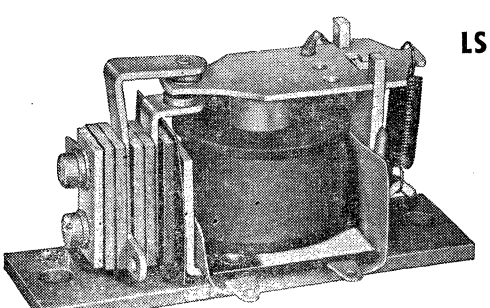
	Add 40c to prices above for coils over 150 volts.				Add 40c to prices above for coils over 55 volts.			



LS Series PLATE CIRCUIT RELAYS

Designed for application where size and cost are important. Often used in photo-electric circuits, temperature control circuits and electronic timing devices. Similar to the LM Series but less sensitive. Available in all resistances up to and including 5000 ohms. Requires .09 watt minimum actuating power.

Single pole double throw, 2500 ohm coil, net $1.68.

Single pole double throw, 5000 ohm coil, net $1.99.

Size 2⅝″ x 1⅜″ x 1⅜″ high.

When ordering, specify coil voltage and frequency.

POTTER & BRUMFIELD SALES COMPANY

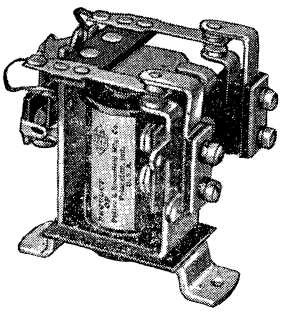
LM Series PLATE CIRCUIT RELAYS



Designed to meet demand for high grade medium cost plate circuit relays in both single and double pole contact arrangements. Large coils are particularly sensitive. The single pole LM operates on as low as .015 watts, the double pole types on .070 watts. Applicable to smoke control, packaging, counting and other electronic control circuits. Contacts supplied are 3/16" fine silver. Approximate size of single pole units 2¼" x 1⅜" x 2⅜" high. Double pole units 2¼" x 2⅛" x 2⅜" high. When ordering, specify coil resistance.

DESCRIPTION	Coil Resistance Ohms	SINGLE THROW Normally Open	Net	Normally Closed	Net

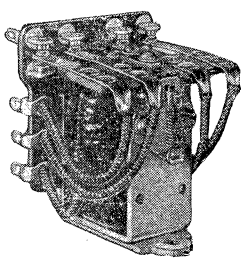
	5000				3.30
	10000				3.65

KL Series

Light Duty Multiple Contact



Similar to the KR Series but differing in the method of mounting, coil sizes, and larger number of poles available. KL relays have approximately twice as much coil space as the KR and are therefore more sensitive. Type KL5D will operate on values as low as .2 watt. Larger coils provide more power on multiple pole models for applications which must withstand aircraft vibration. Frequently applied to fractional horse power motor controls, transceiver switching and audio circuit switching. Contacts are rated at 3 amperes 110 volts, 60 cycle non-inductive load. Approximate size of KL5D 1 7/16" x 1 13/16" x 1 13/16" high. Approximate size of KL17D 1 9/16" x 1⅞" x 1 15/16" high. When ordering, specify coil voltage and frequency.

Description	A.C. RELAYS 6-12-24-110-220 Volts Normally Open	Net	Normally Closed	Net	D.C. RELAYS 6-12-24-110 Volts Normally Open	Net	Normally Closed	Net

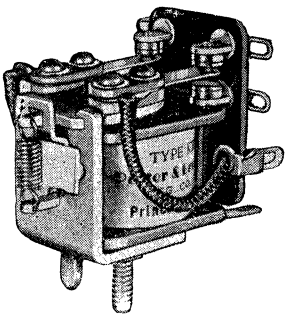
4PDT	KL17A			6.15	KL17D			5.90
	Add 25c to above prices for coils over 117 volts.				Add 25c to above prices for coils over 60 volts.			

KR Series **Small Light Duty**



A relay designed for application where size and weight are important. Sturdy and efficient. In applications where operating current is not too limited, the DC types can be adjusted to withstand the vibration encountered in most aircraft applications. Ideal for sub-chassis mounting and switching of RF or AF circuits. Contacts are rated at 3 amperes 110 volts, 60 cycle non-inductive. Approximate size of KR11D 1 3/16" x 1 11/16" x 1¼" high. When ordering, specify coil voltage and frequency.

Description	A.C. RELAYS 6-12-24-110 Volts Normally Open	Net	Normally Closed	Net	D.C. RELAYS 6-12-24-60 Volts Normally Open	Net	Normally Closed	Net
SPST	KR1A	$2.45	KR2A	$2.40	KR1D	$2.20	KR2D	$2.15

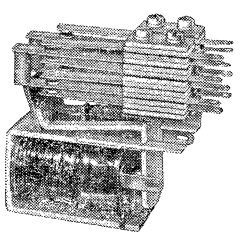
SPDT	KR5A			2.50	KR5D			2.25
DPDT	KR11A			2.75	KR11D			2.50
	A.C. coils up to 117 volts at above prices.				Add 25c to above prices for coils of 3500 to 5000 ohms. From 5001 to 6000 ohms add 35c.			

SU Series MULTIPLE LEAF RELAYS



Unique construction provides many valuable features at low cost. Larger coil space permits most efficient winding for higher voltages and lower consumption. May be mounted either vertically or horizontally, terminals easily accessible in either mounting. Suitable for applications such as signal or alarm controls, remote indicators, temperature controls, overload or underload protective devices, etc. Contacts rated at 4 amperes 110 volts AC non-inductive load. Contact combinations up to and including 4-pole double throw. DC types require 1.5 watts actuating power. Dimensions of SU17A (illustrated) are 2½" x 1 7/16" x 2½" high. When ordering, specify coil voltage and frequency.

speco RHEIN PHOTO RELAYS & INDUSTRIAL CONTROLS

PHOTO RELAY TYPE R-010

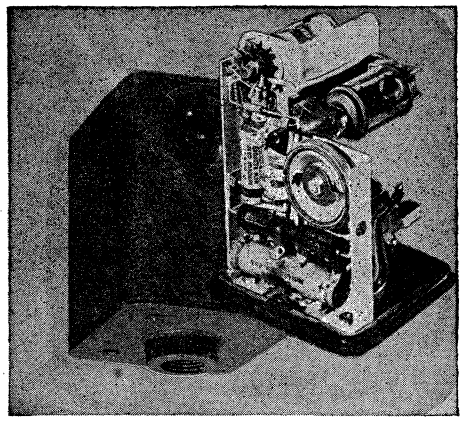

Photo Relay Type R-010—Price, $56.00

MECHANICAL SPECIFICATIONS: The unit is self contained in a strong crackle-finish cast aluminum housing:

WIDTH—3 inches DEPTH—3½ inches HEIGHT—5 inches Base is designed for mounting directly on standard ½-inch electrical conduit. This provides the means of electrical connection as well as support for the unit . . . providing sure contact for any secondary switching arrangement. On special order at no extra cost, a high speed unit is available with 1/20th of a second for both operation and release.

ELECTRICAL SPECIFICATIONS:

PRIMARY SUPPLY VOLTAGE—*115 V 50/60 cycle AC*
OUTPUT CONNECTIONS—*those of single pole double throw switch.*
CONTACTS—*pure silver rated at 5 amps non-inductive load.*
SENSITIVITY CONTROL—*provided as a screw driver adjustment; enables optimum operation at varying distances up to 35 feet.*
TUBE COMPLEMENT—*1 type 921 photo tube; 1 type 2D21 thyratron.*
SPEED—*1/20 second for operation; 1/4 second for release.*

POSITIVE ACTION PHOTO RELAY TYPE R-012

Identical with type R-010, except in response to activating light. In this unit the relay is normally open and stays oyen until a light beam hits it. This is just the opposite of type R-010 where the relay is held open by the beam from the light source and closes only when that beam is interrupted. *Price is same as R-010.*

QUICK CHANGE PHOTO RELAY TYPE R-011

MECHANICAL SPECIFICATIONS: Identical with type R-010, except for mounting.

QUICK CHANGE MOUNTING FEATURE: A plug-in mount is provided with five connecting prongs which plug into a mounting stand. This feature permits quick replacement of the entire unit in applications where repair time must be held to a minimum. Unit Without Stand. Price, $61.00. A variety of stand heights are available as follows:

TYPE	HEIGHT	PRICE
R-011A	12 inches	$66.00
R-011B	18 inches	$67.00
R-011C	24 inches	$68.00
R-011D	32 inches	$69.00
R-011E	34 inches	$70.00
R-011X	any special height under 34 inches	$72.00

* Height is measured from center of lens to bottom of base.

2-in-1 PHOTO RELAY-COUNTER TYPE C-010

Small and compact this one unit combines the functions of both a photo electric relay and electrically actuated digit counter. No need to buy two units or string long interconnecting wires. This 2-in-1 SPECO-RHEIN unit provides both in one small case. Ease of installation and dependability make this counter ideal for application to industrial problems of counting where it is impossible to touch objects being counted, or where objects are so small they would not actuate a normal mechanical counter.

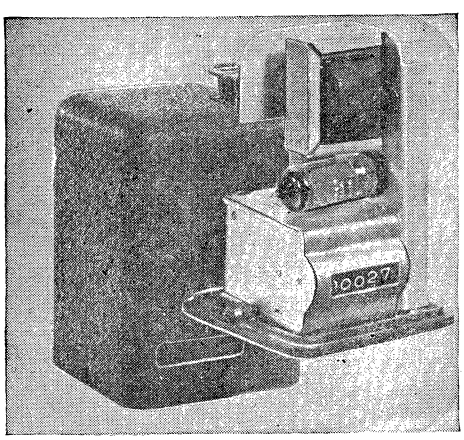

Photo Relay-Counter, Type C-010
Price $70.00

MECHANICAL SPECIFICATIONS:

Both units are self-contained in cast aluminum housing.
WIDTH—3 inches DEPTH—3½ inches HEIGHT—5 inches
BASE: *Provides for mounting directly on a standard ½-inch electrical conduit.*
COUNTING MECHANISM: *Completely enclosed; virtually tamper proof. Face is visible from rear of case. This unit is designed to maintain mechanical operation, without interruption, far beyond normal vibration and impact requirements.*

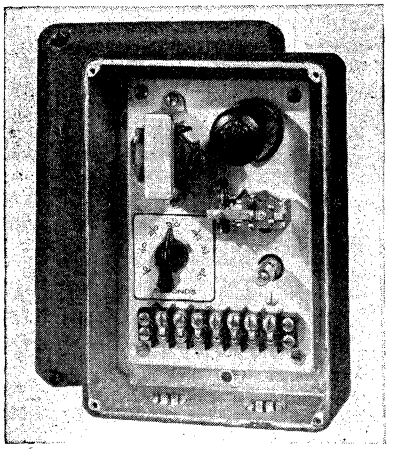
ELECTRICAL SPECIFICATIONS:

OPERATING VOLTAGE: *115 Volts AC*
CONNECTIONS: *Two; made to wires extending 6" below the counter base.*
SENSITIVITY CONTROL: *enables adjustment for optimum operation at various distances. A minimum of 8' candles is required for satisfactory operation. Used with light source L-010, the operating range is 25 feet maximum; with infra red fitted lens is 18 feet.*
SPEED: *400 per minute maximum.*
TUBE COMPLEMENT: *One Type 921 photo tube. One Type 2D21 thyratron.*

Copyright by U. C. P., Inc.

speco PHOTO RELAYS & INDUSTRIAL CONTROLS

ELECTRONIC TIMER TYPE T-010



Electronic Timer Type T-010
Price, $48.00

USES: For time delay-action in timing short intervals.
For continuously repeating a definite cycle of time.
No slipping clutches. No timing gears to wear.
For sequencing entire processes, such as filling of tanks, heating, curing operations in injection molding machines, timing of machine tool operation like grinding, honing, heat treating, spot welding and induction soldering.

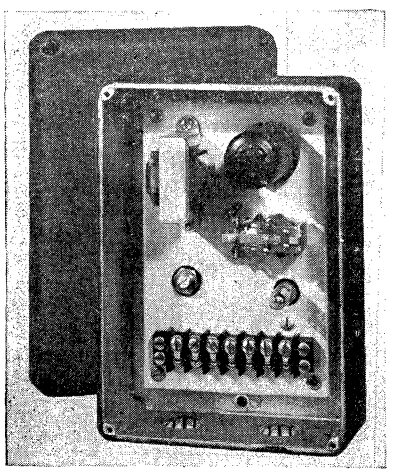
MECHANICAL SPECIFICATIONS:
SIZE: *Fits in 5" x 7" x 3½" case.*
CASE: *Cast aluminum designed for wall mounting. Holes with removable plugs provided for entry of connecting wires.*

ELECTRICAL SPECIFICATIONS:
TIMING ELEMENTS: *High quality resistor and capacitor.*
RELAY ARMATURE: *Only moving part in unit will withstand millions of operations.*
AVAILABLE TIMING RANGE: *1/10th second to 60 seconds. Other ranges available on application at no extra cost.*
OPERATING VOLTAGE: *115v, 60 cycle AC.*
OUTPUT CONNECTIONS: *Those of single pole double throw switch.*
RELAY CONTACTS: *Pure silver rated at 5 amps AC, non-inductive load.*
INTERVAL VARIATIONS: *Less than 2% in repeat cycle timing. Less than 3% for as high as 10% line voltage variation.*
TUBE: *Type GL-502A Thyratron.*

NOTE: *The timer design permits complete interchangeability of equipment; that is, machine process calibration for one timer applies to all timers, permitting the use of a standard dial without special calibration for each unit. Because of the characteristics of the resistor capacitor elements, the range is spread out in a logarithmic scale making the dial dimensions wider in the shorter time periods.*

ELECTRONIC RELAY SWITCH TYPE S-010

APPLICATION: This unit provides a means of switching an electrical current off-and-on where it is impossible to provide a direct electrical contact to carry the required load. This relay has been designed to obtain a reliable contact from the touch of two conductors through which only a very, very small current may, or can, flow.



Elecrtonic Relay Switch Type S-010
Price, $38.00

Type S-010 may be applied where the contact making instrument, or medium, is only a damp thread. It operates on the condensation of moisture between two points located closely together, on a liquid column of mercury such as a contact type thermometer, or any conductive liquid such as milk, chemicals, and even distilled water.

These features make it possible for the S-010 to be used as a liquid level control without the use of a float to increase the life of sensitive limit switches, feeler arms or water-type relays. It is especially adaptable for use with combustibles because of the low voltage and microamperes of current necessary for operation.

MECHANICAL SPECIFICATIONS:
Designed to mount in cast aluminum case 5" x 7" x 3½" but can be supplied without case where wanted to incorporate into manufactured equipment.
Case designed for wall mounting. Holes with removable plugs provided for entrance of connecting wires. May be mounted any distance from control probe or point as only one wire and normal grounding are necessary for operation.

ELECTRICAL SPECIFICATIONS:
OPERATING VOLTAGE: *115V., 60 cycles AC (on special order 230V. AC).*
OUTPUT CONNECTIONS: *Those of S.P.D.T. switch.*
RELAY CONTACTS: *Pure silver rated at 5 amps AC non-inductive load.*
SENSITIVITY CONTROL: *Screw driver adjustment provides operation over range of probe resistance of 5,000 ohms to 7 megohms.*
POLARITY INDICATOR: *Neon lamps insure correct connection and operation. If an error is made in connection or any changes in supply line, this lamp will glow.*
TUBE: *Type GL-502A thyratron.*

ACCESSORIES

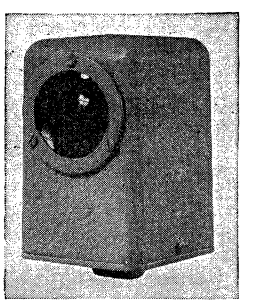
INFRA-RED FILTERS, Type F-011: to make light beam invisible. Price $1.40.

LENS SHIELD, Type L-011A: Is supplied to replace the lens mounting ring, and is easily installed by removing three screws and using the shield instead of the lens mounting ring. For use when photo relay units are placed out of doors in direct sunlight. Price, $2.00.

OBSTRUCTION LIGHT CONTROL SYSTEM

Three electronic units meet CAA requirements

Flash Indicator Unit L-C10A ..... Price, $50 00
Electronic Flasher L-C10B ..... Price, $48.00
Light Sensitive Switch L-C10C ..... Price, $76.00



LIGHT SOURCE TYPE L-010

MECHANICAL SPECIFICATIONS:
Unit is self-contained in cast aluminum housing identcal in size to Photo Relay units.
BASE: Provided with mounting for ½ inch electrical conduit.
LENS: Two inch diameter, prefocused. No other adjustment normally required.

ELECTRICAL SPECIFICATIONS:
LAMP: 21 candle power, single contact automobile Lamp.
SUPPLY VOLTAGE: 115V 50/60 cycle AC. Price, $12.00.

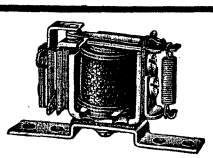
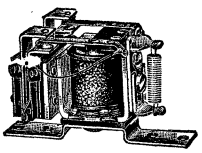
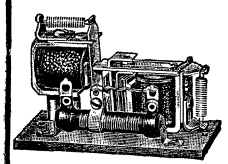
QUALITY STACO PRODUCTS



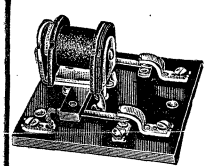
No. MR-11 ● Miniature relay, 3/16" fine silver SPDT contacts, 110-volt AC coil, **$1.59** net. **MR-7** is 6 volt AC model at same price.



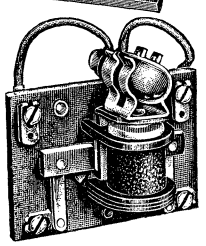
No. MRD-2 ● Miniature relay 2500-ohm coil operates on 12 ma., 3/16" fine silver DPDT contacts, **$2.70** net. **MRD-5** for 7.5-ma. operation and **MRD-6** for 6-volt DC are **$3.60** and **$2.70** respectively. **MRD-11** for 110-volt AC and **MRD-7** for 6-volt AC are each **$3.00.**



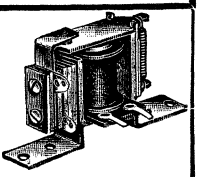
No. OA-2 ● Overload relay, adjustable for 250-500 ma., operating and reset coils are 110-volt AC, 3/16" fine silver SPDT contacts **$4.50** net. **OA-5** is 110-volt AC model for 500-1000 ma. range. Other models for 6-volt DC and 6-volt AC and for either range are all priced at **$4.50** net.



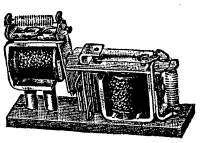
No. ABA ● Antenna changeover relay, 3/16" fine silver DPDT contacts, 110-volt AC coil, **$3.00** net. Type ABD for 6-volt operation, **$3.00. Types** AMA (110-volt AC) and AMD (6-volt DC) Mycalex insulated are **$4.00** net. Other R.F. Relays, SPST and DPST are available at from **$2.10** to **$3.00.**



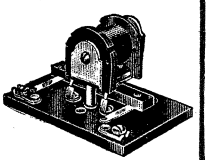
No. MSA ● Mercury switch relay will handle 1/4 HP motor or its equivalent, in addition to the SPST mercury contacts there is a SPST (double break) 3/16" fine silver contact set, 110-volt AC coil, **$3.75** net. Models **MSA-6** (6-volt AC) and **MSD-6** (6-volt DC) are also available at **$3.75.**



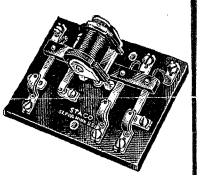
No. MR-2 ● Miniature relay, 2500-ohm coil, operates on 6 ma., SPDT contacts are 3/16" fine silver, **$1.50** net. **MR-5** (5000-ohm) and **MR-6** (6-volt DC) are **$2.10** and **$1.50** respectively.



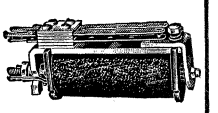
No. LEA ● Latching relay, electrical reset, 110-volt AC coils, 3/16" fine silver SPDT contacts, **$3.75** net. **LEA-6** for 6-volt AC and **LED** for 6-volt DC are also **$3.75** each.



No. KBA ● Keying relay, high speed operating, 3/16" SPST (double break) fine silver contacts, 110-volt AC coil, **$2.10** net. Models **KBD** for 6-volt DC and **KBA-6** for 6-volt AC are available at the same price.



No. BBA ● Break-in relay, four-pole (DPDT, SPST (normally open), 3/16" fine silver contacts, 110-volt AC coil, **$4.20** net. Type BBD for 6-volt DC operation is **$4.20.** Types BMA (110-volt AC) and BMD (6-volt DC) Mycalex insulated are **$6.00** net.



No. T63F ● Communication relay, one break and one make contact sets, 3/16" fine silver contacts, 6300-ohm coil operates on 1/10 watts, **$3.30** net.

T10G—10,000-ohm coil — **$3.30.**
T40F — 4000-ohm coil — **$3.15.**
T10F — 1000-ohm coil — **$2.85.**
T25E — 250-ohm coil — **$2.55.**

NEW! ISOLATION TYPE

Adjust-A-Volt VARIABLE TRANSFORMER

TYPE LR-5

1/2 KVA Isolated Primary ADJUST-A-VOLT Variable Transformer. Continuously variable from 70 to 140 volts. Indispensable in the laboratory and for servicing AC-DC radio sets. Intermittent operation checked by detecting faulty oscillator at 105 volts or "cooking" sets at 130-140 volts to break down intermittent part. Isolated Primary permits servicing without the chance of a "bite." The isolated winding allows the use of grounded equipment without the precautions as to polarity differences.

Type LR- 5—1/2 KVA-Input 115 Vts. **$23.50**
Type LR-22—1/2 KVA-Input 230 Vts. **24.50**
Type LR-10—1 Kva-Input 115 Vts. **$48.50**
Type LR-24—1 KVA-Input 230 Vts. **51.00**

All Models have 70-140 volts A.C. Output. All prices net.

AUTO TRANSFORMER TYPE

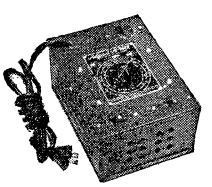
This ADJUST-A-VOLT fills the need for a portable and efficient voltage regulator. The instrument is a necessity for the laboratory, for production testing, appliance servicing and repair, etc. Voltages between 0 and 140 volts are available in two ranges, the LO range and 0 to 70 volts and the HI range from 70 to 140 volts. Voltages in the vicinity of zero are obtainable.

Type PA-5—Output 0-140, 860 V.A..... **$17.50**
Type PA-10—Output 0-140, 1500 V.A..... **36.50**
Type CA-5—Output 0-280, 430 V.A..... **21.50**
Type CA-10—Output 0-280, 860 V.A..... **44.50**

Models above have 115 Input Voltage

Type MA-5—Output 0-280, 860 V.A. **$25.50**
Type MA-10—Output 0-280, 1500 V.A..... **44.50**
Type NA-5—Output 0-140, 860 V.A..... **22.50**
Type NA-10—Output 0-140, 1500 V.A..... **46.50**

Models above have 230 Input Voltage



TYPE PA-5

QUALITY STACO PRODUCTS

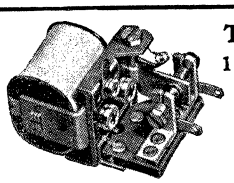
Sigma Relays

will Meet Your Requirements for:

Precision • Sensitivity • Ruggedness • Compactness • Positive Action

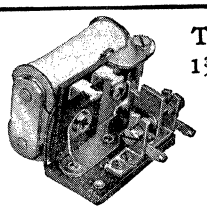


TYPE 4F

$1\frac{3}{8}$" x $1\frac{3}{4}$" x $1\frac{5}{32}$"
Weight:
$2\frac{3}{16}$ oz.

Recommended for:

- Light Weight
- High Speed
- Moderately severe environment (temperature and vibration)
- Moderate Sensitivity
- Minimum input power 10 milliwatts
- Coil resistance up to 14,000 ohms.

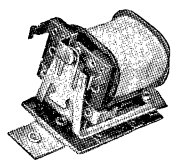


TYPE 5F

$1\frac{3}{8}$" x $1\frac{3}{8}$" x $1\frac{5}{8}$"
Weight:
$3\frac{1}{2}$ oz.

Recommended for:

- Exceptionally severe environmental conditions
- Maximum Sensitivity
- Minimum input power 0.5 milliwatts
- Coil resistance up to 18,000 ohms.



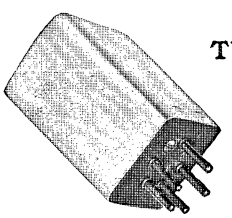
TYPE 41F

1" x $1\frac{7}{32}$" x $2\frac{3}{16}$"
Weight:
$2\frac{5}{16}$ oz.

Recommended for:

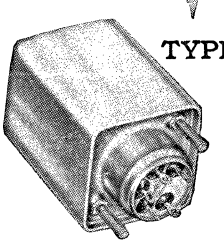
- Critical performance requirements at a low price in high volume applications. Features of other SIGMA Relays not needed in these applications have been omitted.
- Minimum input power 20 milliwatts
- Coil resistance up to 14,000 ohms.

A Wide Range of Enclosures are Available



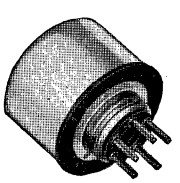
TYPE R

Mounted on a standard 5-pin base and enclosed in an aluminum can.



TYPE RJ

Mounted in a hermetically-sealed enclosure of cadmium-plated brass. Also available with octal base, type RJO.



TYPE A

Mounted on a standard 5-pin, molded bakelite base with snap-on aluminum enclosure.

SIGMA
A. C. RELAYS

The Series 4 and 5 relays are available with a built-in, full-wave bridge-type rectifier for operation on alternating current at any audio frequency. In specifying, add the letter "S" to the designation of the desired type.

The operating characteristics on A.C., including sensitivity and precision, are essentially the same as for the D.C. input relays.

Series 41 A.C. Relays are of shaded coil construction and do not require rectifiers. They are unusually efficient and absolutely quiet. Coils are available for any voltage from 1 to 230 volts—minimum input of 0.1 volt amperes. In specifying, the letter "Z" is added to the designation of the desired type.

CONSULT SIGMA

Our Engineering Department will be glad to help you on your relay problems.

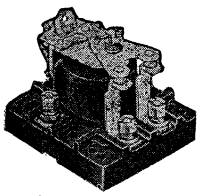
RELAYS FOR AUTOMATIC CONTROL

Representative samples of the comprehensive line of relays made by Ward Leonard. The ones illustrated are those particularly adaptable to electronic and the more common industrial applications.

MIDGET MAGNETIC RELAY — TYPE No. 106. — For remote control of A.C. or D.C. circuits. Has wide application for use on power circuits or electronic circuits in which the currents to be controlled do not exceed the ratings of the contacts. May be energized from main line or from an independent circuit. Built on a molded Bakelite base. Front or back connected terminals.



Coil Voltages —
D.C. — 6, 8, 12, 24, 32, 115 volts.
A.C. (60 cycles) — 6, 8, 12, 24, 32, 115 volts. 115 volts.

Contract Arrangement —
Single Pole, Double Break, Normally Open, Normally Closed and Double Throw.
Double Pole, Single Break, Normally Open, Normally Closed and Double Throw.
Double Pole (Common Feed), Single Break, Normally Open, Normally Closed and Double Throw.

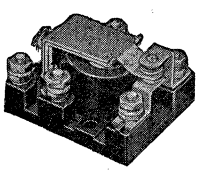
Contact Ratings, in Amperes —

Volts	D. C.		60-Cycle A.C.	
	Single Break	Double Break	Single Break	Double Break
0-24	4	6	4	6
25-115	1*	2	4	6

*0.7 Amperes if Double Throw.

Dimensions — 2" wide; 2¼" high; 2⅛" deep.
Type No. 106 Relays for 3-wire control are also available. Details will be furnished on request.

HEAVY DUTY MIDGET RELAY — TYPE No. 105. — A general purpose relay designed for remote control of the ordinary type of electrical appliances, such as electric heaters, electric signals, electric lights, electrically operated pumps, and most types of electronic equipments. The Heavy Duty Midget Relay is sturdily built on a molded Bakelite base. Heavy, front connected terminals are provided. The Heavy Duty Midget Relay, as a standard unit, is of the open type, but it can be furnished with a steel knock-out box enclosure.



Coil Voltages —
D.C. — 6, 10, 12, 24, 32, 115 volts.
A.C. (60 cycles) — 6, 10, 12, 24, 32, 115, 230 volts.

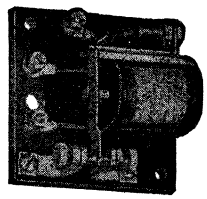
Contact Arrangement —
Single Pole, Single Break, Normally Open, Normally Closed and Double Throw.
Double Pole, Single Break, Normally Open, Normally Closed and Double Throw.

Contact Ratings, in Amperes —

Volts	D. C.		60-Cycle A.C.	
	Normally Open	Normally Closed	Normally Open	Normally Closed
0-24	20	15	20	15
25-115	1	1	20	15
230	0.5	0.5	15	10

Dimensions — Single Pole: 1⅞" wide; 2⅜" high; 1½" deep. Double Pole: 2½" wide; 2¾" high; 1¾" deep.

SENSITIVE RELAY — TYPE No. 250. — For use in applications where a high degree of sensitivity is required such as in electronic circuits. Built on a Bakelite base with large knurled heads and nuts to facilitate adjustment of the contacts and the spring tension on the armature. The use of nickel alloy in the magnetic circuits insures good contact torque at pull-up and crisp drop-out.



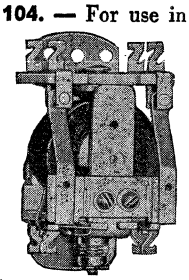
Contact Arrangement —
Single Pole, Double Throw.

Contact Rating, in Amperes —

Volts	D.C.	60-Cycle A.C.
115	0.75	2.0
230	0.5	1.5

Dimensions — 2⅝" wide; 2⅝" high; 1⅝" deep.

MIDGET METAL BASE RELAY — TYPE No. 104. — For use in small radio transmitters, sound equipment, aircraft control circuits, and other similar applications. Available with Bakelite insulation or ceramic insulation. Small size permits installation in limited spaces. Built on a metal base. Vibration resistant up to 10 times gravity when energized. Front connected, solder type terminals.



Coil Voltages —
D.C. — 6, 10, 12, 24, 32, 115 volts.
A.C. (60 cycles) — 6, 10, 12, 24, 32, 115 volts.

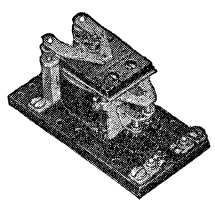
Contact Arrangement —
Single Pole and Double Pote. Various combinations with or without auxiliary contacts.

Contact Ratings, in Amperes —

Volts	D.C.	60-Cycle A.C.
0-24	4	4
25-115	0.5	4

Dimensions — $1\frac{9}{16}$" wide; $2\frac{11}{16}$" high. $1\frac{5}{16}$" deep.

HEAVY DUTY RELAY — TYPE No. 130. — A relay that has heavy current carrying and rupturing capacities for use in A.C. or D.C. circuits. Contact fingers are heavy stiff metal blades with large stainless steel springs for pressure. Large gap contacts with adequate surfaces. As high as four separate circuits may be opened simultaneously with the closing of up to four other circuits.



Coil Voltages —
D.C. — 24, 32, 115, 230 volts.
A.C. (60 cycles) — 24, 32, 115, 230, 440 volts.
Other voltages and frequencies available on special order.

Contact Arrangement —
Various combinations of contacts from one to four poles.

Contact Ratings, in Amperes —

Volts	Direct Current	D.C. with Blowout	A.C. 25 Cycles	A.C. 60 Cycles
0-24	25	25	25	25
25-125	3	20	25	25
126-250	1	10	25	25
251-440	.....	.....	10	15

Note: Blowouts required for relays that control Direct Current circuits in excess of 23 volts or a current of 1 ampere.

Dimensions — Base dimensions vary according to size of relay. Maximum depth, 3⅛".

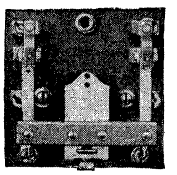
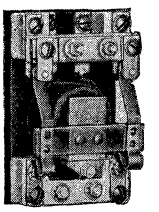
WARD LEONARD · RADIO AMATEUR and INDUSTRIAL RELAYS

RELAYS FOR THE RADIO AMATEUR

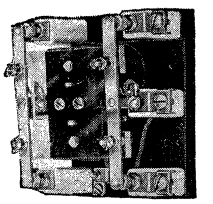
A few examples of Ward Leonard's popular line of relays for use in radio circuits are illustrated here. Information on specifications and prices are detailed in Catalog D-11 which will be furnished on request made to Ward Leonard directly or through one of its agents or distributors.



Midget Type



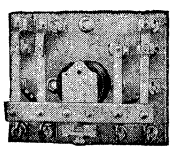
Intermediate Type



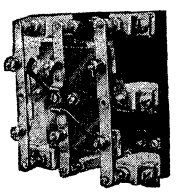
Heavy Duty Type

ANTENNA CHANGE-OVER RELAYS. — Switches antenna to transmit or receive. May also be used to switch transmitter or receiver to either of two antennas. Available in three sizes — Midget Type, Intermediate Type, and Heavy Duty Type. Midget Type built on Mycalex base. Contacts and terminals on Intermediate and Heavy Duty Types (except coil terminals) supported by ceramic blocks. Lucite crossarm used on all types.

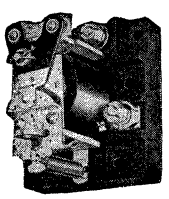
R. F. BREAK-IN RELAYS. — Otherwise known as "Push-to-Talk" Relay for phone transmitters. Pushing button in control circuit connects proper transmitter circuits and disconnects proper receiving circuits to transmit. Releasing button switches all circuits back to normal position for receiving. Furnished in two sizes, Midget Type for light duty and the Heavy Duty Type.



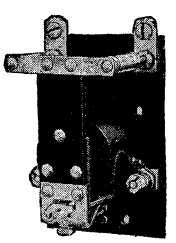
Midget Type



Heavy Duty Type

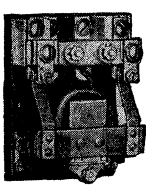


Low Voltage Type

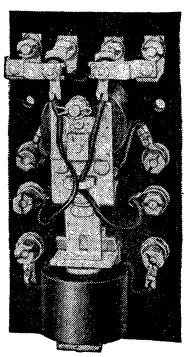


High Voltage Type

KEYING RELAYS.—Low voltage type for center-tap or grid-bias keying. High voltage type for use with grid controlled high voltage rectifier tubes. Use of Keying Relays reduces length of circuit wiring and permits control of keying with key located in convenient position for operating. Capable of keying up to 40 words per minute.

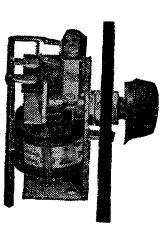


ANTENNA GROUNDING RELAY. — For grounding transmitting or receiving antenna when not in use. Contact arms supported on Lucite crossarm. Circuit contacts and terminals supported on ceramic insulation block. Coil terminals and grounding terminals mounted on Bakelite base. Double pole, double throw contacts, with fixed or adjustable normally closed contacts.

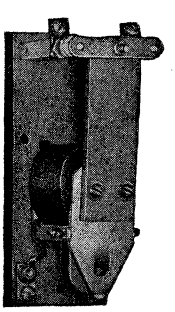


MIDGET LATCH-IN RELAY.—A multi-purpose relay especially useful in circuits where interference might be caused if relay coils were continually energized. Momentary energizing coil "pulls in" armature which is locked in position by mechanical latch. Momentary energizing reset coil releases latch allowing armature to drop to normal position.

UNDERLOAD RELAY. — Protects against damage to tubes and other components of amplifiers when load failures occur, due, for example, to inability of one or more vacuum tubes to hold the load because of loss of excitation. De-energizing of relay coil when load drops opens contacts and prevents damage to transformers or tubes. Available from stock with coil adjusted to pick up at 100 m.a. to 200 m.a. DC or with coil adjusted to pick up at 200 m.a. to 400 m.a. DC.

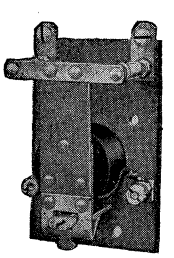


ROTARY RESET OVERLOAD RELAY. — For protection against overloading vacuum tubes of power amplifiers or transmitters. Current surge causes armature to be pulled in, breaking the rectifier primary circuit. A mechanical latch holds the contacts open until the operator closes them by turning the reset knob. Designed for panel mounting. Available from stock with 250 m.a. DC coil and 500 m.a. DC coil.



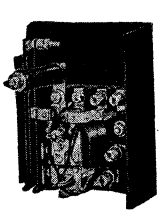
Heavy Duty Type

BAND SWITCHING RELAYS.- Automatically changes frequency bands through two-wire control circuit. Installation on the relay in the set near the coils eliminates the need for long R. F. leads, such as are required when a panel-mounted switch is used. Mycalex insulation used for base and contact arms. Contacts and terminals spaced to insure against leakage or creepage of high frequency and high voltage in the circuit.

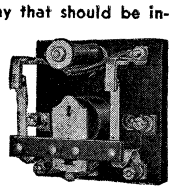


Midget Type

The use of Ward Leonard Relays in an Amateur Rig not only modernizes it, but also improves its efficiency and stability. Short r.f. leads prevent stray currents. Convenient control is provided.



THERMAL TIME DELAY RELAY. — Delays the application of voltage to the plates of vacuum tubes until the filaments have heated. The relay illustrated is adjustable over a range of from 15 seconds to 45 seconds. Other time delay relays — thermal type and motor driven type — are also available. Furnished with 110 volt, 60-cycle AC coil.



SAFETY RELAY. — A relay that should be installed in every amateur rig. It gives automatic protection against the hazards of high voltages in filter condensers when power supply unit is turned off. Furnished with resistor through which condensers are discharged. Furnished with normally closed contacts which open when transformer primary circuit is closed, energizing relay coil.

E. F. JOHNSON Company

WASECA, MINNESOTA

SPEED-X

SPEED-X keys, formerly made by Les Logan Co. of San Francisco, Calif., have attained a pre-eminent position as the leading complete line. Now manufactured by JOHNSON, their reputation will be maintained, and improved wherever possible.

HIGH SPEED SEMI-AUTOMATIC KEYS

SPEED-X Semi-Automatic Keys are designed and constructed to rigid specifications and are approved by the experienced professional and amateur C. W. operators. They are fully adjustable from lowest to highest speeds. Manufactured in four distinctive and attractive models. Fully guaranteed against any defect in material or workmanship. Bases of all models drilled for stationary mounting.

STANDARD MODEL 114-500. New-Improved Standard Model Semi-Automatic Key mounted on extra heavy steel base 3½" x 6¼" x ½" finished in attractive wrinkle baked enamel. Mounted on four rubber feet to insure stationary position at all times. The finish will not scratch or chip and will last indefinitely. The frame is finished same as base and has five adjustments with lock nuts, assuring dependable operations at all speeds. Vibrator arm, posts, switch and all machine parts heavily plated in beautiful satin chromium. Complete with adjustable weight, two sets ⅛" pure silver contacts, circuit-closing switch and two paddles adjustable to any desired height. Net weight 4½ lbs.

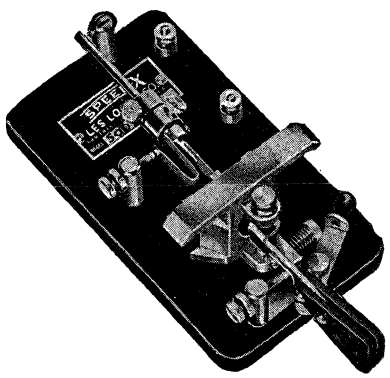
114-500 ..... **List Price $17.50**

114-500-L (Left-handed model) ..... **List Price 19.50**

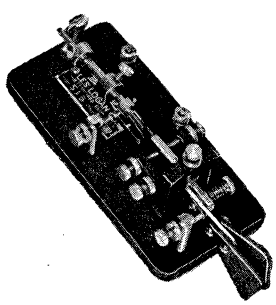
MODEL 114-501. New-Improved Beautiful Chrome finish. Heavy steel base 6¼" x 3½" x ½" with four non-slip rubber feet. Heavy brass connector strips mounted under base. Heavy die cast frame with same finish as base and with five screws for sensitive adjustments. Vibrator is designed to obtain slowest and fastest speeds required by high speed operators. Two sets of ¼" pure silver contacts. Pigtail connections to vibrating arm. Perfectly aligned free acting vibrator bearings. Lock nuts on all adjustments. Paddles adjustable to any required height. All machine parts heavily chrome plated, which makes this the most outstanding semi-automatic key on the market. Furnished with circuit closing switch. Net Weight 4½ lbs.

114-501 ..... **List Price $25.00**

114-501-L (Left-handed model) ..... **List Price 27.50**



Nos. 500, 501



114-515

AMATEUR MODEL 114-515. Baked Black Wrinkle Enamel Finished Steel Base 6¼" x 3" x ⅜" with four rubber feet to prevent slipping or tilting. Heavy Brass connector strips. Die Cast Frame finished same as base with adjustable trunion screws. Chromium brass Vibrator has main spring and U-spring made of clock spring for smooth snappy action. Adjustable weight. Two adjustable black fibre paddles. Two sets ⅛" pure silver contacts. Lock nuts for every adjustment. Deadener wheel, post screws, springs and terminals chrome plated. Packed in attractive carton. Net Weight 3¼ lbs.

114-515 ..... **List Price $12.50**

114-515-L (Left-handed model) ..... **List Price 15.00**

JUNIOR MODEL 115-510. Die Cast Base 2¾" x 6" x ¾" finished in black wrinkle baked enamel concealing heavy brass connector strips. Frame is same finish as base and all other parts are chromium plated. Vibrator Arm same as Standard model with lots of pep. Adjustable from eight words per minute to as high a rate as desired. Two sets of ⅛" pure silver contacts. adjustable weight and two adjustable paddles. Circuit closing switch mounted on base. Being small, compact and streamlined, this semi-automatic key is an outstanding value. A light-weight but sturdy built machine for clean-cut sending. Net Weight 2½ lbs.

115-510 ..... **List Price $13.50**

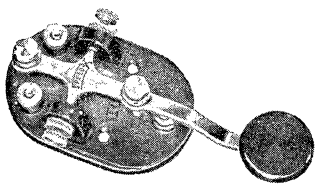
SPEED-X

MOULDED BAKELITE KEYS, BUZZERS, PRACTICE SETS

SPEED-X Moulded Bakelite and Metal Hand Keys, Practice Sets and Buzzers are used throughout the world as standard equipment in amateur and commercial work. Each unit is built according to rigid specifications and is fully guaranteed. All models have holes for stationary mounting. Code card supplied with each individually packed unit.



114-301

AMATEUR KEY 114-301—A general purpose key with moulded black bakelite base. Perfect insulation—adjustable smooth acting bearings — improved spring — nickel key arm — pigtail connections—no current on bearings—1/8" pure silver contacts. Net Wt. 6 oz.

114-301 ..... **List Price $3.00**

114-301-S—Same as Model 301 with circuit closing switch mounted on base..... **List Price 3.50**

Add "L" for 1/4" Contacts—Extra..... **List Price .25**

PRACTICE KEY 114-300 — A well-built and inexpensive practice key for the beginner. Moulded Brown Bakelite base and knob. Spring bearings, perfect action, simple adjustments, 1/8" pure silver contacts. All machine parts nickel plated. Standard Code card furnished. Net Wt. 5 oz.

114-300..... **List Price $1.75**

Add "L" for 1/4" Contacts—Extra..... **List Price .25**

PRACTICE KEY 114-312—Heavy die cast base finished in Gray Wrinkled Enamel. Smooth adjustable contacts. 1/8" pure silver contacts. Has provision for plugging in our semi-automatic keys when desired. Net Wt. 9 oz

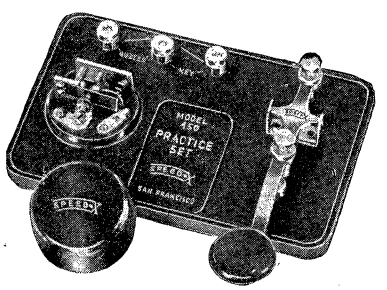
114-312..... **List Price $3.25**

114-312-S—Same as Model 114-312 with circuit closing switch mounted on base..... **List Price 3.75**

Add "L" for 1/4" Contacts—Extra..... **List Price .25**

PRACTICE SET 114-450—Consists of one constant frequency adjustable buzzer and a standard hand key with 1/8" pure silver contacts mounted on a moulded brown bakelite light-weight base 6" x 4". Adjusting screws, key arm and all machine parts nickel plated. Light Spring for perfect keying. A complete sending and receiving set. Three hook-up diagrams on carton show how this Practice Set may be used singly for code practice and in pairs for point to point communications. Standard Code Card included. Net Wt. 12 oz.

114-450..... **List Price $4.50**



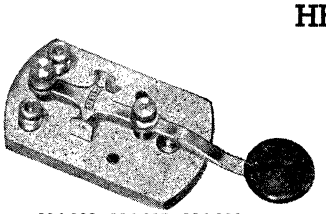
114-450

CONSTANT FREQUENCY BUZZER 114-400—Moulded Black Bakelite Base and Cap eliminates insulation problems. Large pure silver contacts—precision parts hold adjustments. Additional adjustment on vibrator. Resistance 2 ohms. Operates on two dry cells or one "C" battery. A high quality buzzer for all purposes. Net Wt. 3 oz.

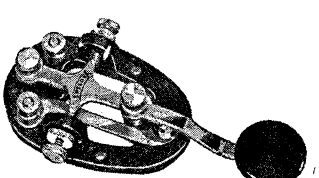
114-400..... **List Price $1.80**

114-400

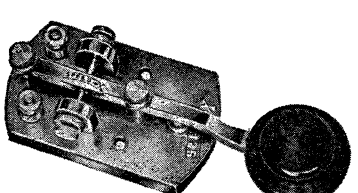
HEAVY DUTY METAL HAND KEYS



114-300, 114-305, 114-306



114-310, 114-311, 114-316



114-320, 114-321, 114-326

METAL HAND KEY 114-305—An inexpensive metal base key with black wrinkled enamel finish. Smooth acting spring bearings and adjustable key arm spring. Key arm and all machine parts bright nickel finish. 1/8" pure silver contacts. Net Wt. 10 oz.

114-305 ..... **List Price $1.90**

114-306—Same as Model 114-305 with Baked Wrinkle Brass finished base..... **List Price 1.90**

STANDARD KEY 114-310—Heavy die cast base finished in black wrinkled enamel. Smooth adjustable bearings. 1/8" pure silver contacts. Has provisions for plugging in our semi-automatic keys when desired. Net Wt. 9 oz.

114-310 ..... **List Price $3.25**

114-311—Same as 114-310 with Chromium finish base and parts..... **List Price 4.00**

114-316—Same as 114-310 with Baked Wrinkle Enamel Brass finish base..... **List Price 3.25**

Add "L" for 1/4" Contacts—Extra..... **List Price .25**

STANDARD KEY 114-310-S—Same specifications as Standard model key 114-310 with circuit closing switch mounted on base. 1/8" pure silver contacts. An attractive high-quality key. Net Wt. 10 oz.

114-310-S..... **List Price $3.75**

114-311-S—Same as 114-311 with circuit closing switch mounted on base..... **List Price 4.50**

114-316-S—Same as 114-316 with circuit closing switch mounted on base..... **List Price 3.75**

HEAVY DUTY KEY 114-320—Black wrinkle enameled extra heavy Die Cast Base. Large sturdy chromium plated key arm with adjustable steel bearings. Heavy brass connector strip concealed under base. Well insulated for heavy duty work. Improved Navy Type Knob and 1/4" pure silver contacts. Net Weight 12 oz.

114-320..... **List Price $4.25**

114-321—Chromium Base..... **List Price 5.00**

HEAVY DUTY KEY 114-326—Same specifications as Heavy Duty Model 114-320 but base finished in a beautiful Lacquered BRASS finish. Arm and machine parts chromium plated. Well designed spring gives this model a light keying touch. Navy Type Knob and 1/4" pure silver contacts. Net Wt. 12 oz.

114-326..... **List Price $4.25**

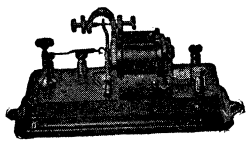
112-K KEY

This key is designed for learners who want an instrument built scientifically correct. Mounted on a mahogany finished wood base with rubber feet. Key base cast iron black enamel finish. Key lever and binding posts in gun metal finish, switch lever brass, Platinor contacts .072″ diameter.

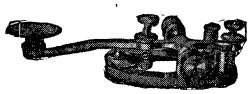
List $3.00



PONY RELAY

All the metal parts on this pony relay are brass with lacquer finish, excepting armature which is polished and plated steel. Magnets are non-adjustable. Mounted on a mahogany finished wood sub base and cast iron black enamel base.

	List
M-104— 4 Ohm	$8.95
M-105—20 Ohm	8.95
M-106—50 Ohm	9.20
M-107—75 Ohm	9.45

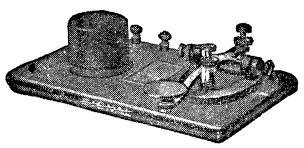


R-48 KEY

This key is recommended for rapid transmitting. The base and binding posts are brass with instrument lacquer finish. Key lever gun metal finish. Platinor contacts .072″ diameter.

List $3.65

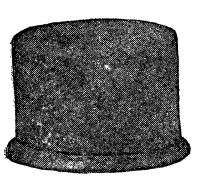
R-68 PRACTICE SET



Set consists of a key and adjustable high frequency 2 ohm resistance buzzer. Key has cast iron black enamel base, key lever gun metal finish with .072″ platinor contact. Buzzer and key mounted on a mahogany finished wood base with brass binding posts and rubber feet. Code appears on an etched plate attached to the base. Instruction manual packed with each instrument.

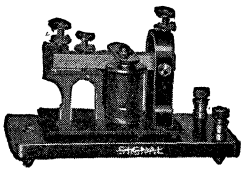
List $5.20

R-60 BUZZER



This high frequency buzzer is mounted on a steel base with steel cover black crystalized lacquer finish. Adjustable frequency with standard resistance of 2 ohms. 1-15/16 in. diameter by 1⅝ in. high.

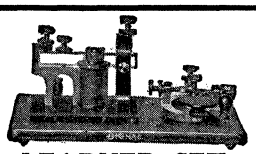
List $1.80



SOUNDER

Properly designed for accurate instant action. Aluminum sounder bar for clear resonant tone. Cast iron bar frame black enamel finish. Bridge and adjustment screws brass instrument lacquer finish. Black lacquered steel sounder plate. Instrument mounted on a mahogany finished wood base equipped with brass binding posts and rubber feet.

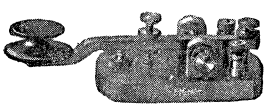
	List
112-S— 4 Ohm	$5.10
113-S—20 Ohm	5.35



LEARNER SET

For two way operation learners will find this instrument accurate and with a clear resonant sounder tone. Bar frame cast iron black enamel. Bridge and adjustment screws brass with instrument lacquered finish, sounding bar aluminum. Black lacquered steel sounder plate. Key has cast iron black enamel base, key lever gun metal finish with .072″ platinor contact, brass adjusting screws. Sounder and key mounted on mahogany finished wood base with brass binding posts and rubber feet. Instruction manual packed with each instrument.

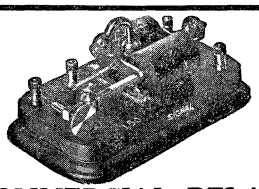
	List
M-110— 4 Ohm	$7.65
M-111—20 Ohm	7.90



STANDARD KEY

This standard wireless key is designed to carry heavy currents. All brass construction with lacquer finish. Furnished with 3/16, ¼ or ⅜-inch coin silver contacts. Navy type key knob.

R-62—3/16″ contacts	$4.50
R-63—¼″ contacts	4.60
R-64—⅜″ contacts	4.85

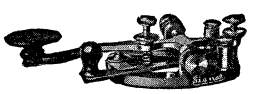


COMMERCIAL RELAY

The commercial relay is well designed and constructed for long, continuous service on commercial lines. Heel iron and armature are made of Norway iron. Has rubber covered adjustable coils. Mounted on mahogany fignished wood sub base and cast iron black enamel base.

	List
916—150 Ohm	$15.00
917—250 Ohm	15.50

M-100 KEY



This key is recommended for rapid transmitting. The base, binding posts and switch lever are brass with instrument lacquer finish. Key lever gun metal finish. Platinor contacts .072″ diameter.

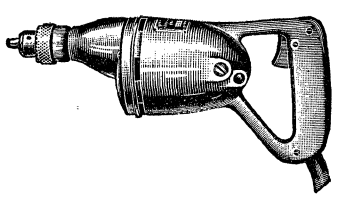
List $3.95

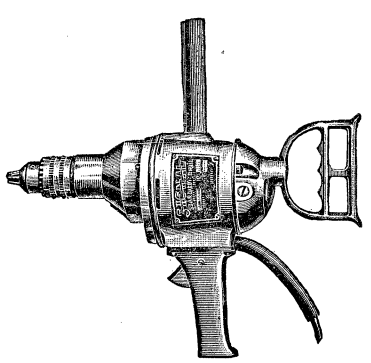
KEY R-50

This instrument is designed for the amateur interested in a well built carefully made wireless key. Cast iron base well insulated, back wrinkle finish. ⅛″ coin silver contacts. Key lever gun metal finish. Binding posts and adjusting screws brass instrument lacquer finish.

List $1.90

PORTABLE ELECTRIC DRILLS





Type	OB-4	OB-8	OB-5
Size	¼″	¼″	½″
Speed	1700	3000	400

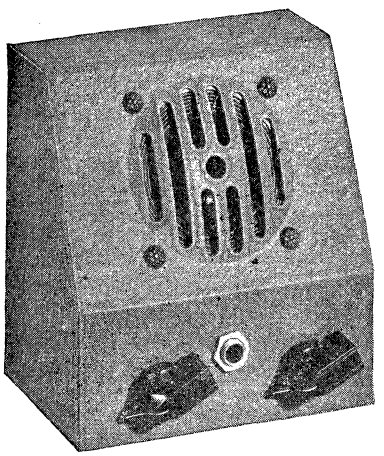
T·A·C

Announces the New Code Practice

OSCILLATONES *with* ADJUSTABLE RESONATORS

for Greater Volume . . . Better Tone

TELEGRAPH APPARATUS CO . . . CHICAGO 7, ILLINOIS



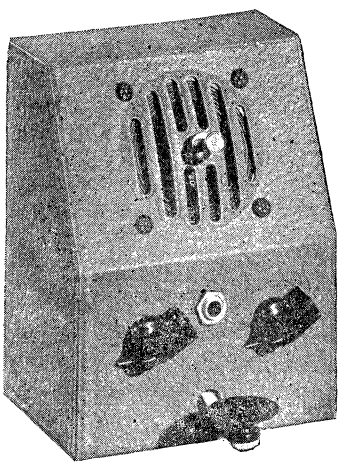
MS 710 has all features described but less resonator and less built-in key. Amateur net price..... **9.00**

MS 710R with resonator but less built-in key. Amateur net price..... **10.50**

Here is the last word in code practice Oscillatones. New Adjustable Resonator (optional) increases volume five times. Tone frequency variable from 600 to 1500 cycles. Volume controllable from 0 to FULL ON. "PM" DYNAMIC speaker may be disconnected during headphone operation if desired. Up to 300 head phones may be used. Has phone jack for headphones. Optional built-in key. Absolutely safe. No shocks. Clean cut, chirpless keying. Operates on 110 V. AC or DC. Uses 117N7GT tube. Gray crackle finish metal case.

Designed by
THE WORLD'S CHAMPION
RADIO TELEGRAPHER

Now in Stock at All Leading Radio Distriubtors



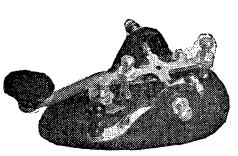
MS 710 P with built-in key but less resonator. Amateur net price **11.50**

MS 710PR Deluxe Master Oscillatone with all features including resonator and built-in key. Amateur net price **13.00**

LEG CLAMP HAND KEY

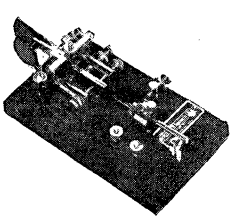
Made to Signal Corps specifications. Spring metal band fits thigh of leg comfortably. Folds for compact packing. With 5 ft. rubber covered cord and plug. Model J-45; Amateur Net Price **5.10**

MODEL 200 HAND KEY



Built to professional standards. Coin silver contacts. Accurately machined bearing screws. Black finish metal base with circuit closing switch. Model 200; Amateur Net Price..... **2.25**

PROFESSIONAL HAND KEY

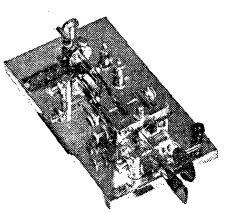


Designed by World's Champion Radio Telegrapher. Gray wrinkle finish and polished chrome. Silver contact points. Fully adjustable. Model CP 510; Amateur Net Price **6.75**

STANDARD HAND KEY

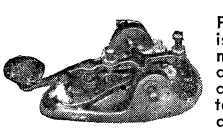
Made to Signal Corps specifications. Solid coin silver contacts. Silver plated lever. Bakelite base. Very smooth operation. Model J-37; Amateur Net Price..... **1.80**

DELUXE SPEED KEY



Finest "bug" available. Chrome finished base and superstructure. Selected blue steel springs for uniform performance. Silver contacts. Nine points of adjustment. Model CP 810; Amateur Net Price..... **9.75**

DELUXE HAND KEY



Finished in polished chrome and nickel. 3/16" diameter contacts, adjustable for tension, spacing and bearing position. Circuit closing switch. Model 300; Amateur Net Price **3.45**

The Vibroplex

A SEMI-AUTOMATIC TELEGRAPH AND WIRELESS TRANSMITTING MACHINE

Embodying the latest exclusive features

Prominent features which have been contributed to the success of the Vibroplex are:

Simplicity • Durability
Perfect control • Easy adjustment
Strong carrier • Ease of manipulation
Adaptability to changing wire conditions
Ability to transmit perfect Morse and Continental signals at high speed

These features, which are found only in the genuine Vibroplex models illustrated on these pages, make for clear, rapid, easy transmission; relieve the arm of strain caused by sending on the ordinary key; rest and strengthen the overworked muscles, and prevent telegrapher's paralysis.

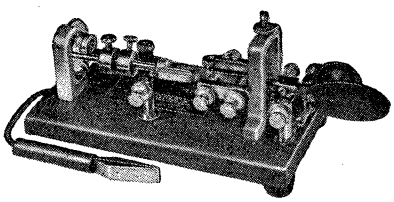
CLEAR, RAPID SENDING MADE EASY

The Vibroplex transmits the same grade of Morse and Continental code as the strongest clearest hand sender, faster than is possible on the ordinary key, and with less than half the labor.

There is no tensing of the muscles, no nerve strain, no pounding on the key in order to make clear, rapid signals. **You simply press the lever — the machine does the rest.**

THE *Improved* "ORIGINAL" VIBROPLEX

Suitable for All Classes of Transmitting work Where Speed and Perfect Morse Are Prime Essentials



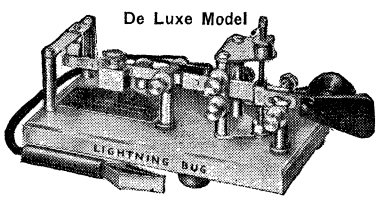
SPECIFICATIONS

The improved model, single lever. Two pairs of contact points: one for dots, the other for dashes. Weight, 3 lbs. 8 oz. A handsome and efficient transmitting machine, with unlimited sending possibilities. Complete with cord and wedge.

Standard—Polished Chromium top parts, black base . . . Amateur Net Price **$15.95**

DeLuxe—Polished Chromium base and top parts, with jeweled movement. Amateur Net Price **19.50**

THE "LIGHTNING BUG" VIBROPLEX



One of the Latest Model Vibroplexes

Sending Ease Surpassing Anything Ever Achieved in Any Sending Machine

HIGH QUALITY SIGNALS AT ALL SPEEDS

This great new Vibroplex is the smoothest and easiest working BUG ever made. It has won fame on land and sea for its clarity, precision and ease of manipulation. Can be slowed down to 10 words per minute or less or geared to as high rate of speed as desired. Maintains the same high quality signal at whatever speed, insuring easy reception under all conditions.

Standard — Polished Chromium top parts, black base . . . Amateur Net Price **$13.95**

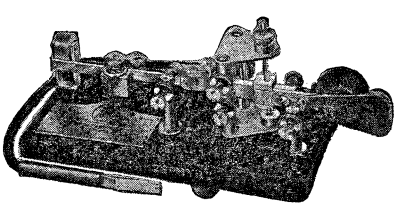
DeLuxe—Polished Chromium base and top parts, with jeweled movement. Amateur Net Price **17.50**

SPECIFICATIONS

Single lever, with improved flat pendulum, instantly adjustable dot contact spring, circuit breaker parallel with pendulum. Two pairs of contact points, one for dots, the other for dashes. Complete with cord and wedge. Weight 3 lbs. 8 oz.

THE "ZEPHYR" VIBROPLEX

A Genuine Vibroplex. Slightly Lighter in Weight. Having Plenty of "Pep" and "Power"



Smaller and more compact but designed in most details the same as the "Lightning Bug" model. Planned to meet the demand for a low priced, efficient and high speed transmitter for telegraph use.

SPECIFICATIONS

Single lever with standard size contact points. Mounted on slightly smaller base. Weight 3 lbs. 2 oz. Equipped with circuit closer, cord and wedge. Standard finish only. Chromium finished top parts, with black crystal base.

Amateur Net Price **$12.50**

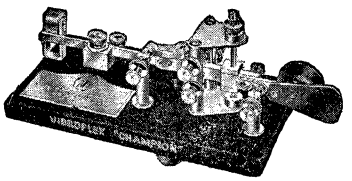
Copyright by U. C. P., Inc.

The Vibroplex

Telegraph & Wireless Transmitting Machines

THE "CHAMPION" VIBROPLEX

For Radio Use Only



Designed to Fulfill the Demand for a Low Priced Radio Transmitter

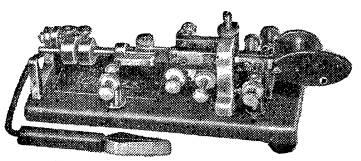
The new "Champion" is an inexpensive transmitter having exceptional sending qualities . . . clarity . . . speed . . . sending ease, which will appeal alike to amateur and professional radio operators. Designed to meet the demand for a low priced Vibroplex in the radio field.

SPECIFICATIONS

Single lever with two pairs of contact points. Mounted on large standard size base. Weight 3 lbs. 8 oz. Without circuit closer, cord and wedge. Standard finish only. Chromium finished top parts, with black crystal base.

Amateur Net Price..... **$9.95**

THE "BLUE RACER" VIBROPLEX



Very similar to the Original Vibroplex except that it is only half the size. Suitable for all classes of telegraph work and in high favor with wireless men.

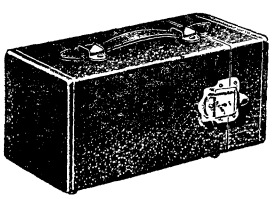
Small and compact, the "Blue Racer" Vibroplex can be carried around and never be in the way. Embodies the same sending possibilities, the same carrying qualities, the same strength and durability as the larger models. Built especially to meet the demand of telegraphers requiring a small, lightweight and efficient sending machine.

SPECIFICATIONS

Single Lever. Two pairs of contact points—one for dots, the other for dashes. Weight, 2 lbs. 8 ozs. Complete with cord and wedge.

Standard—Polished Chromium top parts, black base . . . Amateur Net Price **$15.95**

DeLuxe—Polished Chromium base and top parts, with jeweled movement. Amateur Net Price..... **19.50**



VIBROPLEX CARRYING CASE

Keeps the Machine Free from Dust, Dirt and Moisture
Insures Safe-keeping When Not in Use

A cloth-lined case, finished in handsome simulated black morocco. Corners are reinforced, adding to its durability and attractiveness. A flexible leather handle makes it more convenient to carry. Has lock and key.

PRICE..... **$5.50**

Parts for all VIBROPLEX equipment are always available. Price List for parts will be furnished at once, upon request.

The JEWELS used in this Model Vibroplex are the same as placed in the world's finest precision made watches and instruments.

A JEWEL bearing main lever insures a "LIFETIME" of service and an ease of operation that can only be referred to as "FEATHER-TOUCH" sending.

The "Original" and "Blue Racer" Vibroplex models have been vastly improved. To insure still further absolute uniformity in appearance and in precision construction, the main and damper frames of both models—in Standard and DeLuxe finishes—are now manufactured from streamlined high-pressure castings. No priorities are required on Vibroplex machines.

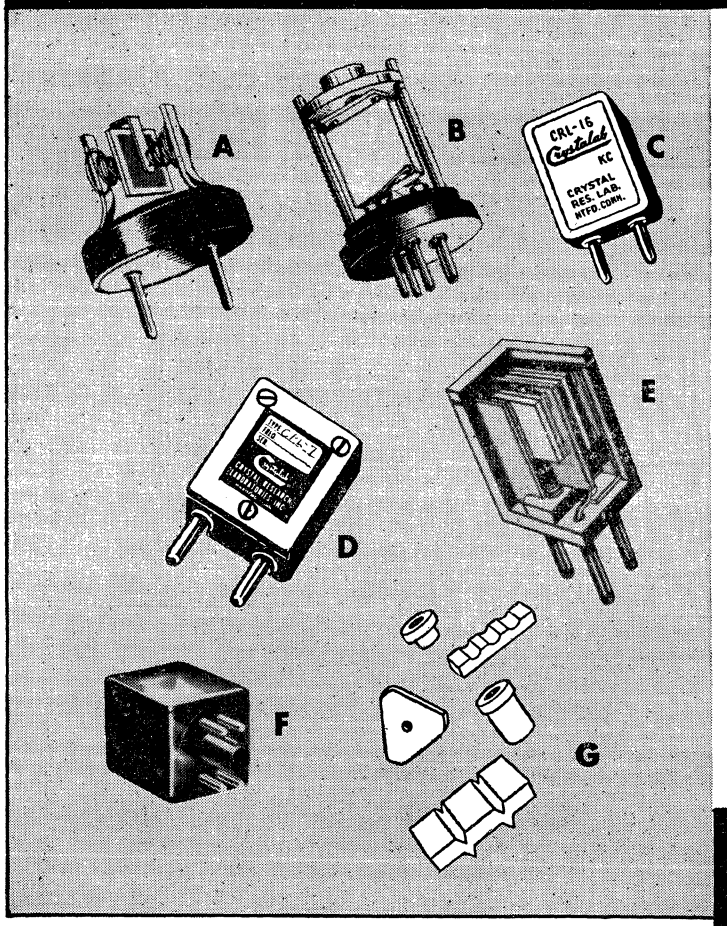
Crystalab

TRADE MARK REG. U. S. PAT. OFF.

Quartz Crystals • Electronic Components • UHF-VHF Capacitors, Communication, Supersonic, and Test Equipment



A. 75-150 KC Freq. Standard Crystal. Spring suspended, wire mounted. Silver plated. Extreme stability. .125" diam. pins spaced .750" on centers. Overall height 2.5"; diam. 1.75".
Cat. No. CRL-80

B. 200-500 KC. Low freq. crystal. Rigidly mounted—NOT A SPACED UNIT—for extreme stability. Silver plated. Hermetically sealed. High current carrying capacity. Fits standard 5 pin socket. Overall height 4.062", diam. 2.25".
Cat. No. CRL-50

C. 2000-15,000 KC Low drift, precision cut, clamped crystal. Compact unit; overall height 1.594"; width .812"; thickness .438". .094" diam. pins spaced .486" on centers.....Cat. No. CRL-16

D. 2,000-15,000 KC. Low drift, precision cut, clamped crystal. Larger quartz blank for high current capacity and wide temperature variations, (Aircraft, Marine, Mobile Applications). Overall height 1.937"; width 1.156"; thickness .562". .125" diam. pins spaced .750" on centers.
Cat. No. CRL-7

E. 1,000-15,000 KC. Dual Crystal Unit. Large crystal blanks, clamped type, for stable operation over wide temperature range (Aircraft, Marine, Mobile). Three pin base. Overall height 2.687"; width 1.187"; thickness 1.594".....Cat. No. CRL-5

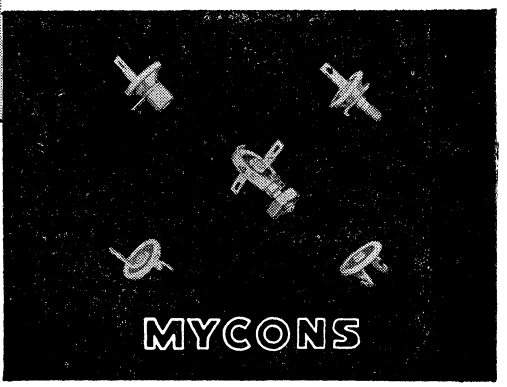
F. 2,000-15,000 KC. Constant temperature holder. Operates at ± 3°C. Frequency can be controlled ±.005%. Heater: 6V—1A; available for other voltages. Fits standard octal socket. Overall height, 1.937"; width 1.125"; thickness 1.187".....Cat. No. CRL-30

G. Fused Quartz. Low coefficient of expansion. High dielectric quality. Lack of distortion from heat of friction. High melting point. Fabricated, if desired, to tolerance of ± .0001". Give us your specifications and applications.

Crystalab AMATEUR CRYSTAL KITS AND BLANKS

Kit No. 3 consists of 5 holders CRL-16. 5 Complete sets: springs, electrodes, covers, gaskets, screws. Lintless cloth for drying. Package fine abrasive for finishing and package medium abrasive for rough lapping. Lapping button and plate. Blueprint of Selector Switch. Photographs of Selector Switch. Illustrated Instruction Book. Kit No. 3—$5.00 net.

Blanks available, 3500 KC to 10,000 KC, 5 per card, in a variety of frequencies. Card of 5 blanks—$5.00 net.



Low Inductance Capacitors

Mycons—Vacuum oil impregnated, silver-mica capacitors for UHF applications. Standard sizes 50, 100, 250, 500, 1000 and 1500 mmfds. Tolerances 2.5%, 5%, 10%, 20%. WV-750DC cont. Test 1000 DC. 15 min. Res. over 10,000 meg. Temp. Coeff. ± 50 PPM/°C.

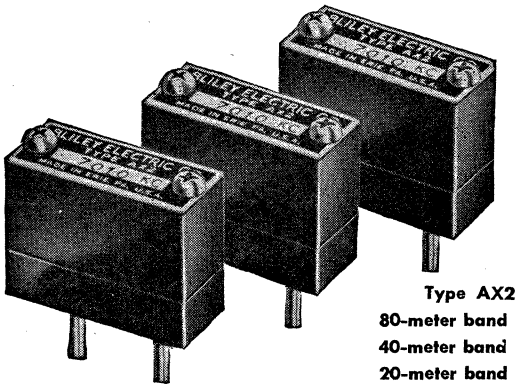
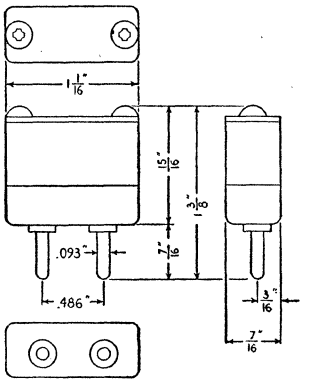
Bliley CRYSTALS . . .

First for amateur frequencies

BLILEY TYPE AX2 PLATED CRYSTALS





Type AX2 Units	
80-meter band	$2.80 ea.
40-meter band	2.80 ea.
20-meter band	3.95 ea.

The advanced development and pace-setting design of the AX2 *plated* crystal again demonstrate Bliley's leadership in the manufacture of crystals for amateur frequencies.

Primary electrodes in the AX2 consist of a micro-thin metal film, deposited directly on the major surfaces of the crystal by evaporation under high vacuum. This film exhibits extremely high adhesion and can almost be considered as a chemical bond to the quartz. Secondary electrodes, under spring pressure clamp the crystal in position and provide a medium for thermal dissipation.

Bliley's *plated* crystal gives you better *grid current stability* over a wide temperature range plus *improved frequency stability* under high drive conditions, and in addition such famous Bliley qualities as:

—Acid etching to frequency to prevent aging.
—Nameplate calibration accurate to ± .002% at 25° C in factory oscillator.
—Temperature stability better than ± .02% between −10° and + 60° C.
—Activity level tested between −10° C and + 60° C.
—Solid, stainless steel pins. Welded contact between pins and contact plates.
—Neoprene gasket seal. Moisture resistant, molded phenolic case and cover.
—Compact size for easy stacking. Two units may be mounted back to back in standard octal socket.
—All nomenclature on top for easy identification.

Nothing has been overlooked to insure top performance under conditions encountered in amateur equipment.

BLILEY CCO...CRYSTAL CONTROLLED OSCILLATOR

FOR RADIO SERVICE TECHNICIANS

The Bliley CCO is the only test instrument available to radio service technicians that features—

DIRECT CRYSTAL CONTROL

—with instant channel selection of the five most commonly used intermediate frequencies—175 kc, 262 kc, 370 kc, 455 kc, and 465 kc.
—at 200 kc for r-f alignment.
—at 1000 kc for short wave alignment.

Finger tip adjustment is provided by a three position modulation selector and a five step attenuator, with vernier output from 0 to 15 volts. An external socket accommodates extra crystals for special requirements.

Simply connect the Bliley CCO to the receiver to be tested and select the frequency desired. The crystals are instantly on frequency as soon as the oscillator is energized. Save hours of time, eliminate guess work and increase your prestige as a radio service technician.

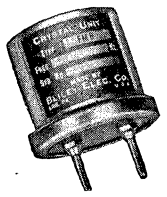
The CCO is a "techniquality" product of the same engineering skill that has kept Bliley Crystals foremost in dependability for over 15 years.

$69.50 complete with seven crystals

BLILEY ELECTRIC COMPANY • UNION STATION BLDG., ERIE, PA.

Copyright by U. C. P., Inc.

tops in TECHNIQUALITY



TYPE FM6-S
100kc.

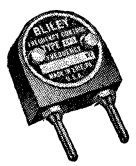
Recommended primarily for use as a frequency standard. Plated precision crystal is rigidly clamped between resonant pins providing exceptional electrical and mechanical stability. Frequency is adjustable to exactly 100kc. at 25°C when unit is used in recommended oscillator circuit. Frequency stability ±.005% at any temperature between 0°C and 50°C. Separate tank coil, with proper characteristics for correct performance, supplied with each unit.

Price **$18.75**

TYPE CF6
455kc.

Single signal filter crystal unit. Exceptionally low holder capacity permits sharp signal discrimination in filter network of general communications receivers. Frequency 455kc. free from spurious responses within ±7kc.

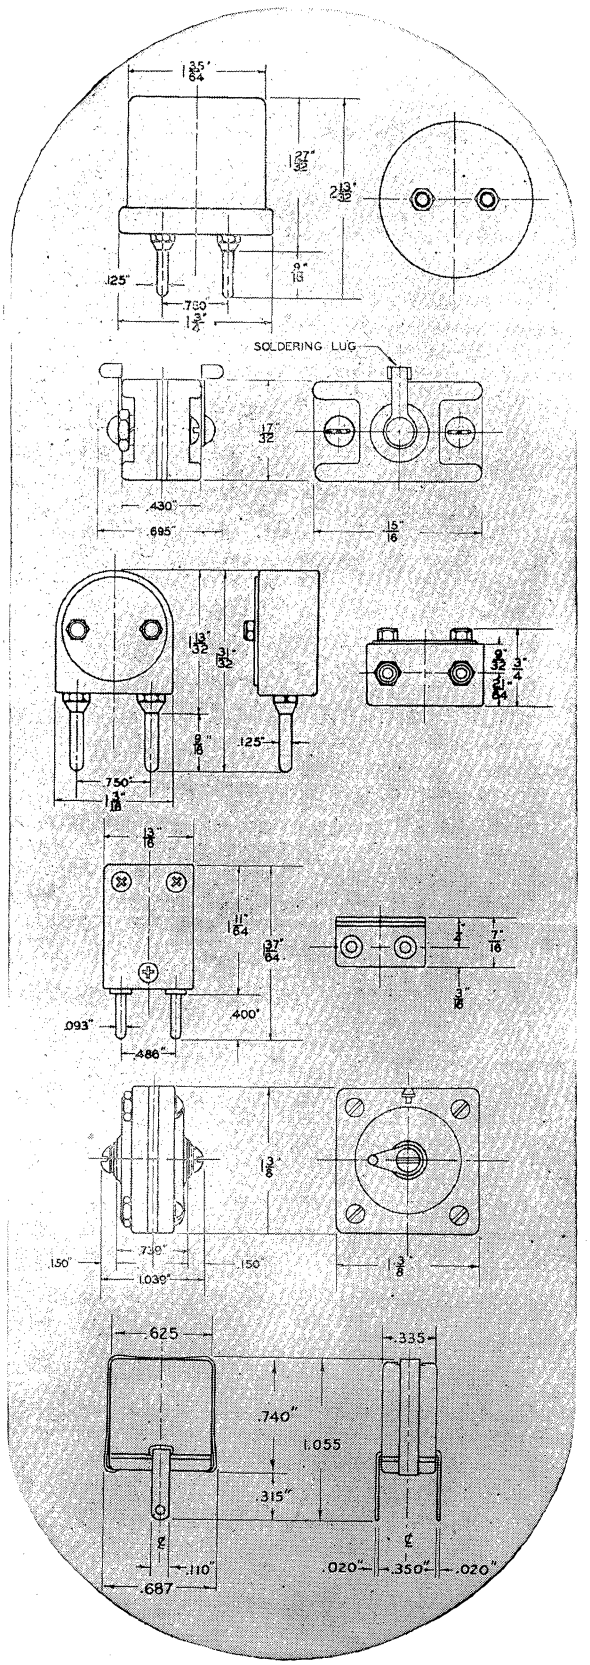
Price **$4.50**



TYPE CF3
455kc.

Single signal filter crystal unit. Frequency 455kc., ±5kc.—free from spurious responses within ±7kc. of fundamental. Designed for intermediate frequency filter in general communications receivers.

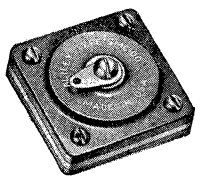
Price **$5.00**



TYPE MC9
3105kc.

This unit is suggested for use in private aircraft transmitters operating at 3105 kc. The crystal is guaranteed to be within ±.02% of 3105kc. at any temperature between 0°C and 50°C and is factory tested for performance over this temperature range. Plug-in type holder is gasket sealed against moisture and humidity.

Price **$5.50**



TYPE SMC100
100-1000kc.

Dual frequency crystal provides either 100kc. or 1000kc. frequency source. When used in recommended oscillator circuit 1000kc. frequency is within ±.05% at 25°C and 100kc. frequency can be adjusted to zero beat at 25°C. Suggested for signal generators used in alignment of radio receivers.

Price **$8.75**

TYPE VX2
3105kc.

Designed for applications where space is at a premium, this unit is recommended for private aircraft communication at 3105kc. Guaranteed to maintain frequency within ±.02% at any temperature between 0°C and 50°C. Solder lug connections permit mounting under chassis and assembly is gasket sealed against moisture and humidity.

Price **$5.00**

HOLDER STYLE 153-AC for 5 PRONG SOCKET

40 OR 80 METER AMATEUR UNITS

Supplied in either of the convenient versatile type of holder 153-AC for 5-prong or 162-PM for octal socket. Frequency range 40 meter 7000 to 8000 KC. (80 meter 3500 to 4000 KC.) Furnished within 10 KC of specified frequency.

Type 205-RF, 40 meter for octal socket $2.80
Type 206-RF, 40 meter for 5-prong socket $2.80
Type 210-RF, 80 meter for octal socket $2.80
Type 211-RF, 80 meter for 5-prong socket $2.80

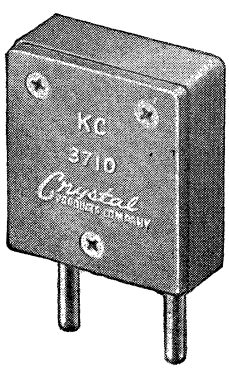
SPECIAL AIR CRAFT

Air craft frequencies supplied in this mounting:

Type 200-AC 3105 KC for octal $5.00
Type 201-AC 3105 KC for 5-prong $5.00
Type 202-AC 6210 KC for octal $5.00
Type 203-AC 6210 KC for 5-prong $5.00

Prices subject to change without notice, F.O.B. Kansas City, Mo.

HOLDER STYLE 162-PM OCTAL



TYPE 266-PM or TYPE 267-PM

SPECIAL UNIT FOR ALL TYPES OF OPERATIONS

Supplied by special order in a molded phenolic holder, 1-13/64" x17/32"x1-3/8" including pins,which are 5/8" long. (Pins are 1/8" diameter and 3/4" center to center.) Neoprene gasket seal against humidity and moisture. Available in a frequency range from 1,000 to 10,000 KC with either .500x.600 crystal blank or 3/4"x3/4" crystal blank. A durable precision unit for use in transmitter.

Type 266-PM mounted with .500x .600 crystal blank $5.25
Type 267-PM mounted with 3/4"x 3/4" crystal blank $7.50

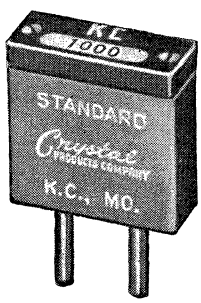
Prices subject to change without notice, F.O.B. Kansas City, Mo.

1000 KC STANDARD

For use with multivibrator circuits for frequency standards. High output with very low T.C. Crystal pre-aged and adjusted so it can be tuned to zero beat. Durable mounting for 5-prong socket. Dimensions 1-1/8" x 1-3/16" x 7/16". Will fit in small size ovens.

Type 290-S
List Price $8.00

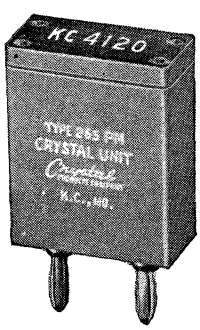
Prices subject to change without notice, F.O.B. Kansas City, Mo.



TYPE 290-S

CRYSTAL BLANKS TO YOUR SPECIFICATIONS

Quartz crystal blanks can be supplied in quantity lots in either of the four stages; rough diced, surface ground, semi-finished or finished (pre-aged).
Quotations supplied upon request depending upon quantity and specifications.



HEAVY DUTY CRYSTAL UNIT

A rugged communication crystal unit designed for rough treatment. Heavy molded bakelite holder, 1-7/16"x3/4"x2-1/16" (excluding pins). Screw-in banana type plugs with 7/8" spacing center to center. Stainless steel contact plates. Neoprene gasket seal. Shock proof construction, engineered for heavy duty in mobile units. Frequency range 2000 to 9000 KC.

Type 265-PM—Quotations supplied upon request depending on frequency and specifications.

Crystal PRODUCTS COMPANY

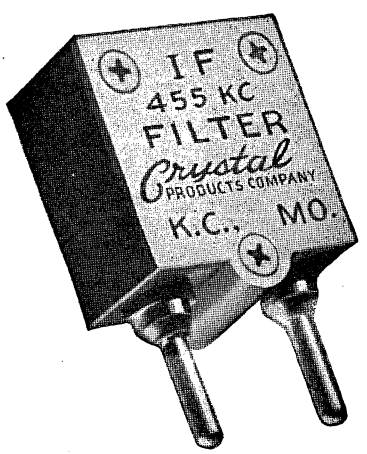
Kansas City 8 Missouri

A NEW MULTIPLE CRYSTAL UNIT
Specially Designed for Amateur Use

Positive contact, low capacity, excellent for switching to four different frequencies instantly and accurately. Operates in any position and requires very small space. Will improve the appearance of any transmitter either in front or behind panel mounting. Over-all dimensions 2" high, 1-1/4" in diameter with octal socket base. Frequency range 3000 KC to 9000 KC supplied in any combination. Frequency masked name plate.

Type 275-M—Prices will depend on your specifications as to frequency and tolerance. Quotations upon request.

MULTIXTAL
Type 275-M



I. F. FILTER UNIT

455 or 465 KC Filter for most intermediate frequencies in receivers. Rugged design, dust and moisture proof. Dimensions 1-3/16" x 1-3/8" x 5/8"—Crystal accurately ground for peak performance free from interfering spurious frequencies. 3/4" pin spacing for regular mount or standard 5-prong socket.

Type 220-F—Quotations on request.

THIRD HARMONIC OPERATIONS

This crystal has been engineered to supply an Amateur unit that is dependable on the 14MC or 20 meter operations. Mounted in a sturdy water and dust proof holder sealed with fibre gasket. Black phenolic holder, 1-1/2"x3/4"x1-3/4" (excluding pins). Solid stainless steel contact plates. Pins 1/8" in diameter, 3/4" from center to center. Stocked frequency range 14,000 to 14,500 furnished within 10 KC of desired frequency and .01% of frequency marked on crystal.

Type 208-TH—Power drive $10.00
Supplied with smaller mounting
Type 209-TH for octal socket $4.00

Prices subject to change without notice,

PR CRYSTALS SINCE 1934

2800 WEST BROADWAY—TELEPHONE 2760

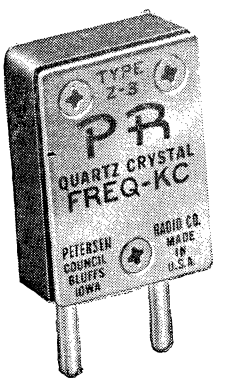
COUNCIL BLUFFS, IOWA

CRYSTALS FOR
Amateur 40 and 80 Meter Band
Type Z-2

Highly active low temperature coefficient units for 40 and 80. Low temperature coefficient, drift less than 2 cycles per MC. per °C. Calibration accurate to within .01% of stated frequency. Holder is small and compact, fits octal tube socket. Exact frequency (integral K.C. only) in amateur bands furnished at no extra cost.

TYPE Z-2 .....Net $2.65

Amateur 20 Meter Band
Type Z-3



Low temperature coefficient. High activity 20 Meter Crystal Unit. Temperature coefficient less than 2 cycles per MC. per °C. Oscillates on third Harmonic. Calibration accurate to within .01% of stated frequency. Exact frequency (integral K.C. only) in amateur 20 Meter band supplied at no extra cost.

Type Z-3 .....Net $3.50

10 Meter Amateur Band
Type Z-5

The first 10 meter low temperature coefficient crystal for the Amateur. Less than 2 cycles per MC. per °C. Operation guaranteed only when used in circuit furnished with each crystal, when so used, guaranteed against fracture. Calibration accurate to within .01%, fits octal tube socket.

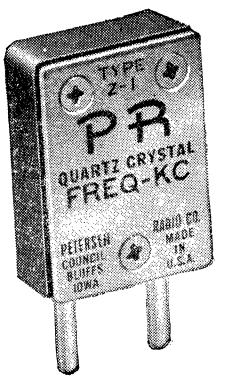
TYPE Z-5 .....Net $5.00

456 and 465 k.c.
Type Z-7

Excellent for the serviceman for aligning the I. F. in receivers, etc. Low temperature coefficient silver plated unit. Calibration accurate to within ± 1 K.C. Holder fits ordinary 5 prong tube socket.

TYPE Z-7 .....Net $5.00

Aircraft—Marine Police
Type Z-1



A precision low temperature coefficient unit that meets F.C.C. requirements for above services. Temperature coefficient less than 2 cycles per MC. per °C. Small, compact and rugged. ½" pin spacing fits octal tube socket. Two units may be plugged into same socket simultaneously. Calibrated to specified frequency within ± .005%. Frequency range 1000 K.C. to 10.5 MC.

TYPE Z-1 .....Net $10.00

TYPE Z-1A same specifications at type Z-1 except larger holder and ¾" pin spacing will fit 5 prong tube socket.

TYPE Z-1A .....Net $10.00

SPECIAL AIRCRAFT—3105 and 6210 Kcs. The Type Z-1 units are available in the above frequencies.

Net $5.00

Frequency Standard
Type Z-6

100 K.C. precision unit for Frequency Standard. Temperature coefficient less than 2 cycles per MC. per °C. Temperature control not required for ordinary use.

TYPE Z-6—100 K.C. .....**Net $7.50**

CHECK SUPERIORITY OF PR CRYSTALS

STABILITY—Drift characteristics of PR Crystals limited to less than 2 cycles per MC per degree. You get low drift combined with high output, dependable frequency control. X-Ray orientation guarantees uniform cut for maximum low-drift performance.

ACCURACY—Guaranteed accurate within .01 per cent of specified frequency or better. You KNOW where you are with PRs.

POWER OUTPUT—PRs are designed to give maximum power output from the exciter stage.

ACTIVITY—PRs give you high activity. They "come in" instantly, key without chirps. No excessive "backing off" necessary.

UNCONDITIONAL GUARANTEE—Every PR Precision CRYSTAL is guaranteed unconditionally by the makers of fine crystals since 1934.

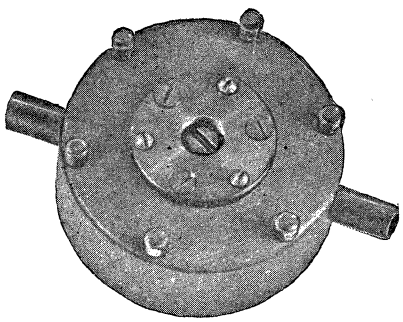
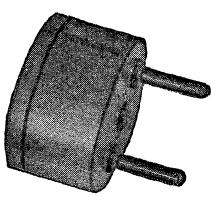
RSMC Crystals

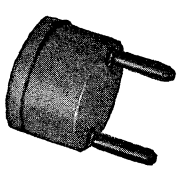
COVERING FREQUENCIES FROM 90 KC TO 35,000 KC FOR *Every* PURPOSE . . .



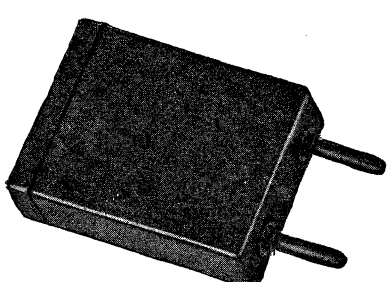
Type 1076



Type 1079
& 1080



Type 1044



Type 1075
& 1077

For 14 years RSMC crystals have been filling the industry's requirements for quartz crystals ground to the most rigid standards. Each crystal blank is from the highest grade Brazilian quartz and is carefully checked by X-ray diffraction methods during orientation. All crystals may be supplied with a temperature coefficient, better than 2 cycles per megacycle per degree centigrade, and normal current carrying capacity. Tolerance to .01% can be met over any reasonable temperature range. Crystals are processed to prevent ageing, and holders are hermetically sealed. Electrodes are made from highest grade stainless steel. All crystals *unconditionally guaranteed.*

BROADCAST AND FREQUENCY STANDARD

Type 1076 approved by FCC for use in broadcast transmitters and frequency standards. Air gap is adjustable. Crystal ground to specified frequency. Frequencies: 90 kc to 6000 kc.

MARINE CRYSTALS

This type crystal is available in type 1041 holders on any marine frequency. It may be supplied in type 1059 with banana pins on special order. Low drift with .02% tolerance.

AMATEUR CRYSTALS

Available in type 1071 holders for any amateur frequency. Tolerance within 1 kc. of specified frequency. Fundamental crystals are furnished to 20,000 kc. and third harmonic crystals from 20,000 kc. to 35,000 kc.

Price: to 10 mc. $2.65
to 20 mc. 3.50
to 35 mc. 4.75

AIRCRAFT CRYSTALS

Supplied in type 1071 holders for any aviation frequency. Tolerance .02%. Fundamental crystals furnished to 20,000 kc. and third harmonic crystals higher to 35,000 kc., simplifying design of new VHF equipment. CAA type certified crystals (CAATC No. 1015) furnished in type 1058-1-1 and 1058-1-2 holders (CAATC No. 1017) are available on request. Tolerance meets CAA specifications of .015%.

Type 1040

MOBILE AND POLICE CRYSTALS

This type crystal is supplied in type 1041, 1071 and 1072 holders. Tolerance .02% on any frequency from 1000 kc. to 35,000 kc. (Third harmonic type beyond 20,000 kc.)

GENERAL COMMERCIAL CRYSTALS

Available in type 1041, 1071, 1072, 1044, 1059, 1078, 1079 and 1080 holders. By special order they can be supplied in type 1075 and 1077 holders. May be ground to any tolerance required if type of oscillator circuit and constants are supplied with order. For frequency coverage see holder specification table.

CRYSTAL SOCKET ADAPTOR

Adapts new, small type 1071 and 1072 holders (FT-243) to ¾" crystal sockets. Saves re-wiring and re-vamping when new type holders are used in old equipment.

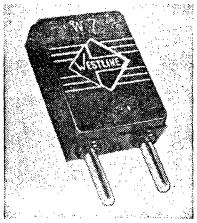
WESTLINE

QUARTZ CRYSTALS

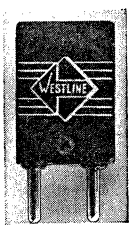


TYPE W7: Range 7.0 to 7.4 MC.

A highly active oscillator. Made for maximum performance in the 40 and 20 meter and higher frequency bands. Expertly designed and constructed . . . molded phenolic holder . . . stainless steel electrodes . . . copper contact plates . . . this unit offers the ultimate in precision and long life. We guarantee this crystal to maintain constant calibrated frequency. Drift is less than 1 cycle/MC/°F. Westline specially processed Units offer you this precision. Plugs into either octal or 5 prong socket, or 2 units can be plugged octal or 5 prong socket. Size of holder, 1⅛" x 13/16" x 7/16". Pin size 3/32": Pin spacing .483": Unit comes accurately marked to calibrated frequency.

Type W7: 7.0 to 7.4 MC: Supplied within 1 KC of desired frequency $3.50

From Dealer's Stock.....$2.80



TYPE W6: Range 6.0 to 6.75 MC.

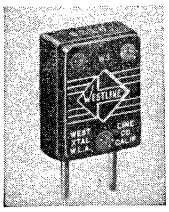
Another example of WESTLINE precision. These crystals will maintain constant calibrated frequency. Drift due to temperature change is less than 1 cycle/MC/°F. 8th harmonic falls into 50 to 54 MC band; 24th harmonic falls into 144-148 MC band; 36th harmonic falls into 220-225 MC band. Fine materials and expert craftsmanship gives you the finest unit that money can buy at competitive prices. Frequency accurately marked on holder. Plugs into either octal or 5 prong sockets. Size of holder, 1⅛" x 3/16" x 7/16": Pin size 3/32": Pin spacing .483": Two units will plug into one octal socket.

Type W6: Supplied within 1 KC of requested frequency $3.50

From Dealer's Stock.....$2.80

ONE YEAR REPLACEMENT GUARANTEE

Each WESTLINE unit is rigidly tested in our laboratory and is guaranteed for a period of one year against faulty construction.



TYPE W3: Range 3.5 to 4.0 MC.

Brazilian Quartz Crystal expertly processed by master craftsmen . . . mounted in molded phenolic holder. Stainless steel electrodes, nickel plated brass contact pins, copper contact plates, stainless steel spring, neoprene gasket. These are the reasons why WESTLINE UNITS maintain proper frequency. (Average frequency drift is less than 1 cycle/MC/°F.) That's why you get BETTER performance. Plugs into either octal or 5 prong socket. Two units will plug into one octal socket. Frequency accurately marked on holder. Size of holder, 1⅛" x 13/16" x 7/16": Pin size 3/32": Pin spacing .483".

Type W3: Supplied within 1 KC of frequency requested $3.50

From Dealer's Stock.....$2.80

TYPE WH14: Range 14.0 to 14.8 MC.

Three new units, especially designed and engineered by WESTLINE to operate in any circuit with plate tuned to the 3rd harmonic. Type WH14 oscillates in 14 MC band when used in oscillator with plate circuit tuned to 14 MC. Highly active, these units will give you top performance . . . at a price designed to fit your pocketbook. Supplied within 5 KC of requested frequency. Size of holder, 1¼" x 15/16" x 7/16": Pin size 3/32": Pin spacing .483": Plugs into either octal or 5 prong socket. Two units will plug into one octal socket.

Type WH14: 14.0 to 14.8 MC. Price $3.50

TYPE WH21: Range 21.0 to 21.5 MC. Oscillates in 21 MC band when used in oscillator with plate circuit tuned to 21 MC. Price.....$3.50

TYPE WH28: Range 28.0 to29.7MC. Oscillates in 30 MC band when used in oscillator with plate circuit tuned to 30 MC. Price.....$3.50

WESTLINE

QUARTZ CRYSTALS

WC-34

1500-18000 kc

A very stable-high activity-moisture proof unit for all types of equipment. ¾" blank mounted in stainless steel electrodes. Will stand severe abuse. Holder size is 1.375 x 1.375 x .500, pins fit 5 prong socket.

TYPE WC-34

Stock frequency $7.50

Other $9.50

WF-4

400-500 kc

For use in filter circuits of communications receivers. Supplied within ± 2 kc. Low capacity holder. Overall dimensions are .521 x .937 x .430 with solder lug attachments.

TYPE WF-4 .....$3.75

ONE YEAR REPLACEMENT GUARANTEE

Each WESTLINE unit is rigidly tested in our laboratory and is guaranteed for a period of one year against faulty construction.

DURO POWR G/B PATENTED

GENERAL DRY BATTERIES

General dry batteries contain many outstanding advancements such as extra heavy seamless extruded zinc cups, the famous paper thin separator permitting more mix and more active zinc area by utilization of the cell bottom. The curled rim lock seal which seals each cell individually. These features assure long shelf life as well as the maximum in dry battery performance.

GENERAL A & B RADIO FARM PACKS

General A-B packs are made with L size cells in the A section. These cells are 40% longer than the largest conventional 1¼" diameter cell. This construction assures the perfect balance between these "A" and "B" sections for current drains established by the Radio Industry.

GENERAL ABC HOME RADIO BATTERIES

All cells used in General batteries are filled with active mix by loading equipment developed by General which automatically puts the right amount of mix into each cell and packs it uniformly. General home radio batteries are accepted for their uniformity, dependability and long service.

GENERAL PORTABLE A&B PACKS AND A&B BATTERIES

The small size cells used in portable batteries greatly reflect the benefits derived from General's patented construction. General Batteries deliver more service hours per dollar, therefore you will find them used as original equipment in more battery radios than any other brand.

GENERAL FLASHLIGHT CELLS AND LANTERN BATTERIES

General Flashlight and Lantern batteries are designed to give brighter light and recuperate rapidly while idle. The Heavy Duty cells are made for moderate home use. The Industrial is to be used where light is needed frequently and for long periods.

Type	Voltage	Terminals	Std. Pkge.	Pounds Weight	Length	Width	Height	Price

GENERAL IGNITION BATTERIES, MULTIPLE AND ELECTRIC FENCE

All General batteries are designed to use the most efficient cells available. The 4L1 Hywatt is far superior in service and shelf life to any other battery of comparable size because it consists of four L cells, the service being about double that secured from the conventional No. 6 dry cell. These same L cells are used in the Electric Fence and Multiple batteries and produce most satisfactory performance. GENERAL Electric Fence batteries have no equal.

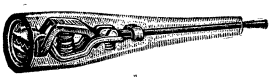
For use in making quick, temporary electrical connections. Packed 10 in a box, half marked + half plain to indicate polarity. Screw connections

No. 45 PEE WEE

A very small test clip for radio, ignition, meter and similar work. 1½" long. Jaw spread ⅜". Steel, cadmium plated.

EACH NET.....$0.06 LOTS OF 10.....$0.037



No. 45-C Clip
No. 47 Insulator

No. 45-C Solid Copper R.F. Test Clip

Solid copper radio frequency test clip. Phosphor bronze spring, brass screw. Will not heat up in high frequency test work, entirely non-ferrous. 1½" long.

EACH NET.....$0.08 LOTS OF 10.....$0.055

Use No. 47 Insulator for clips 45 and 45-C.

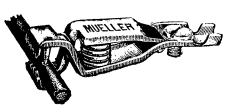
No. 48-B

A small test and battery clip for radio use and general testing purposes. 2" long. Jaw spread ½". Steel, cadmium plated.

EACH NET....$0.06 LOTS OF 10....$0.04

No. 48C—Solid Copper. Same size as 48-B.

EACH NET.....$0.10 LOTS OF 10.....$0.07



No. 82 Needle Clip

Needle pierces insulated wire. Ideal for quick hookup of truck trailer lighting systems, telephone and signal work. Steel, cadmium plated. 2" long.

EACH NET $0.14
LOTS OF 10.....$0.10

Use No. 49 Insulator for Clips 48-B, 48-C and 82.

No. 27

A high grade test clip with meshing teeth on three sides of jaws. For laboratory and shop test work 2 1/16" long. Jaw spread ⅝". Steel, cadmium plated.

EACH NET.....$0.10 LOTS OF 10.....$0.07

No. 27-C—Solid copper. Same size as No. 27.

EACH NET.....$0.17 LOTS OF 10.....$0.12

Use No. 29 Insulator for clips 27 and 27-C.

No. 24-A

A medium sized battery clip. Stands erect on battery post. Lead coated, copper shunt protects spring. 2⅞" long. Jaw spread 1". Steel, lead plated.

EACH NET $0.12
LOTS OF 10..... .08

No. 24—Solid copper. Same size as No. 24-A.

EACH NET.....$0.20 LOTS OF 10.....$0.14

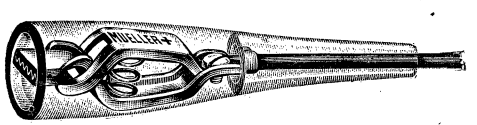
Use No. 26 Insulator for Clips 24-A and 24.

LARGER SIZES OF CLIPS

		Each Net	Lots of 10
No. 21-A	Heavy Duty Steel, lead plated, 4" long	$0.17	$0.12
No. 21	100 Amp. Solid Copper, 4½" long	.50	.35
No. 11A	100 Amp. Steel, lead plated. 6" long	.60	.42
No. 11	200 Amp. Solid copper. 6" long	1.00	0.70
No. 33	300 Amp. Solid copper. 7¾" long	1.80	1.25

(Above furnished with lug connections.)

FLEXIBLE INSULATORS FOR CLIPS



A convenient protection against short circuit and electric shock. Packed 10 in a box, 5 red and 5 black to indicate polarity. Long tail prevents breakage of wire. Constructed so that clip is held in firmly.

CROCODILE CLIPS

U.S. Patent No. 1,999,613

No. 85 or 85-C Clip with No. 87 Insulator

No. 85-T Clip

No. 85—A very small clip with slender, elongated jaws for getting into tight places in radio or electrical test work. Screw connection. 2⅛" long.

EACH NET.....$0.07 LOTS OF 10.....$0.045

No. 85-C—Same as No. 85, except solid copper. A radio frequency, entirely non-ferrous test clip.

EACH NET.....$0.10 LOTS OF 10.....$0.07

No. 85-T—New Crocodile "Tip-Clip"—equipped with standard phone tip on one jaw, otherwise same as No. 85. Ideal for use as a prod, for ordinary clip connections and for connections to insulated binding posts having non-removable heads. 2⅝" long.

EACH NET.....$0.14 LOTS OF 10.....$0.095

Use No. 87 Insulators for clips 85, 85-C and 85-T. Red and Black. Cover entire clip except nose. Protects against short and shock. Helps to distinguish leads.

ALLIGATOR CLIPS

No. 60—CONVENTIONAL TYPE

Accurately made, slim jaws, fine meshing teeth. Convenient, round thumb grip, barrel connection for banana plug. Equipped with small soldering lip. Strong spring with a hard bite. Cadmium plated. 2" long.

EACH NET.....$0.06 LOTS OF 10.....$0.04

No. 60-S—SCREW CONNECTION

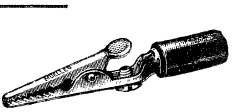
Eliminates necessity for soldering. Otherwise same as No. 60.

EACH NET $0.07 LOTS OF 10 $0.45

No. 60-CS—COPPER R.F. ALLIGATOR CLIP

Same as No. 60-S except made of solid copper. Has brass screw connection. Ideal for R.F. work. Will not heat up in H.F. circuits. Bright, natural copper finish. 2" long.

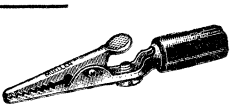
EACH NET.....$0.09 LOTS OF 10.....$0.06



No. 60-HS—STEEL ALLIGATOR CLIP WITH INSULATED HANDLE

Same as No. 60-S except equipped with red and black insulating sleeves on end. Very convenient for distinguishing leads. Has screw connection also. Cadmium plated. 2¼" long.

EACH NET.....$0.10 LOTS OF 10.....$0.07



No. 60-CHS—COPPER ALLIGATOR CLIP WITH INSULATED HANDLE

Same as No. 60-CS except equipped with red and black insulating sleeves on end. Brass screw connection, for R.F. work. 2¼" long.

EACH NET.....$0.13 LOTS OF 10.....$0.09

WEE-PEE-WEE No. 88

Entirely Non-ferrous. Smaller Than Ever! An extremely small clip for fine testing in radio and electrical work. Light-Weight; thin-nosed; spring-temper phosphor bronze. Ideal for close-wound coils. 1 1/16" long; jaw spread ¼".

EACH NET.....$0.15 LOTS OF 10.....$0.10

Use No. 93-P R.F.Insulator.

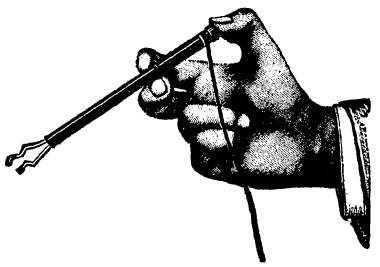
Mueller Electric Co.

THE SNAPPER

A Long Insulated Test Clip and A "Triple Threat" Radio Tool



U. S. Patent No. 2,074,324

No. 99—7" Long Insulated

The long tube is of insulating material and is fitted with spring contact jaws on the far end.

The jaws are operated by a push of the thumb on the near end. Wire is quickly and easily connected in a hole in the insulator knob binding post on the near end.

May be used as (1) A "Deep Sea' Electric Test Clip—test contacts with ease, deep in the recesses of radio chassis with no danger of short circuits; (2) An Electric Contact Prod—clip jaws may be used to make quick prod contacts, or clip one Snapper on ground circuit and prod with another; (3) A Retriever—start small screws and nuts or pick up odds and ends that may accidentally be dropped into inaccessible places.

PRICE....$0.80 EACH Dealers Wholesale Price, each....$0.48 Net

Snappers are generally used in pairs—1 red and 1 black.

INSULATED GRID CLIP ASSEMBLY

One Universal Clip That Fits Them All

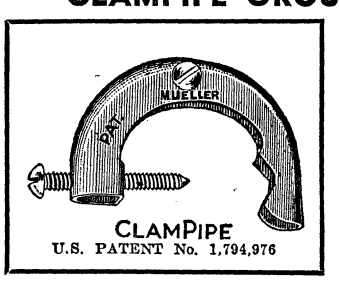
U. S. Patents Nos. 1,779,442-1,965,151

This assembly is made up of a Pee-Wee Clip with jaws specially constructed to give a firm grip on all sizes of grid caps, a rubber insulator over the clip, 10 inches of flexible, rubber-covered wire and a standard phone tip.

FEATURES: ● **Will Never Weaken or Break** ● **Bull-Dog Grip**—in either vertical or horizontal position, will not come off cap no matter how hard tube is pounded. ● **Will Not Injure or Break Grid Cap**—if clip itself is struck accidentally it will pull loose without damaging cap. ● **Wire Will Not Pull Loose from Clip**—soldered connection at both ends. ● **Quick and Easy Application**—fits all sizes of grid caps.

No. 106—Insulated Grid Clip Assembly.
EACH NET $0.22 LOTS OF 10 $0.15

CLAMPIPE GROUND CLAMP



No. 58

The exclusive patented feature of a U-shaped cross section in combination with a U-shaped clamp gives a rigidity and effectiveness to the ClamPipe that cannot be found in any other make.

The ClamPipe will not bend or lop over when applied to a pipe. The point of the large case hardened screw, cuts through rust, paint or corrosion into clean, fresh metal, insuring a good contact. The Clamp may be installed on a pipe lying flush against a wall. Will not spread open.

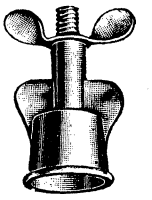
The best ground clamp value on the market. Applicable to pipe ⅜" to 1⅜" outside diameter.

Packed 10 in a box

EACH NET.....$0.11 LOTS OF 10.....$.075

BATTERY POST ADAPTER

For Making Non-Corrosive, Semi-Permanent Connections to Storage Batteries



No. 103

No. 103—Is simply pressed, not burned, on to battery post. The wire is quickly and easily connected under the thumb nut.

Made of non-corrosive antimonial lead. Ideal for use on battery operated home appliances.

Packed 10 in a box

EACH NET.....$0.21 LOTS OF 10.....$0.15

BATTERY CHARGING JUMPERS

No. 89—MUELLER CLIP JUMPER

A complete jumper, ready to use. Two No. 24-A clips and 14" of insulated wire.

Packed 10 in a box

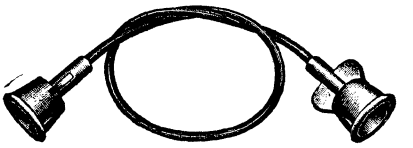
EACH NET.....$0.29 LOTS OF 10.....$0.20

No. 57—MUELLER TAP-TITE SPIKE JUMPER

Hard, pointed steel pins soldered to ends of wire and held firmly in lead coated steel jackets. Drive into battery posts.

Packed 10 in a box

EACH NET.....$0.26 LOTS OF 10.....$0.18



No. 38—MUELLER PRES-TITE JUMPER

Is simply pressed over battery posts. Made of non-corrosive, antimonial lead.

Packed 10 in a box

EACH NET.....$0.40 LOTS OF 10.....$0.28

BATTERY CARRIERS

No. 73—MUELLER "COCKEYED CARRIER"

No. 73—A rugged carrier with heavy, rubber covered strap which will stand plenty of abuse. To use, drop the end pieces over the battery posts and lift up. This cocks the eyes and they grab hold. The heavier the battery the tighter the grip. 12" long. Packed 10 in a box.

EACH NET.....$0.42 LOTS OF 10.....$0.30

NEW EXTRA LONG CARRIER

No. 73-EL—19" long. Ample length to take the new long batteries in some latest model cars. Same construction as No. 73. Packed 10 in a carton.

EACH NET.....$0.53 LOTS OF 10.....$0.37

ESPY INSTRUMENTS
GIVE YOU CONTROL OVER YOUR TEST CONDITIONS

Research and development laboratories are finding that Espy equipment gives them convenient, dependable accuracy in the control of test variables. The exacting standards maintained in design, workmanship, and materials give you confidence in your test methods. Assure accurate, reliable results by standardizing on Espy instruments for all your lab measurements.

MODEL P-11 REGULATED POWER SUPPLY

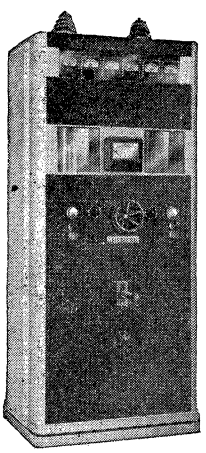
- continuously variable
- 0 to +400 v.d-c, 200 ma
- 0 to —150 v.d-c
- 6.3 v.a-c, 6 amperes
- 1.0% regulation
- metered output
- cabinet or rack mounting
- voltages available at both front and rear
- 105/125 v.a-c source
- $250.00 f.o.b. factory
- early delivery
- voltage connections isolated from ground
- SLO-DOWN circuit prevents initial voltage surge
- line and high voltage fuses on front panel

Model P-12 Regulated Power Supply

- 0 to +600 v. d-c
- 0 to 300 ma d-c
- other features same as Model P-11
- $375.00 f.o.b. factory

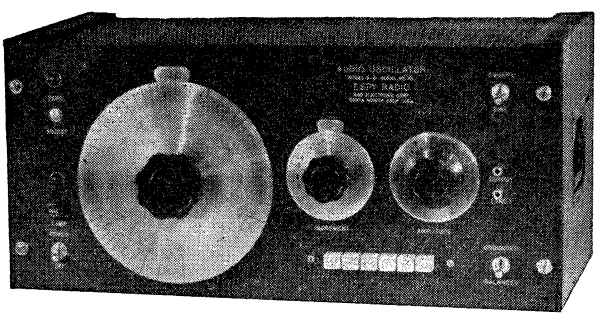
Model P-14 Regulated Power Supply

- +200 to +1000 v. d-c
- 0 to 500 ma d-c
- other features same as Model P-11
- $550.00 f.o.b. factory



CUSTOM BUILT REGULATED POWER SUPPLIES

We specialize in custom designed power supplies for such applications as magnetron, klystron, X-ray, and television equipment. Ask for details of our regulated laboratory master power supply system.



MODEL G-21 AUDIO OSCILLATOR

- 10-20,000 cps
- 5w max. output; 30v across 200 ohms
- 0.5% distortion
- 6 push button frequencies
- incremental dial
- less than 1% hum
- RC oscillator b.f.o. circuit
- cabinet or rack mounting
- ±2% frequency accuracy
- square wave output provided by toggle switch
- 105/125 v. a-c source
- output voltage maintained constant within 1.0 db
- $350.00 f.o.b. factory

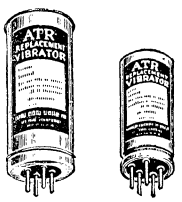
ATR INVERTER VIBRATORS

ATR Vibrators, the heart of vibrator-operated power supplies, are proven units of the highest quality, engineered to perfection. They are backed by more than twelve years of vibrator design and research, development and manufacturing—ATR pioneered in the vibrator field.



ATR Inverter Vibrators incorporate the following features:

- **Large Oversized** ¼" Diameter Tungsten Contacts having Full Wiping Action—for greater reliability and longer life.
- **Highest Quality** Spring Steel Reed—for uniform flexibility and prevention of reed breakage.
- **Highly Efficient** Magnetic Circuit with Formed Base—for greater accuracy and more uniform operation on both high and low voltages.
- **Mica and Metal Stack** Spacers with Bolted Stack Construction—for adjustment permanency under any operating condition.
- **Highest Precision** Construction and Workmanship—practically all parts are held to within a tolerance of 0.0005 of an inch.
- **When Ordering** ATR Inverter Vibrators for replacement, be sure to mention the type number, model number, and serial number of the ATR Inverter for which it is intended. Consult the ATR Inverter Vibrator Guide.

ATR Low Power INVERTERS

Illustrating all ATR Low Power Inverters except Types 6 and 12.

For Operating Small A. C. Motors, Electric Razors, and Devices of Approximately 35 watts Consumption from 6, 12, 24, 32, 110, and 220 volt D. C. Lines.

This line of ATR Low Power Inverters was specially brought out to meet the insistent demand for a good, low power, inexpensive portable Inverter for operating phonograph and other A. C. motors and a host of small A. C. devices from D. C. voltage sources. These Inverters operate at an efficiency in excess of 90% and are designed for operation of loads having a power factor as low as 60%. They are ruggedly built and powered by a special ATR six-contact plug-in Inverter Vibrator utilizing four ¼" diameter tungsten power contacts and two silver alloy driver contacts.

Type	Input D. C. volts	A.C. Output 60 cycles	Wattage		Code Word	List Price
			Intermittent	Continuous		
6 LIC	6	110 volts	35	25	ALICM	$21.50
12 LIC	12	110	50	35	BLICN	21.50
24 LIC	24	110	50	35	FLICR	25.00
32 LIC	32	110	50	35	CLICO	25.00
110 LIC	110	110	75	35	DLICP	21.50
220 LIC	220	110	75	35	ELICQ	25.00

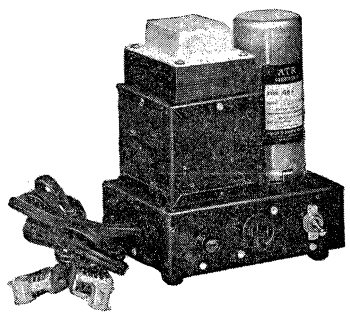
Radio frequency interference not suppressed. Built-in filter model available, $7.95 additional.

Protective cover, $2.00 additional.

Any of the above type Low Power Inverters are available with 220 volt A. C. output at prices 25% higher. In ordering, specify "S" after the type number and substitute for the last letter in the code word "T"; that is, if a 110 volt D. C. Low Power Inverter having a 220 volt A. C. output is desired, this would be ordered as Type 110S covered by code word, "DLICT".

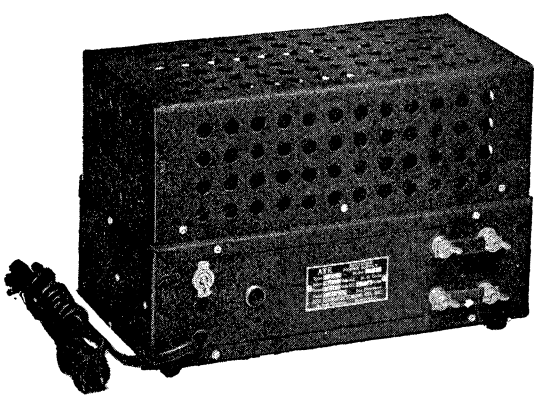
Dimensions, 5⅝" x 4" x 6⅝"; shipping weight, 6½ lbs.

Replacement Vibrators for any of the above Low Power Inverters are available. Be sure to mention the type number as well as model number when ordering. Consult Inverter Vibrator Guide.



Illustrating Types 6 and 12 Low Power Inverters only.

ATR "A" BATTERY ELIMINATORS



Illustrating Heavy Duty "A" Battery Eliminator, Type 120C ELIO.

Specially Designed for Testing D. C. Electrical Apparatus on Regular A. C. Lines, 105-125 Volts 50-60 Cycles

- Eliminates Storage Batteries and Battery Chargers.
- Operates the Equipment at Maximum Efficiency at all Times.
- Delivers Filtered Direct Current at the Correct Voltage for Proper Operation.
- Fully Automatic and Fool-Proof.

SUGGESTED USES:

As a power supply for radio sets, aircraft instruments, relays, motors and other electrical and electronic equipments. In the laboratory, for supplying various low D.C. voltages by simply using a rheostat in one side of the A.C. cord.

Battery Eliminators may be treated as batteries in the sense that they can be connected in series for higher voltages at the same current output per unit or in parallel for the same output voltage per unit at higher currents.

Equipped with Full-Wave Dry Disc Type Rectifier, Assuring Noiseless, Interference-Free Operation and Extreme Long Life and Reliability.

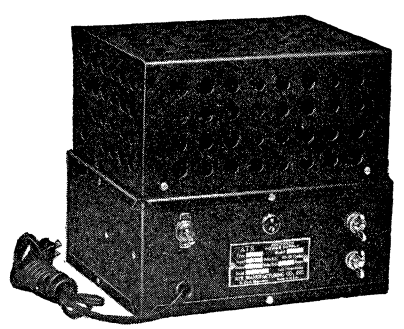
TYPE 60 ELIA—Rated output 6.3 volts at 6.5 amperes. Size 8"x6¼"x7¼"; shipping weight, 18¾ lbs. Code word "SELIA". List Price.....$38.00

TYPE 120C ELIO—Uses dual rectifiers. Size 11⅝"x6¼"x7¼". Shipping weight, 32 lbs. Code word "HELIM".

Rated Output: 6.3 volts at 14 amperes or 14 volts at 7 amperes. Either output obtainable by means of simple output terminal switching arrangement.

List Price $62.00

All ATR Eliminators have as standard equipment: On-Off Switch, Pilot Light Indicator, 10-Ampere Fuse, Rubber Mounting Feet, 6-ft. All-Rubber Cord Set, and Cabinet of heavy gauge metal having attractive black-wrinkled finish.



Illustrating Standard "A" Battery Eliminator, Type 60 ELIA.

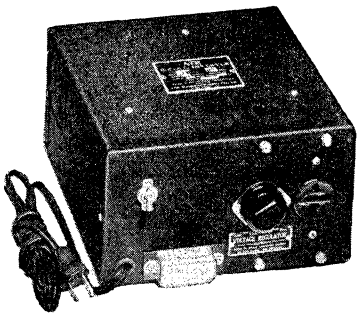
AMERICAN TELEVISION & RADIO CO.

ATR STANDARD AND HEAVY DUTY RADIO INVERTERS



Illustrating all Standard Types ATR Radio Inverters except Types 6 and 12. For Heavy Duty Styles—see cut below.

Specially Designed for Operating A. C. Radios, Public Address Systems, Television Sets, Amplifiers, Intercall Systems, and Radio Test Equipment from D. C. Voltages in Vehicles, Ships, Trains, Planes, and in D. C. Districts.

This group of ATR Inverters is especially recommended for use with A. C. radios, amplifiers, and similar electronic equipment, being exceptionally well filtered to insure interference-free radio reception. With ATR Inverters, the need for special equipment is eliminated. They are designed for quiet, long-life radio operation. All models indicated are equipped with an ATR ten-contact plug-in Inverter Vibrator of new design and construction having dual arms and utilizing eight ¼" diameter tungsten power contacts and two silver alloy driver contacts, insuring increased long life and reliable service. These Inverters also come equipped with four point voltage regulators, which make possible the correct output voltage for minimum to maximum loads and also help compensate for input voltages which are lower or higher than normal; the operating efficiency is in excess of 85%.

Type	Input D.C. Volts	A.C. Output 60 Cycles	Output Wattage		Code Word	List Price
			Intermittent	Continuous

220A-RSB	220	110/220	250	150	MRSBP	49.50

Radio frequency interference completely suppressed.

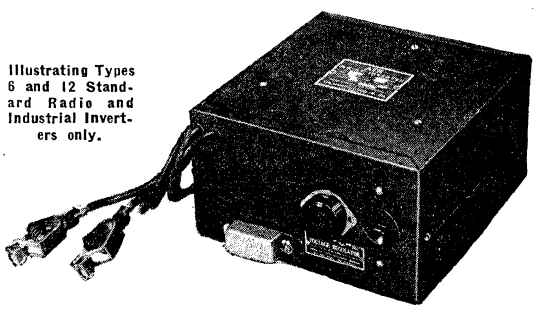
Any of the above type Inverters are available with 220 volt A. C. output at prices 25% higher. In ordering, specify "S" after the type number and substitute for the last letter in the code word "T"; that is, if a 110 volt D. C. Inverter having a 220 volt A. C. output is desired, this would be ordered as Type 110S covered by code word, "GRSBT".

ATR Standard and Heavy Duty Radio Inverters are housed in attractively finished black-wrinkled metal cabinets.

Dimensions of Standard Model Radio Inverters, 7⅞"x8-3/16"x4½"; Shipping weight, 17 lbs.

Dimensions of Heavy Duty Model Radio Inverters, 7⅞"x9⅝"x6¼"; Shipping weight, 26 lbs.

For correct replacement vibrator, consult Inverter Vibrator Guide.



Illustrating Types 6 and 12 Standard Radio and Industrial Inverters only.

ATR STANDARD AND HEAVY DUTY INDUSTRIAL INVERTERS

For Operating A. C. Motors, Electronic Apparatus, Electrical Testing Equipment, and A. C. Electrical Appliances from D. C. Lines.

These units are specially designed for applications as indicated, permitting the use of standard A. C. equipment on D. C. lines. These Inverters operate at an efficiency in excess of 80% and are carefully built and equipped to give the longest possible life and operating satisfaction. All Inverters indicated utilize ATR ten contact plug-in vibrators, and are also equipped with four point voltage regulators as fully described above. These Industrial Inverters are recommended for use with loads having power factors as low as 60%, and as low as 50% for the "P" Inverters indicated. These Inverters should not be used with Neon signs.

Illustrating Heavy Duty Models Radio and Industrial Inverters except types 6 and 12. Types 6 and 12 Industrial Inverters are illustrated by center cut above.

Type	Input D.C. volts	A.C. Output 60 cycles	Output Wattage		Code Word	List Price
			Intermittent	Continuous		
6 ISO	6	110 volts	85	75	AISOD	$38.00
12 ISO	12	110	125	100	BISOE	38.00
24 ISO	24	110	125	100	LISON	42.00
32 ISO	32	110	150	100	CISOE	39.50
32P*-ISO	32	110	150	125	DISOF	49.50
32B-IHO	32	110	200	180	EIHOG	59.50
110 ISO	110	110	250	150	FISOH	39.50
110P*-ISO	110	110	250	150	GISOI	49.50
110A-IHO	110	110	325	225	HIHOJ	57.00
110B-IHO	110	110	500	350	IIHOK	65.00
220 ISO	220	110	250	150	JISOL	42.00
220P*-ISO	220	110	300	150	KISOM	49.50

Radio frequency interference not suppressed.

Any of the above type Inverters are available with 220 volt A. C. output at slightly higher prices. In ordering, follow similar directions given above.

ATR Standard and Heavy Duty Industrial Inverters are housed in attractively finished black-wrinkled metal cabinets.

Dimensions of Standard Model Industrial Inverters, 7⅞"x8 3/16"x4½".

Shipping weight, 17 lbs.

Dimensions of Heavy Duty Industrial Inverters, 7⅞"x9⅝"x6¼"; shipping weight, 26 lbs.

For correct replacement vibrator, consult Inverter Vibrator Guide.

*"P" Inverters are corrected for loads having power factors as low as 50%.

Built-in filter, $10.00 additional.

Cyclohm POWER PLANTS

CYCLOHM POWER PLANTS, which proved their dependability and popularity with the Armed Forces of the Allied Nations, are now available for civilian use. Powered by Briggs & Stratton air-cooled gasoline engines . . . embodying the most advanced features of power unit design. Known for their efficient, dependable performance as LIGHTING PLANTS (portable or stationary) for homes, boats, fisheries, farms, mines, camps, etc. . . . BATTERY CHARGERS for mechanized equipment, industrial works, radio, farms, boats, mobile repair plants, truck fleets, etc.

The following optional equipment is available at additional cost: — ignition radio shielding — carrying handle — battery charging cables with terminals in lengths of 3, 9 and 15 feet — connections and flexible hose for exhaust extension — remote control starting and stopping — vibration insulated sub-base — fungus proofing — stellite faced valves and seats for operation on highly leaded fuels.

DYNAMOTORS CONVERTERS **Carter** MAGMOTORS GENERATORS

CARTER—the oldest name in Rotary Power Supplies for mobile radio

CARTER SUPER DYNAMOTOR

The Carter Super Dynamotor is widely acclaimed as the finest and most reliable Power Supply by leading Communications Equipment Manufacturers, Engineers, Police Departments, Government Agencies, etc. Exacting care in the selection and design of armature, brushes, commutators, bearings, and other component parts, assures trouble-free, efficient operation. Excellent regulation, minimum AC ripple, easy to filter and install.

SUPER DYNAMOTOR
8¼" long, 4½" wide, 4¾" high, weight 13 lb.

Code No.	Input Volts	Input Amps	Output Volts	Output M.A.	Duty	List Price

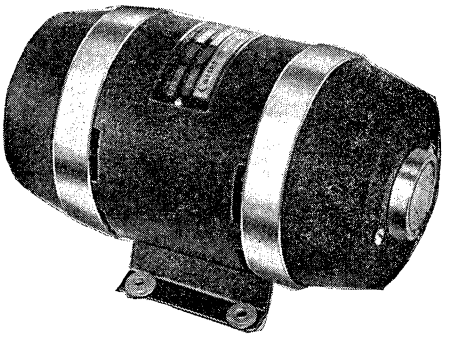
BS1250	12	20.5	1000	250	Int.	125.00

Multi Output Super models for two or three outputs available. Other outputs to 3000 volts. Add "X" to code No. for filter, $27.50 extra. Add "R" to code No. for starting relay, $8.00 extra. Above models avaliable from 5.5 to 115 volts DC input.



CARTER SUPER DYNAMOTOR

CARTER GENEMOTOR

The oldest Genemotor in continuous production! That's the record of the Carter Original Genemotor. Available in 3 frame sizes, it is the recognized standard Power Supply of Police Radio, Aircraft, Amplifier, and Marine radio equipment. Minimum ripple, efficient and dependable. Complete filter and starting relay available as illustrated.

1½" frame, 5 9/16" long, 4⅛" wide, 3½" high, weight 7 lbs.

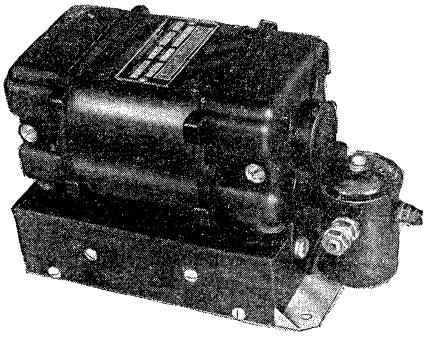
620AS	6	32.0	600	200	Int.	64.50

Add "X" to code No. for filter. 1½" and 2" frame $24.00 extra. 3" frame, $25.00 extra. Add "R" to code No. for starting relay, $8.00 extra. Available from 5.5 to 115 volt DC input.



CARTER ORIGINAL GENEMOTOR

CARTER SUPER CONVERTER

The Carter Super Converter is a small, compact, quiet running, two pole, 3600 RPM fan-cooled unit for changing DC to AC. This long life double-wound type unit is ideally suited for non-inductive loads such as radio equipment, public address systems, musical instruments, testing devices, small signs, etc. Available in 85% to 100% Power Factor only, ball bearing equipped, from 40 to 250 watt capacities.

8¼" long, 4½" wide, 4¾" high, weight 13 lbs.

Code No.	Input Volts	Input Amps	Output Volt	Output Volts-Amps	List Price
D1080C	115	1.3	110	80	$52.00
D1010C	115	1.9	110	110	54.75

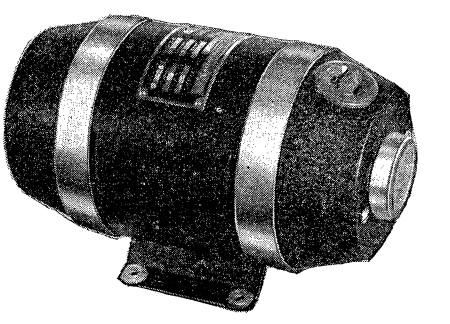
	HV FRAME, 10¼" long, 4½" wide, 4¾" high, weight 19 lbs.				
D1020C	115	2.9	110	200	$68.00
D1025C	115	3.5	110	250	70.00

Add "X" to code No. for filter, $25.00 extra. Above Converters available from 12 to 115 volts DC input. 6-volt models available up to 150 watts output. Frequency Controlled models available on special order.



CARTER SUPER CONVERTER

CARTER MAGMOTOR

The exclusive patented Permanent Magnet field design of the Carter Magmotor permits higher efficiency, longer life, and greater output from a small, compact frame.

The preferred Power Supply for Police Mobile FM and AM receivers, small aircraft transmitters. Low drain, ball bearing equipped.

5⅝" long, 3 11/16" wide, 2½" high, weight 4¾ lbs.

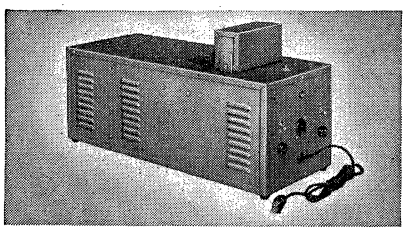
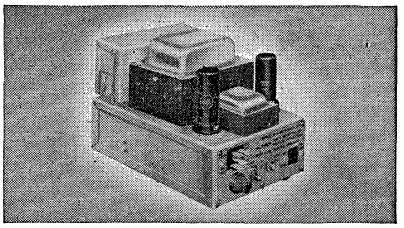
E-L VIBRATOR CONVERTERS RECTIFIER PACKS FREQUENCY CHANGERS



801 *A typical standard E-L frequency changer. Input: 115 volts AC, 25 cycle; Output: 115 volts AC, 60 cycle; Output power: 100 watts; Dimensions: 19⅝" x 8¼" x 10"; Weight: 29 pounds.*



619 *A typical E-L standard vibrator converter for transmitter application. Input: 6 volt DC and 115 volt AC; Output: 300 volts DC; Output power: 60 watts; Dimensions: 9¾" x 5¾" x 6": Weight: 14½ pounds.*

E-L Vibrator Converters have been designed to make possible the operation of equipment requiring high DC voltages from 6, 12 or 24 volt storage batteries. Offered in an extensive line of models, there is a Standard E-L Converter for every popular application, including the provision of plate and grid supply of radio receivers and transmitters in stationary, portable, or mobile applications, public address systems, communications equipment, electrical and electronic test equipment, and the like.

RECTIFIER PACKS

The rectifier pack is a power supply with an AC input and DC output, and is useful in electrical and electronic laboratories as well as in radio service shops.

FREQUENCY CHANGERS

A frequency changer is a vibrator power supply with an AC input of one frequency, and an AC output of a different frequency. This makes possible the use of standard 110 volt 60 cycle AC equipment, such as amplifiers, public address systems, etc. from 110 volt AC of different frequency.

SPECIAL FOR AMATEUR PORTABLE MOBILE RADIO OPERATION

2606 *A brand new improved E-L portable amateur radio power supply, completely filtered with hum-free output. Input: 6 volts DC at 8 amps.; Output: 300 volts DC at 100 ma; uses vibrator number 1823. Dimensions: 4¼" x 4⅞" x 5¼"; Wt.: 5 lbs. 2 ozs.*

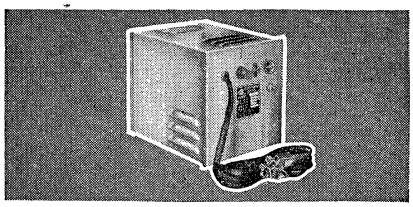
VIBRATOR INVERTERS
DC TO AC POWER CONVERSION

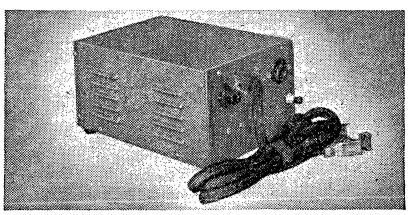
For EFFICIENCY ECONOMY SERVICE

Changing the characteristics of electric power is the job of E-L Vibrator Power Supplies. Available for applications up to 1500 watts, they have established an outstanding record of efficiency and economy in accomplishing these basic power conversions: Inverters for changing direct current to alternating current; Rectifier Packs for changing alternating current to direct current; Converters for increasing or decreasing DC voltages as desired, and Frequency Changers for changing frequency of alternating current.

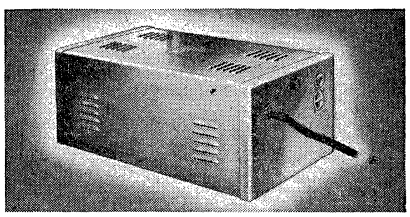
E-L Vibrator Inverters have been designed to make possible the operation of standard 115-volt AC equipment and appliances from various DC voltages. Offered in an extensive line of standard models, there is an E-L Inverter for every popular application, such as the operation of radio receivers and transmitters, public address systems, intercommunication systems, coin-operated equipment, motors, electrical appliances, refrigerators, etc.



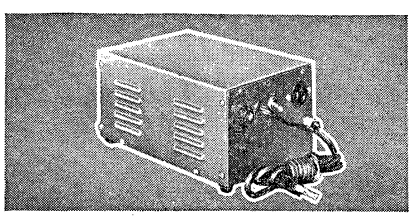
307 *A standard E-L vibrator inverter operating on 115-volt AC equipment (up to 100 watts) from 6-volt storage batteries. Input: 6 volts DC; Output: 115 volts AC; Output power: 100 watts (max.); Dimensions: 10¾" x7½"x8¼"; Wt.: 23½ lbs.*



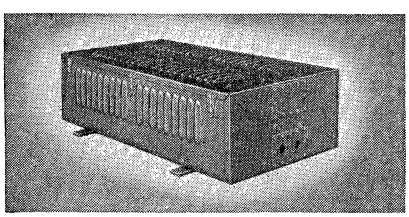
502 *A typical E-L standard vibrator inverter operating on 12 volts DC for powering radio receivers and electric appliances. Input: 12 volts DC; Output: 115 volts AC; Output power: 100 watts; Dimensions: 9⅜" x 6⅜" x 4⅜"; Weight: 14½ pounds.*



146 *A standard E-L vibrator inverter operating on 32 volts DC for powering radio receivers and transmitters, coin phonographs and other equipment which demands 350 watts power. Input: 32 volts DC; Output: 115 volts AC; Output power: 350 watts; Dimensions: 16" x 10" x 8⅜"; Weight: 48 pounds.*



204 *A standard E-L vibrator inverter operating on 115-volt DC source. Especially useful in DC areas existing in large cities, as well as with Marine and Farm power plants producing 115 volts DC. Input: 115 volts DC; Output: 115 volts AC; Output power: 150 watts (max.); Dimensions: 9⅜"x6⅜"x4⅝"; Wt.: 12½ lbs.*



268 *A standard E-L vibrator inverter with output power of 750 watts operating on 115-volts DC for powering radio transmitters, electric motors and appliances. Input: 115 volts DC; Output: 115 volts AC; Output power: 750 watts; Dimensions: 20⅛"x11¾" x7½"; Wt.: 66 lbs.*

Auto · Radio VIBRATORS

4 E•L Models Service 95% of Current Replacement Demand

Typical E-L Auto-Radio Replacement Vibrator

The E•L "BIG FOUR"

		LIST
Model 1703 Services	755 Auto Radios	$4.10
Model 2041 Services	9 Auto Radios	4.10
Model 2689 Services	52 Auto Radios	4.10
Model 2092 Services	20 Auto Radios	6.90

● E•L has led the way in the standardization and simplification of auto-radio vibrators with its outstanding new line. Just 4 E•L Models will service 95% of the current demand for auto-radio vibrator replacement! Also, E•L makes available nine additional models, which, together with the four volume leaders, provide exact replacements for *all* current auto-radio demands. Here's simplification that really counts—reducing vibrator inventories over *two-thirds*—speeding up turnover—and increasing profits in vibrator sales!

● E•L Auto Radio Vibrators leave nothing to be desired in service and performance. Embodying many improvements in design and construction, developed during the war, they produce life and operating characteristics far superior to the best that was known prior to the war.

Write for full information on E•L Auto Radio Vibrators. They'll please your customers . . . build your business . . . and make you money!

A complete Vibrator Replacement Guide is available. It lists alphabetically every auto radio model serviced by E-L Vibrators, and the proper E-L Vibrator Model Number.

These E•L Vibrator Models Plus the "Big 4" Provide Exact Replacements for all Current Auto Radios

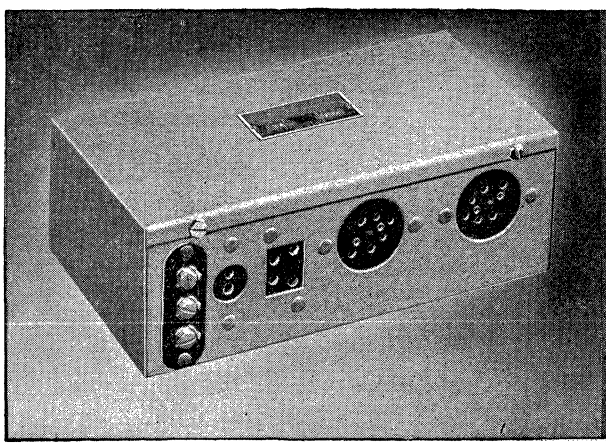
ELECTRO ELECTRICAL AND RADIO EQUIPMENT

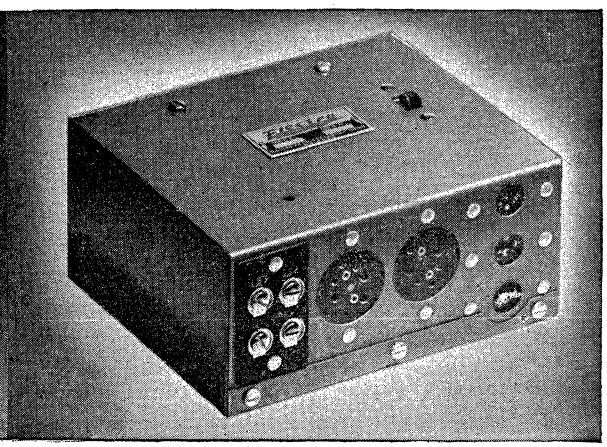
BATTERY ELIMINATORS *of Distinction*

ELECTRIFY *with* ELECTRO

Now battery radio reception can be enjoyed at its best without the usual grief and expense incurred when using batteries. Radio can be used for unlimited periods without fading. Costs but a few cents per hundred hours of operation.

FOUR TYPICAL MODELS are shown on this and the following page. These are ruggedly constituted units of unusually long life—easy to install—no liquids to spill—no moving parts to get out of order and wear out—operate in any position. Completely filtered, hum free and silent in operation. Universal plugs and sockets are provided to accommodate any radio. All units durably finished in blue crystallac.





MODEL "Q" SYNCRO POWER

Operates Any 1.4 Volt—4, 5, or 6 Tube Battery Radio from 6 Volt D.C. Source

This Eliminator is to be used where 115 volt A.C. lines are not available. Will provide all "A" and "B" voltages more efficiently and at lower cost from 6 volt battery. Will operate a 4-tube radio three weeks at 3 hours a day on a single storage battery (100 A.H.) charge. Low battery drain—one-eighth that of ordinary auto radio—one-third that of 6-volt farm radio. Excellent for use at farm, summer cottage or camp, in automobile, motor boat, etc.

Technical Data

"A" Supply Output

5-6 tubes (average)	1.4 V. @ 320 ma.
4 tubes	1.4 V. @ 250 ma.
4 tubes	1.4 V. @ 200 ma.

"B" Supply Output

90 Volts D.C. @ 12 ma. (max.)

Primary

6 Volts D.C. @ 0.8 amp. (for 4 tube radio).

Specifications

Cord and battery clips on primary.
On and Off switch in Eliminator turns power on.
Size: 5″ x 5″ x 2⅜″.
Weight packed: 3½ pounds.

LIST PRICE $16.50

MODEL "R" SYNCRO POWER

Operates Any 2 Volt—4, 5, 6 or 7 Tube Battery Radio from 6 Volt D.C. Source

Ideal for use where 115 volt 60 cycle lines are not available. Provides "A" and "B" power for portable radios for 3 weeks at 3 hours per day from single 100 A.H. storage battery charge. For use with 1A4, 1C7, 1D5, 1E5, 1F5, 1F7, 1G5, 1H4G, etc. Permits longer use of portable radios at less cost and with greater volume. Fine for use at the farm, summer cottage, camp, in motor boat, trailer or auto.

Technical Data

"A" Supply Output

7 tubes	2 V. @ 480 ma.
6 tubes	2 V. @ 420 ma.
4-5 tubes (average)	2 V. @ 325 ma.

"B" Supply Output

67, 90, 112, 135 volts @ 18 ma. (max.).

Primary

6 Volts D.C. @ 1.2 amps. (for 4 tube radio).

Specifications

Cord and battery clips on primary.
On and Off switch in Eliminator turns power on.
Size: 5½″ x 5″ x 2⅜″.
Weight packed: 3½ pounds.

LIST PRICE $18.95

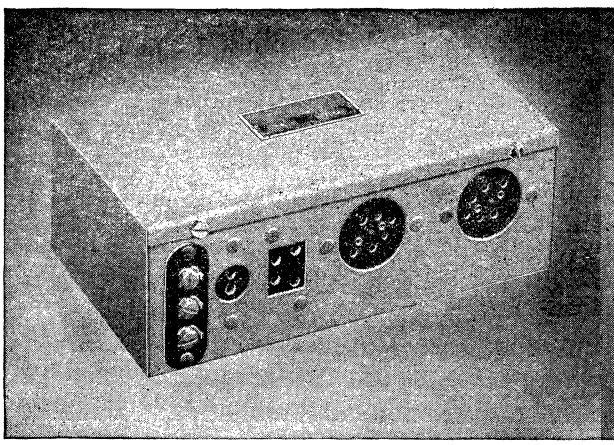
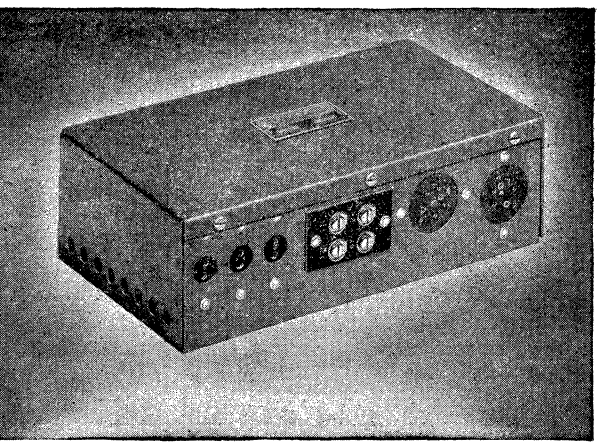
BATTERY ELIMINATORS *of Distinction*

ELECTRIFY *with* ELECTRO

Now battery radio reception can be enjoyed at its best without the usual grief and expense incurred when using batteries. Radio can be used for unlimited periods without fading. Costs but a few cents per hundred hours of operation.

FOUR TYPICAL MODELS are shown on this and the preceding page. These are ruggedly constituted units of unusually long life—easy to install—no liquids to spill—no moving parts to get out of order and wear out—operate in any position. Completely filtered, hum free and silent in operation. Universal plugs and sockets are provided to accommodate any radio. All units durably finished in blue crystallac.





MODEL "P" COMPACT

Operates Any 1.4 Volt—4, 5, or 6 Tube Battery Radio from 115 Volt 60 Cycle Source

Designed for sets using 1A7, 1E4, 1N5G, 1N5G, 1Q5G, etc., tubes to convert battery radio to an efficient AC receiver with low operating cost. Fits in battery compartment of most radios. Ideal for use in home, hotel, camp or any place where normal AC is available.

Technical Data

"A" Supply Output

5-6 tubes (average)	1.4 V. @ 320 ma.
4 tubes	1.4 V. @ 250 ma.
4 tubes	1.4 V. @ 200 ma.

"B" Supply Output

90 Volts D.C. @ 12 ma. max.

Primary

115 Volts A.C. @ 60 cycles.

Specifications

Six foot card and plug—switch in cord.
Size: 2⅜" x 3½" x 6¾".
Weight packed: 3½ pounds.

LIST PRICE $15.00

MODEL "F" COMPACT

Operates Any 2 Volt—4, 5, 6 or 7 Tube Battery Radio from 115 Volt 60 Cycle Source

For use in receivers employing 1A4, 1C7, 1D5, 1E5, 1F5, 1F7, 1H4G, etc., tubes to change radio into an all-electric set giving maximum performance at all times. Inexpensive to operate. Excellent to use when AC current is available and save batteries for occasions when used as portable.

Technical Data

"A" Supply Output

7 tubes	2 V. @ 480 ma.
6 tubes	2 V. @ 420 ma.
4-5 tubes (average)	2 V. @ 325 ma.

"B" Supply Output

67, 90, 112, 135 Volts D.C. @ 18 ma.

Primary

115 Volts A.C. @ 60 cycles.

Specifications

Six foot card and plug—switch in cord.
Size: 2⅜" x 4½" x 8¼".
Weight packed: 5½ pounds.

LIST PRICE $17.95

Take advantage of the High Line.
Convert Battery Radios to All-Electric Operation.

PERMA-POWER

(the Improved Porta-power)

★ **GUARANTEED electrically for 3 years.**

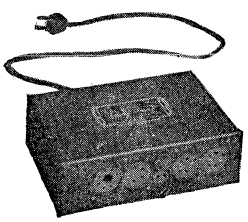
★ **YEAR AFTER YEAR** of trouble-free performance.

★ **SELENIUM RECTIFIERS.** No tubes.

★ **RADIO PLAYS IMMEDIATELY.** No warm-up period required.

★ **HUM-FREE** operation of 4, 5 or 6 tube, 1½ volt farm or portable battery radios from 105-125 volt, 50-60 cycle lines.

Model "A"



for 1½ volt radios of 4, 5 or 6 tubes

Circuit designed for optimum voltage regulation and changes in line voltages. Supplies all needed power.

Universal sockets for all battery plugs.

Fits in 99% of all portables as well as all farm battery radios.

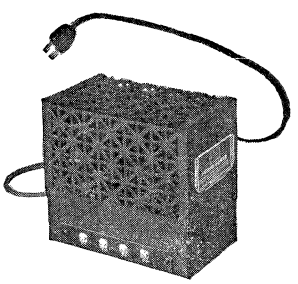
PROVIDES:
"A"—1.5v at 200 m.a.
1.35v at 250 m.a.
1.55v at 300 m.a.
1.35v at 350 m.a.
"B"—90v at 13 m.a.
101v at 8.5 m.a.

List..... $16.75

Size 2⅛ x 4½ x 6¾"
Shipping Weight 4 pounds.

Model "B"

FOR 6 VOLT RADIOS "TWIN-POWERED"



CONVERTS 98% of all 6 VOLT RADIOS

Vibrator disturbance is eliminated and high fidelity performance assured by sensational new design having *two isolated sources;* one for the vibrator and one for the filaments.

Provides two sources of 6 volts at 1½ amps. or connected in parallel 3 amps—Screw type terminals.

List..... $19.95

Shipping weight approximately 7 lbs.
(Size: 3⅝" x 6⅛" x 5½")

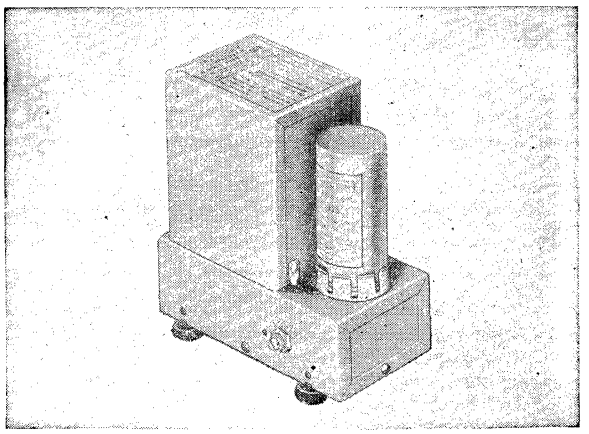
GUARANTEE

This unit is guaranteed against electrical failure for three years from date of manufacture, provided it has been used for the purpose for which it is intended and has not been abused. This guarantee does not cover mechanical breakage of parts.

Our liability under this guarantee is limited to repair or replacement only.

P. R. MALLORY & CO. INC. MALLORY VIBRAPACKS* (Vibrator Power Supplies)

*REG U. S. PAT. OFF.



TYPE VP-552

● Vibrapacks are the ideal vibrator power supplies designed for providing dependable and low cost high voltage direct current from a low voltage storage battery. Proved efficient and dependable by more than ten years of actual field service. Available in various types and sizes, with outputs up to 60 watts at 300 and 400 volts.

Outstanding Advantages:

1. High efficiency—low battery drain.
2. Dependable—trouble free—time-tested in thousands of installations.
3. Low cost—low maintenance.
4. Compact—light in weight.
5. Ease of installation.
6. Flexibility. Single unit Vibrapacks can be adjusted to give 4 output voltage ranges each.

Applications

Vibrapacks are widely used for furnishing "B" power in the following applications:

Automobile receivers—police, sheriff, amateur short wave, etc.

Aircraft and marine receivers and transmitters.

Farm receivers.

Police mobile two-way equipment.

Automobile P. A. systems.

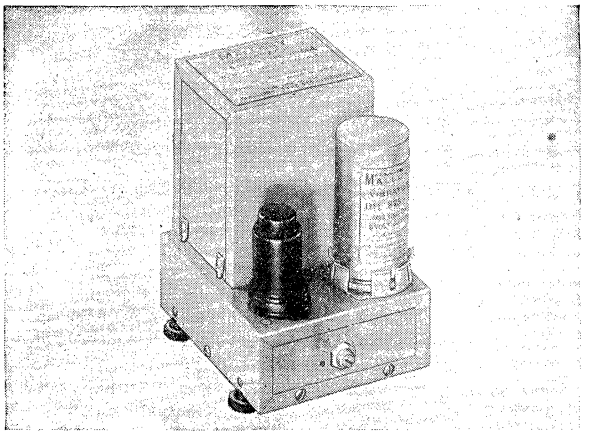
Military, lighthouse, and forestry service radio communication apparatus.

Miscellaneous electronic applications where commercial power is unavailable.

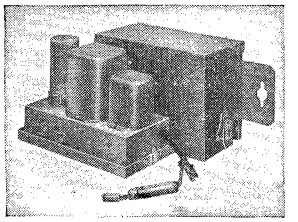
Catalog Number	Nominal Operating Voltage	Nominal Output Voltage	Maximum Output Current	Type	List Price
VP-551	6.3	125-150 175-200	100 ma.	Self-Rectifying	$18.50
VP-552	6.3	225-250 275-300	100 ma.	Self-Rectifying	22.50
VP-553	6.3	125-150 175-200	100 ma.	Tube Rectifier	19.50
VP-554	6.3	225-250 275-300	100 ma.	Tube Rectifier	23.50
VP-555	6.3	300	200 ma.	Tube Rectifier	46.00
VP-557	6.3	400	150 ma.	Tube Rectifier	46.00
VP-G556	12.6	225-250 275-300	100 ma.	Self-Rectifying	23.50
VP-F558	32.	225-250 275-300	100 ma.	Tube-Rectifying	24.50

NOISE SUPPRESSION

● Vibrapacks are equipped with complete, built-in noise suppression equipment. Type VP-555 also includes an efficient low-frequency hum filter. Type VP-557 incorporates the first input filter condenser only. Other Vibrapacks do not include the high voltage hum filter. High voltage filter requirements are similar to equivalent AC power packs.



TYPE VP-554



TYPE VP-540

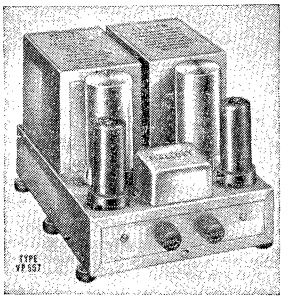
● Designed for use as a complete "B" power unit for automobile, airplane, and marine service. May be used to operate long wave, broadcast-band, and short wave receivers, or any electronic device within its load capabilities. Rigid anchorage of components permits satisfactory operation under conditions of considerable vibration. Completely filtered for both RF and audio so that the hum and hash level is extremely low.

Universal mounting, any position, with horizontal preferred. VP-540 is of the synchonrous, or self-rectifying type. Nominal output, 250 volts at 60 ma. Nominal input, 6.3 volts. Size 7½ x 3 15/16 x 5⅛" high, exclusive of mounting brackets and leads. Weight, 7 lbs., 14 oz.

No. VP-540 Vibrapack. List price..... **$26.00**

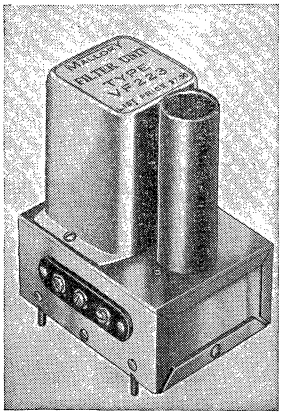
TYPES VP-555, VP-557

(See listing at left)



● Special Dual Packs for high output. Tube rectifier types permit "B—" to be isolated from ground if desired. Output voltages indicated are nominal. Actual average output voltages at various loads will be found in the graphs of our Form No. 555E, when operated at rated terminal voltage. Vibrapacks are supplied complete with special Mallory vibrator. Rectifier tubes included in the interrupter types.

TYPE VF-223 AUDIO FILTER



● A complete audio filter system for use with all single-unit Vibrapacks. Designed to give maximum suppression of hum with minimum voltage drop. Especially recommended for applications which are sensitive to hum, or where voltage regulation is important as in Class "B" audio amplifiers.

No. VF-223 Filter.
List price.....$8.00

MALLORY REPLACEMENT VIBRATORS

● Mallory Vibrators are better than ever today—and here's why:

—Heavy frame holds springs in permanent alignment
—Extra heavy cans insure better sound deadening
—High-grade clock spring steel eliminates reed breakage
—Precision measurements in increments of .0001″ insure long life
—105-strand lead wire defies vibration—connections stay intact
—Optical adjustment methods insure accuracy not obtainable with unaided eye
—Individual testing for output, starting voltage and wave form assures high quality

There is a Mallory Replacement Vibrator for most automobile receivers and vibrator-powered equipment.

For recommendations by receiver make and model number, see your distributor for the Mallory Vibrator Guide, or consult the 5th Edition Mallory Radio Service Encyclopedia.

MALLORY REPLACEMENT VIBRATOR GUIDE

● Bigger and better than ever before, this Vibrator Guide lists replacements for all prewar auto radios and is sectionalized for quick reference. It includes a new section on buffer capacitor circuits . . . another section on servicing old radios that need obsolete or discontinued types of vibrators . . . even information on vibrator power supplies. No charge.

MALLORY REPLACEMENT VIBRATORS

These Mallory Vibrators Meet 90% of Your Replacement Needs

● The 12 basic vibrator types listed at right cover 90% of your replacement needs. The entire line of Mallory Vibrators has been simplified so that replacements can be made easily and quickly. By effecting substitutions, Mallory is materially reducing the number of vibrators needed to meet your requirements.

This Mallory standardization program means that your distributor will stock fewer vibrator types and more units of each—thus delivery will be tremendously speeded up.

The vibrator replacement problem is being simplified but Mallory quality remains the same. Mallory precision vibrators, backed by years of outstanding performance, still offer the dependability, the long life and the trouble-free service that you and your customers expect. It pays to insist on Mallory Approved Precision Products.

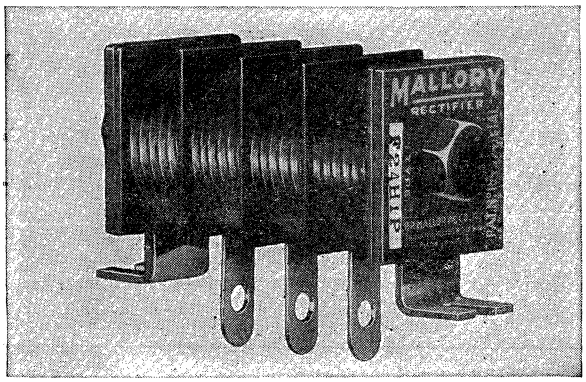
MALLORY DRY-DISC RECTIFIERS • BATTERY CHARGERS



RECTIFIERS DRY-DISC TYPE

● Low voltage, direct current—from a watt to kilowatts—is easy and economical to obtain with Mallory Magnesium-Copper Sulphide Rectifiers.

For battery charging, electroplating, energizing magnetic chucks, there is no substitute for direct current. There are countless other applications where it does a better job than alternating current. They range from operating train models to powering motion picture arc lights. High gain speech amplifiers, for instance, can be made more hum-free by operating the tube heaters from DC Solenoids and electromagnets operate smoothly and without chattering when powered by direct current.

Full details are incorporated in Form R-615A, available without charge from your Mallory distributor or from the factory. Inquiries from manufacturers whose products employ dry-disc rectifiers are also invited.

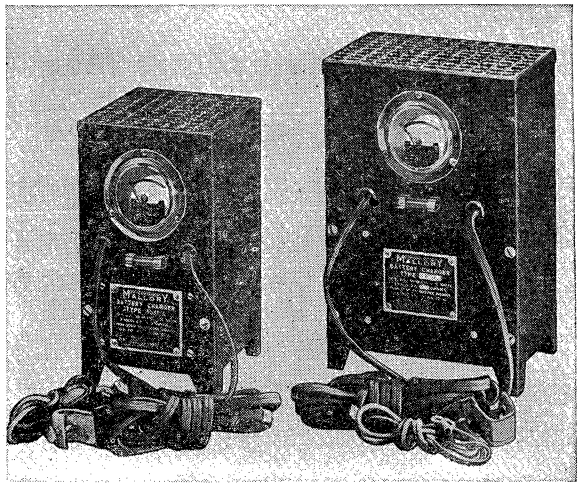
IB4R • IB8R

ULTRA-COMPACT RECTIFIERS

● These midget rectifiers, measuring 9/16-inch in diameter and 7/8-inch overall height including terminals, have been widely used during recent years in battery eliminators, power packs and similar equipment. For complete electrical specifications of their use on specific types of loads—inductive, resistive, capacitive and taper charging—refer to Booklet R-615A.

No. IB4R. Replaces similar rectifier supplying filament power in packs (GTC Porta-Power, Electro Battery Eliminators, etc.) for conversion of 1½-volt portable or farm radios, of 4, 5 or 6 tubes, to 105-125 volt 50-60 cycle lines. List price each..... **$1.75**

No. IB8R. Similar to IB4R but with eight rectifying junctions instead of four. Maximum AC volts (115 volt line or equivalent), 7.2 at no load, 6.44 operating. Maximum intermittent DC amps., 5. List price each..... **$2.40**

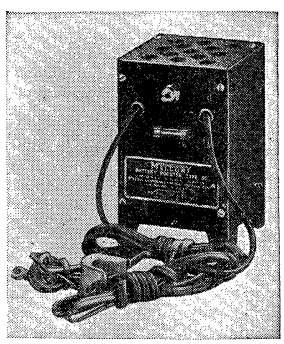


TYPE 5535B TYPES 107 and 125

BATTERY CHARGERS

● Mallory Chargers and Boosters are designed primarily for charging automobile storage batteries. For this purpose they are provided with clamp-on dash receptacle and plug for easy attachment to any automobile, truck, bus, taxi-cab or trailer. They offer a simple, economical and dependable method of keeping the battery charged to give prompt starting on cold mornings and to provide an abundance of current for lights, radio, heater and other accessories.

Mallory Chargers and Boosters are also ideal for charging storage batteries used in small boats, farm radios, laboratories, and aircraft. They are designed to operate from 115 volts, 50-60 cycles, and to automatically provide a tapering charge; that is, a high charging rate into a discharged battery, the rate gradually decreasing as the battery becomes charged and a safe charging rate when the battery is fully charged. Mallory Chargers and Boosters are equipped with an automotive type fuse which protects the charger from improper connection to the battery and from serious overloads. The fuse is located on the front of the box for accessibility and convenience in replacing.



TYPE 3C BOOSTER

Although designed especially for battery charging, Mallory Chargers and Boosters may be used as a direct current power supply for: electroplating, toy and model train operation, operating loud speaker fields, coin machines, relays, solenoids, scientific apparatus, small generator and alternator fields and other applications requiring a low voltage direct current.

Type Charger	Max. Charg. Rate (Amps.)	Tapered Rate (Amps.)	Charging Meter	Height (In.)	Width (In.)	Depth (In.)	Approx. Shipping Weight	Length A.C. Cord (Ft.)	Length D.C. Cord (Ft.)	List Price

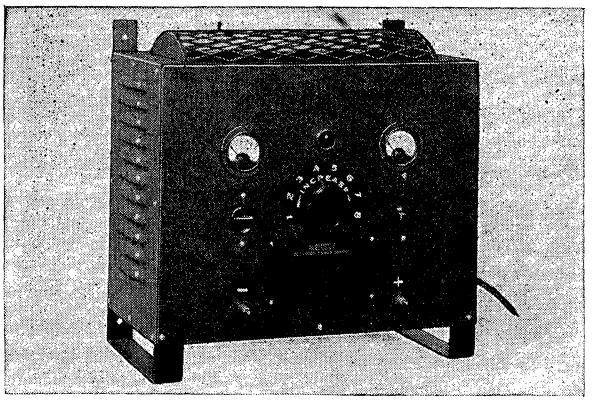
MALLORY BATTERY CHARGERS • RECTIFIER POWER SUPPLIES



RECTOPOWER** STATIONARY TYPES

● A compact, heavy-duty Mallory Dry Disc Rectifier that furnishes constant and adequate DC power. The unit is particularly suited for testing and repairing electrical communications and electronic equipment in all applications employing voltage within specified ranges.

May also be used for the economical and efficient taper charging of batteries.

Requires no special foundation; may be quickly and easily mounted on wall or bench for the most convenient location.

Featuring a variable voltage output to simulate actual operation under different conditions, the power supply has low ripple characteristics—3% at full load, lower at light load. Send for catalog sheet R-659-A.

Type	D.C. Output		A.C. Input		Dimensions				Approx. Net Weight	Net Price††

*Fan cooled.
†Can be furnished for dual operation, i.e., half voltage, double current.
**Reg. U. S. Pat. Off.
††Prices, F.O.B. Indianapolis.

RECTOPOWER** PORTABLE TYPES

● The portable rectopower requires no special foundation, but may be rolled easily about the laboratory or assembly floor to the exact spots where it can be used most conveniently. Radio transmitters and receivers, and other electric and electronic equipment, may be tested while in the process of manufacture or after being installed.

Rectopowers have variable voltage output to simulate actual operation under different conditions, good regulation, and low ripple characteristics—3% at full load, lower at light loads. Circuits are arranged to deliver both 12 and 24 volts simultaneously. A DC contactor prevents discharge of battery if AC starting switch is open when unit is used as a battery charger or in parallel with a battery for precision regulation.

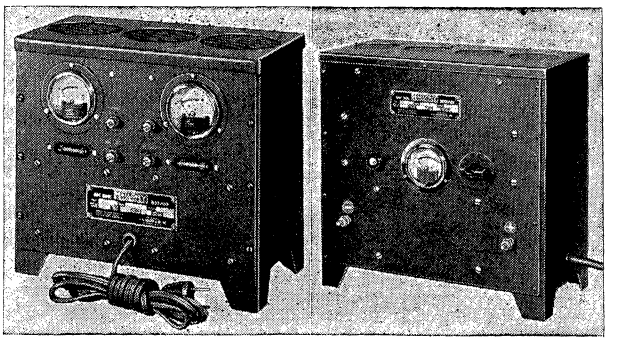
TYPE VA 1500

Type No.	AC Input
VA1500	208 or 230 V. 3 phase 60 cycle
VA1500-A	460 V. 3 phase 60 cycle

DC Output for Both Types: 100 amps. at 10-16 volts or 50 amps. at 20-32 volts.

VA1500 net price **$400.00**

VA1500-A net price **420.00**



BATTERY CHARGERS AVIATION TYPES

● Mallory aviation rectifier battery chargers have been designed and developed to answer the need for a practical and economical unit to charge 12 and 24-volt aircraft batteries and battery carts.

Featuring a tapering charge, these units supply a high charging rate for a discharged battery with a gradually decreasing rate as the battery becomes charged.

Mallory aircraft battery chargers employ the tried and proven Mallory magnesium-copper sulfide dry disc method of rectification. This method eliminates all moving parts and assures long life and dependability.

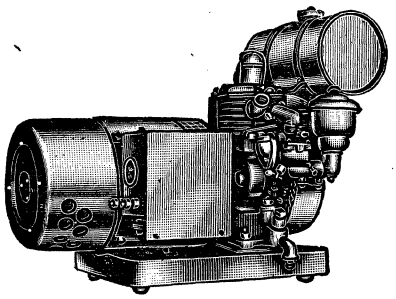
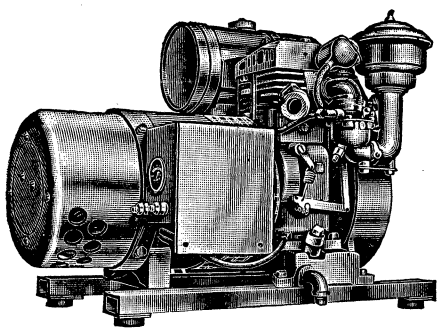
110 VOLT AC ANYWHERE WITH KATOLIGHT!



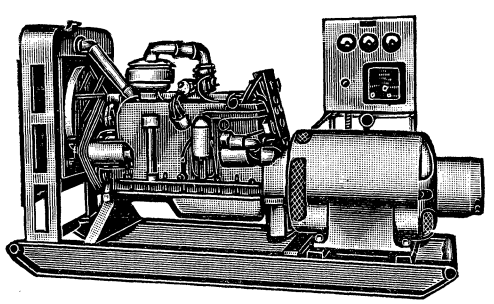
Model 23HAB4

500 watt, 115-volt, 60-cycle, AC KATOLIGHT plant powered with a 1 h.p., single cylinder, 4 cycle, air-cooled engine. Approximately 25" long x 11" wide x 20" high, net wt. 135 lbs., shipping wt. 170 lbs. As a special feature this model is furnished with start and stop button right on the generator, with cutout, D.C. ammeter, charge control resistor and battery cables.



Model 28HAB4

1500 watt, 115-volt, 60-cycle, A.C. KATOLIGHT plant powered with Briggs & Stratton 4 h.p., 1 cylinder, 4 cycles, aircooled engine. (Illustrated with 40-ft. Remote Control. Standard models are furnished with manual cranking arrangement.) 31" long x 40" high x 21" wide, net wt. approximately 350 lbs., shipping wt. 410 lbs.



MODEL 55MPK6

25,000 watt, 127/220 volt, three phase, 60 cycle, 4 wire, 1200 r.p.m., A.C. revolving field type Katolight generator powered with Chrysler Industrial engine. This type unit suitable for continuous duty or for standby service. Net wt. approximately 3300 lbs.

CONTINUOUS DUTY — ECONOMICAL RUGGEDLY CONSTRUCTED — PORTABLE

Designed for sound trucks, homes, cottages, trailers, farms or any place where plant is desired for running many hours daily and expected to give years of trouble-free service.

KATOLIGHT PLANTS are the result of actual experience in the light plant field; the result of much laboratory and actual field tests. The engine that will give the best performance is selected for each model. Engine manufacturers are known internationally and maintain service stations in key cities in U. S., Canada and foreign countries. The user is assured of service and parts from authorized service stations.

KATOLIGHT PLANTS are already to go by simply adding a little gasoline and oil and connecting to the lines; complete with engine, generator, base, fuel tank, instruction manual, hand crank.

GAS ENGINE DRIVEN PLANTS

500 to 5000 Watts, Aircooled, 110-volt A.C., 60 Cycle, 1800 R.P.M.

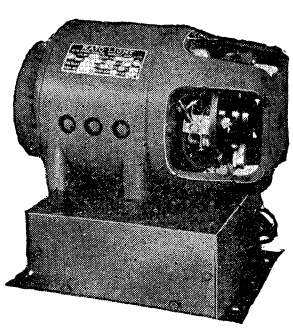
Watts Rating at 100% Power Factor (Lamp Load)

Available in all standard voltages other than list, at a LIST EXTRA cost of . . . $40.25. Also available for 32-volt direct current operation on specification at an ADDITIONAL LIST of $17.25 on sizes through 2000 watts or an ADDITIONAL LIST of $40.25 on sizes to 5000 watts.

LIST PRICES—ACCESSORIES

40-Ft. Remote Control (For starting and stopping plant 40 ft. or less away)—A.C. models only	$23.00
500-Ft. Remote Control (For starting and stopping plant 500 ft. or less away)—A.C. models only. 2000 watt plants and under. (No control wire furnished.)	40.25
500-Ft. Remote Control (For starting and stopping plant 500 ft. or less away)—A.C. and D.C. plants over 2000 watts. (No control wire furnished.)	138.00
Full Automatic Control — 2000 watt plants and under. A.C. plants only	115.00
Full Automatic Control — For model 45HAW4	172.50
Special Mufflers and 5-Ft. Flexible Exhaust Tubing	10.35
Remote Control Station Only—Including 40-ft., 3-wire control cable	5.75



KATO KONVERTERS

Kato Konverters furnish standard 115-volt, 60-cycle A.C. from a source of 32, 115 or 230-volts direct current. Ideal for operating radio and electronic equipment, appliances, etc. All steel frames available. Send for bulletins and prices. (Model 5 KA43, 225-watt illustrated.)

Manufacturers of A.C. & D.C. Generators, Rotary Konverters, A.C. & D.C. Power Plants, Motor-Generators, Frequency Changers, High Frequency Generators, Gas-Engine Driven Battery Chargers, etc. Write for quotations and specifications.

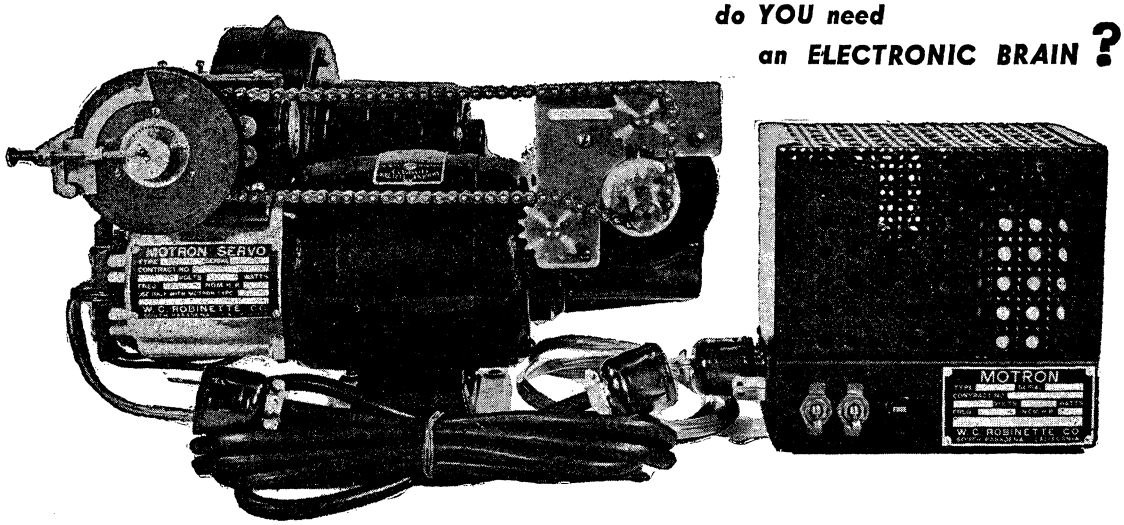
MOTRON—

do YOU need
an ELECTRONIC BRAIN ?



ELECTRONIC SERVOMECHANISM

may be YOUR answer

The MOTRON (MOTor-electRON, TM, Reg.) Servo Model 61A is a packaged continuous-balance control system of practical infinite sensitivity that can be applied to the automatic control or regulation of a large variety of practical problems to eliminate the need of human supervision. Several miniature vacuum tubes directly control (without circuit-breaking contactors) the speed and direction of a standard 1/15 horsepower induction motor, (according to the setting of the input-dial), which can be used to control other larger power sources.

The input-dial is mounted on selected precision instrument ball bearings and may be rotated by extremely small forces, such as electrical meter movements, pressure gages, flow gages, nylon or silk filaments, precision weighing balances, miniature motors and repeaters, synchronous electric clocks, wet paper fibres, air vanes, metal bellows and magnetic compass needles.

The input-dial controls either the velocity or position of the motor to very accurate limits. The velocity in either direction may be limited from zero to maximum independent of input-dial setting, so that hunting instability can never occur. The motor may actuate any device or mechanism (with 33-75 in-lb. torque, 0-29 R P M) that controls the process, state, or condition that is measured on the input-dial, thus controlling and regulating the process. Alternately the motor may act as a torque amplifier or remote positioning agent. Since the motor velocity (not torque) is controlled, load change or complete loss of load cannot cause instability.

The 61 A Servo is designed for short time-constant systems and is usually capable of great sensitivity, 15/100 of one percent to 3/100 of one percent. Electronic components are in a replaceable plug-in can for instant servicing.

Suggested uses:

Air velocity controller to within as close as 25 or 50 F P M or .01 inch of water for separation of food products from chaff or sizing coal or other granular material; Vehicle steering or cam following; Tracer controlled mechanisms such as oxy-acetelyne cutting or lathe duplicators; Automatic weighing; Antenna positioning; Tensioning, guiding and winding paper, cloth, thread, wire, etc.

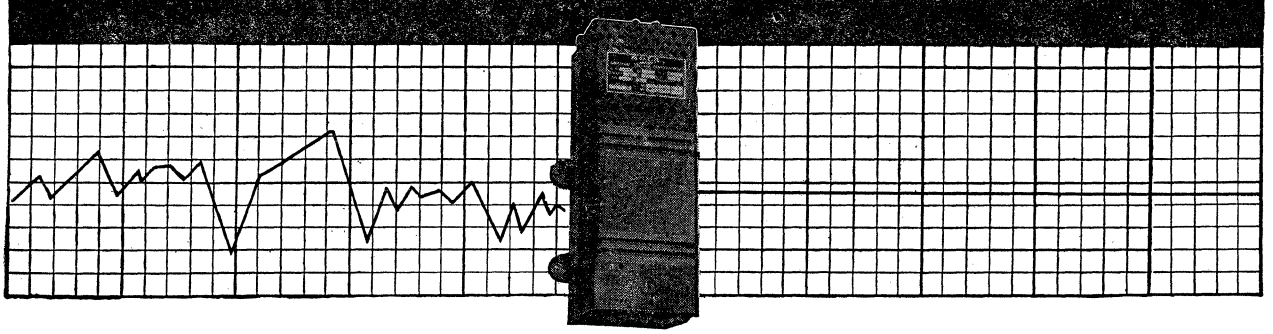
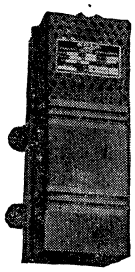
SOLA Constant Voltage Transformers



FLUCTUATING LINE VOLTAGE



SOLA CONSTANT VOLTAGE TRANSFORMER
TYPE 3

SOLA CONSTANT VOLTAGE TRANSFORMER
TYPE 2

Constant Voltage Transformers are designed to provide a constant output voltage which is unaffected by changes in input voltage. Stabilization is instantaneous and automatic and there are no moving parts. Constant Voltage Transformers also provide isolation between input and output circuits. Low output voltage wave distortion and small size make these transformers especially attractive for use with all types of electronic equipment.

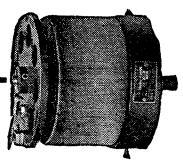
POWERSTAT VARIABLE TRANSFORMERS

The **POWERSTAT** is a variable auto-transformer used in applications requiring a smooth continuously adjustable output voltage from a-c power lines. Essentially this device consists of a single layer toroidal winding on a silicon-steel core with a set of brushes contacting a bared portion of each turn. By rotating these brushes on the bared part of the winding, any voltage can be "picked-off" from zero to above line.

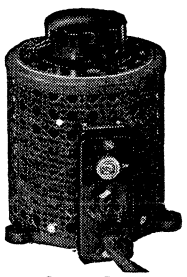


TYPE 20

Input: 115 volts, 50/60 cycles, 1 phase
Output: 0-135 volts, 3.0 amps., 405 va

THE ½ KVA SERIES

For applications that require a small compact variable transformer of relatively low electrical capacity, there is no greater value than type 20. Ruggedly constructed yet requiring a space of only 3½ by 3¾ inches, this unit delivers a variable output of 0-115 or 0-135 volts (depending upon terminals employed) from a 115 volt single phase line.



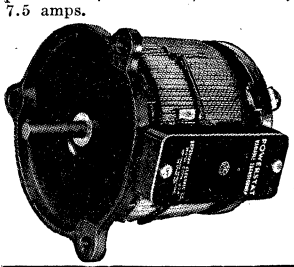
TYPE 116

Input: 115 volts 50/60 cycles, 1 phase.
Output: 0-135 volts, 7.5 amps., 1 KVA.

THE 1 KVA SERIES

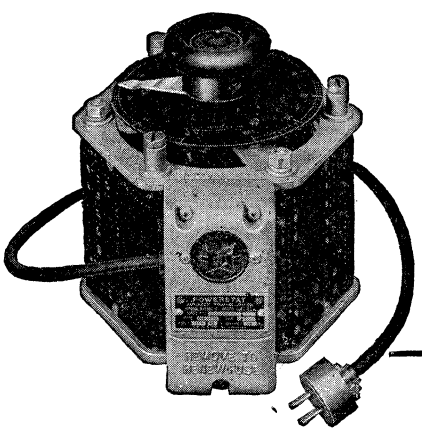
TYPE 116U

Input: 115 volts, 50/60 cycles, 1 phase. **Output:** 0-115/135 volts, 7.5 amps.

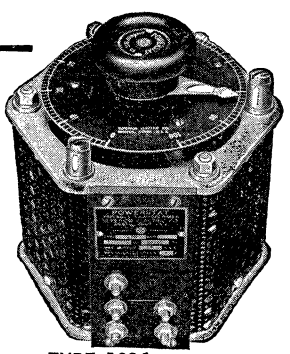


When used for general purposes, these **POWERSTATS** are offered with protective screening, fuse protection, "on-off" switch, output receptacle, and input cord-plug. If the unit is to be incorporated with other apparatus, the accessory equipment is not furnished. These **POWERSTATS** are available in the tabulated rating and also for 230 volt single phase service. Two and three phase operation is possible by mounting individual **POWERSTATS** in tandem.

THE 2 KVA SERIES



To suit each need—in the laboratory or in the shop—the 2 KVA **POWERSTATS** are obtainable in a variety of models for single or poly phase duty. Different types feature . . . exposed terminals . . . fuse protection with bakelite terminal cover . . . or enclosed aluminum terminal box with output receptacle, fuse protection, and input cord-plug. Type 2PF1126 can be furnished for either 2 or 3 wire service as can the 230 volt units.



TYPE 2PF1126
Input: 115 volts, 50/60 cycles, 1 phase
Output: 0-135 volts, 15 amps., 2.0 KVA

TYPE 1226
Input: 230/115 volts, 50/60 cycles 1 phase
Output: 0-270 volts, 9.0 amps., 2.4 KVA

THE 5 KVA SERIES

With high output current capacities, the 5 KVA **POWERSTATS** find wide application for large power requirements. Both the 115 volt (1156) and the 230 volt (1256) units are readily adaptable to gang mounting to supply a continuously adjustable output from 115, 230, or 440 volt single or poly phase lines. Standard types are offered in capacities up to 100 KVA.

TYPE 1256
Input: 230/115 volts, 50/60 cycles, 1 phase
Output: 0-270 volts, 28 amps., 7.5 KVA

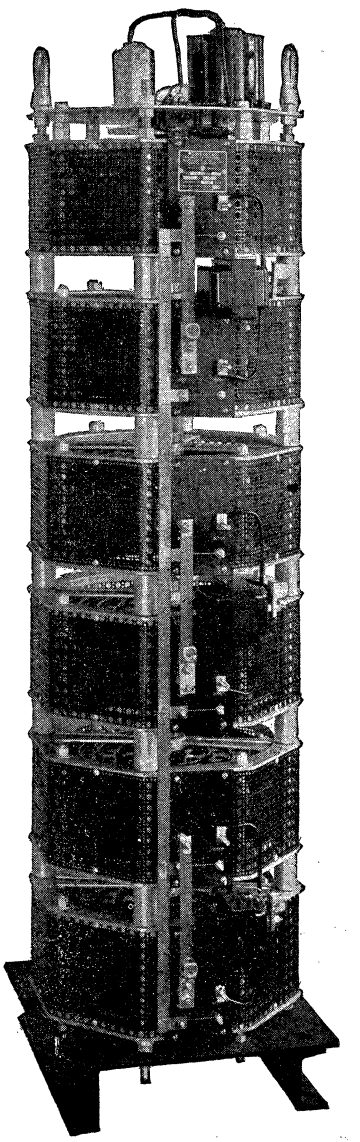
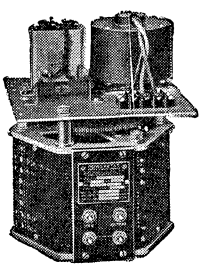
MOTOR-DRIVEN POWERSTATS

FOR PUSH BUTTON OR AUTOMATIC CONTROL

Where it is necessary to locate the **POWERSTAT** away from the control station or it is desirable to automatically control the source of variable voltage . . . **POWERSTATS** can be equipped with motor-drives. This arrangement enables the operator to remotely control kilowatts of power in a safe and convenient manner. A smooth continuously adjustable output voltage is at the finger-tips and with a push of the control button, any voltage from zero to above line is obtainable.

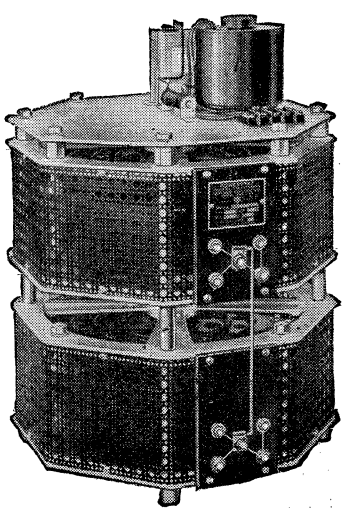


SINGLE PHASE UNITS



For operation from 115, 230, or 440 volt single phase lines, **POWERSTATS** with motor-drives are offered in ratings up to 50 KVA. The driving motor is a reversible, highly damped, rapid starting, synchronous type of low fundamental speed. It is a three wire ball-bearing mounted unit that operates from a 115 volt single phase source. Since the motor-driven **POWERSTAT** has the same fine adjustment of voltage as found in manually-operated units, it is ideal for numerous applications requiring efficient, quick, convenient and continuous control of a-c power.

POLYPHASE UNITS



Although the motor used to drive the **POWERSTAT** is physically small, the torque delivered is sufficient to drive even the largest tandem mounted 5 KVA units. As with the single phase **POWERSTATS,** all manually-operated two and three phase units can be motor driven. It is recommended that an investigation be made of **POWERSTAT** variable transformers where a self-contained piece of apparatus is required for rapidly controlling 115, 230, or 440 volt two or three phase power lines. Already this equipment has found wide use in radio transmitters, electrical testing, induction heating, electric furnace temperature control, and automatic voltage regulators. Perhaps it is the solution to your voltage control problem.

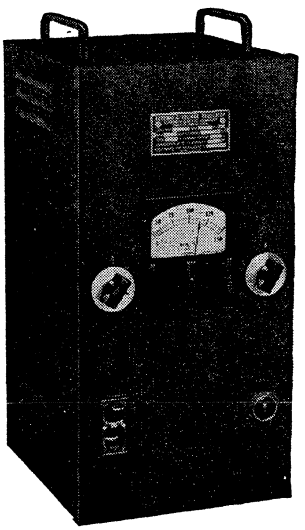
SECO AUTOMATIC VOLTAGE REGULATORS



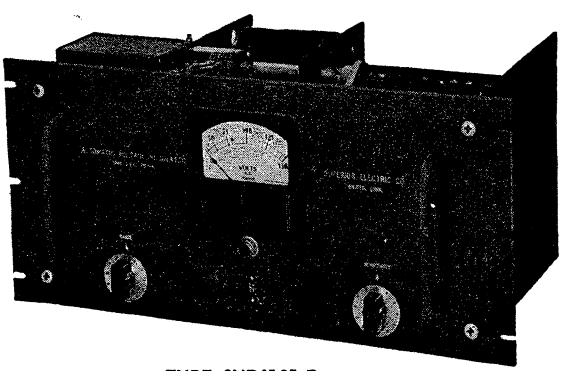
TYPE SVR4101-H

For automatic control of a-c power lines, the **SECO** Automatic Voltage Regulator has no equal. Regardless of variations in input voltage or output load current, it always maintains a constant output voltage. In addition—there is no waveform distortion—no internal mechanical adjustments—operation is not affected by changes in power factor of the system.

SINGLE PHASE UNITS

The many advantages offered by **SECO** Automatic Voltage Regulators, not found in other types of voltage stabilizers, is the result of combining a motor-driven **POWERSTAT** variable transformer with a special electronic detector circuit. When the detector circuit notes a variation from the nominal output voltage (set by means of knob on the panel) it authorizes the motor controlling the **POWERSTAT** to rotate in the required direction. This bucks or boosts the incoming line to the pre-determined output voltage value. When this value is reached, the detector circuit calls for no further correction until the incoming line again fluctuates.

No matter what the requirements of a particular voltage control application, there is a **SECO** Automatic Voltage Regulator to fulfill the need. Standard single phase **SECO** regulators are available in ratings from 1 to 28 KVA in 115, 230, and 440 volt models. Most units will correct line variations of approximately 15% from the nominal voltage. The self-contained cabinet type SVR4101-H illustrated above is representative of the entire line of **SECO** Regulators. It shows the combination quick-trip circuit-breaker and "on-off" switch, pilot light, and easily read voltmeter all housed in a compact black wrinkle-finish cabinet. Whereas the SVR4101-H is designed for table or wall mounting, its companion the SVR4101-R is for relay rack mounting as a component part of existing equipment.



TYPE SVR4101-R

POLYPHASE UNITS

In capacities ranging up to 75 KVA, the three phase **SECO** Automatic Voltage Regulators are indispensable for many factory and laboratory requirements. All equipment on a power line can be controlled by one **SECO** regulator. An installation will insure proper operation of motors, electric furnaces, heater units and other equipment that is critical of line voltage. Standard models are wye connected for use on 230 or 440 volt three phase lines. The three phase **SECO** Automatic Voltage Regulators possess all the characteristics inherent in single phase types. Some features not mentioned previously are . . . efficiency runs as high as 98 percent or better at full load . . . low exciting current . . . low cost per KVA . . . built-in circuit protection on all units . . . and although not instantaneous, the **SECO** regulator is extremely rapid in correcting line voltage variations.

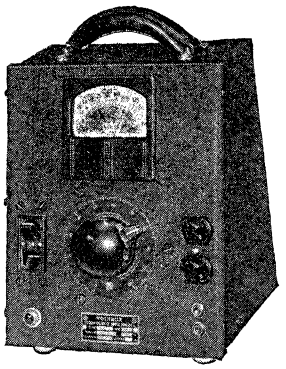
THE VOLTBOX

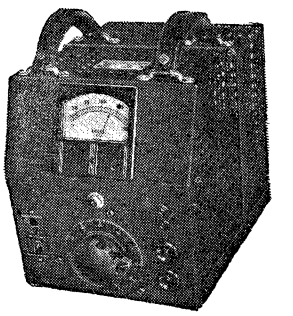
a-c power supply



TYPE U-1000

Input: 115 volts, 60 cycles, 1 phase.
Output: 0-135 volts, 7.5 amps., 1 KVA.

For the laboratory, assembly line, and maintenance shop, the **VOLTBOX** a-c power supply offers a compact portable source of variable a-c voltage. Unregulated and automatically regulated models are available. The unregulated **VOLTBOX** consists of a strong, light weight, steel enclosure with a **POWERSTAT** variable transformer to supply any voltage from zero to above line, a 1% voltmeter, high speed circuit protection, pilot light, binding post inserts and input cord-plug. In addition to the type U-1000 tabulated to the left, a companion 230 volt model is available as are 2 KVA 115 or 230 volt units. The regulated type, the R-500, has all the components of type U-1000 plus a voltage stabilizer, Its rating is tabulated under the photograph.



TYPE R-500

Input: 95-125 volts, 60 cycles 1 phase.
Output: 0-135 volts, 4.0 amps.

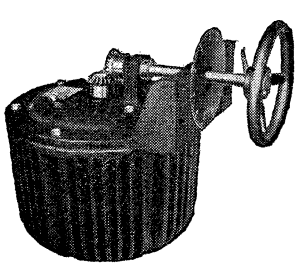
SECO CUSTOM-BUILT EQUIPMENT

SECO REMOTE POSITIONER — This instrument affords a method of remotely controlling a **POWERSTAT** variable transformer with a high degree of accuracy. Servo-operation is achieved by turning the dial of the remote controller causing the motor-driven **POWERSTAT** to follow in accordance with the dial position. Control wires between the Remote Positioner and the **POWERSTAT** act as an "electrical flexible shaft."

SECO D-C POWER SUPPLIES—In addition to its line of superior a-c voltage control apparatus, **SECO** offers d-c power supplies. Both regulated and unregulated models can be designed and built to specific requirements. Capacities range up to 3000 volts, 2 KVA for regulated types and up to 5000 volts, 5 KVA for unregulated. Inquiries are invited.

SECO FIXED-RATIO TRANSFORMERS — For those who desire fixed-ratio transformers of the same high quality as found in **POWERSTAT** variable transformers and other **SECO** manufactured equipment, it is recommended that the **SECO** engineers be consulted on requirements of 500 va and larger. A request for information will receive immediate attention.

SECO SATURABLE REACTORS—At times the use of **POWERSTAT** variable transformers for unusually large current requirements is not feasible. Other times, definite requirements necessitate the employment of saturable reactors. To meet these needs, **SECO** has engineers who will be most pleased to cooperate in supplying a saturable reactor to rigid specifications.



TYPE 0-1226

Input: 230/115 volts 50/60 cycles, 1 phase
Output: 0-270 volts, 18.0 amps., 4.9 KVA.

OIL-COOLED POWERSTATS

By mounting any air-cooled **POWERSTAT** variable transformer in a sufficient quantity of transformer oil, its rating can be increased up to 100 percent above normal air operation. For a high continuous output from a variable transformer of small physical size, **SECO** offers the standard 1, 2, and 5 KVA **POWERSTATS** in a compact, cast-aluminum oil-container. Not only do these units allow increased output currents but immersion in oil permits their use in hazardous or humid atmospheres and where high momentary overloads are occasioned. Standard oil-cooled **POWERSTATS** can be obtained for 115, or 230 volt single phase duty in capacities up to approximately 10 KVA.

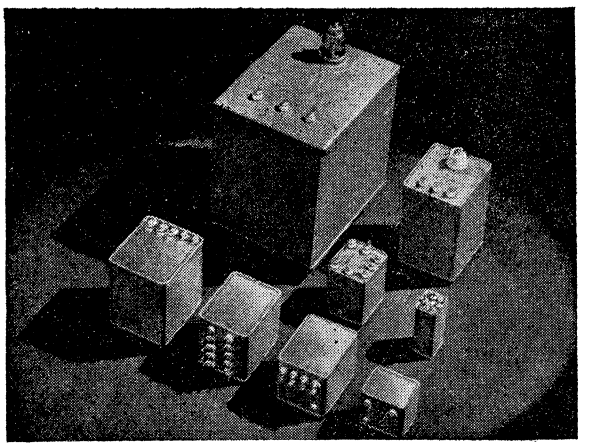
RADIO'S MASTER

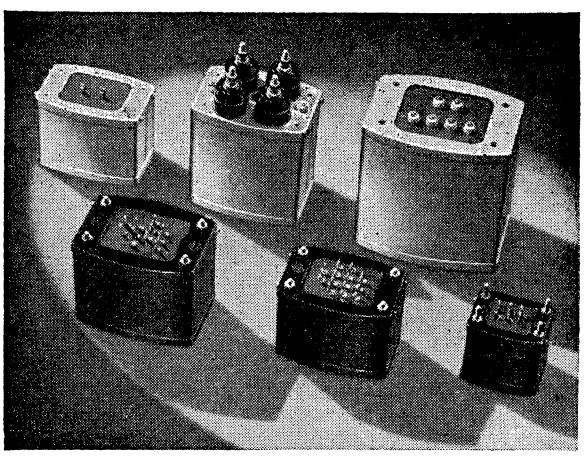
TRANSFORMERS AND REACTORS
For Radio and Other Electronic Devices

Hermetically Sealed Units

Compound-filled and hermetically sealed against the entrance of moisture. Designed to meet U. S. Navy salt water immersion tests. Standard hermetic case types range from very small up to units approximately 200 volt-amperes physical size. Special construction is employed for larger units.



Hermetically sealed units



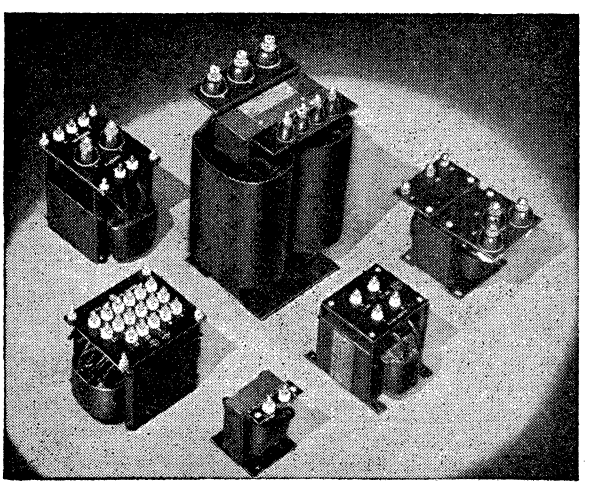
Conventional compound-filled units

Conventional Compound-filled Units

Not hermetically sealed. Moisture resistant, but not immersion-proof. Wide application in the Frequency-Modulation field. Top or bottom mounting for open or underdeck wiring. Standard case types include units up to 250 volt-amperes physical size. Larger units employ special construction.

Core-and-coil Units

Usually applied where moisture resistance is not a factor, and where size and weight must be kept to the minimum. Standard core laminations are utilized in core-and-coil units 15 kva and smaller (physical size). Larger units are built up from special parts and ratings above 15 kva require special laminations.



Core-and-coil units

Three general types of transformers and a complete line of reactors assembled from standard unit parts to meet specified requirements: **power**—with plate, and plate-and-filament units; **filament**—both conventional types and high-voltage units; **audio-frequency**—include microphone, input, interstage (or grid), modulation, and output types.

The line of reactors contains microphone, plate, filter (conventional or swinging), and modulation units.

No standard ratings are listed as being in stock, but standard parts are available for manufacturing to specifications. This method of production enables every transformer to be specially designed for its given application.

TRANSFORMERS

Altec Lansing has developed a complete line of transformers which have the necessary frequency range, power carrying capacity, low insertion loss, low phase shift, and ample electro-magnetic and electrostatic shielding, good balance of windings for push pull operation, and proper impregnation and treatment so that heat and moisture will not adversely affect their continued operation. Ability to handle the rated power at low frequencies insures that intermodulation products will be very low.

The use of negative feedback in amplifiers requires that the frequency range of the amplifier must be made much broader than the actual amplification characteristic needed. The required frequency range over which the transmission characteristics of the feedback loop must be controlled is surprisingly high and represents the price that must be paid in order to obtain the benefits of negative feedback.

Altec Lansing transformers, unless otherwise specified, have a transmission range of 20-20,000 cycles (± 1 db) and this condition will hold over a range of 60 db in power. In most cases the transformers will have good transmission up to 50 KC so that it is not necessary to use special compensation in the feedback path when the transformer is part of it. The same is true at the very low frequencies since in general the transformers will not be down over 3 db at 10 cycles.

KENYON "T" LINE TRANSFORMERS

KEN-O-DYNE UNIVERSAL OUTPUT TRANSFORMERS

Type No.		Case No.	Weight	List Price	
T-108	15 watts	3A	2 lbs. 13 ozs.	$9.30	Will match any set of Push-Pull or Push-Pull Parallel or a single plate to 500-200 or speaker voice-coils. Low impedance connection for speaker voice coils range from .5 to 25 ohms.
T-109	30 watts	4A	5 lbs. 2 ozs.	13.55	
T-110	60 watts	5A	10 lbs. 1 oz.	18.20	

KEN-O-TAP MODULATION TRANSFORMERS

Ken-o-Tap Transformers never grow obsolete! Ideal for amateurs who wish to keep up to date with new tube combinations. Will match any Class B tube or tubes to any Class C load.

Type No.	Audio Output Primary	Class "C" Secondary	Primary Range	Secondary Range	Case No.	Weight	List Price

All power transformers are designed for 115 volt, 50 to 60 cycle operation. For any other voltage 50 to 60 cycle operation add 25% to list prices. For 115 volt 25 cycle operation, add 60% to list prices. For any other voltage 25 cycle operation add 100% to list prices. Case sizes for 25 cycle application are different from those specified for standard 115 volt 50 to 60 cycle operation.

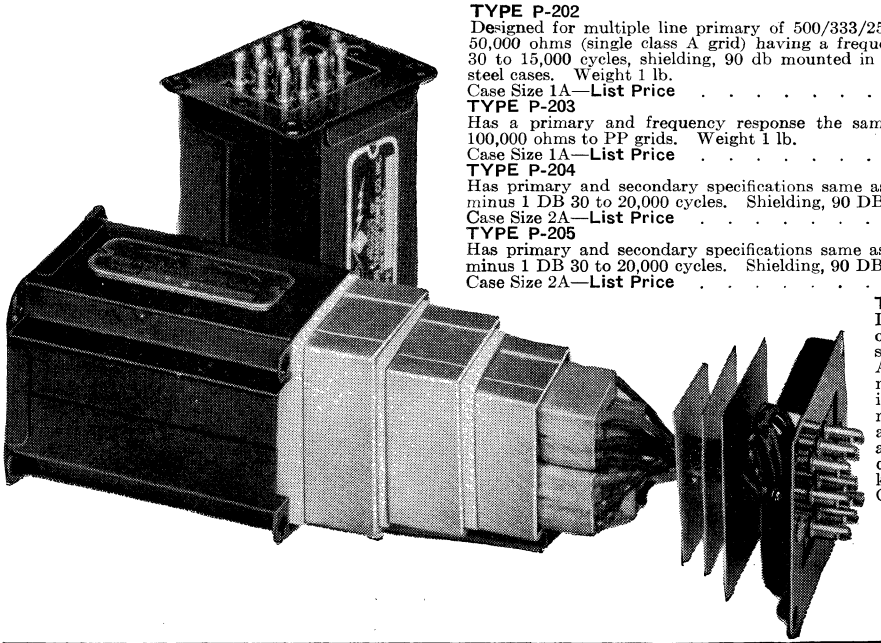
TELESCOPIC SHIELDED HUMBUCKING TRANSFORMERS

The core type, humbucking, construction employed in these transformers tends to minimize hum pick-up. In addition, they are mounted in multiple electromagnetic shields of high permeability alloy steel which are annealed after complete construction to remove shearing and bending strains thus assuring maximum permeability upon which depends the efficiency of shielding.



TYPE P-202
Designed for multiple line primary of 500/333/250/200/125/50 ohms and secondary of 50,000 ohms (single class A grid) having a frequency response of plus or minus 2 DB 30 to 15,000 cycles, shielding, 90 db mounted in four high permeability alloy annealed steel cases. Weight 1 lb.
Case Size 1A—**List Price** **$20.60**

TYPE P-203
Has a primary and frequency response the same as type P-202 above. Secondary: 100,000 ohms to PP grids. Weight 1 lb.
Case Size 1A—**List Price** **$24.90**

TYPE P-204
Has primary and secondary specifications same as P-202. Frequency response plus or minus 1 DB 30 to 20,000 cycles. Shielding, 90 DB. Weight 1 lb. 7 ozs.
Case Size 2A—**List Price** **$29.25**

TYPE P-205
Has primary and secondary specifications same as P-203. Frequency response plus or minus 1 DB 30 to 20,000 cycles. Shielding, 90 DB. Weight 1 lb. 7 ozs.
Case Size 2A—**List Price** **$34.25**

TYPE T-6
Designed with a multiple line primary of 500/333/250/200/125/50 ohms and secondary of 20,000 ohms (single class A grid). Frequency response plus or minus 3 db 60 to 10,000 cycles. Shielding, 50 db. Mounted in 2 high permeability annealed alloy steel cases and plain steel outer case. These units are designed for use in low level input circuits where hum-pick-up must be kept to absolute minimum. Weight 1 lb.
Case Size 1A—**List Price** . . **$10.10**

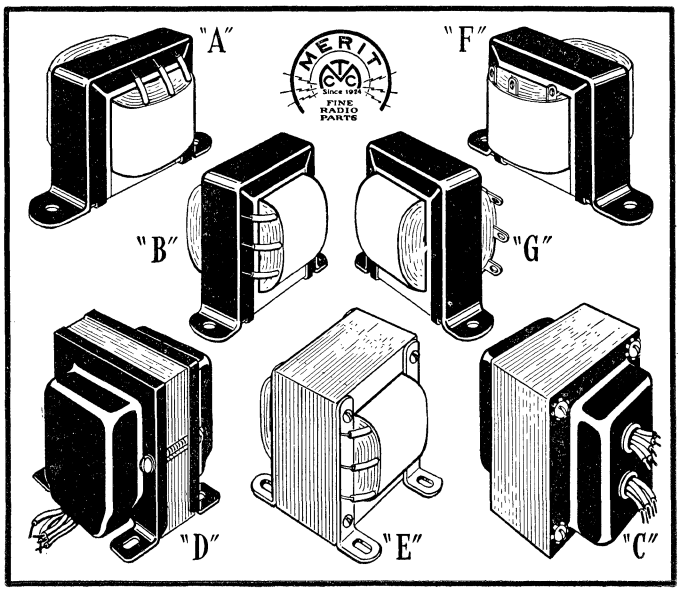
MERIT TRANSFORMERS

MERIT presents a line of replacement transformers specially designed to supply the jobber with a simplified, compact line which will meet 90% of customers' requirements and eliminate carrying an excessive stock.

Embodying new developments, Merit Transformers have demonstrated dependable service under the most difficult conditions, and will be recognized and welcomed by thousands of customers. Conforming to the latest and most rigid specifications, Merit Transformers are now standard equipment with many leading radio manufacturers.



OUTPUT TRANSFORMERS

Receiver Replacement Type

Power Transformers New Universal Type

Stancor's Universal Power Transformers represent the last word in efficient transformer construction, they are designed for compactness without sacrificing efficiency.

Four universal brackets permit their being mounted in either vertical or horizontal position. Special studs* provide underwriters type mounting. Transformers equipped with 8" flexible RMA color coded leads and static shields.

Power Transformers (Fully Cased)

Vibrator Transformers Six Volt Universal

These units equipped with mounting brackets for universal replacement work.

Six Volt D.C. or 115 Volt A.C. Speaker Field Supply Transformers

Tube Checker Transformer

Especially designed for use in modernizing older types of tube checkers. Ideal for other testing equipment and laboratory. Packed with wiring instructions giving color coding of leads.

Interstage Transformers

Designed primarily as radio replacements, this group of transformers has a multiplicity of applications because of the wide range of sizes and types. Listed are units in channel frames, ranging from the smallest to the largest in common usage, a universal bracket universal winding transformer, large core heavy duty units for higher fidelity push-pull and universal interstage transformers and a fine grouping of drivers. Size for size, unit for unit, these transformers represent the finest offering by any manufacturer — and they're so easy to use.

Universal Interstage Transformers (Split Secondaries)

May be used as plate to grid; push pull input or push-pull interstage replacement transformers. Have 3:1 over all ratio, however, primary is center-tapped and secondary has split winding, thus permitting ratios of 1:1, 3:1 and 6:1. Transformers may be used in either step-up or step-down applications.

Tone Control Unit

The necessary components for a dual tone control circuit to provide both bass and treble attentuation when used in conjunction with two dual 250,000 ohm potentiometers. Contained in Hi-Fi-type W-1 cast case for shielding against hum pickup and provided with 12" Flexible Coded Leads for direct connection in the circuit. Dimensions H.3 1/2" x W.2 3/4" x L.3 1/16". Packed with complete instructions for installation and use.

Variable Line Autoformers

These transformers designed so that the associated equipment may be kept at a specific input voltage regardless of line voltage. Line regulating transformers continuously variable in 5 volt steps from 85-125 volts.

Stancor No.	Primary Volts	Primary Cycles	Secondary Volts	Output Watts	Type Mtg.	Dimensions H	Dimensions W	Dimensions D	Wgt. in Ctn.	List Price

Testing Autoformer

Incorporates a convenient tap switch to permit variable voltages from 90 to 150 volts. Primary equipped with 5 ft. approved cord and plug. Secondary connected to female receptacle. Locking screw mounted on switch.

Step-Down Autoformer

These transformers are excellent units to be used with standard apparatus on 220-250 volt lines. May also be wired to step up 110-125 volts to 220-250 volts for test purposes or other applications.

*Mounted in special can and equipped with cord, plug and receptacle.

Isolation Transformers

These transformers are designed with an electrostatic shield to isolate line noises and interference from the apparatus being used. They are suitable for screen test booths, electrical therapeutic machines, medical instruments, beauty parlor equipment, electric furnaces, amateur transmitters, etc. Each unit complete with a 6 ft. cord and plug and a female receptacle. Primary tapped for 105, 115, and 125 volts, 50-60 cycles. Secondary rated at 115 volts. Tap switch controls primary voltage, except on Nos. P-6123 and P-6125.

Stancor Number	Watts	Type Mounting	Mounting Dimensions H	Mounting Dimensions W	Mounting Dimensions D	Weight in Carton	List Price

Filter Chokes
(REPLACEMENT TYPES)

These chokes include all commonly used ratings for units of their type. Since inductance varies with the amount of D.C. flowing through the coil these units have been tested under uniform conditions. Filter chokes are rated at 10 Volts 60 Cycles with maximum D.C. in winding. Swinging chokes are rated at 10 Volts 60 Cycles from maximum to 10% of maximum D.C. in windings. Audio chokes are rated at 2 Volts 200 Cycles with maximum D.C. in winding. Tolerance of plus 15% is maintained on all ratings.

Plate Transformers

This group of transformers is designed primarily to deliver the rated D.C. voltage and current outputs when used with full-wave mercury vapor rectifier tubes in conjunction with a two section filter employing choke input and two 2 mfd. condensers working into a resistive load. Generous coil and core design result in a transformer with above average regulation and efficiency. Phenolic terminal boards and heavy duty ceramic insulators assure protection from voltage breakdown.

Other voltage and frequency combinations available on special order. Write for quotations.

Volt Adjusters

STANCOR'S volt-adjuster is the answer to the fluctuating voltage problem. It is a compact unit containing a ruggedly constructed step-up; step down autoformer.

The primary winding accommodates various voltages in 10 volt steps. A 10 position tap switch with an off position permits changing of the primary winding when a voltage shift occurs, and through this switch the output may be changed and kept at 115 or 230 volts. A meter with 0-150 or 0-250 volt range indicates the output at all times. The nominal output is indicated on the meter face by a red line. Unit is housed in beautiful black wrinkle finish case.

Filament Transformers

Single Secondary

This group of filament transformers represents a complete listing of all commonly used electrical and physical specifications for units of this type. All transformers except those especially indicated have center taps. They are designed to provide accurate voltage output at rated loads with good regulation. Generous insulation provides a safety factor over and above the test voltage as indicated. Each group of transformers by voltage ratings is available in several convenient mounting styles which lend themselves to most applications.

Multiple Secondary

Plate Modulation Transformers

Listings cover two distinct groups of transformers, universal or Poly-pedance and specific types. The latter group covers the most frequently used ratios, core sizes and mounting styles. They should be used in permanent installations whenever possible since their design permits the best efficiency and fidelity for units of this type. Poly-pedance transformers are ideally suited for use in experimental or temporary equipment, such as schools, laboratories, etc., since they are provided with a large number of taps to permit the user to secure the widest practical range of impedance match. All units represent outstanding values.

Driver Transformers

Two distinct groups of driver transformers are shown. Tapped or Poly-pedance and specific or fixed ratio types. Poly-pedance units are especially designed for experimental and laboratory work where it is desirable to change the turns ratio to optimum value. Two power ratings one of which is applicable to circuits employing inverse feedback and two line drivers are available. Specific types are listed in the most frequently used ratios, core sizes and mounting styles. They should be used wherever possible in permanent installations because their design permits the best efficiency and fidelity for units of this type.

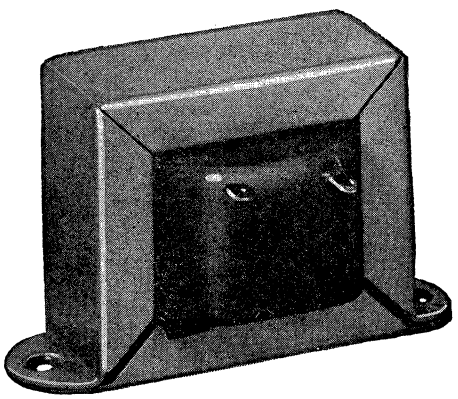
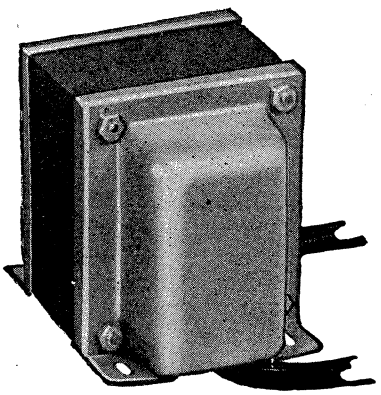
From out of the west . . . America's finest transformers . . .



L Case Type



A Case Type

Superior materials, workmanship and performance have established these Thermador transformers as America's finest. Designed, engineered and produced by the West's largest manufacturer of transformers, the name Thermador guarantees their rugged, precision construction and their longer life.

Adaptable to a particular job

The transformer models listed have been engineered to cover the replacement field for both the old and new home radio receivers. The new line affords the widest range of application for use in receivers, amplifiers and small transmitters.

Compact in size—low in temperature rise

Both the L Case Type and the A Case Type are attractively finished in durable baked grey enamel. High silicon content core materials, with low current and flux densities, contribute to the engineering superiority which results in small physical size and low temperature rise of Thermador power transformers. All power transformers have static shields which are grounded to the case and core.

Thermatite treated to withstand heat and humidity

Thermador transformers are Thermatite treated, which is a well tested and approved form of vacuum impregnation. This treatment, proved on thousands of transformers under severe climatic conditions, gives these units the resistance to withstand extreme conditions of humidity and heat.

Specifications

For further information about Thermador transformers, write Dept. TT.

THORDARSON TRANSFORMERS

NEW STREAMLINED SERIES

This is the new Thordarson post-war series of Transformers and Chokes. Every unit has been designed for utmost efficiency and adaptability. Many of the engineering and production advancements developed by Thordarson during the war, are used in producing this line.

The new lamination alloys and insulating material, incorporated in this series, results in superior performance and a greater factor of safety without an increase in size or weight. Consequently, some types are smaller and more compact without sacrificing efficiency or performance.

Finished in baked grey enamel and fitted with matched mounting styles, the units present a uniform appearance. This is especially desirable where several Transformers and Chokes are mounted on the same chassis.

Types for Radio Receiver Replacement, Amateur Radio, Sound Systems and allied applications, can be selected from this listing.

It is essential that the class C R.F. load be properly matched to the class B modulator tubes for a maximum transfer of speech energy with low distortion. Thordarson Multi-Match modulation transformers have sufficient flexibility to enable the engineer or amateur to adjust the impedance ratio of primary to secondary, to meet any practical condition of operation. This feature forestalls the possibility of the modulation transformer becoming obsolete due to changing the modulator or class C tubes. The use of new tubes or a change in class C voltage and current will not necessitate the need of a new modulation transformer, providing the power capacity is adequate. Complete charts and instructions for proper matching are supplied with each unit.

PLATE TRANSFORMERS

The new Thordarson plate transformers are designed to deliver the rated D.C. voltage from a two-section filter which includes the voltage drop in the rectifier tubes and chokes. Two current ratings are indicated, "Continuous Commercial Service" (CCS) and "Intermittent Commercial or Amateur Service" (ICAS). These dual ratings make it possible to select the plate transformer exactly suited for each application.

* Secondary voltages changed by means of primary taps.

† Designed for double rectifiers and will deliver both secondary ratings simultaneously. If only the lower voltage taps are used the current rating is equal to the current rating of both windings.

CHOKES—REACTORS
Universal Types—Swinging and Smoothing

Thordarson Universal Chokes are designed for use both in the input and smoothing positions. Where the current taken from the power supply is essentially constant (not varying more than a few percent) the chokes should be selected so as not to exceed the rated D.C.-M.A. If the current fluctuates considerably, as is the case where the power supply furnishes a class B modulator stage, the chokes should be selected so as not to exceed the rated D.C.-M.A. rating under the steady state of operation, and not to exceed the Max. D.C.-M.A. rating when the modulator stage is fully excited.

These are truly universal chokes suitable for use in power supplies requiring either input, swinging or smoothing types.

The tapped Splatter Chokes are used between the modulator and Class C stage for eliminating objectionable side band splatter. Full instructions and circuit diagrams are supplied with each unit.

*Furnished with primary cord and secondary receptacle.
†Output is proportional to voltage applied to input.

THORDARSON LITERATURE

TRANSFORMER MANUAL: A complete book containing literature on Radio receiver replacement transformers, Sound amplifiers, amateur transmitters and current Thordarson catalogs. Bound in heavy blue and orange loose leaf cover permitting addition of future Thordarson releases. Manual No. 340—35 cents.

TRANSFORMER CATALOG: A complete listing of Thordarson transformers, chokes, voltage changers, and regulators for receiver replacement, amateur radio and sound amplifiers. Tables and curves give complete data on application and characteristics of output, modulation and other transformers and chokes. Catalog 400—Free.

TRU-FIDELITY TRANSFORMER CATALOG: Complete technical data on Thordarson broadcast units. Includes audio transformers, filters, line equalizers, filament transformers, filter reactors, plate transformers, and modulation reactors and transformers. Highest quality units that satisfy the requirements of discriminating engineers, broadcast stations and laboratories. Catalog 500—Free.

AMATEUR RADIO: Carefully prepared and edited to make learning of Radio, by all beginners, easy and interesting. Presents fundamental theory and instructions for making code practice oscillators, receivers and transmitters. Has 160 pages and over 100 illustrations and drawings. Heavy book cover, finished in wear-resistant blue cloth and imprinted with gold lettering. Amateur net price—75 cents.

TRANSFORMER SPECIALISTS SINCE 1895 **THORDARSON**

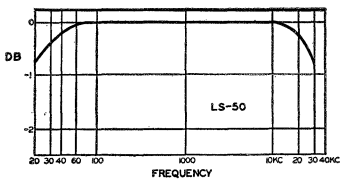
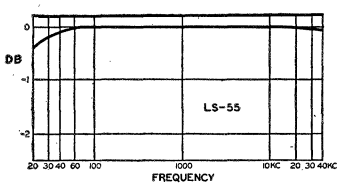
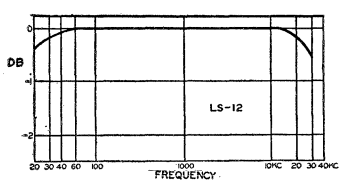
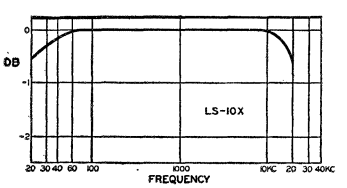
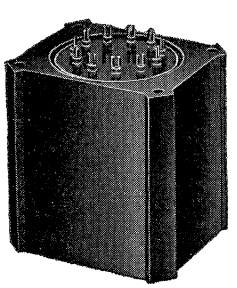
LINEAR STANDARD AUDIO TRANSFORMERS











LS-1 CASE

Length	3⅛"
Width	2⅝"
Height	3¼"
Mounting	1 15/16" x 2 7/16"
Screws	6-32
Cutout	1⅞" dia.
Unit Weight	3 lbs.

The ever increasing use of wide range equipment for broadcast service has reached the point where the major limiting factor is the frequency range of the transformers employed. UTC Linear Standard components represent the closest approach to the ideal transformer from the standpoint of uniform frequency response, low wave form distortion, high efficiency, thorough shielding, and dependability.

LINEAR STANDARD AUDIO UNITS FEATURE:

UNIFORM FREQUENCY RESPONSE . . . at low frequencies, is effected through the use of HIPERM-ALLOY, a STABLE nickel iron alloy of very high initial permeability. Uniform high frequency response is the result of multiple section interleaved windings arranged in a semi-toroidal coil structure. This, plus special winding methods and insulations, assures a minimum of distributed capacity and leakage reactance.

UTC LINEAR STANDARD transformers are the ONLY audio units with a **GUARANTEED** uniform response . . . ± 1.3 DB from 20 to 20,000 cycles.

MINIMUM HUM PICKUP . . . is accomplished through the use of a hum balanced, semi-toroidal, coil structure which affords maximum neutralization of external fields. In addition, all low level units employ an internal high permeability alloy case as well as the high conductivity outer case for maximum shielding. For very low level applications, units whose code numbers end in X employ quadruple alloy shielding, making possible a transformer with the lowest inductive pickup commercially available.

NEGLIGIBLE WAVE FORM DISTORTION . . . is a function of proper impedance matching, minimum phase shift, and low flux density. These elements have been given great attention in the design of Linear Standard units. It is interesting to note that an output transformer reasonably flat from 20 to 20,000 cycles may show serious distortion at 30 and 10,000 cycles. For this reason, UTC high level units have a frequency range better than guaranteed value in some instances up to 50,000 cycles.

MULTIPLE TAP WINDINGS . . . make possible a wide combination of impedance terminations without impairing fidelity or efficiency. Precision winding methods result in winding accuracy of .1% . . . perfect balance of inductance and capacity . . . exact impedance reflection. For all practical uses, 500 ohm termination may be used for 600 ohm requirements. For maximum efficiency and balance, 250 ohm lines are recommended to be connected to 200 ohm terminations.

DEPENDABILITY . . . is a function of external and internal structure. Linear Standard units are housed in rugged die cast cases of precise dimension with reversible mounting to permit above chassis or subchassis wiring. The solid terminal posts on low absorption bakelite are arranged in a circular layout so that a round chassis hole will clear all terminals. Coils are vacuum baked and impregnated. Semi-hermetic sealing is accomplished through the use of a high adhesion compound poured through the large opening opposite the terminal board after controlled preheating of the unit for full compound penetration.

LOW IMPEDANCE TO GRID TRANSFORMERS

Type No.	Application	Primary Impedance	Secondary Impedance	± 1 db from	Max. Level	Relative* hum-pickup reduction	Max. Unbalanced DC in prim'y	Case No.
LS-10	Low impedance mike, pickup, or multiple line to grid	50, 125, 200, 250, 333, 500/600 ohms	60,000 ohms in two sections	20-20,000	+15 DB	—74 DB	5 MA	LS-1
LS-10X	As above	As above	50,000 ohms	20-20,000	+14 DB	—92 DB-Q	5 MA	LS-1
LS-12	Low impedance mike, pickup, or multiple line to push pull grids	50, 125, 200, 250, 333, 500/600 ohms	120,000 ohms overall, in two sections	20-20,000	+15 DB	—74 DB	5 MA	LS-1
LS-12X	As above	As above	80,000 ohms overall, in two sections	20-20,000	+14 DB	—92 DB-Q	5 MA	LS-1
LS-14	Low impedance mike, pickup, or parallel mixer to grid	2.5, 5.5, 10, 15, 22, 30, 38, 60 ohms	60,000 ohms in two sections	20-20,000	+15 DB	—74 DB	5 MA	LS-1
LS-14X	As above	As above	50,000 ohms	20-20,000	+14 DB	—92 DB-Q	5 MA	LS-1
LS-15	Three isolated lines or pads to one or two grids	30, 50, 200, 250 ohms each primary	60,000 ohms overall, in two sections	20-20,000	+15 DB	—74 DB	5 MA	LS-1
LS-15X	As above	As above	As above	20-20,000	+14 DB	—92 DB-Q	5 MA	LS-1
LS-18	High level multiple line to push pull grids	50, 125, 200, 250, 333, 500/600 ohms	50,000 ohms overall, in two sections	20-20,000	+30 DB	—50 DB	5 MA	LS-2
LS-26	Bridging line to single or push pull grids	5,000 ohms	60,000 ohms in two sections	15-20,000	+20 DB	—74 DB	0	LS-1

The values of unbalanced DC shown will effect approximately 1.5 DB loss at 30 cycles.
* Comparison of hum balanced unit with magnetic shielding to normal uncased type.
Q Quadruple alloy magnetic shield.

INTERSTAGE AUDIO TRANSFORMERS

Type No.	Application	Primary Impedance	Secondary Impedance	± 1 db from	Max. Level	Relative* hum-pickup reduction	Max. Unbalanced DC in prim'y	Case No.
LS-19	Single plate to push pull grids like 2A3, 6L6, 300A. Split secondary	15,000 ohms	95,000 ohms; 1.25:1 each side	20-20,000	+17 DB	—50 DB	0 MA	LS-1
LS-20	Single plate to single grid	15,000 ohms	60,000 ohms; 2:1 turn ratio	20-20,000	+14 DB	—74 DB	0 MA	LS-1

SPECIAL LOW LEVEL LINEAR STANDARD UNITS

Where unusual impedance or frequency ranges are required, UTC can supply units to specific customer requirements.

For example, one special design, for bolometer service, has following characteristics:

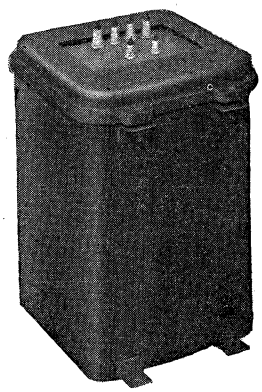
Frequency Range
1 cycle to 20 cycles

Secondary Inductance
250,000 Hys.

Primary Impedance ..... 10 ohms

Impedance Ratio 75,000:1

Shielding...for 100 DB operation



LS-6 CASE

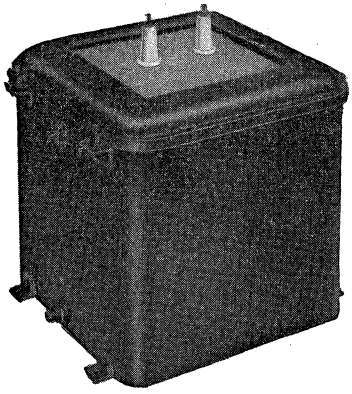
Length	15¾"
Width	13"
Height	22"
Mounting	7⅜" x 14⁵⁄₁₆"
Mounting Hole	⅜" dia.
Unit Weight	350 lbs.

OUTPUT TRANSFORMERS

Linear Standard output and matching transformers employ large cores of high permeability steel and precisely balanced, highly interleaved coil structures. The frequency response and harmonic distortion are unequalled in commercially available material.

The multiple tap windings afford a wide range of impedances for every application. The impedance values given are for one load. Where it is desired to feed two loads simultaneously, with equal power, it is necessary to connect the loads to terminations of half the impedance value.

For example, if it is desired to split the output between a 500 ohm line and a 15 ohm voice coil, connect the the 500 ohm line to 250 ohm termination and the 15 ohm speaker to the 7.5 ohm termination. If the bulk of the output is desired in one of the loads, connect this load to its correct termination and the other load to a termination of 20% rating or less. For example, if in the above case, the speaker were used solely for monitoring, connect 500 ohm line to 500 ohm termination and 15 ohm voice coil to 2.5 ohm termination.



LS-7 CASE

Length	20⅜"
Width	17¾"
Height	26"
Mounting	11⅝" x 19⅜"
Mounting Hole	⅜" dia.
Unit Weight	500 lbs.

DRIVER TRANSFORMERS

LS-34	High level line matching	50, 125, 200, 250, 333, 500/600 ohms	1.2, 2.5, 5, 7.5, 10, 15, 20, 30, 50, 125, 200, 250, 333, 500/600	20-20,000	30 watts	LS-3

LINEAR STANDARD POWER EQUIPMENT

In choosing power components for broadcast and commercial equipment, the first factor to be considered is dependability. Linear standard power components are very conservatively designed for maximum reliability. Designs provide for low temperature rise 40°, and high insulation safety factors. Only the finest of materials and workmanship are used throughout.

The low power components of the Linear Standard series are housed in the familiar rectangular LS case with top or bottom mounting facilities. High power components are housed in end castings which completely protect the ·inding, while directly exposing the laminations for maximum heat transfer.

·nits have a deep grey finish to obtain the highest heat radiation co-effi-
·rge components (up to 250 KVA) are housed in oil tanks.

UTC VARIABLE INDU

UTC type VIC variable inductors offer a revolutionary approach to th lem of tuned audio circuits. By adjusting a set screw in the side of th an inductance valve of +90%, —50% from mean value is obtainable. S is positive. Effective Q for a wide frequency range and variation of induct with applied AC voltage are shown on the illustrated curves, for a typic VIC unit.

The VIC inductor is housed in a rugged die cast case 1 11/32" long, 1 1/4" wide and 1 1/16" high with mounting centers on terminal board side 13/16" by 29/32" Weight is 5 1/2 oz.

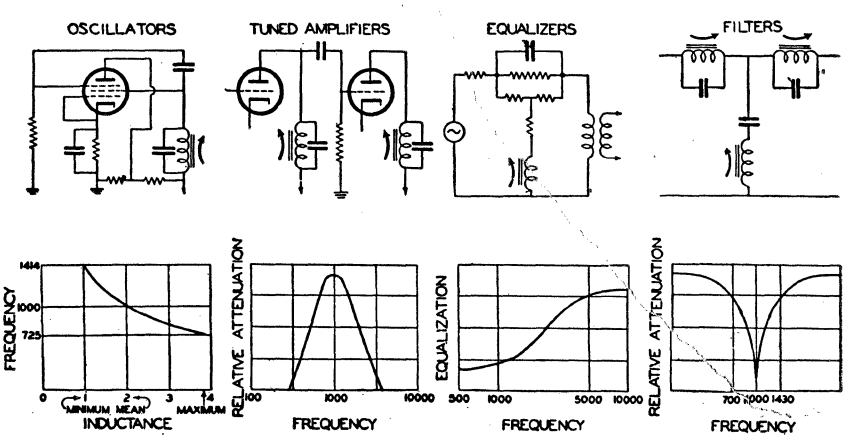
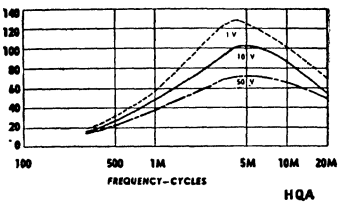
TYPICAL VIC APPLICATIONS



UTC HIGH Q TOROID INDUCTORS

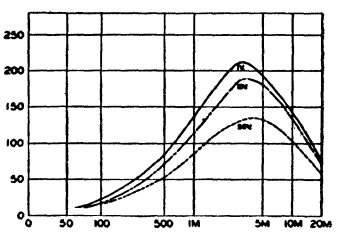
There are many applications in the audio, carrier, and supersonic field requiring inductors of high Q and great stability. The HQ series of units developed for these applications have remarkable characteristics as illustrated below. HQA coils have high Q (100 at 5000 cycles) and are available in inductances from 5 MHY to 2 henrys. HQB coils have very high Q (200 at 4000 cycles) and are available in inductances from 5 MHY to 12 henrys.

HUM PICKUP is low due to the toroidal winding structure, 70 and 140 microvolts per gauss respectively for the HQA and HQB at 60 cycles.



HQA

Stability is excellent. For the .14 Hy. HQA ...l illustrated, inductance change is less than ...or applied voltages from .1 to 25 volts ...cles. For the .45 Hy. HQB coil illus... inductance change is less than 1% ...tages from 1 to 50 volts 1000 ... variation from −55 to plus ...ade is less than ⅓%. due to DC current is ...MA linearly for the ¾% for the HQB. ... sealed.



...y type followed by in... ...e a 250 MHY type HQB ...ered as HQB-250 MHY. ...ce tolerance is 2%. For 1% ...crease is 10%.

INTERSTAGE FILTERS

...ge filters lend themselves to effecting gain simultaneously with their frequency ...ination. UTC manufactures three basic types of filters for such application with a ...nal impedance of 10,000 ohms to be used in a circuit as illustrated.

Type BPI (band pass), LPI (low pass), and HPI (high pass) interstage filters are not carried in stock, but are available from standardized designs and components. They are available for any frequency from 200 to 10,000 cycles. Order by type followed by frequency as: LPI-2500, which designates a low pass filter—2500 cycles cutoff frequency For low impedance circuits (500/600 ohms), order as BPL, LPL or HPL in similar manner

All interstage filters are housed in hermetically sealed cases identical in dimensions to HQB, but cutout is ⅝ x 2 inches. Dual alloy shielding reduces hum pickup to 150 MV per gauss at 60 cycles.

BPI units have 2:1 gain. They are sharply peaked, having approximately 2 DB attenuation at plus or minus 3% from mean frequency and attenuations of approximately 40 DB per octave. They are adjusted to zero phase shift at mean frequency

HPI units have loss of less than 6 DB at cutoff frequency. At .67 cutoff frequency the attenuation is 35 DB and at .5 cutoff frequency, 40 DB

LPI units have loss of less than 6 DB at cutoff frequency At 1.5 cutoff frequency the attenuation is 35 DB and at twice cutoff frequency, 40 DB

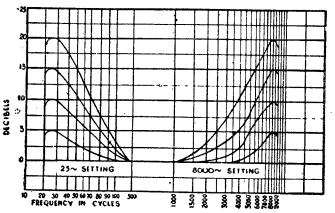
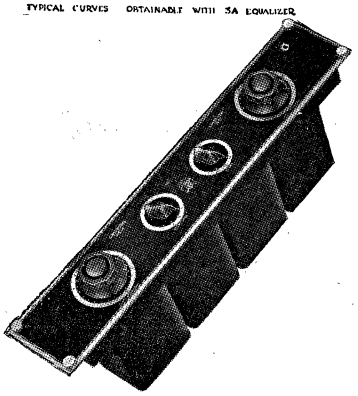
EQUALIZERS and FILTERS



TYPICAL CURVES OBTAINABLE WITH 3A EQUALIZER



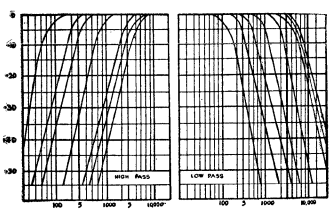
3AX UNIVERSAL EQUALIZER*

The universal characteristics of the UTC 3AX equalizer have made it the most popular item for broadcast and recording equalization. This unique unit, with which most communications engineers are already familiar, is an accurately calibrated, quickly adjustable, combined low and high frequency equalizer. The low frequency controls include a switch for adjusting the maximum equalization frequency to 25, 50, or 100 cycles and a calibrated T-pad for exact adjustment of the amount of equalization. The high frequency portion of this unit includes a switch to set maximum equalization point at 4000, 6000, 8000, 10,000 or 15,000 cycles, and a similar calibrated control reading directly in DB. Equalization up to 25 DB available at any frequency selected.

Through a unique arrangement of compensating pads, changes in adjustment of the 3AX equalizer do not affect the insertion loss (50 DB). This permits rapid changes in tone color, with negligible change in volume. Where rapid change-over is required in service from one line to another, or from recording to play back, it is merely necessary to predetermir the required setting. The actual adjustment of the controls can be taken care of al instantaneously. The construction is of the depressed chassis, etched panel, rack type. Thoroughly shielded against inductive pickup with UTC Trialloy Shielding. Di of panel 3½" x 19" Depth 7½". Weight 15 lbs.

3A UNIVERSAL EQUALIZER*

The 3A equalizer is identical to the 3AX described above, excer porate the compensating pads for constant insertion loss. The proportional to the amount of equalization employed. All other char the 3AX unit, this item weighs 10 lbs.



CHARACTERISTICS OBTAINABLE WITH 4C FILTER

4C SOUND EFFECTS FILTER*

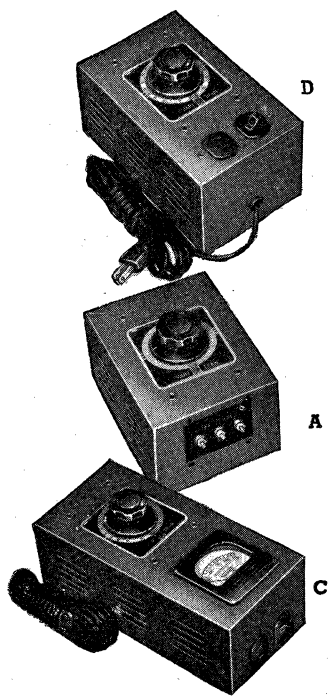
The use of filters to obtain unusual sound effects is now finding wide app. cast technique. The Model 4C Filter was originally developed for one of the chains, and is now used extensively by most broadcast stations Two c vided on the 5¼" x 19" panel, which is similar in appearance to the 3AX u of the 4C unit is 20 lbs.

The low pass switch can be set for cutoff frequencies of 100, 250, 500, 100 4000, or 5000 cycles. The high pass switch has identical frequency points. The c of cutoff frequencies provides for a wide latitude of tone control. If desired, normally necessary, external potentiometers may be inserted in the circuit for control.

*500/600 ohms

UTC VARITRAN CONTROL UNIT

For controlling: Rectifier output . . . motors . . . heaters . . . lights . . . line volta



The UTC Varitran is a simple autotransformer whose turns are arranged on one layer with the insulation removed so that every exposed turn may be used as a tap of the winding. A special non-fusing contact can be moved to any position on the winding, permitting the exact voltage desired to be obtained. The regulation and efficiency are excellent and no distortion of wave form occurs. The output voltage is independent of load. In addition to its many laboratory uses, the Varitran is widely employed for controlling electric ovens, fans, soldering irons, furnaces and heaters, for photographic and enlarging lighting control, for life tests of lamps and for dimming illumination.

VARITRAN RATINGS

Standard Varitrans are designed for 115 or 230 volt service. The respective output voltages are 0-130 and 0-260 volts The Varitran autotransformer current and wattage rating is based at 115 volts (115V models) As the voltage is reduced, the wattage output is reduced correspondingly The maximum current can be taken at any point from 0 to 20 volts and from 95 to 130 volts. Between 20 and 95 volts the current capacity tapers off from the two ends to approximately 60% of the rated maximum current at the 65 volt point. The mounting facilities are at both top and bottom of each unit to assure ease of mounting on panel, chassis or for laboratory bench service.

V-4-B	230 volts	0-260	1250	5.5	A	6¼ x 10¾ x 5	36

UTC HIPERM ALLOY TRANSFORMERS

The UTC Hiperm alloy audio and power transformers are specifically designed for portable and compact service. While light in weight and small in dimensions, neither dependability nor fidelity has been sacrificed. The frequency characteristic of the Hiperm alloy audio units is uniform from 30 to 20,000 cycles. These units are similar in general design and characteristics to the Linear Standard audio units, incorporating a Hiperm-alloy nickel iron core and a hum balanced coil structure. The rugged die cast case is of high conductivity alloy finished in grey, arranged for mounting with the terminals either up or down.

UTC MICROPHONE CABLE TRANSFORMERS

UTC cable transformers are designed to be inserted in the cable circuit, and are ruggedly constructed to withstand mechanical abuse. The cable connections (supplied less cable) are made through the spring strain relief to terminal boards inside the end caps. These units may be located any place on the cable within twenty-five feet of the amplifier. 1 1/2" diameter . . . 2 1/2" long . . . 1/2 lb.

UTC MICROPHONE CABLE TRANSFORMERS

Type MC-1—primary tapped 30/50 and 200/250 ohms, secondary to grid standard fidelity.

Type MC 2—primary tapped 30/50 and 200/250 ohms, secondary to grid, high fidelity.

ULTRA COMPACT AUDIO UNITS

The UTC Ultra compact audio units are small and light in weight, ideally suited to remote amplifier and similar compact equipment. High fidelity is obtainable in all individual units, the frequency response being ± 2 DB from 30 to 20,000 cycles.

All units except those carrying DC in Primary employ a true hum balancing coil structure, which combined with a high conductivity outer case, effects good inductive shielding. The die-cast (Type A) case provides for top or bottom mounting. Maximum operating level + 10 DB.

Height	1 15/32"
Socket	Standard Octal

UTC OUNCER components represent the acme in compact quality transformers. These units, which weigh one ounce, are fully impregnated and sealed in a drawn aluminum housing 7/8" diameter . . . mounting opposite terminal board.

Ouncer items are ideal for portable broadcast, hearing aid, aircraft, concealed service, and similar applications. High fidelity characteristics are provided, uniform from 40 to 15,000 cycles, except for 0-14, 0-15, and units carrying DC which are intended for voice frequencies from 150 to 4,000 cycles. Maximum operating level 0DB.

"P" series units are identical to the UTC OUNCER units but are sealed in bakelite housings with plug in base to fit standard octal socket. While of submersion proof design, these units weigh but two ounces. Oversize pins in the base make it impossible to dislodge these units from their sockets, even when used upside down in portable equipment.

SUBOUNCER UNITS

FOR HEARING AIDS . . . VEST POCKET RADIOS . . . MIDGET DEVICES

UTC Sub-Ouncer units weigh only 1/3 ounce. Through unique construction, however, these miniature units have performance and dependability characteristics far superior to any other comparable items. The coil is uniform layer wound of Formex wire . . . On a molded nylon bobbin . . . insulation is of cellulose acetate . . . leads mechanically anchored . . . core material Hiperm-alloy . . . entire unit triple (waterproof) sealed. The frequency response of these standard items is ± 3 DB from 200 to 5,000 cycles.

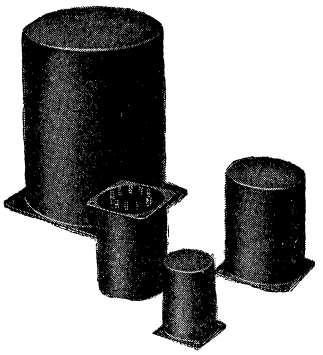
SUB-OUNCER UNIT

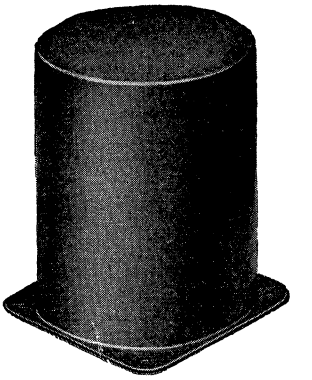
Dimensions	9/16" x 5/8" x 7/8"
Weight	1/3 oz.

UTC COMMERCIAL GRADE COMPONENTS



The commercial grade series of transformers incorporate conservative design and rugged construction to assure dependability under continuous service operation in industrial and commercial grade communication equipment. These units are mounted in uniform drawn cases finished in light grey enamel, and intended for chassis mounting. All items are poured with special sealing compound in addition to vacuum impregnation of coil structures. The CG line was developed to replace our very popular PA series in a more rugged construction, with professional appearance. Type numbers are identical with the PA units except for the prefix "CG".

CG-134, 135 and 136 are of the hum-bucking type to assure low hum pick-up. All audio components are linear. ±1½ DB from 60 to 8,500 cycles (no unbalanced D.C.). Parallel feed low level interstage units with 50,000 ohms and .25 mfd. 200 ohm windings on input transformers are balanced and may be used for 250 ohm circuits.



INPUT, INTERSTAGE, MIXING AND LOW LEVEL OUTPUT TRANSFORMERS

(200 ohm windings are balanced and can be used for 250 ohms)

Type No.	Application	Primary Impedance Ohms	Secondary Impedance Ohms	Case No.
CG-131	1 plate to 1 grid	15,000	90,000 2:1 ratio	RC-50
CG-132	1 plate to 2 grids	15,000	135,000 centertapped 3:1 ratio overall	RC-62
CG-133	2 plates to 2 grids	30,000 P to P	80,000 overall 1.6:1 ratio overall	RC-75
CG-134	Line to 1 grid hum-bucking	50, 200, 500	80,000	RC-50
CG-135	Line to 2 grids hum-bucking	50, 200, 500	120,000 overall	RC-50
CG-235	Line to 1 or 2 grids, hum-bucking; multiple alloy shielded for low hum pick-up	50, 200, 500 ohms	80,000 overall	RC-75
CG-136	Single plate and low impedance mike or line to 1 or 2 grids Hum-bucking	15,000, 50, 200	80,000 overall	RC-62
CG-233	PP 6C5, 56, similar triodes to AB 45's, 2A3's, 6L6's, etc.	30,000 P to P	25,000 overall .9:1 ratio overall	RC-87
CG-333	PP 6C5, 56, similar triodes to fixed bias 6L6's	30,000 P to P	7,500 overall .5:1 ratio overall	RC-87

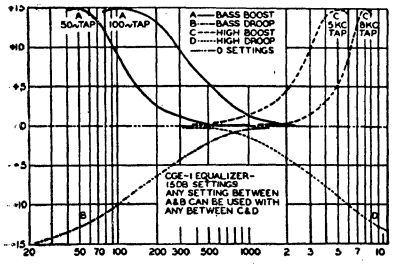
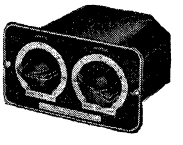
CG-140	Triode plate to line	15,000	50, 200, 500	RC-50
CG-141	PP triode plates to line	15,000	50, 200, 500	RC-50





UNIVERSAL INTERSTAGE EQUALIZER

This new UTC unit is the ideal device for any application requiring frequency response correction. Designed to be connected between two triode audio stages or will match a high impedance (5000 to 30000 ohms) source to grid.

The CGE-1 equalizer is not a simple R-C tone control, but employs resonant circuits to permit low or high end equalization without effecting mid-frequencies. With controls in center, no equalization is effected. Moving one control to left increases bass; to right, drops bass. Moving other control to left increases highs; to right drops highs. Controls are independent so that bass may be raised and highs dropped simultaneously, etc Amount of equalization is continuously adjustable, up to 15 DB. The insertion loss effected is equal to the combined low frequency and high frequency settings plus 6 DB, or a maximum of 36 DB. Unless existent gain of equipment to which CGE-1 is added is high, an additional audio stage may be required.

This unit comes complete so that controls with etched panel (calibrated in DB) can be mounted on a chassis (2½ inch minimum) or a panel with case containing the electrical elements held by etched panel screws.

CGE-1 Panel Dim. 2⅜ x 4. Wt. 2 Lb.

COMMERCIAL GRADE CASE

Case No.	Base Dim. (Sq.)	Mounting Dim. (Sq.)	Height	Cutout Dia.	Unit Weight (Lbs.)

CG VARIMATCH OUTPUTS FOR P. A.

Universal units designed to match **any tube** within the rated output power, to line or voice coil. Output impedance 500 200, 50, 16, 8, 5, 3, 1.5 ohms. Primary impedance 3000, 5000, 6000, 7000, 8000, 10,000, 14,000 ohms (except 125 and 300 watt models).

Case No.	Audio Watts	Typical Tubes	Case No.
CVP-1	12	42, 43, 45, 47, 2A3, 6A6, 6F6, 25L6	RC-100
CVP-2	30	42, 45, 2A3, 6L6, 6V6, 6B5	RC-125
CVP-3	60	46's, 50's, 300A's, 6L6's, 801, 807	RC-150
CVP-4	125	800's, 801's, 807's, 4-6L6's, 845's	RC-152
CVP-5	300	211, 242A's, 203A's, 838's, 4-845's, ZB-120's	RC-175

CG VARIMATCH LINE TO VOICE COIL TRANSFORMERS

The UTC VARIMATCH line to voice coil transformers will match any voice coil or group of voice coils to a 500 ohm line. More than 50 voice coil combinations can be obtained, as follows:

.2, .4, .5, .62, 1, 1.25, 1.5, 2, 2.5, 3, 3.3, 3.8, 4, 4.5, 5, 5.5, 6, 6.25, 6.6, 7, 7.5, 8, 9, 10, 11, 12, 14, 15, 16, 18, 20, 25, 28, 30, 31, 40, 47, 50, 63, 69, 75.

Where speakers are to be connected in groups to one transformer, it is preferable that parallel connection be used to eliminate the possibility of multiple resonance. If two speakers of different impedances are connected in parallel, the lower impedance speaker will develop greater power. If connected in series, the higher impedance speaker will develop greater power.

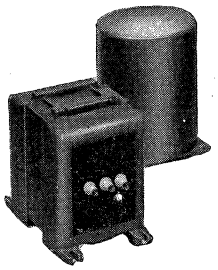
Type No.	Audio Watts	Primary Impedance	Secondary Impedance	Case No.
CVL-1	15	500 ohms	.2 to 75 ohms	RC-87
CVL-2	40	500 ohms	.2 to 75 ohms	RC-125
CVL-3	75	500 ohms	.2 to 75 ohms	RC-150

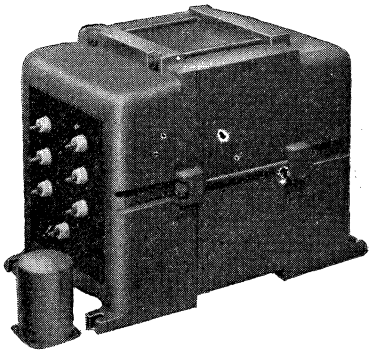
CG VARIMATCH LINE AUTOFORMERS

UTC Varimatch Line Autoformer will match one to ten 500 ohm lines or CGL windings to the 500 ohm output of an audio amplifier. The CGA-10 to 12 autoformers have impedances of 500, 250, 167, 125, 100, 83, 71, 62, 50 ohms.

Type No.	Audio Watts	Case No.
CVL-10	15	RC-87
CVL-11	30	RC-125
CVL-12	60	RC-150

COMMERCIAL GRADE COMPONENTS





UTC CG power transformers, Varimatch units and chokes are designed to A.I.E.E. commercial standards. Ratings are conservative for continuous duty. Designs provide temperature rise less than 55 degrees C Units are tested for breakdown at twice maximum working voltage plus 1000 volts. Plate transformers are given a surge test of 250% normal voltage at 200 cycles. All items are vacuum impregnated and sealed with special insulating compound.

The conservative design and manufacturing procedure of these units make them suitable for virtually all types of commercial equipment as well as ideally suited for quality amateur and public address service.

CG VARIMATCH MODULATION UNITS

Will match any modulator tubes to any RF load.

The ever increasing number of vacuum tubes available for audio and RF applications has increased the difficulty of obtaining transformers suitable for matching to the various correct tube loads. If a standard transformer having a limited impedance range is purchased and used for a specific purpose as the "nearest thing" available, comparatively high distortion is inevitable. While a 20% mismatch caused by such an occurrence does not represent a serious loss in power, it greatly reduces the undistorted power available from a class B modulator because optimum plate load is not reflected to the tubes. The UTC Varimatch transformer eliminates this difficulty through the use of a combination of tapped windings affording an extremely wide range in impedance matching. Designs provide that for any load impedance employed, full class C plate current can be carried by secondary winding.

Primary impedances from 500 to 20,000 ohms
Secondary impedances from 30,000 to 300 ohms

Type No.	Max. Audio Watts	Max. Class C Input	Typical Modulator Tubes	Case No.

VARIPOWER AUTO-FORMERS

Designed for line voltage control, filament control and reduced power operation. Output voltage from 0 to 130 volts, 50/60 cycles. Varipower units permit control of filament voltage at the tube socket to within 2½% of desired value simultaneously with line voltage control and plate voltage control. Can be used to reduce or increase voltages on filament transformers. Taps at 25, 55, 75, 95, 100, 105, 110, 115, 120, 125 and 130 volts permit output voltages from 0 to 130 volts in 5 volt steps.

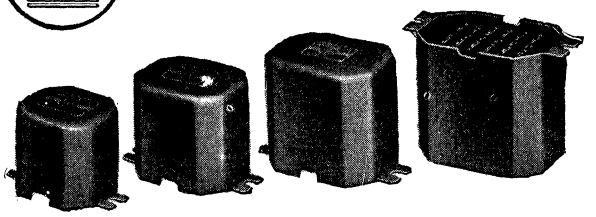
SPECIAL SERIES AUDIO TRANSFORMERS



UTC Special Series transformers are specifically designed for amateur and popular-priced PA service. The Special units are finished in a rich, commercial type medium gray enamel. A recessed terminal strip is provided permitting above chassis or breadboard wiring in addition to standard chassis type wiring. The universal windings provided on driver, matching and output transformers assure a maximum of flexibility. Modulator output units will carry the DC current of the class C stage for any of the impedances available and will match practically any audio tubes to any RF load within the power rating of the transformer. Large components are housed in formed cases with top or bottom mounting. All units are vacuum impregnated — compound filled.

CASE SIZES

Type No.	H	W	D	M	Wt. Lbs.

* Above manufacturers' rating, but frequently employed by amateurs.

UTC SPECIAL SERIES POWER EQUIPMENT

UTC Special Series power supply components are designed specifically for amateur and popular-priced PA service. The ratings are based on such applications and recommended for intermittent service. For commercial applications, CG or LS grade components should be employed. Tapped coil structures on power and bias supply transformers afford maximum flexibility, permitting a given transformer to be used with many circuits and types of tubes.

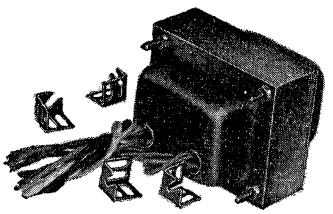
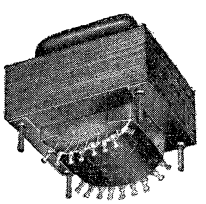
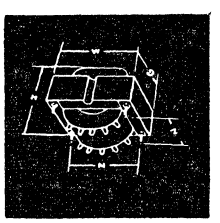
The UTC replacement type transformers represent the culmination of years of development in this field All units are vacuum sealed against humidity with special impregnating materials to prevent corrosion and electrolysis. Shells and brackets are finished in attractive high lustre black enamel

The UTC shells and universal brackets employed make possible a latitude in mounting dimensions never approached heretofore Using Varitap coil construction a minimum number of transformers have been developed to cover any requirement in the replacement field.

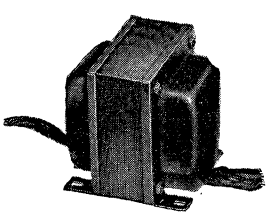


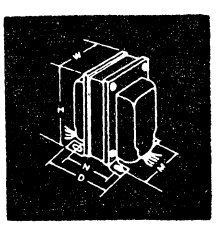
Through unique construction the five UTC Varitap Duplicate replacement transformers will service as many types of radio receivers as the 15 or 20 units more customarily employed for such service. The universal feet may be used for upright or horizontal mounting, or eliminated for flush mounting.



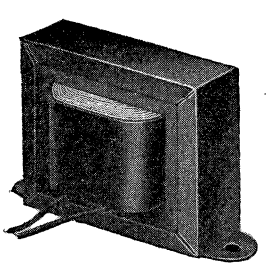


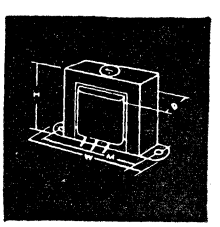
UTC flush type transformers are husky units designed for low temperature rise and good regulation. By employing a Varitap universal coil structure, the five units described are universal in application. The rugged solder terminals permit ease of circuit change for the experimenter.



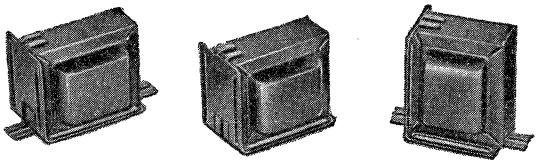


UTC vertical power transformers are unusually attractive in appearance, having smooth drawn cases finished in high lustre black enamel. The Varitap coil structure assures flexibility of application.





Channel frame chokes and audios are conservatively designed. Standard black enamel mounting channels are employed. Coils are tropic-sealed by vacuum-pressure method.



Varitap Duplicate audio units are extremely attractive, the double shells and universal mounting brackets being finished in high lustre black enamel. The figure A units use the UTC universal bracket. This bracket makes possible four hole horizontal or vertical mounting and two hole, channel type, horizontal or vertical mounting. The coils of these units, in addition to efficient design and mechanical shielding, are vacuum impregnated and sealed with a special compound to assure complete protection against adverse climatic conditions.

SHIELDED UNIVERSAL MOUNTING AUDIO TRANSFORMERS AND FILTER CHOKES

Type No.	Application	Description	Fig.	Wgt. Lbs.
R-23	1 plate* to 1 grid	3½:1 ratio	A	1
R-24	1 plate* to 2 grids	2:1 ratio	A	1
R-25	2 plates* to 2 grids	1.5:1 stepup for class A triodes, 1.5:1 stepdown for 6L6's, 2A3's, 2A5's, etc.	A	1¼
R-26	Driver, 1 plate to 2 grids	Single 42, 2A5, 6F6, 45, 46	A	1¼
R-27	15 watt Universal Output	All tubes up to 15 watts to any voice coil from .1 to 30 ohms	A	1¼
R-28	35 watt Universal Output	All tubes up to 35 watts to any voice coil from .1 to 30 ohms	B	2½
R-29	Mike to grid	Single or double button mike or line to 1 grid	A	1¼
R-30	Filter choke	13 Hys—250 MA—100 ohms	C	7
R-31	Filter Choke	10 Hys— 80 MA—250 ohms	A	2½
R-32	Filter choke	10 Hys—150 MA—100 ohms	B	2¼

* Will match tubes like 27, 37, 56, 6C6 triode, 6C5. Can be used with high mu triodes with loss in low frequencies.

CHANNEL FRAME AUDIO TRANSFORMERS

Type No.	Application	Description	Dimen., Ins. W	D	H	M	Wt. Lbs.

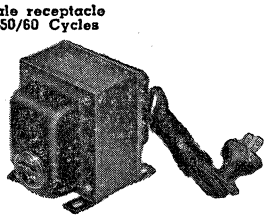
* Will match tubes like 27, 37, 56, 6C6 triodes, 6C5. Can be used with high mu triodes with loss in low frequencies.

STEP DOWN AUTO-TRANSFORMERS

With 6 foot cord and female receptacle
220-240 to 110-120 Volts—50/60 Cycles

Type No.	Application	Wgt. Lbs.
R-41	85 watt capacity	4
R-42	125 watt capacity	5
R-43	175 watt capacity	5½
R-44	250 watt capacity	6½
R-45	500 watt capacity	12
R-46	1200 watt capacity	18
R-64	2500 watts, no cord	30

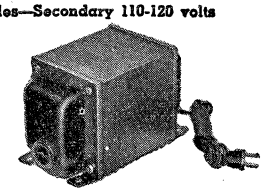


ISOLATION TRANSFORMERS

Ideal for isolating line noise, AC-DC sets, etc. Excellent electrostatic shielding. 2000 volt breakdown test. Six foot cord and female receptacle.

Primary 110-120 volts, 50/60 cycles—Secondary 110-120 volts

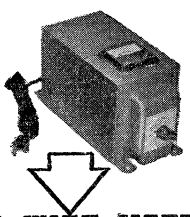
Type No.	Rating	Wgt. Lbs.
R-73	100 watts	6
R-74	250 watts	12
R-75	600 watts	20
R-76	1200 watts	30
R-77	2500 watts (no cord)	70



EXPORT VOLTAGE ADAPTER

Complete with cord and plug and special locking switch providing for line voltages of 105, 115, 125, 135, 150, 210, 230, 250 volts; 42 to 60 cycles. Output voltage 115.

Type No.	Rating	Wgt. Lbs.
R-47	85 watts	4½
R-48	150 watts	5½



LINE VOLTAGE ADJUSTERS WITH METER

The perfect answer to abnormal or fluctuating line voltage. Adjust switch so that meter reads at red line and you know that your equipment is working at correct voltage.

These units combine a tapped auto-transformer with a switch and meter in a compact, rugged assembly.

The nine tap switch provides for line voltages of 60 to 140 volts on 115 volt output models and 160 to 240 volts on 230 volt output models.
All units are designed for 50/60 cycle service and come complete with 6 foot input cord and plug and outlet receptacle.

Type No.	Primary Voltages	Sec. Volts	Watts	Wt. Lbs.
R-78	60, 70, 80, 90, 100, 110, 120, 130, 140	115	150	6

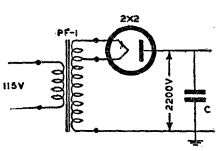
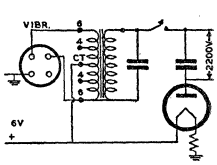
PHOTO FLASH TRANSFORMERS

Can be used for either standard (Amglo type) or trigger (Sylvania type) multiple flash bulbs. Circuit details included with transformer.



PF-1 Primary for 115 volts, 50/60 cycles. Secondaries for power supply delivering 2200 volts DC to condenser up to 100 Mfd. (30 Mfd. charges in 4 Sec.) Compound sealed in G-3 case 2⅛ x 2¾ x 2½ inches high. Weight 2 Lbs.



PF-2 For portable photoflash service. Primary tapped for 4 volt or 6 volt battery (full wave vibrator). Secondary for power supply delivering 2200 volts DC to condenser up to 60 Mfd. (30 Mfd. charges in 8 sec. with 6 volts or 14 Sec. with 4 volts). Compound sealed in G-3 case. Weight 2 Lbs.

PF-3 Trigger Transformer 15 KV peak

TELEVISION TRANSFORMERS

These components are quality designs, vacuum impregnated and fully compound sealed in heavy steel cases affording a high degree of shielding.

Type No.	Application	Case	Wt. Lbs.
R-91	Horizontal oscillator (15750 cycles)	RC-50	1
R-92	Vertical oscillator (60 cycles)	RC-50	1
R-93	Vertical output, tapped for different tubes	RC-100	4
R-94	Horizontal output (special core), tapped for adjustment	RC-100	4
R-95	2800 vac (4000 DC) 2.5V-1.8A., 6.3V-.6A tapped 2.5V-2.1A., 7000 V test	RC-125	5

PARALLEL FEED AUDIO REACTORS

Designed to eliminate the direct current component in the primary of audio transformers to be used as plate coupling reactor where the use of a high resistance is objectionable. Low distributed capacity insures excellent high frequency response.

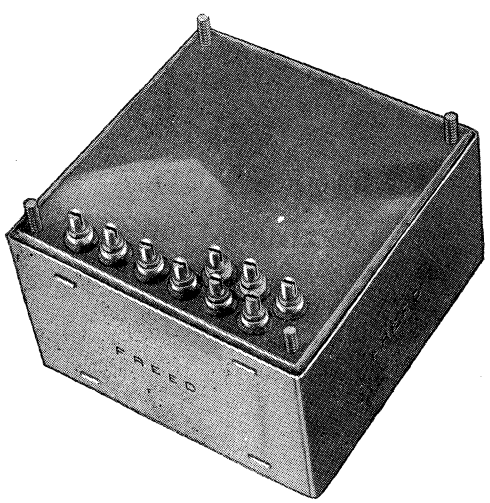
The mounting dimension 1 5/8 is given between centers across corners.



THE FREED MULTICHANNEL FILTER

The unit is a five channel interstage type narrow bandpass filter designed for frequency selective remote control applications. The five inputs are connected in parallel, the five outputs are available separately. The frequency characteristic of each individual filter is ±1.5 DB for ±10% of the nominal frequency. The attenuation per octave ranges from 35 to 40 DB. Each individual filter provides a step up ratio of 6 DB. The units are designed for a 10,000 ohms input impedance. Filters of this type can be supplied for frequencies from 300 to 10,000 cps.

OUTPUT TRANSFORMERS

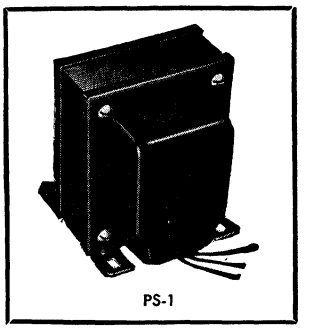
H. O. T. Series



PS-1

Designed for delivering the maximum audio frequency power from an amplifier to a load (voice coil or line). Good frequency response and low harmonic distortion are the quality factors of the H.O.T. output transformers. Fully enclosed shielded type with leads. All H.O.T. series transformers have multiple secondary impedances.

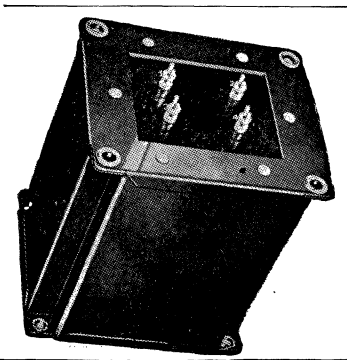
The 500 ohms secondary is designed in such a way that it can be used with a 600 ohm line.



FREED BAND PASS FILTER

This unit is designed for use in communication equipment to transmit speech frequencies only. The highly selective property of the filter makes possible the increase of power in the frequency band necessary for special communication work and eliminates undesirable frequency components in the high and low end of the audio spectrum.

THE FILTER HAS THE FOLLOWING CHARACTERISTICS:

10,000 ohms or 8000 ohms impedance
Low frequency cut-off at 300 cps
High frequency cut-off at 3000 cps
2.5 DB attenuation at the cut-off frequencies
1.5 DB Insertion Loss
40 DB attenuation at 100 cps
Working Level — 0 DB
Maximum Level — ±10 DB.

40 DB attenuation at 50% of the high frequency cut-off.

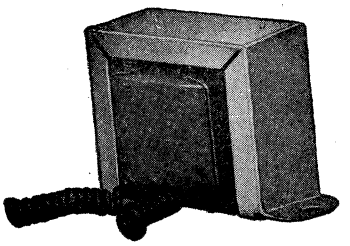
AUDIO TRANSFORMERS

Receiver and Amplifier



CH-1

RECEIVER AUDIO TRANSFORMERS

Designed for use in receiver audio circuits where a reasonably good frequency response is required. To be used for Class A applications, i.e., where no great current is drawn.

AMPLIFIER AUDIO TRANSFORMERS

Designed for amplifier and transmitter audio circuits. To be used for Class "A" applications.

Fully enclosed shielded type construction, conservative design and good frequency response are the quality features of the amplifier audio transformers.

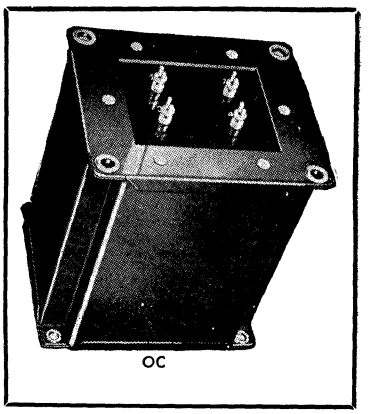
AUDIO TRANSFORMERS

C Series

FREED TRANSFORMER CO., INC.



OC

A quality line of transformers used in Public Address amplifiers and transmitters. Uniform case design, universal mounting, conservative ratings, vacuum impregnation of coils and moisture proof sealing of all these transformers is one of the outstanding features of the C Series Audio Transformers.
Low level input and output transformers have a balanced hum bucking coil construction. The frequency response of all these units is flat within ± 2 db from 60 to 10,000 cps.

RADIO'S MASTER

AEROVOX Electrolytic Capacitors

IF IT'S MARKED "AEROVOX" IT'S A QUALITY CAPACITOR

UPRIGHT OR INVERTED MOUNTING CAPACITORS

TYPE E

These units are widely used in highest-quality radio, communications, electronic and similar types of apparatus. Type E capacitors are hermetically-sealed. Ring-type clamp provides rigid and convenient method of mounting unit inverted or upright, beneath, on, or through mounting surface. Available with single or multiple elements. Single unit has two terminals, dual unit has three terminals, and triple unit has four terminals. Cathode connections made through one terminal in cover.

INSULATED SCREW-MOUNTING CAPACITORS

TYPE G

These capacitors are highest quality hermetically-sealed aluminum can units, used in all quality electronic, radio and communications equipment. Constructed with threaded cover, provided with lock washer and hexagonal nut to provide simple means of mounting capacitor through hole in mounting surface. The capacitor may also be insulated from chassis by use of an insulating washer. Terminals are molded in cover. Single element units have two terminals; dual-element units have three terminals. Cathode connection in made through one terminal in the cover.

SCREW-MOUNTING WIRE-LEAD CAPACITORS

TYPE GL

These inverted mounting, aluminum can capacitors are made in single, double and triple section units with two separate color-coded leads 3½" long brought out from each section. The threaded neck and palnut provide a simple means of mounting the unit through a hole in the mounting surface. *Suitable for replacement of wet electrolytics.

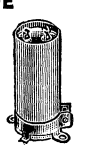
HIGH-CAPACITY LOW-VOLTAGE CAPACITORS

TYPE HCLV



These high-capacity low-voltage units are used in electric fence control and other applications requiring very high capacitance values at very low voltages. These capacitors are supplied with an outer insulating tube and mounting ring. Sizes given below are over the outside tube.

Type HCLV12—12v D.C. Working

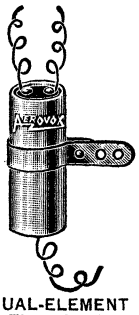
AEROVOX Electrolytic Capacitors

IF IT'S MARKED "AEROVOX" IT'S A QUALITY CAPACITOR

DANDEES
Minature Tubular Aluminum Can
DRY ELECTROLYTICS

TYPE PRS

SINGLE-SECTION
Two Leads



DUAL-ELEMENT
Three Leads

Tightly sealed aluminum-can dry electrolytics for use where money- and space-saving considerations are paramount. Smallest proportions consistent with full-rated capacity and voltage, operating under normal-duty conditions.

Excellent for crowded assemblies. DANDEES are favorites for use in midget sets, AC-DC sets, auto-radios, etc. Also many servicing jobs where low cost is important.

Electrically insulated with special waxed paper jacket. Ends spun over can rim, eliminating possibility of shorts if leads are bent close to unit. Generous length tinned wire leads. DANDEES are thoroughly aged, ready for immediate use. Each unit is thoroughly tested. Individually packed with guarantee slip. Dual-element units have three leads (common negative).

TWIST-PRONG BASE CAPACITORS*

TYPE AF

These capacitors are tightly sealed round aluminum can units. They are mounted by means of prongs which extend through the mounting surface and are twisted to hold the unit in place. These are high-quality units especially suitable in compact assemblies where space is limited. All connections, except the cathode, are made through terminals in the cover. The cathode is connected to the container. Base prongs slip into fibre or metal elliptic washer that is riveted or eyeletted on chassis, and are bent over. Fibre washer provides insulated can; metal elliptic washer, grounded can. **Metal or fibre washer supplied at 5c each net.** The terminal lugs slip through holes in washers for soldered connections.

AEROVOX Electrolytic Capacitors

IF IT'S MARKED "AEROVOX" IT'S A QUALITY CAPACITOR

PLUG-IN ELECTROLYTIC CAPACITORS

TYPE AEP

Quick change dry electrolytics. Facilitate testing and replacement in equipment where continuity of service is important. Install merely by plugging into standard octal socket. Unit can be inserted only the right way. Key of octal base fits octal socket. Ultra-compact due to use of etched foil for higher capacities in the small can sizes. Aluminum internal construction. Non-corrosive due to use of similar metals throughout. Fully vented for safety.

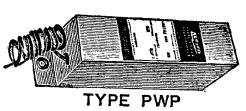
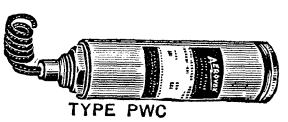
PAPER-WOUND REPLACEMENTS FOR ELECTROLYTICS



TYPE PWP



TYPE PWC

High-grade paper sections in standard inverted screw mounting aluminum can (PWC) or cardboard case (PWP) similar in appearance to electrolytics. Used as replacements for standard electrolytics indicated; applications subjected to high AC component or ripple particularly in first stage of filter circuit; or where excessive surges are encountered. No polarity to be observed. Actual capacity indicated in each case. Capacity is less than electrolytic being replaced but will be found adequate in most filter circuits since filtering capacity in electrolytics is more than generous. PWP has cardboard mounting flanges; PWC similar to the inverted dry electrolytic types.

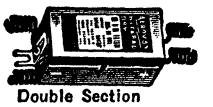
SPACE-SAVER MIDGET CAPACITORS

TYPE PBS

Single Section



Double Section

Units encased in heavy cardboard containers, thoroughly impregnated and fully sealed. Two color-coded wire leads for each section; four leads, double section; six leads, triple section. Units may be mounted flat or upright; also, two or three units may be stacked by overlapping the metal flanges.

AEROVOX Mica Capacitors

IF IT'S MARKED "AEROVOX" IT'S A QUALITY CAPACITOR.

"POSTAGE-STAMP" MOLDED-IN-BAKELITE MICA CAPACITORS

Wide choice of designs, sizes, mountings, terminals offer the correct Aerovox unit for every application, as listed. Units built of selected mica and foil; molded bakelite casing impervious to moisture, heat, mechanical damage. Micrometer test for mica thickness maintains capacity values for long life. Capacity values indicated on units.

Type 1467

Compact, size $\frac{25}{32}$ in. square, provided with wire leads. 1000 volts D.C. Test—500 volts D.C. Working.

PORCELAIN-CASED MICA CAPACITORS

Ideal for those higher-frequency applications. Encased and hermetically-sealed in glazed porcelain case. Heavy-duty terminals. Power loss due to dielectric absorption reduced to a minimum. Units operate at full load without heating up. Dimensions: 3½" between mounting holes, 4" overall by 3" high.

HIGH-VOLTAGE MOLDED-IN-BAKELITE MICA CAPACITORS

Type 1450

1000v D.C. Test—600v D.C. Work.

Intended for the more critical service of low-powered transmitting circuits, buffer stages, power amplifiers, and laboratory equipment, etc. Non-magnetic parts are used to reduce r.f. losses to minimum, and heavy terminals provide minimum r.f. and contact resistance. Intended for point-to-point wiring, being supported entirely by its soldered connections. 1¼" x 1¼". $\frac{5}{16}$" or ¾" thick (see below).

Types 1455-57

Size 1¼" x $1\frac{25}{32}$" x $\frac{11}{32}$"

Types 1455-57, have insulated mounting holes, independent of soldering lugs, for connections. 1½" spacing between mounting hole centers. If $1\frac{1}{16}$" spacing is preferred specify Types 1445-47. Large meter-mounting brackets permitting use of this type of unit for shunting meter windings may be obtained at 45c added to list price. Specify by adding suffix (A) to type number. Small brackets are also available at 25c additional. Specify by suffix (E). Both brackets have universal slots for either mounting hole spacing. Standard tolerance ±20%; for ±10% add 10% to list price; ±5% add 20%; ±2% add 75%.

AEROVOX Mica Capacitors

IF IT'S MARKED "AEROVOX" IT'S A QUALITY CAPACITOR

SILVERED MICA CAPACITORS

For most critical applications where precise capacity values must be attained and maintained, AEROVOX silvered mica units are generally available. Encased in red molded XM bakelite. Similar in external appearance to standard bakelite molded mica units.

Unique construction. Only plus .0022 per degree F.—a remarkably low temperature coefficient. Excellent retrace characteristics. Practically no capacity drift with time. Exceptionally high "Q". Mechanically protected against physical damage and changes in electrical characteristics due to varying atmospheric conditions. Wax impregnated externally. Ideal for use in circuits where inductance and capacity product must remain constant under all operating conditions. Specifically designed for use in push-button tuning, oscillator padding circuits, fixed tuned circuits, and as capacitance standards, etc., where accuracy and stability are of prime importance.

Standard tolerance ±5%. For ±20% deduct 10% from price. For ±10% deduct 5%. For ±3% add 10%. For ±2% add 15%. For ±1% add 25%.

TYPE 1464—1000v. D.C. TEST

Size $\frac{25}{32}$ in. square. Provided with wire leads. *600v. D.C. test.

Commercial Grade MICA TRANSMITTING CAPACITORS

Extra-heavy-duty Capacitors for

- **Commercial Communication Companies**
- **Broadcasters**
- **Builders of Quality Radio and Electronic Equipment**
- **Amateurs, Experimenters**

With these capacitors Aerovox is contributing its share towards narrowing still more the small remaining gap between professional and amateur radio practices.

Due to the normally limited demand for these extra-heavy-duty mica capacitors, as well as the considerable number of capacitance and voltage ratings in which they are made, this line is made to special order. However, your Authorized Aerovox Jobber is now able to order these commercial-grade capacitors for you.

Consult your Aerovox Jobber for specifications and quotations.

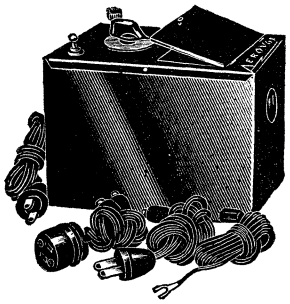
AEROVOX Interference Filters and Auto-Radio CONDENSERS

IF IT'S MARKED "AEROVOX" IT'S A QUALITY CAPACITOR

AEROVOX INTERFERENCE FILTER SELECTOR



TYPE ANL-37

Plugs between interfering device and outlet. Selector switch adjusted until noise is eliminated or minimized. Dial indicates which type filter to use. Handsome, sturdy metal cabinet. Compartment contains necessary test leads and attachment plugs and clips. Size 5½ x 5½ x 8 inches.

TYPE ANL-37

Dealers Net Price.....$17.50

AEROVOX Type IN-23

For elimination of interference caused by neon lamps or fractional horsepower motors. Mounting bracket for attaching to neon fixture (one eliminator needed for each fixture) or for attaching to frame of motor. Flexible leads for connecting across motors such as in hair-driers, fans, mixers, etc. .5-.5 mfd. 1 x 2⅛ in.

TYPE IN-23

List Price $1.50 Net Price $0.90

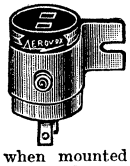
AEROVOX Type IN-27

Simple, inexpensive noise filter. Inserted between set and outlet when interference is slight. Also used with appliance causing low-intensity interference. Keeps troublesome noises out of house wiring and power line. Size 1⅜ x 1½ inches.

TYPE IN-27

List Price $1.50 Net Price $0.90

AEROVOX Type IN-28



Intended for cases where ground is considerable distance from point of application. Most efficient when mounted directly on interfering device by bracket. Size 1⅜ x 2 inches.

TYPE IN-28

List Price $2.00 Net Price $1.20

AEROVOX Type IN-29

Provides additional filtering action over IN-27 and IN-28. Especially effective for local sources of interference of variable character but strong intensity. Very effective for electric razor and other vibrating devices. Plugs between device and line. Size 1⅜ x 3 inches.

TYPE IN-29

List Price $1.75 Net Price $1.05

AEROVOX Type IN-30

Similar to IN-29 but with additional inductance. Handles more severe interference. Plugs between set and outlet, or preferably between noisy appliance and outlet. Size 1⅜ x 3 inches.

TYPE IN-30

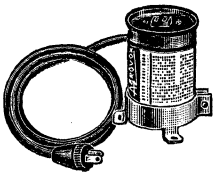
List Price $2.50 Net Price $1.50

AEROVOX Type IN-31

Plugs in between attachment cord and electric outlet, either of set or preferably at appliance. Additional inductance for better filtering. Works best mounted by bracket directly on interfering appliance. Size 1⅜ x 3 inches.

TYPE IN-31

List Price $3.00 Net Price $1.80



AEROVOX Type IN-42

Designed for use in the more serious cases of radio interference from power lines and appliances. Provided with inductance as well as capacitance for thorough filtering action. Plugs into electric outlet. Radio set or interfering device plugs into receptacle of the filter. Recommended for use between interfering device and power line. Size 2½" x 3¾". Provided with mounting ring. Rated at 6 amps. for 110-220v. A.C..

TYPE IN-42

List Price $7.50 Net Price $4.50

MIDGET TUBULAR METAL-CASED "HYVOL" CAPACITORS

Type 38

These units are hermetically-sealed and are exceptionally compact. Originally designed as alternates for mica capacitors but have since become a standard item in the Aerovox oil-filled capacitor line. Not only used as replacements in existing equipment, but are especially suitable for newly-designed equipment particularly where allowable weight of the finished assembly and allotted space is at a minimum. Despite unusual ultra-small size for oil-impregnated, oil-filled capacitors, constructional and electrical characteristics meet many of the exacting conditions to which molded-in-bakelite mica capacitors are normally subjected. Type 38 units are normally supplied with case insulated, and are provided with outer insulating tube.

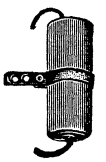
TUBULAR CAPACITORS

OIL-IMPREGNATED OIL-FILLED

Type 89



Immersion-proof, oil-impregnated, oil-filled units in handy, space-saving tubular form. Ideal for use in vibrator applications, coupling and by-pass functions in transmitters, high-voltage amplifiers, in r.f. by-pass circuits, interference eliminators for motors and generators, and in test equipment. Fully sealed against oil leakage or moisture penetration. Case is insulated, not connected to the capacitor section. Mounting strap and outer insulating tube are supplied.

AEROVOX "HYVOL"
VERTICAL-MOUNTING
HIGH-VOLTAGE
CAPACITORS
Type 14

Particularly applicable for use in high-voltage filter circuits such as cathode-ray tube power supplies, high-voltage by-pass circuits in transmitters and high-powered public address equipment. Type 14 units are made in the standard 1⅜" diameter. Grounded can, with one-piece immersion - proof molded - bakelite pillar insulator which provides maximum spacing between live terminal and can. Mounting ring furnished for upright or inverted mounting.

OIL-FILLED
CAPACITORS
In Round Aluminum Cans
—Inverted Mounting
Type 10

This is an improved design, replacing the former single terminal type. This new design is physically interchangeable with the old. Ideal for crowded assemblies; a logical choice in filter circuits of power supplies, high-gain high-fidelity amplifiers, and small transmitters. Hermetically-sealed. Has one-piece molded bakelite terminal assembly. Both terminal lugs are insulated from container.

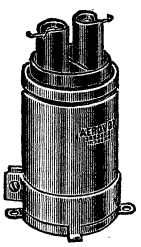
AEROVOX "HYVOL"
VERTICAL-MOUNTING
HIGH-VOLTAGE
CAPACITORS
OIL-IMPREGNATED
OIL-FILLED
Type 12



This is an immersion - proof capacitor designed to meet high - voltage operating requirements. Suitable for such high - voltage circuit applications as in television, cathode-ray tube power supplies, high-voltage rectifiers, or, as a high - voltage by - pass capacitor. Recommended where long leakage path between terminals is required. Barrier in bakelite top increases insulation and creepage path between terminals. For certain applications, the ceramic insulators may be removed if desired. Supplied with adjustable mounting ring for vertical mounting.

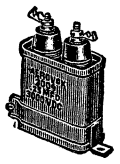
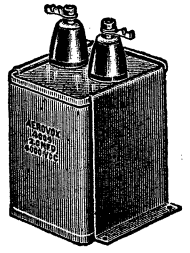
AEROVOX "HYVOL"
OIL-IMPREGNATED OIL-FILLED CAPACITORS
In Rectangular Metal Cans
Type 09

Type 09
(Basic)



Type 09MB
(Mounting Bracket)



Type 09MS
(Strap Mounting)

Hermetically-sealed in sturdy can, leakproof and seepageproof. High tension pillar terminals fitted with locknuts and soldering lugs. Exceptionally compact dimensions for given capacity, working voltage—and safety factor due to use of "Hyvol." Intended for heavy-duty continuous service in transmitters, amplifiers, etc. Type MB bracket is normally supplied as standard equipment, unless otherwise specified, on all units having base sizes other than 3¾" x 3 3/16" and 3¾" x 4 9/16". Type MS is normally supplied as standard with these latter base sizes.

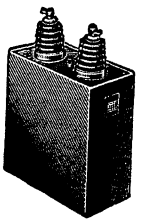
AEROVOX Paper Capacitors

IF IT'S MARKED "AEROVOX" IT'S A QUALITY CAPACITOR

HIGH-VOLTAGE TRANSMITTER TYPE D.C. CAPACITORS

Type 20

6,000v. D.C. Work. to 50,000v. D.C. Work.



These capacitors meet the exacting requirements of radio transmitter service and other applications requiring high-voltage, heavy-duty, transmitter-type oil capacitors. Available in ratings from 6000 volts to 50,000 volts D.C. working. These are single-section or parallel-section capacitors. Type 20 units are critically checked to close standards of physical and electrical perfection. Capacitor sections consist of multi-layered capacitor tissues and high-purity aluminum foil, uniformly and accurately wound under critically-controlled tension, then vacuum-impregnated with Aerovox Hyvol to insure stability of full-rated capacitance, even at zero temperatures. Welded steel containers finished in non-corrosive, dark grey lacquer. Heavy-duty porcelain insulator assembly is cork-gasketed and pressure sealed to prevent leakage of oil or entrance of moisture at the terminals. Single-section units rated at 30 KV or less are normally supplied with capacitor section insulated from ground. Additional information on Type 20 units rated at 37,500 volts and 50,000 volts, as well as voltage-doubler units rated at 25,000 volts output is available on application.

All Type 20 units are built to special order—not carried in stock. Submit full application information when ordering.

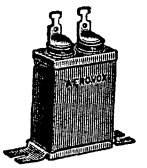
COMPACT HERMETICALLY-SEALED OIL-IMPREGNATED, OIL-FILLED "HYVOL" CAPACITORS

Type 16T

(Terminals on Top)



Compact, oil-filled, hermetically-sealed units for use where least space and minimum weight are essential. Corrosion-proof metal container. Special immersion-proof terminals designed for equipment subjected to severe atmospheric and climatic conditions. Suitable for by-pass and filter applications in receivers and low-power transmitters.

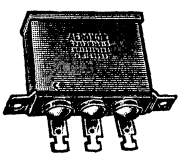
COMPACT HERMETICALLY-SEALED OIL-IMPREGNATED, OIL-FILLED "HYVOL" CAPACITORS

Type 18B

(Terminals on Bottom)



Compact, oil-filled, hermetically-sealed units. Type 18 is smaller in height and depth than Type 16. However, greater width makes Type 18 adaptable for applications where small-sized dual- and triple-section capacitors with three terminals are required. Otherwise, similar to Type 16 with respect to construction and application.

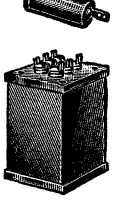
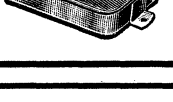
CUSTOM-BUILT PAPER CAPACITORS TO MEET YOUR SPECIAL NEEDS —





If your paper capacitor needs are most unusual, AEROVOX will work with you in designing and producing special types. With many basic types to draw upon—a wide choice of containers, terminals, mountings, sizes, etc.—we can quickly and economically produce out-of-the-ordinary capacitors to meet those extraordinary requirements. Address your inquiry to Aerovox Engineering Department, New Bedford, Mass.

"PYROHM JUNIOR" Wire-Wound Vitreous-Enameled FIXED RESISTORS

Types 931 and 933

Compact, genuine wire-wound units. Covered with vitreous-enamel. Highest quality materials used throughout. Correctly designed. Note these features:

1. Crack-proof refractory tubing for the support. Adequate heat dissipation.

2. Quality resistance wire precisely space wound under tension.

3. Copper terminal band clamped to tubing. Wire ends wrapped about raised ear and brazed to same.

4. Heavy vitreous-enamel coating for permanent seal against moisture, oxidation and mechanical damage.

5. Pig-tail of stiff wire 2 in. long soldered to terminal band for positive, non-breakable connection.

Type 931—10 Watts
Size—Ins. 5/16 x 1¾

Ranges	List	Net
1-10,000	$0.59	$0.35
12,000-50,000	.65	.39

30,000 to 50,000 ohms, rated at 5 watts.

INSULATED MOLDED CARBON RESISTORS

Types 1097 and 1098

Small, noiseless, vibration-proof. Crack-proof molded casing around molded carbon resistance element. Tinned copper pig-tail leads 2 in. long. Resists humidity effects. Ideal for AVC circuits, high-gain amplifiers. RMA color - coded; stamped with resistance value. Precision tested. Standard tolerance 10%. These types may come thru for some time in slightly larger sizes until complete changeover is achieved.

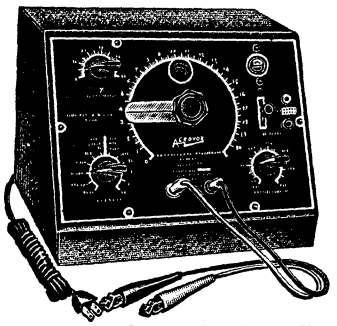
AEROVOX TEST INSTRUMENTS



AEROVOX CAPACITANCE AND RESISTANCE BRIDGE

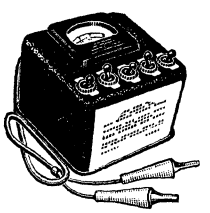
AEROVOX MODEL 76 Resistance Capacitance Bridge is the new postwar general-utility instrument combining simplicity of operation, remarkable degree of accuracy, and modest price. Extreme ruggedness makes it equally suitable out on the job, in the shop, or in the laboratory.

Sloping panel 10" x 6". Aluminum, etched and anodized. Steel cabinet, black crackle finish. All readings taken from main 4" dial. Same calibrated scale eliminates trouble and chances for errors in reading. Linear scale, also an exclusive feature, means no crowding at high end to make readings difficult and inaccurate. Both the resistance and the capacitance readings are covered by six overlapping ranges, as against two or three in usual service instruments, for maximum sensitivity and accuracy. Positive "magic eye" indicator.

Here is what Model 76 bridge does: (1) Measures capacitance from 100 mmf. to 200 mfd. in six ranges. (2) Measures resistance from 10 ohms to 20 megohms in six ranges. (3) Measures power factor from 0 to 50%. (4) Provides D.C. polarizing potential for leakage measurements, from 0 to 600 V. D.C., continuously variable and calibrated in volts. (5) Checks leakage or insulation resistance.

Instrument is provided with shockproof, color-coded test leads fitted with banana plugs for panel jacks, and with clips. Instructions. Measures 10" x 7¾" x 8¼". Weight 8 lbs. 3 oz.

AEROVOX MOTOR-STARTING CAPACITOR SELECTOR



★ Determine the necessary capacitance to replace the wornout motor-starting capacitor, at the mere flip of a switch or two! That's the idea of the Aerovox Motor-Starting Capacitor Selector. In the absence of label, nameplate or other identification means of the original equipment being serviced, this simple, inexpensive, handy instrument provides the immediate answer.

The Capacitor Selector, by throwing a series of toggle switches, provides a choice of capacitance ratings: 17½, 35, 52½, 65, 70, 82½, 100, 117½, 135 and 152½ mfd. A voltmeter indicates the maintenance of safe starting voltage. The instrument is merely clipped to the motor in place of the defective capacitor. Capacitance readings are made from the total of open switches directly from the selector. The 0-150v AC voltmeter can be used independently.

Complete Kit, Model No. 87, comprising Capacitor Selector and two Emergency Capacitors. Dealer's, servicemen's net cost **$20.95**

Capacitor Selector, Model No. 85.....$11.64
Emergency Capacitor, Model No. 86, each $4.65

EMERGENCY CAPACITORS

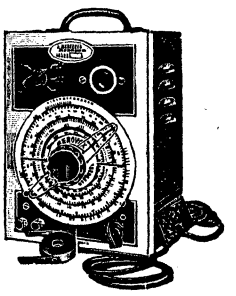
★The RIGHT capacity value is determined by the Capacitor Selector in a jiffy. That's half the job.

The other half is to have that RIGHT capacity immediately available. And that's where the Aerovox Emergency Capacitors come in to round out this Aerovox "Jiffy Way" of handling motor-starting capacitor jobs.

The Aerovox Emergency Capacitors are truly universal Units. Each provides any capacity value from 17½ to 152½ mfd., simply by cutting in one or more sections. The unit then clips on to the motor. The refrigerator gets going without delay. Later, at the serviceman's convenience, the usual replacement is installed.

Emergency Capacitor, Model No. 86, $4.65 Net, each

AEROVOX L-C CHECKER



★ This exclusive Aerovox development has no counterpart, much less an equal. Basically, it determines the effectiveness of any capacitance or inductance while actually connected in its circuit. Testing efficiency is greatly increased. Components may be tested singly or in combinations whereby to determine resonant frequency and effectiveness of given circuits. Circuit or systems may be adjusted by this checking means for proper operating efficiency. Certainly a "must" instrument for the radio worker.

HERE'S A PARTIAL LISTING OF WHAT THE AEROVOX L-C CHECKER DOES:

It checks capacitance of capacitors at radio frequencies **without removing them** from circuit. • It checks alignment of r.f. circuits; also tracking of super-het. oscillator. • It checks alignment of broad or narrow band i.f. amplifiers. • It checks the tuning of wave traps and of image-rejection circuits; frequency ranges of receivers; frequency ranges of signal generators; calibration of wave meters. • Identifies harmonics of frequency standard in precision frequency calibration of radio equipment • It checks natural resonant points of r.f. chokes making sure they are beyond operating range. • It traces resonant absorption trouble in "all-wave" receiver circuits—locating dead spots, etc. • It locates resonant points in shorted windings (unused coils) in multi-range oscillators, etc. • Locates resonant frequency of r.f. coupling chokes, making certain of placement to secure enough gain balance over tuning range of r.f. stage • It checks natural period of antennae and transmission lines in order to have resonant peaks at certain frequencies. • It checks quartz crystals for frequency, false frequency, operation at harmonics, and for activity. • Checks FM i.f. transformers. • Checks alignment of FM i.f. channels. • Checks leakage of paper capacitors. And it checks many other functions when used with auxiliary equipment. This checker operates from AC or from DC 120 volts source. It has a frequency range from 100 KC to 44MC as follows:

Range:	A — 75 — 225 KC	D — 1.5 — 5 MC
	B — 200 — 600 KC	E — 4.5 — 14.5 MC
	C — 550 — 1650 KC	F — 13 — 44 MC

Capacitance Range: .00025 mfds. — 1 mfd.

Inductance Range: 0 — 500 MH

Tube Complement: 6J5G, 25Z5, 6E5, VR105

Accuracy: Capacitance and Inductance ± 10%

Frequency Ranges A, B, C: ± 1%

Other ranges: ± 2.5%

Dimensions: 10½ x 7½ x 5½

This new model L-C Checker has provisions for determining the insulation resistance of capacitors in addition to the measurements described in bulletin 995A.

Weight: (shipping) 6 lbs.

Watch for the announcement of the new model Aerovox L-C Checker!

Standard Universal Electrolytic Motor-Starting Replacement Capacitors

Many of these Standard Universal replacements are also Exact Duplicate replacements. They have the same AEROVOX catalog numbers shown in the special Motor-Starting Capacitor Catalog devoted to the AEROVOX complete line. This list is intended to simplify the selection of required capacitor when manufacturer's part number and AEROVOX catalog number are not known. Information given: capacity range, voltage rating, dimensions and type of container may help determine capacitor required in absence of original unit or name-plate data. This listing also ideal for use with the AEROVOX Capacitor Selector.

TYPE MSRT

Supplied with insulating tube (not shown). Former AEROVOX designation Fig. 18A or 18B.

Standard Universal Replacement Oil Capacitors

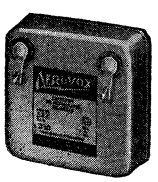
The following Universal Replacement Oil Capacitors are arranged according to types of containers, and capacitance and voltage ratings. The listing is intended to simplify the selection of required capacitors when manufacturers' part numbers and Aerovox catalog numbers are not known. The required standard Aerovox capacitor may be determined from the information given below.

TYPE RR

Former AEROVOX designation Fig. 25.

TYPE RT

Former AEROVOX designation Fig. 21.



TYPE RD

Former AEROVOX designation Fig. 22.

ROUND CAN—Type RR—1⅜", 2", 2½" and 3" Containers

Standard Universal Electrolytic Motor-Starting Replacement Capacitors

Many of these Standard Universal replacements are also Exact Duplicate replacements. They have the same AEROVOX catalog numbers shown in the special Motor-Starting Capacitor Catalog devoted to the AEROVOX complete line. This list is intended to simplify the selection of required capacitor when manufacturer's part number and AEROVOX catalog number are not known. Information given: capacity range, voltage rating, dimensions and type of container may help determine capacitor required in absence of original unit or name-plate data. This listing also ideal for use with the AEROVOX Capacitor Selector.

125 VOLTS A.C.—ROUND CANS—ULTRA-COMPACT
TYPE MSRT—1⅜" and 2" Cans with Insulating Tube

(Max. Surge Voltage 120% of Rated Voltage)

Standard Universal Replacement Oil Capacitors

The following Universal Replacement Oil Capacitors are arranged according to types of containers, and capacitance and voltage ratings. The listing is intended to simplify the selection of required capacitors when manufacturers' part numbers and Aerovox catalog numbers are not known. The required standard Aerovox capacitor may be determined from the information given below.

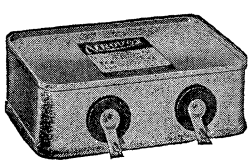
TYPE RF
Former AEROVOX designation Fig. 20.



TYPE RK
Former AEROVOX designation Fig. 29.

RECTANGULAR CASE—Type RF—4⅞" x 3⅛" (Terminals on Cover)

Aerovox Cat. No.	CAPACITY MFDS.	A.C. Volts	DIMENSIONS D.H. or L.W.D.	Figure	List Price	Net Price
			220 VOLTS A.C.			
RF-676	1	220	4⅞ x3⅛ x ⅞	RF or 20	$ 3.79	$ 2.65

AEROVOX Special-duty Capacitors

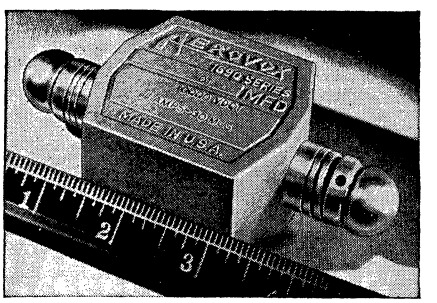
IF IT'S MARKED "AEROVOX" IT'S A QUALITY CAPACITOR

P. S.

● This is a postscript. This page contains several new Aerovox products recently introduced and not as yet cataloged. These special-duty capacitors are of particular interest to advanced radio workers, builders of special equipment, experimenters and engineers.

Other new products are being announced from time to time. Aerovox engineering is keeping abreast of the rapid advances of the radio-electronic art. Therefore, if you do not see what you need in these pages, tell us about your unusual needs. Aerovox either has a type already developed and in production, or will consider an entirely new type if warranted by the anticipated demand.

LOW-INDUCTANCE MICA CAPACITOR



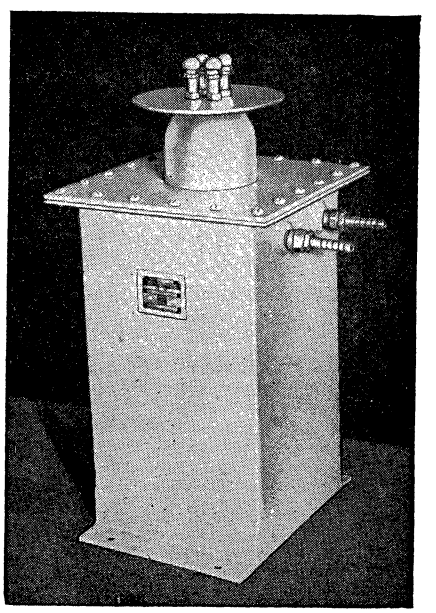
AEROVOX SERIES 1690 is a molded-in-bakelite mica capacitor designed for exceptionally low loss operation at ultra high frequencies. External evidence of its efficiency is offered by the rounded hardware—round nuts, round washers and spherical lock nuts eliminating sharp edges and corners that cause corona losses. The use of fine threads for the terminal studs insures maximum contact and minimum r.f. resistance. Silver plating of all conducting members minimizes skin resistance. The body is of XM or yellow low-loss bakelite. Internally, the mica stack is designed for a straight-line path for high frequencies.

This type is several times larger than the conventional molded-in-bakelite transmitting micas. Body dimensions are 2⅜" wide x 2-3/16" deep x 1⅜" high, and 4¾" overall between rounded terminal tips.

Units are available in ratings up to 20,000 volts D.C. Test or 10,000 volts operating, and in capacitance values up to .001 mfd. at the highest voltage rating.

This type has been developed specifically for lower r.f. resistance and impedance, thereby providing increased KVA ratings for given size. Such units can be advantageously applied as blocking capacitors in transmission lines, as tank capacitors for high-frequency oscillators, as by-pass capacitors for ultra-high-frequency energy, and as coupling or by-pass capacitors in induction-heating circuits.

WATER-COOLED MICA CAPACITOR



AEROVOX SERIES 1780 water-cooled mica capacitor is available for extra-heavy duty service such as high-power transmitters and induction furnaces. The water-cooling feature boosts the KVA rating by a factor of five or more, or conversely, greatly reduces the bulk for given rating.

The higher KVA ratings are obtained in two ways: First, by exceptional design such as critical arrangement and location of mica sections; critical selection of materials; specially-plated parts; large cross-section of conductors; attention to details. Second, by the use of a water-cooling system so designed as to provide maximum heat transfer from capacitor to cooling coils.

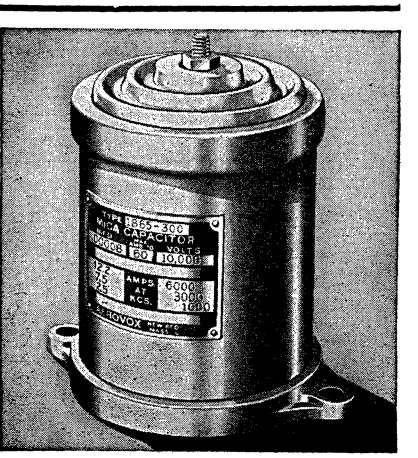
The mica stacks are in an oil bath. Cooling coils in the oil bath provide for the efficient transfer of heat. What this cooling system means may be judged from the fact that a unit handling 200 KVA for air-cooled operations steps up to 1000 KVA with water-cooling.

The series-parallel mica stack is designed for uniform current distribution throughout. There is a large factor of safety. Silver-plated hardware minimizes skin resistance. Terminals are furnished with large radii of curvature to minimize and even eliminate corona. The steatite insulator is shaped to hold gradients below corona limits.

Heavy non-ferrous welded metal case, hermetically-sealed and grounded. Side-mounted nipples for connecting water-cooling hose. Sturdy mounting flanges. Provisions for making connections with high-current-capacity conductors. Four-stud terminal for low-loss connections.

Available in ratings up to 25,000 volts A.C. Test, and in capacitances up to .01 mfd.

ULTRA-HIGH-FREQUENCY CAPACITORS



AEROVOX SERIES 1860 and 1865 are engineered and especially recommended for use in ultra-high-frequency radio equipment such as television and FM transmitter, as well as other miscellaneous applications in the u.h.f. field. In such applications they are readily adaptable for use as fixed-tuning capacitors, by-pass, blocking, coupling, neutralizing and antenna-series capacitors.

Losses are extremely low, due to the highly refined sulphur dielectric. Corona losses are avoided by the unique construction design, the grounded case and the terminal on each type.

Series 1860 (not illustrated) is the smaller unit in an aluminum can, intended more for the radio amateur and experimenter, and for low-cost assemblies. It has a suitably plated brass terminal mounted on a mica insulating plate. Available in four types: .0001 mfd., 10,000 v..; .000025 mfd., 10,000 v.; .00005, 5000 v.; .00005, 10,000 v. Voltage is Peak Working Volts.

Series 1865 (illustrated) is the larger unit, in a cast aluminum case with steatite insulator supporting the higher-voltage terminal. Available in capacitances from .00002 to .000125 mfd., at 10,000 v.

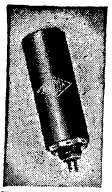
RADIO'S MASTER

AMCON PAPER CAPACITORS

There is a standard type of Amcon Paper Capacitor to fill practically all commonly encountered requirements—a wide range of capacities, voltages, dimensions, casings and terminals. All are built to AMCON'S highest precision standards. For special capacitor problems, AMCON'S competent engineering staff is always available and inquiries for specific needs are invited.

PAPER CAPACITORS IN PLASTIC CONTAINERS



Type PPLL

Type PPL

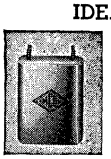
Encased in gleaming plastic with inverted one nut mounting permitting use on top or side of chassis. Condenser unit is oil cooled and molded in oil proof wax. Permanently sealed, moisture proof, wide temperature range.

Working Voltage 600 V.D.C.—Test Voltage 1800 V.D.C.

Cat. No.	Cap. Mfd.	Size	List
PPL62	2	1 3/8 x 3 1/2	$2.15
PPLL62	2	1 3/8 x 3 1/2	2.50

TYPE US UNCASED SECTIONS

IDEAL FOR REPLACEMENT WORK



Designed for reliability rather than for appearance. Wound of chemically pure paper and foil, carefully impregnated and sealed with high melting point wax. Long, securely anchored leads.

Working Voltage 600 V.D.C.—Test Voltage 1800 V.D.C.

Cat. No.	Cap. Mfd.	Size	List
US-601	1	1/2 x 2 1/4 x 1 3/4	$0.90
US-602	2	7/8 x 2 1/2 x 2 1/8	1.35
US-604	4	3/4 x 3 1/8 x 1 7/8	2.70

Working Voltage 1000 V.D.C.—Test Voltage 1800 V.D.C.

Cat. No.	Cap. Mfd.	Size	List
US-1001	1	3/4 x 3 1/8 x 1 7/8	$1.50
US-1002	2	7/8 x 3 1/8 x 2	2.50

TUBULAR PAPER CAPACITORS

Non-inductively wound with highest quality paper and tinfoil. Pigtail leads hot soldered to sections. Vacuum sealed in thoroughly impregnated cardboard tubes and fully protected against moisture.

WORKING VOLTAGE 600 V.D.C.

Cat. No.	Cap. Mfd.	Size	List
TP60T1	.0001	3/8 x 1 1/8	$0.15
TP60T25	.00025	3/8 x 1 1/8	.15
TP60T50	.0005	3/8 x 1 1/8	.15

TP6001	.01	3/8 x 1 1/8	.15
TP6002	.02	7/16 x 1 1/8	.15
TP6005	.05	9/16 x 1 5/8	.20
TP6010	.1	11/16 x 1 5/8	.25
TP6025	.25	15/16 x 1 3/4	.30
TP6050	.5	11/16 x 2 3/8	.40
TP6100	1.	1 1/8 x 2 3/4	.50

TUBULAR UNITS FOR VIBRATOR USE

Sturdy, heavy duty units specifically designed to withstand the high voltage encountered in vibrator duty.

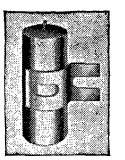
WORKING VOLTAGE 1600 V.D.C.

Cat. No.	Cap. Mfd.	Size	List
TPX005	.005	7/16 x 1 3/4	$0.30
TPX01	.01	1/2 x 1 3/4	.35
TPXO2	.02	5/8 x 1 3/4	.45

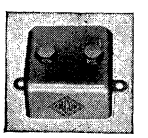
TYPE GC GENERATOR CONDENSER

For heavy-duty automotive service. Leads hot soldered and swedged to the condenser section and to the can. Thoroughly impregnated and sealed.

.5 Generator Condenser 50c



TYPE AHB-PAPER DIELECTRIC (BATH-TUB) CAPACITORS



Units are non-inductively wound, wax impregnated, oil cooled, wax sealed and encased in drawn metal container, well tinned to prevent corrosion. Exclusive AMCON Terminals (combination one-piece bushing) give high voltage rating between terminals and can. Tested at three times rated voltage.

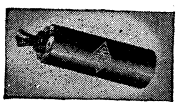
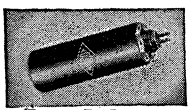
AMCON ELECTROLYTIC CAPACITORS

All AMCON Electrolytic Capacitors measure up to the highest standards for consistent uniformity in electrical characteristics and for dependable long life in service. Inquiries for specific needs are invited.

ELECTROLYTIC CAPACITORS IN PLASTIC CONTAINERS



Type PL



Type PLL

Inverted type plastic casing can be used on a top chassis mounting with a nut. 100% moisture proof, withstands extreme heat or cold. Type PL with 4½" insulated wire leads; PLL with soldering lugs.

TYPE PL—WORKING VOLTAGE 450 V.D.C. PEAK 600 V.D.C.

Cat. No.	Cap. Mfd.	Size	List
PL5-8	8	1⅜ x 3½	$1.20
PL5-10	10	1⅜ x 3½	1.50
PL5-12	12	1⅜ x 3½	1.60
PL5-16	16	1⅜ x 3½	1.75
PL5-20	20	1⅜ x 3½	1.95
PL5-24	24	1⅜ x 3½	2.05
PL5-30	30	1⅜ x 3½	2.25
PL5-35	35	1⅜ x 3½	2.35
PL5-40	40	1⅜ x 3½	2.65
PL5-88	8-8	1⅜ x 3½	1.90

TYPE PLL—WORKING VOLTAGE 450 V.D.C. PEAK 600 V.D.C.

Cat. No.	Cap. Mfd.	Size	List
PLL 5—2 Lugs	8	1⅜ x 3½	$1.45
PLL10—2 Lugs	10	1⅜ x 3½	1.75
PLL12—2 Lugs	12	1⅜ x 3½	1.85
PLL16—2 Lugs	16	1⅜ x 3½	2.00
PLL20—2 Lugs	20	1⅜ x 3½	2.20
PLL24—2 Lugs	24	1⅜ x 3½	2.30
PLL30—2 Lugs	30	1⅜ x 3½	2.50
PLL35—2 Lugs	35	1⅜ x 3½	2.60
PLL5 40—2 Lugs	40	1⅜ x 3½	2.90
PLL5 88—3 Lugs	8-8	1⅜ x 3½	2.15

TYPE IC CAPACITORS

Standard Amcon quality condensers offered for use where economy is a prime factor. Furnished in kraft cardboard tubes with 1¼ inch c-c spade bolt mounting.

WORKING VOLTAGE 450 V. — PEAK 600 V.

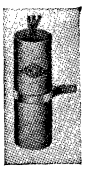
Cat. No.	Cap. Mfd.	Size	List
1C5- 8	8	1⅜ x 3½	$1.00
1C5-48	4-8	1⅜ x 3½	1.50
1C5-88	8-8	1⅜ x 3½	1.60
1C5-10	10	1⅜ x 3½	1.30
1C5-12	12	1⅜ x 3½	1.40
1C5-16	16	1⅜ x 3½	1.55
1C5-20	20	1⅜ x 3½	1.75
1C5-24	24	1⅜ x 3½	1.90
1C5-30	30	1⅜ x 3½	2.10
1C5-35	35	1⅜ x 3½	2.25
1C5-40	40	1⅜ x 3½	2.40

TYPE IC FILTER BLOCKS

Concentrically wound units with all sections having a common negative. High voltage sections are rated 150 working V., 200 peak V. Low voltage sections are 25 working V., 50 peak V. Also available on special order with separate negatives.

Cat. No.	Cap. Mfd.	Size	List
IC2-101	16-12 & 10-10	1⅜ x 3½	$2.15
IC2-102	16-8 & 5-5	1⅜ x 3½	2.00

TYPE KT CAPACITORS

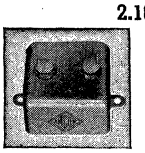


Kraft tube unit with center mounting bracket for use in assemblies where space is limited. 4½" insulated wire leads. Dual units made with four or three leads and common negative. Other capacity combinations available on request.

THREE LEADS — COMMON NEGATIVE
Working Volts 150 D.C. — Peak V. 200 D.C.

Cat. No.	Cap. Mfd.	Size	List
KT3-20-20	20-20	1 x 2⅜	$1.25
KT3-30-20	30-20	1 x 2⅜	1.40
KT3-40-20	40-20	1 x 3	1.60
KT3-40-40	40-40	1 x 3	1.85
KT3-60-30	60-30	1 x 3	2.05
	4 LEADS		
KT4-20-20	20-20	1 x 2⅜	$1.45
KT4-30-30	30-30	1 x 3	2.00
KT4-40-40	40-40	1 x 3	2.10

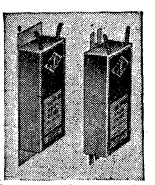
TYPE AEB ELECTROLYTIC (BATH TUB TYPE)



Constructed to withstand salt water immersion tests—ideal for marine use. Characteristics remain constant under extreme climatic variations. Engineered to highest standards—hermetically sealed.

Cat. No.	Cap. Mfd.	Volts	C-C Mount	Size	List
AEB10	10	25	1 13/16 x 1 x 13/16	2⅛	$1.75
AEB25	25	25	1 13/16 x 1 x 13/16	2⅛	1.90
AEB105	10	50	1 13/16 x 1 x 13/16	2⅛	1.80
AEB255	25	50	1 13/16 x 1 x 13/16	2⅛	1.95

TYPE CB ELECTROLYTIC In Cardboard Containers



These dry electrolytics are available in a wide variety of capacities and voltages. Furnished with six inch leads and solder lug mountings. Triple sealed for long unfailing service.

WORKING VOLTAGE 450 V.D.C.—PEAK 600 V.D.C.

Cat. No.	Cap. Mfd.	Size	List
CB5-2	2	1x⅝x2¾	$0.65

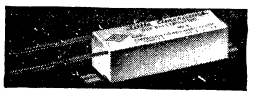
AMCON ELECTROLYTIC CAPACITORS



MIDGET PAPER ELECTROLYTICS

TYPES LP2 - LP3 - LP5

Small and compact, these dry electrolytics are readily wired into almost inaccessible places—are interchangeable in any circuit with standard larger size capacitors. Uniform, dependable characteristics. Dual and multiple type units are of separate sections.

TYPE LP-2 150 W. V. — 200 P.V. D.C.

Cat. No.	Cap. Mfd.	Size	List
LP2-8	8	2 3/8 x 3/4 x 3/4	$0.75

AMCON TELEPHONE CONDENSERS Type AHT

HERMETICALLY SEALED IN METAL CONTAINERS

Each unit receives full minute test at flash-test rating—is fully guaranteed as to capacity, insulation and breakdown tests. Heavy-duty, water-tight, all-metal containers, enamel dipped. Minus 10, plus 30 tolerance, standard; others on special order.

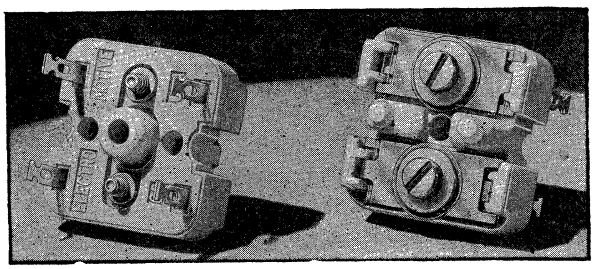
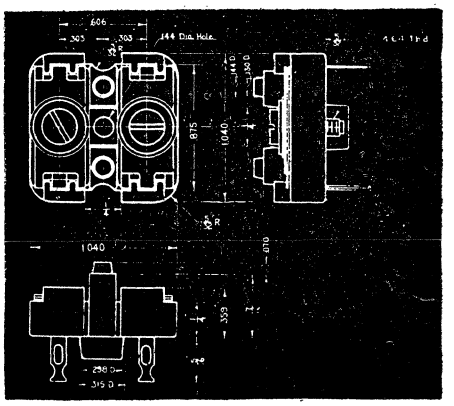
EL-MENCO CAPACITORS

TYPE 50 DUAL PADDER



Type 50 Dual Padders provide two variable trimmers mounted on a single base. This unit is designed as a tuning component for I. F. transformers; and as such, may be snap-in mounted along with the transformer coil in any size shield having dimensions exceeding 1-1/16" x 1-1/16".



PRICES, TYPE 50

Part No.	No. of Plates	Guaranteed Range		List Price
		At tight cap. will be more than MMF	At two turns open cap. will be less than MMF

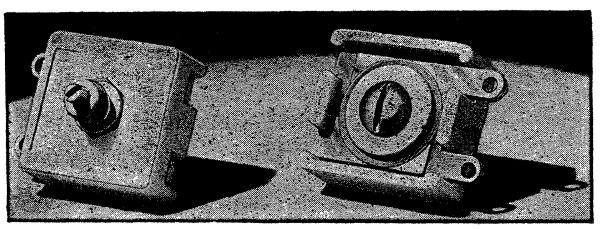
503	3 Pl.	170	19	.70
502	2 Pl.	80	7.5	.60

TYPE 30 PADDER



El-Menco Padding Condensers have been acclaimed by engineers as the finest development in adjustable mica condensers.

The construction is such as to completely enclose and protect the delicate edges of the mica films, made of the finest quality clear India ruby mica.

The phosphor bronze adjusting plates assure permanent resilience and freedom from mechanical fatigue. All parts are heavily plated to resist corrosion.

The adjustable screw advances 1/64 inch for one complete rotation thus insuring accurate adjustment of the capacity setting.

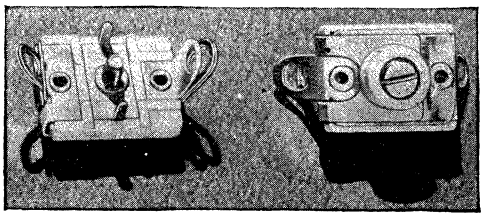
EL-MENCO CAPACITORS

TYPE 46 MICA TRIMMER CONDENSER



The base is made of the lowest dielectric loss ceramic material available and the mica is clear India Ruby.

The soldering lugs may be bent in any position without affecting capacity setting due to the rigid construction of adjusting plates.

El Menco trimmer condensers are treated for resistance to humidity and for permanence of capacity setting.
Trimmers shown here are standard sizes and capacities.

EL MENCO FUSED PLUG

They're all saying again, "It's a wonder no one thought of it before." Here's a plug *that carries its own fuses.*

It attaches to the cord just as any standard plug, looks pretty much the same, light-weight, but easier to handle because of finger grips. However, it contains two small fuses, which provide complete protection against damage to the appliance and to the main line.

Blown fuses are easily removable; replacements are available up to 10 amperes.

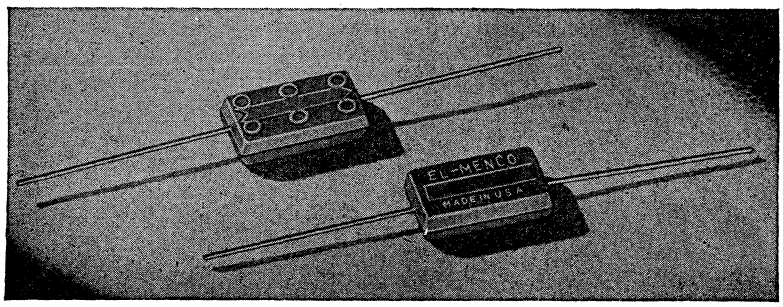
EL-MENCO CAPACITORS

FIXED MICA DIELECTRIC CAPACITORS • ALL IMPREGNATED AND JAN-C-5 COLOR CODED



MADE IN ACCORDANCE WITH AMERICAN WAR STANDARDS TO MEET ARMY AND NAVY JAN-C-5 SPECIFICATIONS

All units are rated at 500 Volts D.C. working and tested at 1000 Volts D.C. except on capacities higher than 6200 mmf. which are rated at 300 Volts D.C. working and 600 Volts D.C. Test. All are tested for accuracy of capacity according to tolerance requested and voltage breakdown.

PLASTICON CAPACITORS

TYPE A PLASTICONS

DIELECTRIC

PLASTICON A is a transparent, thin plastic film. Made to our specifications, it is chemically pure, and has extremely uniform characteristics. Superior to the finest linen or kraft condenser paper hitherto used, Plasticon A film is free from metallic particles or other foreign matter. It has a much higher tensile strength than paper and does not become brittle with age and heat. It is not porous in the same sense as paper and has a higher breakdown voltage (4000 to 4500 v.p.m. as against 700 to 1000 v.p.m. for paper).

PROCESSING

Plasticon A film is carefully processed to remove all traces of moisture. The capacitor sections are cased in various types of containers and impregnated through small vents and then solder sealed. With a uniform film as a foundation, this process guarantees uniformity in production.

IMPREGNANTS

The three impregnants used in Plasticon A capacitors are chemically neutral to the film. They are carefully processed to remove residual moisture and entrapped gases.

PLASTICON AO . . . Mineral oil impregnated Plasticon A capacitor winding. Properly processed mineral oil is one of the finest electrical insulating mediums.

PLASTICON AS . . . Silicone fluid impregnated Plasticon A winding. Silicones are Hydrocarbon-Silicon-Oxygen compounds of great thermal, chemical, and electrical stability. The silicone fluid used in Plasticon AS units will not deteriorate at 250°C. It has a dielectric constant of 3 and a p.f. of .0002. For a liquid it has an extremely high dielectric strength (about 2000 v.p.m.)

PLASTICON AW . . . Petroleum-Wax impregnated Plasticon A capacitor winding. Used at rated voltage and temperature Plasticon AW capacitors have a fine performance record on less severe applications where size and cost are a factor.

PLASTICON CAPACITORS

DC CAPACITORS *for the following applications*

TRANSMITTERS, RADIO AND TELEVISION
AIRCRAFT ELECTRONIC EQUIPMENT
AMPLIFIERS
CAPACITANCE TESTERS
OSCILLOSCOPES
DYNAMOTOR AND MOTOR FILTERS
TELEVISION AND COMMUNICATION RECEIVERS
ELECTRONIC TIMERS
DC POWER SUPPLIES
DIELECTRIC AND INDUCTION HEATERS

DC OVALS

SPECIFICATIONS:

Mineral oil impregnated and filled. Hermetically sealed; can be operated in any position.

Conservatively rated; can be operated continuously at 10% over rated voltage.

Capacitance Tolerance—Standard plus or minus 10%.

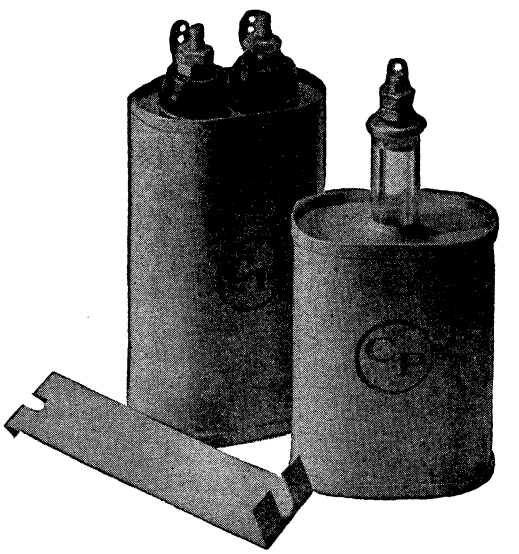
Ambient Temperature Range—minus 40°C to plus 85°C. If required, Plasticon AOCO capacitors can be made for 105°C operation.

Insulators—Two wet-process porcelain bushings on Types AOCO6C, AOCO1M and AOCO2M. One soldered-in metallized glass stand-off, can grounded on Types AOCO3M, AOCO5M, AOCO8M and AOCO10M.

Terminals—All DC Ovals have 8-32 screw and hex nuts with removable hot-tinned solder lugs.

Case—Obround (flattened oval) cross section. Drawn or lock-seam lead coated steel with heavy finish of gray organic lacquer.

Brackets—Two right angle mounting foot brackets are provided as standard on all AOCO capacitors. Add ½" to C to get mounting centers. Universal mounting strap or spade-screw bracket can be furnished on request.



Cat. No.	Cap. Mfd.	Volts D.C.	A—height of can; B—width; C—thickness; D—height of insulator assembly; E—distance between centers of insulators. A	B	C	D	E	List Price*

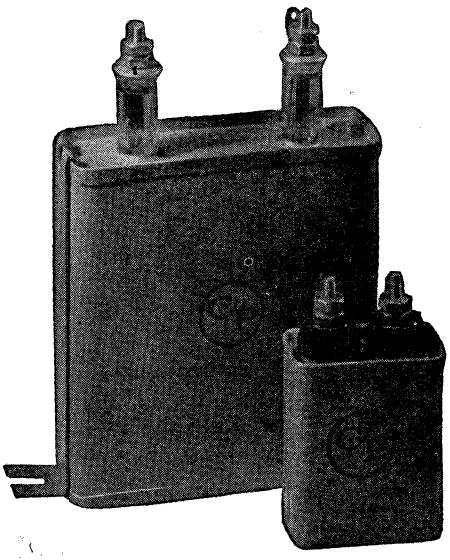
PLASTICON CAPACITORS



DC RECTANGULARS

SPECIFICATIONS:

Mineral oil impregnated and filled. Hermetically sealed; can be operated in any position.

Conservatively rated; can be operated continuously at 10% over rated voltage.

Capacitance Tolerance—Standard plus or minus 10%.

Ambient Temperature Range—minus 40°C to plus 85°C. If required, Plasticon AOC capacitors can be made for 105°C operation.

Insulators—Two wet process porcelain bushings on Types AOC6C, AOC1M, AOC2M. Two soldered-in metallized glass standoffs on Types AOC3M, AOC4M, AOC5M, AOC75C, AOC10M.

Terminals—All DC Rectangulars have 8-32 screw and hex nuts with removable hot-tinned solder lugs.

Case—Rectangular base; lead coated steel with heavy finish of gray organic lacquer.

Brackets—Two right angle mounting foot brackets are provided as standard. Add ½" to B or C to get mounting centers.

Universal mounting strap or spade-screw bracket can be furnished on request.

PLASTICON CAPACITORS

GLASSMIKES

TELEVISION AND OSCILLOSCOPE CIRCUITS
VIBRATOR BUFFER AND ARC ELIMINATION
AF AND RF COUPLING AND BYPASS USES
GEIGER COUNTER AND INSTRUMENT CAPACITORS
HIGH TEMPERATURE AC AND DC APPLICATIONS, Etc.

Modern functionally designed capacitors. Metal ferrules are soldered to silver bands fused to each end of heavy-walled glass tubes. This vacuum tight assembly is fungus-proof and passes Signal Corp, Air Corp, and Navy thermal cycle and immersion tests. Ample flashover spacing is provided between silver bands for sea level operation. Submit specifications for high altitude applications.

Specifications:

Mounting: 2" tinned copper wire pigtails are provided on all Glassmikes 19/32 OD and under. 8-32 screw terminals, and removable solder lugs on all other Glassmikes. Glassmikes can also be mounted in fuse clips.

AC and RF operation: Glassmikes can be operated at low and medium power. Submit specifications, including frequency and ambient temperature.

Temperature range: PLASTICON ASG: from 60°C to plus 125° C. PLASTICON AOG: from minus 40°C to plus 105°C.

Capacitance tolerance: Plus or minus 10%.

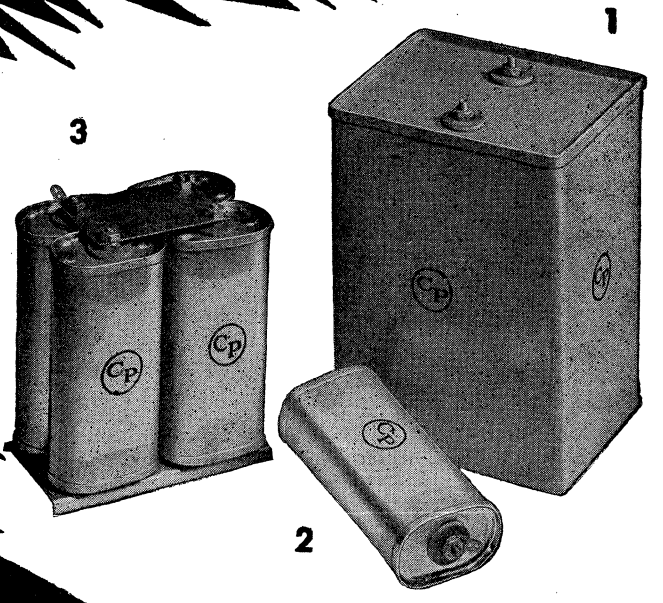
PLASTICONS*

The Best Photo-Flash Capacitors



SPEEDIER DISCHARGE
MORE BRILLIANT LIGHT

For Photographic Quality

PLASTICONS:* The most complete line of Energy Storage Capacitors

PLASTICONS* Are Superior to Paper Capacitors:

- **Lighter Weight**
- **More Compact**
- **Lower Losses (less inductance and series resistance)**
- **Operates More Safely at High Voltages**
- **Lower Absorbtion (less residual energy)**

PLASTICON* Type AOCE Capacitors are used extensively in Energy Storage Welders

Order from your jobber: If he cannot supply you, order direct.

**PLASTICONS:* Plastic-Film Dielectric Capacitors*

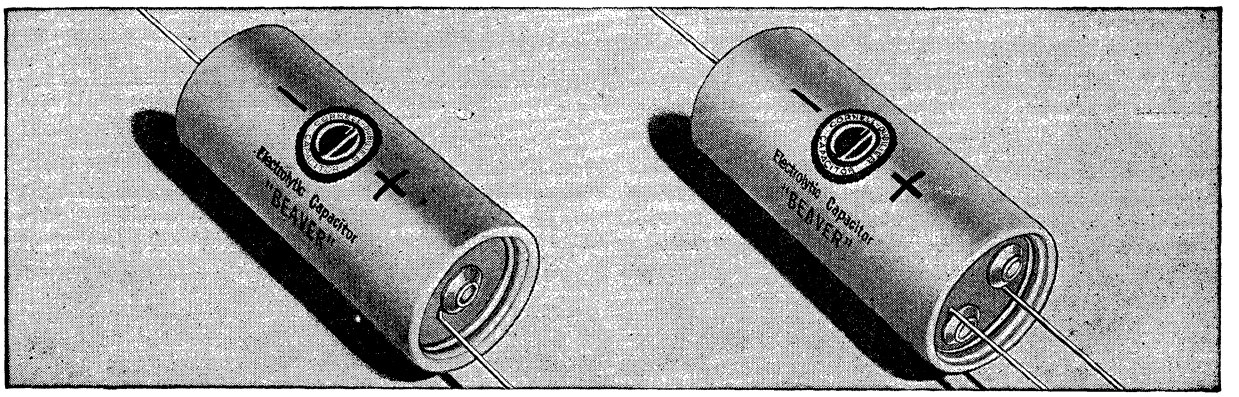
TUBULAR CAN-TYPE DRY ELECTROLYTIC CAPACITORS



TYPES BR AND BRD "BLUE BEAVER"* CAPACITORS

Types BR and BRD "Blue Beavers" are the most popular electrolytic capacitors employed for all applications where units are required for convenient mounting in small spaces beneath a chassis or connected directly in the wiring assembly. They are small in physical size and self-supporting by means of strong, bare tinned-copper wire leads, while the larger sizes may be mounted with a metal strap or any other arrangement which may be found suitable.

Type BR capacitors employ seamless, drawn aluminum can construction encased in a tightly fitted insulated cardboard tube sleeve. A bare tinned-copper wire lead is riveted to the bottom of the can for negative connection while the positive terminal lead is riveted in the center of an insulated disc cover at the opposite end. Polarity of all units is clearly indicated on the cardboard tube casing.

Cat. No.	Cap. Mfd.	Size—Inches Diam. x Length	List Price	Net Price

Type BRD, dual section units, in the small size (BRD202A), are furnished in an aluminum tube which is closed at both ends with an insulated disc, each disc supporting a positive wire lead. Common negative connection to the unit is made to a metal mounting strap around the middle of the tube. No cardboard tube sleeve is of course supplied on this unit. All other BRD capacitors are furnished with positive leads riveted on an insulated disc cover at one end of a drawn aluminum can and provided with a cardboard tube sleeve.

All BR and BRD units are hermetically sealed and are suited for operation under conditions of relatively high humidity. The range of capacities and voltage ratings available cover practically all uses as replacements in radio service work. Two and more of these small size capacitors may be strapped together in a unit in order to obtain a wide variety of capacity combinations employed in various circuits of standard receivers.

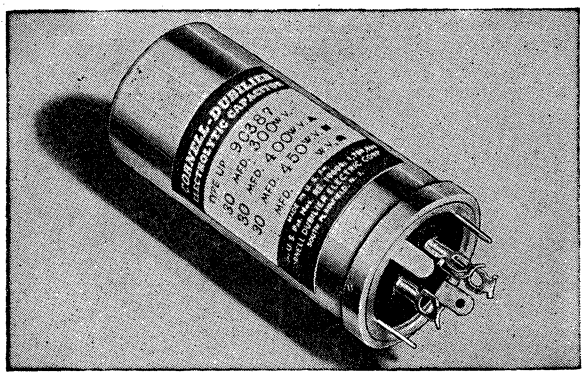
PRONG-BASE DRY ELECTROLYTIC CAPACITORS



TYPE UP CYLINDRICAL CAN UNITS

Type UP capacitors are the smallest can-type electrolytic units available. They are hermetically sealed in aluminum cans with positive terminal lugs on a bakelite insulating cover, the can being the common negative terminal.

Projecting tongues provide facilities for mounting in a vertical position on metal chassis bodies or on metal or bakelite mounting washer. Bakelite and metal washers are furnished with each unit. The projecting tongues have small wire holes and are tinned for convenient soldering to common negative connections. All solder lugs are mechanically strong, being made of cold rolled steel, although nothing other than pure aluminum comes in contact with the electrolyte within the container to cause galvanic corrosion. Electrically, these Type UP units possess excellent characteristics, having exceptionally low leakage and power factor, and are especially dependable in operation over wide temperature variations with minimum capacity change.

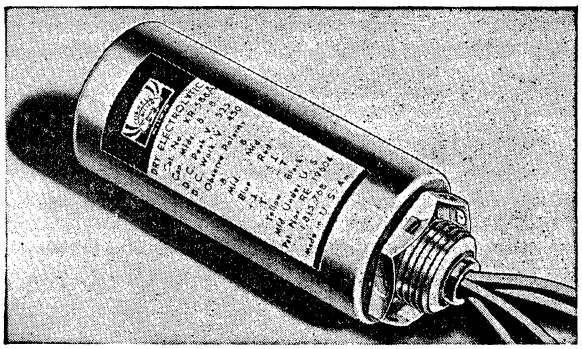
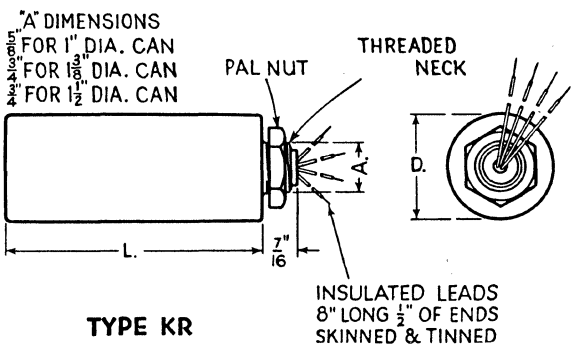
CORNELL DUBILIER

ONE-HOLE MOUNTING DRY ELECTROLYTIC CAPACITORS



TYPE KR CYLINDRICAL CAN UNITS

Types KR and KRC single-hole mounting units are compact etched foil type dry electrolytic capacitors furnished in cylindrical (inverted mounting) aluminum cans. Available in single, dual and triple sections with color-coded leads. Made in all popular voltage ratings for use in A.C.-D.C. or voltage-doubler midgets and A.C. operated sets.



TYPE KR

Cat. No.	Cap. Mfd.	D.C. W. Volts	Size—Ins. Dia. x Lth.	List Price	Net Price

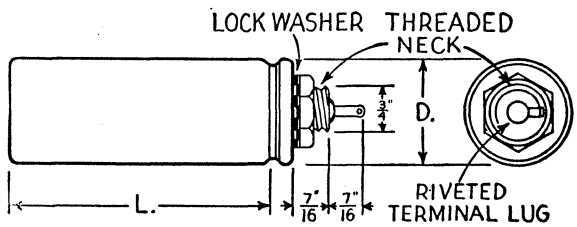
TYPE WR REPLACEMENTS FOR WET ELECTROLYTIC CAPACITORS

These dry electrolytic capacitors furnished in cylindrica aluminum cans are offered as substitutes for replacement of wet electrolytic units which have been discontinued in manufacture during the war. The limited range of capacities listed below cover practically all applications in standard radio receivers and other equipment in which wet type electrolytic capacitors were originally employed.



TYPE WR
WET ELECTROLYTIC REPLACEMENT

TYPE WR—500-Volt D.C. Replacements

Cat. No.	Cap. Mfd.	Replacement for	Size—Ins. Dia. x Lth.	List Price	Net Price
WR 10	10	4 to 12 mfd.	1 5/8 x 2 1/2	$1.45	$0.87
WR 20	20	16 to 20 mfd.	1 5/8 x 2 1/2	2.25	1.35
WR 30	30	20 to 30 mfd.	1 5/8 x 3 1/4	2.60	1.56
WR 40	40	30 to 40 mfd.	1 5/8 x 3 1/4	2.90	1.74

For one-inch diameter can wet electrolytic replacements we recommend employing C-D Type KR capacitors in one-inch diameter cans of equivalent capacity and voltage ratings.

TYPE EB REPLACEMENT CAPACITORS

Type EB electrolytic capacitors are especially suited for replacement purposes in radio receivers to replace units of larger physical sizes. They are identical in mounting hole dimensions and general construction to Type WR capacitors except they are provided with insulated color-coded wire leads brought through the threaded neck of the unit instead of a lug terminal.

TYPE EB—450-Volt D.C. Electrolytic Capacitors

Cat. No.	Cap. Mfd.	Size—Ins. Dia. x Lth.	List Price	Net Price
EB 9080	8	1 3/8 x 4 3/8	$1.80	$1.08

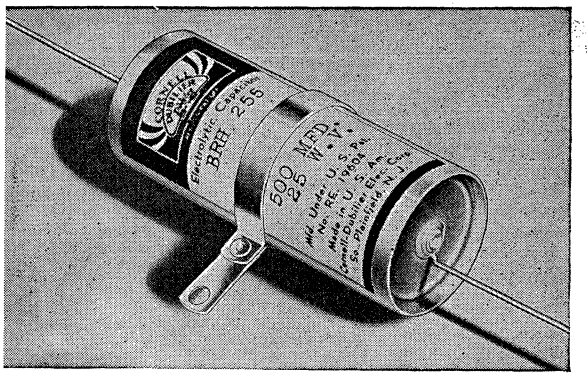
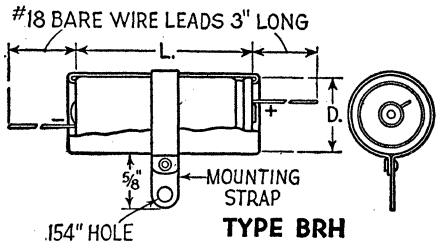
HIGH CAPACITY DRY ELECTROLYTIC CAPACITORS



TYPE BRH HIGH-CAPACITY LOW-VOLTAGE UNITS

These compact C-D etched foil electrolytic capacitors have been especially designed for all applications requiring high capacity units operating in low voltage D.C. circuits. They are widely employed in portable radio power rectifying circuits, electric fence devices, telephone and D.C. timing circuits. Units are available in standard capacities and voltage ratings for all uses.

Hermetically sealed in pure aluminum cans with an external cardboard insulating sleeve, these units are provided with metal mounting strap and bare wire leads for convenient wiring into any circuit assembly. They are constructed identically the same as Type BR "Blue Beavers" except all units are provided with a mounting strap.



TYPE BRH

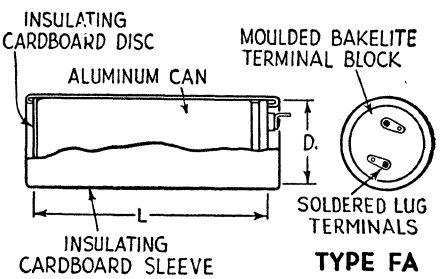
TYPE FA HIGH-CAPACITY LOW-VOLTAGE UNITS

Type FA capacitors in round aluminum cans are designed for high capacity, low voltage applications, and are especially popular as replacements in motion picture sound equipment, "A" battery power supplies and other low voltage circuits where hum-free operation is essential. All units are provided with lug terminals on a moulded bakelite cover and furnished with an external cardboard insulating sleeve for protection against short circuits.



TYPE FA

Cat. No.	Cap. Mfd.	D.C. W.Volts	Size—Inches Dia. x Lgth.	List Price	Net Price

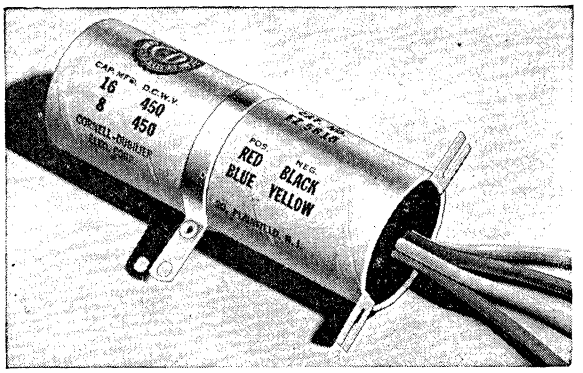
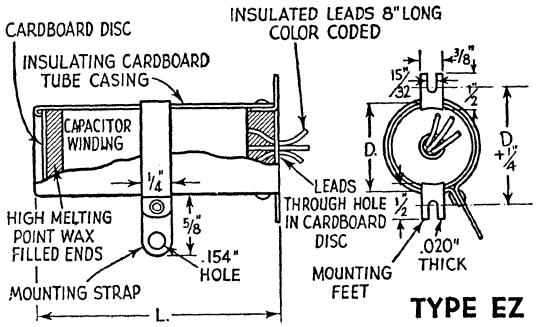
CARDBOARD TUBE DRY ELECTROLYTIC CAPACITORS



TYPE EZ UNIVERSAL-MOUNTING UNITS

Type EZ capacitors are especially popular for radio servicing where low cost replacements are required. They are designed with mounting feet for upright mounting to replace inverted can-type units, spade-lug units, or may be mounted beneath the chassis by means of the mounting strap provided around the center of the cardboard tube casing. In any instance, the unused mountings may easily be cut off.

These units are without doubt the most practical all-around replacement capacitors available and incorporate C-D etched foil features in design and construction. They are completely sealed in moisture-proof cardboard tube casing, filled with special wax compound, and provided with insulated wire leads eight inches long. All units are clearly stamped with capacities, voltages and color code designation of leads.



COLOR CODING OF WIRE LEADS ON TYPE EZ CAPACITORS

BLACK —Common negative lead.
RED —Positive, highest voltage or capacity.
BLUE —Positive, next highest voltage or capacity.
GREEN —Positive, next highest voltage or capacity.
YELLOW—Positive, next highest voltage or capacity, or negative in units where two separate negative terminals are required.
BROWN —Negative, in units where three separate negative terminals are required.

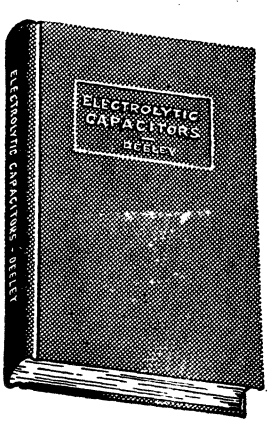
"ELECTROLYTIC CAPACITORS"

By PAUL McK. DEELEY



This instructive book supplies the reader with specific information concerning the many factors involved in the theory design and construction of electrolytics. It is profusely illustrated and describes all applications of electrolytic capacitors. 300 pages, size 5½" x 7⅞", cloth bound hard cover. Every page is a gold mine of facts and data

This 300-page book postpaid—for only **$1.00** ne

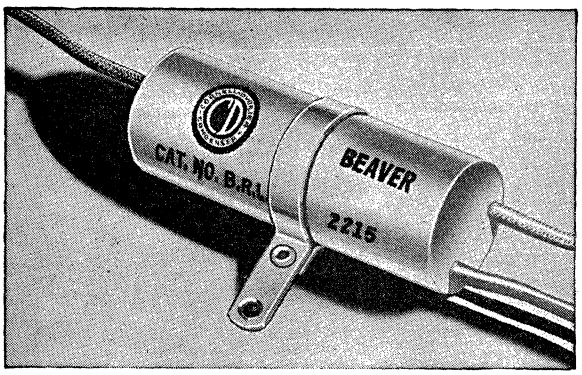
CARDBOARD TUBE DRY ELECTROLYTIC CAPACITORS



TYPE BRL CARDBOARD TUBE UNITS

Type BRL Capacitors are dual and triple common negative units in cardboard tube containers with wax-filled ends. Capacities, voltages and polarity of the leads are clearly defined by color coding stamped on the cardboard tube casing. Units are provided with insulated wire leads brought out at both ends of the unit. A mounting strap around the center of the cardboard tube casing enables mounting the unit with one screw under the chassis assembly.

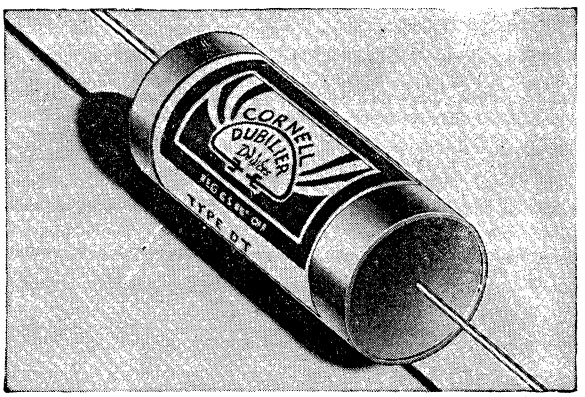
TUBULAR PAPER CAPACITORS



TYPES DT AND MD TUBULAR UNITS

Type DT, "Dwarf Tiger" capacitors are non-inductively wound, wax impregnated units in specially treated cardboard tubes with high melting point wax filled ends. They have tinned-copper wire leads 2½" long.

Type MD "Blue Tiger" capacitors are impregnated with Dykanol "D" which provides longer life under more severe conditions of humidity and temperature.

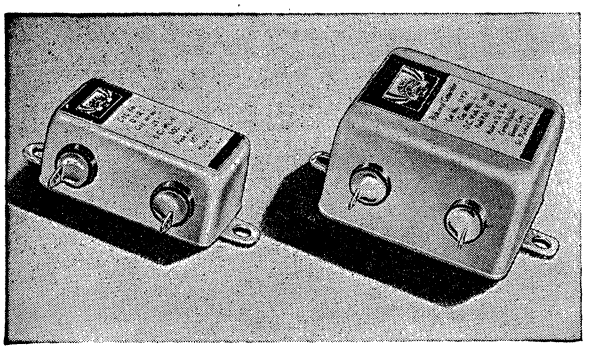
DRAWN METAL SHELL PAPER CAPACITORS



TYPE DYR DYKANOL "G" FILLED UNITS

Type DYR Dykanol Bypass Capacitors are non-inductively wound and meet the need for dependable capacitors of fractional capacities that will operate efficiently in R.F. and A.F. bypass, audio frequency coupling and A.C. circuits under all humidity conditions and at temperatures up to approximately 85° C. (185° F.). They are built to stand an immersion test in hot water and have been specially designed to fill the severe requirements of aircraft, submarine, marine and tropical applications for maximum capacity and voltage in minimum space, where quality and reliability are of paramount importance. They are impregnated and filled with Dykanol "G" and sealed in non-corrosive cases with leakproof riveted terminals.

TYPES DA, DB & DC WAX FILLED UNITS

Types DA to DC capacitors are non-inductively wound and wax-potted in drawn metal shell containers. They are available in a large variety of ratings for radio frequency bypass, audio frequency coupling and bypass functions. Lug terminals are amply insulated. Integral with casing, the mounting feet allow ease of assembly.

In the single and dual section capacitor units, the terminals are insulated from the container. The duals have three terminals, the common lug being on the left. In the triple and quadruple section capacitors, the common terminal connection is grounded to the metal case.

All units are wound with the highest grade pure aluminum foil and multi-laminated Kraft tissue, thoroughly dried under vacuum pressure, impregnated in the finest grade wax compound, oil-cooled, and potted in a special wax compound. Conservative D. C. ratings of these capacitors by triple testing assure dependable service in operation.

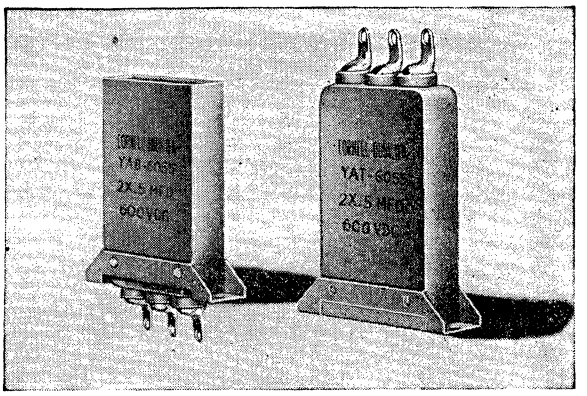
DRAWN METAL SHELL PAPER CAPACITORS



TYPE YAB AND YAT DYKANOL CAPACITORS

Types YAT and YAB are impregnated and filled with Dykanol "G" (chlorinated diphenyl) a synthetic, non-inflammable, non-oxidizable liquid compound which is unaffected by wide latitude of temperature changes or voltage stresses. They are especially suited for use in bypass, audio frequency coupling circuits and other applications where conditions of high humidity and temperatures are encountered.

Units are sealed in drawn metal shell containers and provided with leakproof terminals either on top or bottom of the can containers, designated as Types YAT and YAB accordingly. All units are provided with rugged metal mounting brackets which provide rigid mountings. Two or more units may be mounted close together in an assembly.

Single section units are provided with two terminals while dual and triple section units have three terminals. In single and dual section units terminals are insulated from the metal container. The third terminal of dual section units is the common terminal and marked for identification. In triple section units the common terminal connection is grounded to the metal case.

Types WAT and WAB Capacitors are smaller size units of similar construction and electrical characteristics but only supplied in single section units with two terminals. These units are ideally suited for use in assemblies where space is limited and multiple units may be mounted close together for compactness.

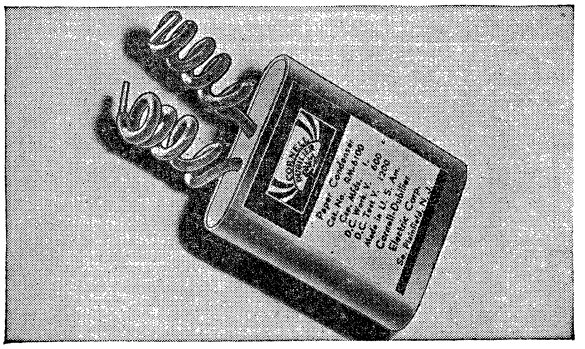
REPLACEMENT PAPER CAPACITORS



TYPE RM UNCASED PAPER CAPACITORS

Type RM uncased capacitors are made available to repair paper dielectric filter blocks which were used in the early models of A.C. operated radio sets. Also useful in the elimination of electrical interference caused by pushbuttons, bells, buzzers, and similar applications in radio, electronic and electrical devices.

Special capacitor units can be made up and potted into suitable containers by servicemen to fulfill many requirements.

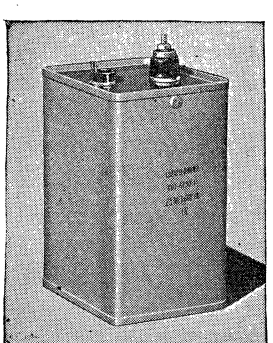
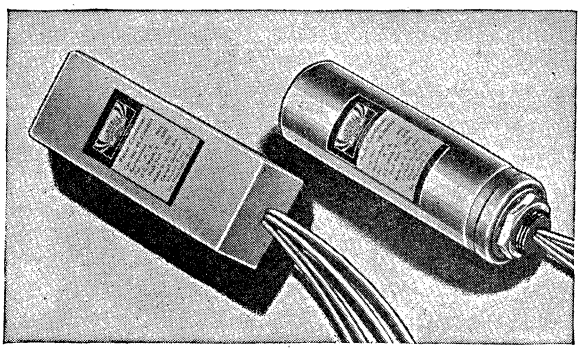
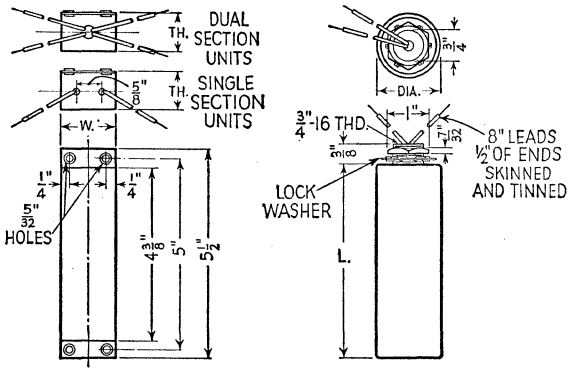
HIGH SPEED PHOTO-FLASH CAPACITOR for High Speed Stroboscopic Photography





TYPE PECH AND PEB REPLACEMENT UNITS

Paper Replacement Capacitors that simulate electrolytics in appearance; these types fulfill many service requirements. Their actual capacity is from 1/3 to 1/2 of the usual value employed when using electrolytics. They afford a high voltage breakdown which an electrolytic does not offer. There is no polarity to observe when using these capacitors. Mounting flanges are provided on all cardboard box units. Dual section units have separate leads.



TYPE PECH, 1200 V. D.C. Test, 800 V. D.C. Peak, 600 V. D.C. Working

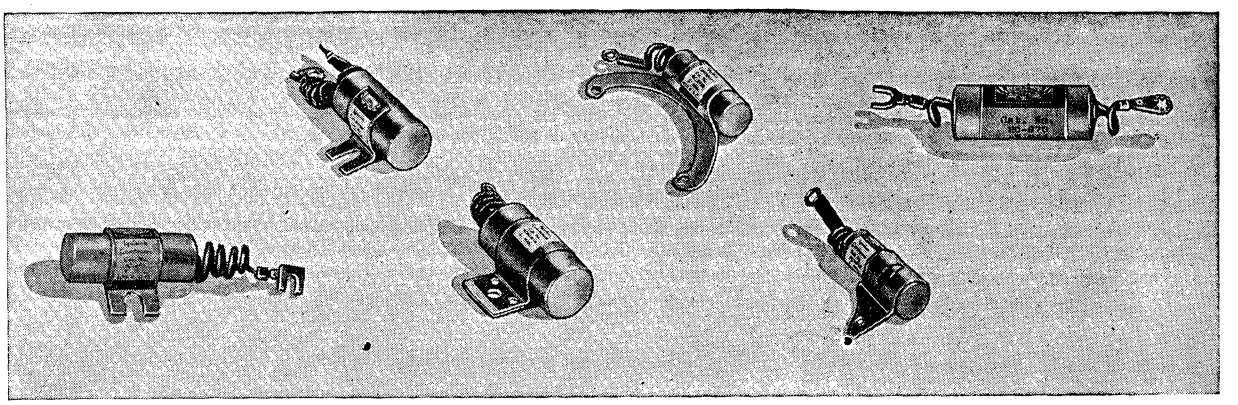
AUTO RADIO CAPACITORS



TYPES: (Top Row) IC-2P55, FC-2P5A AND HC-870E; (Bottom Row) IC-2P5V, ICH-2W1A AND FC-2P5V

The mechanical design of C-D Auto Radio Capacitors insures against damage by the high temperatures and excessive vibration existing under the hood of an auto. Special units such as these are designed for certain particular installations. Thus, for instance, Ford generator capacitor, FC-2P5V, has a special mounting bracket while others are also provided with special mountings and terminals. Vibrator capacitors are oil-treated to withstand high peak and surge voltages.

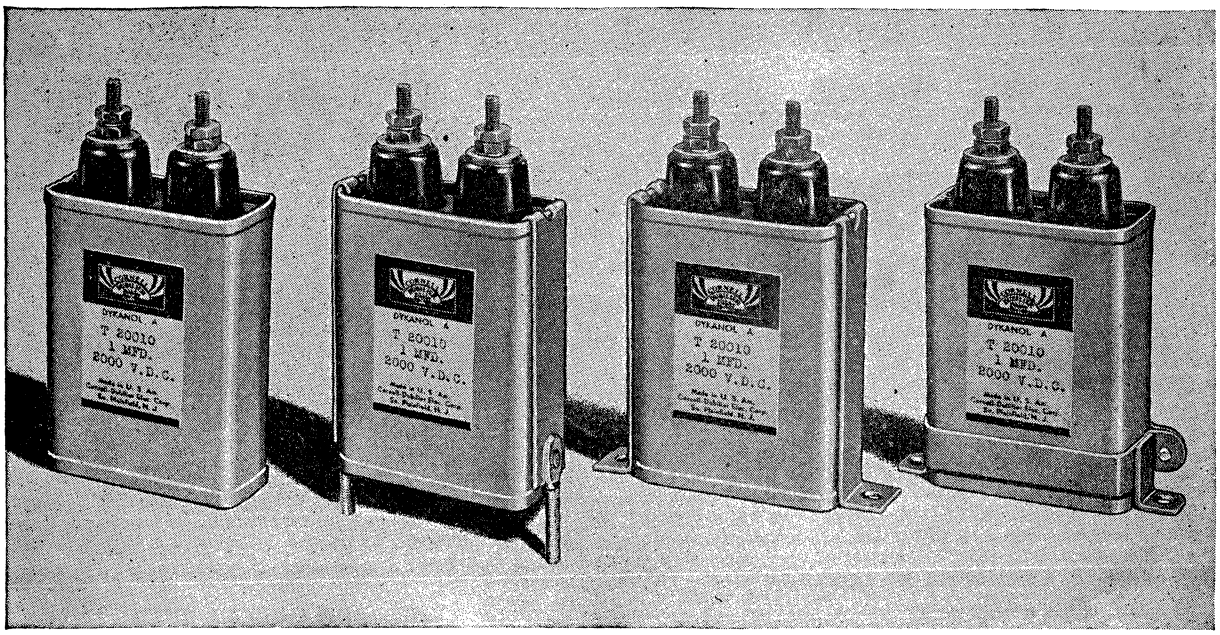
DYKANOL TRANSMITTING CAPACITORS



TYPES T, TJH, TJL AND TJU DYKANOL CAPACITORS

Type T-series Dykanol transmitting capacitors are the finest and most dependable units obtainable for use in all amateur, broadcast and commercial equipment. Units are provided with well insulated terminals, and mountings desired as shown in the accompanying illustrations. These units are standard in thousands of broadcast and government stations all over the world, and also employed in all types of sound equipment, television receivers and transmitters, and other electronic apparatus.

Type T capacitors are thoroughly impregnated and filled with Dykanol "G" (chlorinated diphenyl), a non-inflammable, fireproof, non-oxidizable liquid compound which provides a high factor of safety and exceptionally long life at high temperatures.

In the past, organic oils, resins, and waxes were used as paper impregnants in electrical insulation. Because of the variation of these natural materials, uniformity of results could be desired only and not attained. The concentrated attention of chemists and electrical engineers was turned toward the development of non-organic, synthetic substitutes and new substances, the properties of which could be controlled and modified as desired. The chlorinated diphenyls were recognized as outstanding among the rapidly increasing number of synthetics available. Of these compounds, continued research pointed to one narrow group, that known as Dykanol "G," the characteristics of which were particularly suited to the capacitor art. This material, having the lowest power factor compatible with the highest dielectric constant, is used as the impregnant in Type T capacitors.

For the dielectric separator in Type T capacitors, only the highest grade of kraft paper is used, ranging in thickness from .0003 to .001 of an inch for a single sheet. Three or more layers of paper dielectric as a separator between foil members are always used. The higher voltage units use as many as six or more layers. This multiple lamination builds a high safety factor into Type T capacitors.

All paper is manufactured to meet rigid specifications and is subjected to a series of tests at the C-D laboratories before acceptance for use in these capacitors. The paper must be of exceptionally high quality to pass the tests. In order to determine its many characteristics, tests are made for porosity, tensile strength, effect of heating, conducting particles, dielectric strength, ash content and ash analysis, acidity or alkalinity, soluble impurities, general appearance, and mechanical considerations such as yield, thickness, width, etc.

Due to the use of Dykanol "G" and multi-layer kraft capacitor tissue in these units, many outstanding advantages are thus gained, i.e., small size, light weight, low dielectric stress and long life at higher operating temperatures. The size is reduced due to the high dielectric constant of Dykanol "G" which also affords reduction in weight. A low dielectric stress is obtained as the result of efficient use of container volume, and the high specific inductive capacity of the impregnant. And since the dielectric stress is low, the life of the unit in operation is greatly increased. The synthetic liquid impregnant employed in these capacitors does not oxidize or deteriorate like commonly used organic oils.

For higher voltage units, ranging from 6000 to 25,000 v.d.c., write for data and prices on Type TK capacitors.

DYKANOL TRANSMITTING CAPACITORS

TYPE TQ DYKANOL CAPACITORS

Cornell-Dubilier, Type TQ Dykanol Capacitors, in cylindrical aluminum containers are provided with two insulated terminals and universal mounting rings for mounting the unit in any position with terminals either above or below a subpanel assembly. These units are designed primarily for filter circuits in amateur, low-power broadcast and commercial transmitters. They are also adapted for high-power, high-fidelity public address systems and portable power amplifiers.

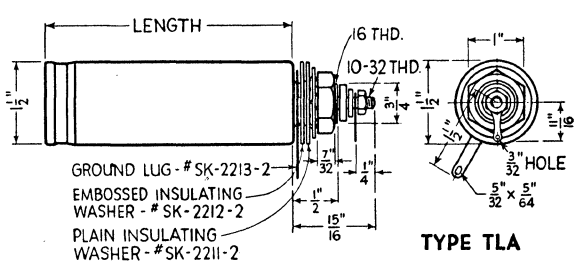
TYPE TLA DYKANOL CAPACITORS

For compact high-voltage filter applications in high-fidelity P.A. amplifiers, power supplies for short-wave portable transmitters and transceivers, type TLA Dykanol filter units in cylindrical aluminum containers are ideal in every respect. One terminal is well insulated, the other being the metal can itself. Insulating washers, as well as a large spade lug, are provided so that the metal container may be insulated from the chassis.

Type TLA capacitors are thoroughly impregnated and filled with Dykanol "G" (chlorinated diphenyl), a non-inflammable, fireproof, non-oxidizable liquid compound which provides a high factor of safety and exceptionally long life at high temperatures.

Type TLAD Capacitors are similar in construction except that the capacitor section is insulated from the metal container and furnished with two soldering lug terminals instead of one.



Cat. No.	Cap. Mfd.	D.C. W. Volts	Size—Inches Lth. x Diam.	List Price	Net Price

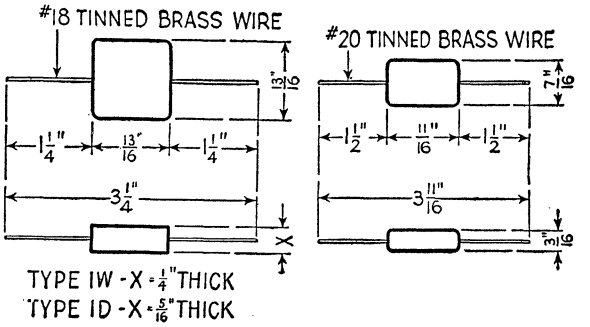
Moulded Bakelite Capacitors, Types 1W, 1D, and 5W are suitable for numerous electronic uses and are specially adapted to serve many important functions in low-voltage radio circuits. Standard units are furnished in brown bakelite and also available in low-loss yellow bakelite on special order. They are individually tested for accuracy of capacity and voltage breakdown and designed to give dependable service where small size units are required.



TYPE 1W & 1D **TYPE 5W**

Notes on Ordering Special Capacitors

The listing at the left gives the range of capacities available from stock. Intermediate capacities, not exceeding the maximum as listed for each type, can also be furnished upon request.

STANDARD CAPACITY TOLERANCE is plus or minus 20%. Also available, on order, in plus or minus 10%, 5%, 3% and 2% tolerance ratings (or within 1 mmfd.—whichever is greater). For capacity tolerance of: 10% add 10% to list prices; 5% add 20% to list prices; 3% add 40% to list prices; 2% add 75% to list prices.

"L" MOULDED IN LOW-LOSS BAKELITE available on order—add "L" to Cat. No. (examples: 5WL; 1DL; 1WL). For types 1WL, 1DL and 5WL add 10c to list prices.

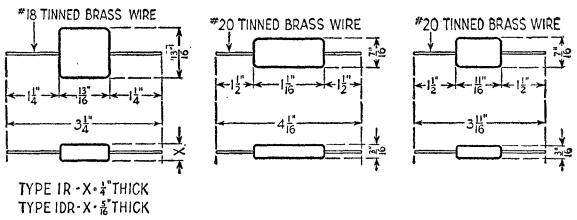
Types 1R, 1DR, 2R and 5R "Silver-Mike" Silvered Mica Capacitors are designed for use in high Q electronic circuits where frequency stability and minimum loss must be maintained. They are ideally suited for use in circuits where the LC product must be maintained constant, and particularly adapted for use in tuning IF transformers, push-button tuning circuits and other similar applications. Standard units are moulded in low-loss red bakelite and furnished with tinned brass wire leads. All units are rated at 500 volts D.C. working and tested at 1000 volts D.C.



TYPE 1R & 1DR TYPE 2R TYPE 5R

Notes on Ordering Special Capacitors

The listing at the left gives range of capacities which are available from stock. Intermediate capacities, not exceeding the maximum as listed for each type, can also be furnished upon request.

STANDARD CAPACITY TOLERANCE is 5%. Also available, on special order, in tolerance ratings of plus or minus 3%, 2% and 1% (or within 1 mmfd.—whichever is greater). All types can also be supplied in plus or minus 10% and 20% tolerances at lower prices.

TEST VOLTAGE—All Types 1R, 1DR, 2R and 5R are tested at 1000 volts D.C.—500 volts D C. working. Higher capacities in the latter are tested at 600 volts D.C.—300 volts D.C. working.

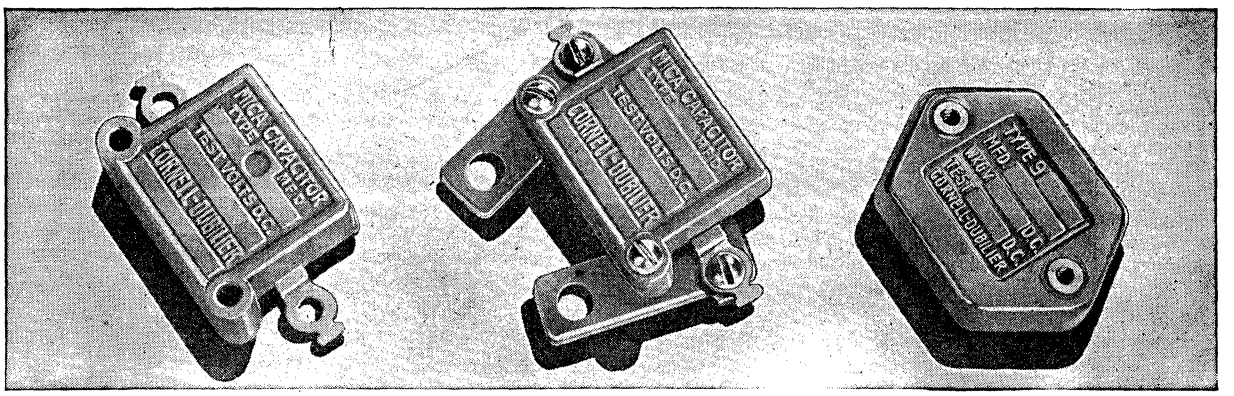
MOULDED MICA TRANSMITTING CAPACITORS



TYPES 4, 4E AND 9 MICA CAPACITORS

C-D Mica Capacitors Types 4 and 9 are designed to meet the requirements of power amplifiers and low-power transmitters. They are principally employed for grid and plate blocking purposes and for r. f. by-pass functions.

Notes on Ordering Special Capacitors

Type No. Suffix

STANDARD TOLERANCE is plus or minus 10%. Also available on order in plus or minus 5% and 2%. For capacity tolerance of: 5% add 15c to list prices; 2% add 40c to list prices.

"L" MOULDED IN LOW-LOSS BAKELITE available on order. Add "L" to Cat. No. (example: 4L-22060; 9L-11010). Add 25c to list prices.

"S" SPECIAL SALT WATER IMMERSION SEAL AGAINST HUMIDITY. To order, add "S" to Cat. No. (example: 4S-53010; 9S-12050). Add 10c to list prices.

"T" HEAT AGEING TREATMENT for stabilizing capacity over extremely wide temperature changes, minus 40° C. to plus 70° C., furnished on special order. Add "T" to Cat. No. (example: 4T-12010; 9T-21020). Add 15c to list prices.

"LST" TO ORDER A COMBINATION OF ABOVE FEATURES, add letters specified to Cat. No. (example: 4LST-12040; 9LST-13020). Add 50c to list prices.

INSULATION RESISTANCE—Brown Bakelite, 20,000 megohms per unit—Low-Loss Bakelite. 40,000 megohms per unit. Low-Loss Bakelite provides higher Q and lowers the power factor.

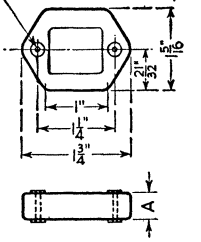
"4E" SMALL METER BRACKETS adapted for Weston Model 301 meters, add "E" to Cat. No. (example: 4E-22050). Add 20c to list prices.

"9A" UNTAPPED MOUNTING HOLES. Standard units are tapped for 6-32 and furnished with round head screws. For untapped mounting hole, .144" diameter (No. 6 clearance), add "A" to Cat. No. (example: 9A-11030).

"9F" HIGHER VOLTAGE CONSTRUCTION, rated 6,000 v.d.c. test, 3,000 v.d.c.—1500 v.a.c. operating. Capacity range limited. Moulded in low-loss Bakelite, BM 262. The thickness of these units, or "A" dimension, is 7/16" for capacities up to .002 mfd. and 3/4" for capacities from .0022 to .005 mfd. max. To order, add "F" to Cat. No. (example: 9F-63050, the numeral "6" designating 6,000 volts test). Prices of "9F" units are double the list prices shown.

"9R" HIGH STABILITY UNITS—Special high stability units, comprising low-loss Bakelite, BM 262, temperature aged and sealed construction for use as low power master oscillator tank capacitors or accessory positions. These units are fixed and permanent in characteristics, having a capacity-temperature coefficient of approximately plus .003% (30 parts per million) per degree C. To order, add "R" to Cat. No. (example: 9R-52020). Prices of 9R units are double the list prices shown.

TYPE 9:6-32 THD. TAPPED HOLES
TYPE 9A: 144" DIA. HOLES



TYPE 9

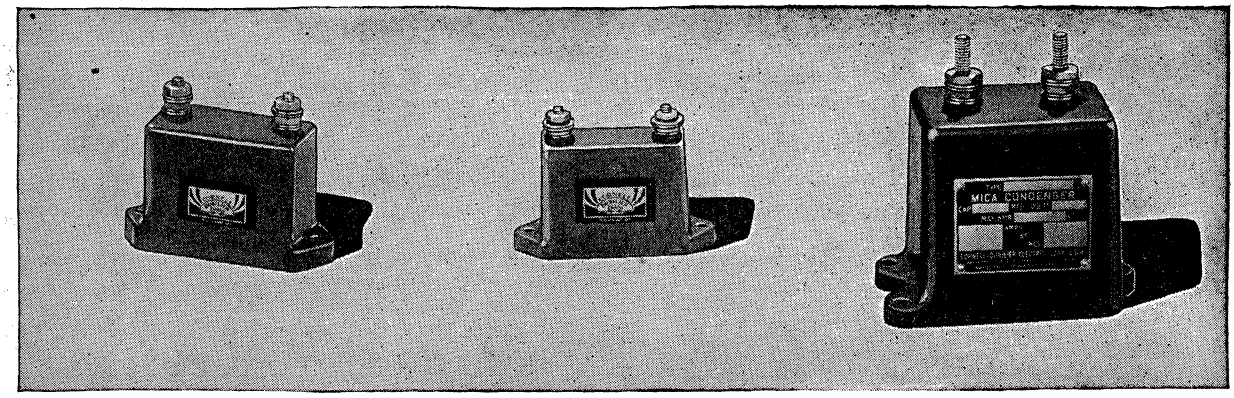
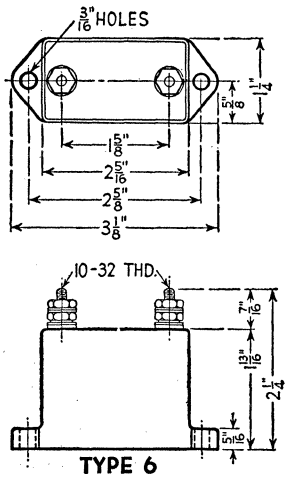
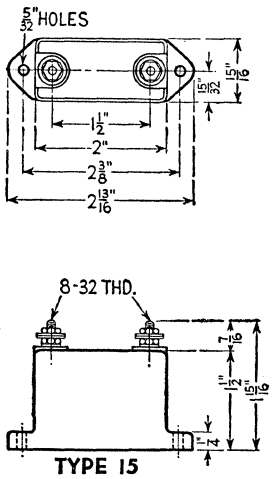
BAKELITE CASED MICA TRANSMITTING CAPACITORS



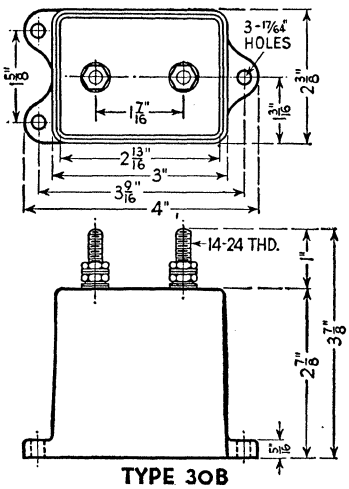
TYPES 6, 15L AND 30B BAKELITE CASED MICA CAPACITORS



TYPE 6



TYPE 15



TYPE 30B

Types 6, 15L and 30B Mica Capacitors in moulded bakelite cases are designed for a wide variety of radio frequency applications where size and weight are at a premium, such as in aircraft, portable equipment, low-power transmitters and the earlier stages of high-power transmitters. They are specially suited for use as grid, plate, coupling, tank and by-pass functions. These units are among the smallest types employing the patented series-stack construction permitting their use on higher r.f. voltages.

Notes on Ordering Special Capacitors

Type 15L units are available only in low-loss Bakelite (BM-262 or equivalent) cases. Types 6 and 30B may be had in either standard (brown) or low-loss (yellow) Bakelite cases. When ordering low-loss units, add "L" to Cat. No. (example: 217-6L; 604-30BL). Add $1.00 to list price for Type 6. Add $1.50 to list price for Type 30B.

STANDARD CAPACITY TOLERANCES—Plus or minus 5%. Tolerance of 2% can be furnished on special order. Add $1.50 to list price for Types 6 and 15L. Add $2.00 to list price for Type 30B.

OPERATING AMBIENT TEMPERATURE—Up to 60° C. maximum.

SALT WATER IMMERSION SEAL—To order, add "S" to Cat. No. (example: 246-6S; 726-15LS; 113-30BS). Add to list: $.30 for Types 6 and 15L. Add to list: $.50 for Type 30B.

"H" TYPE—These units have been developed for use where excellent retrace and low temperature coefficient are required. Over a range of − 40° C. to + 70° C. the capacity temperature coefficient is approximately + .003% per degree C. A limited range of capacity and voltage ratings is available. Made only in low-loss Bakelite and sealed for immersion test. To order, add "H" to Cat. No. (example: 6H, 15H, 30BH). Add to list: $4.00 for Type 6. Add to list: $2.00 for Type 15L. Add to list: $5.00 for Type 30B.

TYPE 6K—This unit is a still further refinement being a compensated unit which can be made with a positive, zero or negative coefficient within the limits of + .003% to − .005% per degree C. over a temperature range of from − 40° C. to + 70° C. Type 6K is available in a limited range of low capacities and voltage ratings. "K" Type includes low-loss Bakelite and immersion seal. When ordering Type 6K, temperature coefficient must be specified. (Type 6 only) Add to list Price: for plus or minus 5%—$12.00; for plus or minus 3%—$13.00; for plus or minus 2%—$14.00; for plus or minus 1%—$18.00.

ELECTROLYTIC MOTOR STARTING CAPACITORS

TYPES JDS, ETN AND ETNCB MOTOR STARTING CAPACITOR REPLACEMENTS

Types ETN and JDS Electrolytic Motor-Starting Capacitors are universal replacement units for use in standard makes of oil-burners, refrigerators and other motor driven equipment. The list of units below simplifies the selection of the capacitor required when the capacity, voltage rating, and size are known.

In many cases where a round can-type unit is to be replaced a smaller size capacitor of the same capacity and voltage rating may be selected as a replacement. The smaller size unit may be wrapped tightly with ordinary corrugated paper and fitted into the capacitor housing on the motor. While only the most widely used range of capacities are listed below, Type ETN 110 V.A.C. capacitors can be supplied in intermediate capacities from 10 mfds. to 498 mfds.

All units are furnished with tightly fitted insulating cardboard tube or paper box casings with screw terminals on Type ETN or with terminal board on Type JDS capacitors. Type ETN units are available with black lacquered steel end caps, designated as Type ETNC, or with both end caps and black lacquered steel mounting bracket designated as Type ETNCB (see illustration above). Units must be designated accordingly upon ordering. (See note below.)

TYPE JDS—110 VOLTS A.C. 50-60 CYCLES

Cat. No.	Cap. Mfd.	Dimensions—Ins. L. x W. x T.	List Price	Net Price
JDS-10	10	3½ x 3½ x 2	$2.90	$2.03
JDS-20	20	3½ x 3½ x 2	2.90	2.03
JDS-25	25	3½ x 3½ x 2	2.90	2.03
JDS-30	30	3½ x 3½ x 2	3.03	2.12
JDS-40	40	3½ x 3½ x 2	3.03	2.12
JDS-50	50	3½ x 3½ x 2	3.16	2.21
JDS-60	60	3½ x 3½ x 2	3.16	2.21
JDS-65	65	3½ x 3½ x 2	3.16	2.21
JDS-70	70	3½ x 3½ x 2	3.21	2.25
JDS-80	80	3½ x 3½ x 2	3.21	2.25

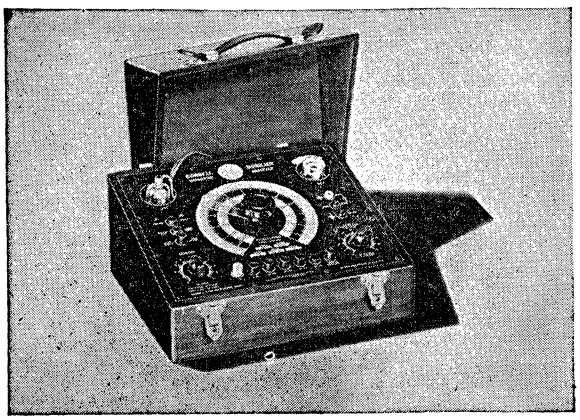
CORNELL DUBILIER

CAPACITOR TEST INSTRUMENTS



C-D CAPACITOR ANALYZER

The Model BF-50 Capacitor Analyzer quickly and accurately measures all important characteristics of all types of capacitors. It offers the most accurate and thorough capacitor test of any instrument of its type, and may be operated on any 110-volt, 50-60 cycle power line.

The analyzer will determine the true condition of all paper, mica and electrolytic capacitors, including A.C. motor starting types. It is the only instrument of its type which provides a complete test for all capacitors, with amplifier for adequate sensitivity, easy reading linear scales, push-button switches for simplicity of adjustments, D.C. voltage supply and visual eye leakage indicator.

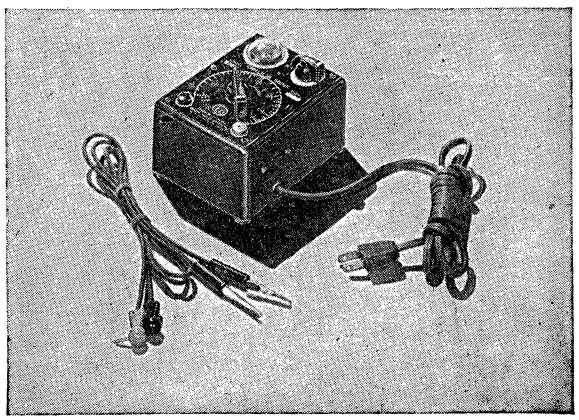
Features of C-D Analyzer

1. Measures Capacity—Accurately measures capacity of paper, mica, air, electrolytic and motor-starting capacitors from .00001 to 240. mfd.
2. Measures Power Factor—Measurements of power factor from zero to 50 percent on all types of electrolytic capacitors including motor-starting types.
3. Employs Wien Bridge—Assures permanent accuracy of capacity and power factor measurements. Readings not affected by line voltage variations.
4. Indicates Insulation Resistance—Insulation resistance measurements of paper and mica capacitors up to 1500 megohms. Also measures many types of insulation.
5. Indicates Leakage—Measurements of leakage of electrolytic capacitors by means of built-in direct current power supply.
6. Visual Eye Leakage Indicator—Provides simplified and reliable leakage tests on all types of capacitors. Enables measurements to be made rapidly
7. Detects Defective Capacitors—Character measurements, such as leaky, shorted, open, high and low capacity, and high power factor on all capacitors.
8. High Sensitivity on All Measurements—Amplifier for capacity, power factor and leakage tests provides sharp and accurate readings. Amplifier built in Analyzer.
9. Balance Sensitivity Control—Provides sharp or broad balances for quick and accurate readings. All readings are made simply and directly.
10. Direct Reading Linear Scale Calibration—Provides simplified measurements All scales on panel uniformly spaced, easy to read, thus avoiding possible errors in using multipliers or charts.
11. Push-Button Switching—For convenient and simplified adjustments, all tests and circuit changes are made by means of modern push-button switches.
12. Visual Eye Bridge Balance—Visual detector gives positive indication of bridge balance for convenient, simplified and accurate capacity and power factor measurements.
13. Six Color-Coded Scales—Accurately calibrated, six color-coded scales. Uniformly spaced over total spacing of sixty inches. Easy to read. No "blind" spots.
14. General Purpose Instrument—May be used to check continuity capacity between circuits, insulation of transformer windings and other types of coils, etc.
15. Self-Contained—Portable—An instrument complete in itself, requiring no external standard, headphones, meters or accessories. A portable unit, for 110 volt, 50-60 cycle operation, supplied in walnut cabinet, removable cover, with carrying handle. Size, 6 ½ x 12 x 9 ¾ inches. Weight, 9 pounds.

MODEL BF-50 CAPACITOR ANALYZER

Net Price..... **$39.80**

For Operation on 110 volts, 50-60 cycles.



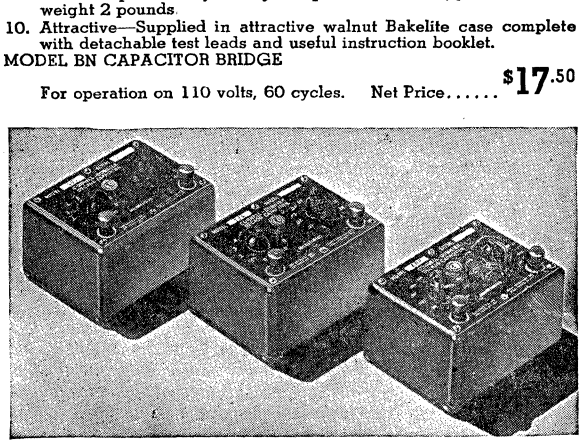
C-D CAPACITOR BRIDGE

Features of C-D Capacitor Bridge

1. Measures Capacity—Accurately measures capacity of paper mica electrolytic and air capacitors from .00001 mfd. to 50 mfds.
2. Indicates Power Factor—Power factor of electrolytic capacitor indicated by means of visual eye detector tube.
3. Detects Defective Capacitors—Detects many types of defective capacitors, open and short circuited, high and low capacity, and high power factor.
4. Checks Circuit Continuity—May be used on continuity meter. A handy instrument for checking circuits, coils, transformers and many other uses.
5. Employs Wien Bridge—Employs Wien Bridge circuit for all measurements. Accuracy independent of line voltage variations.
6. Visual Eye Bridge Balance—Dual type visual bridge balance for accurate measurements facilitates quick tests on service jobs.
7. Direct Reading Scale—Direct reading ranges with all scale markings directly in microfarads. Clear reading dial scale. All capacity calibrations marked on panel. No charts or multipliers required.
8. Self-Contained—The Capacitor Bridge is complete in itself and requires no headphones, standards, external meters or similar accessories.
9. Extremely Compact—The unusually small size of this bridge makes it particularly handy for portable use—3 5/8" x 5" x 3" weight 2 pounds.
10. Attractive—Supplied in attractive walnut Bakelite case complete with detachable test leads and useful instruction booklet.

MODEL BN CAPACITOR BRIDGE

For operation on 110 volts, 60 cycles. Net Price..... **$17.50**



C-D CAPACITOR DECADES

C-D Capacitor Decades provide accurate standards over a wide range of capacity May be used in groups of the three decades, shown above, or used individually for maximum flexibility Each decade is furnished with calibration chart giving exact capacity values for all scale markings, extending use to more precise measurements.

Rated Voltage—600 D. C.—220 A. C.

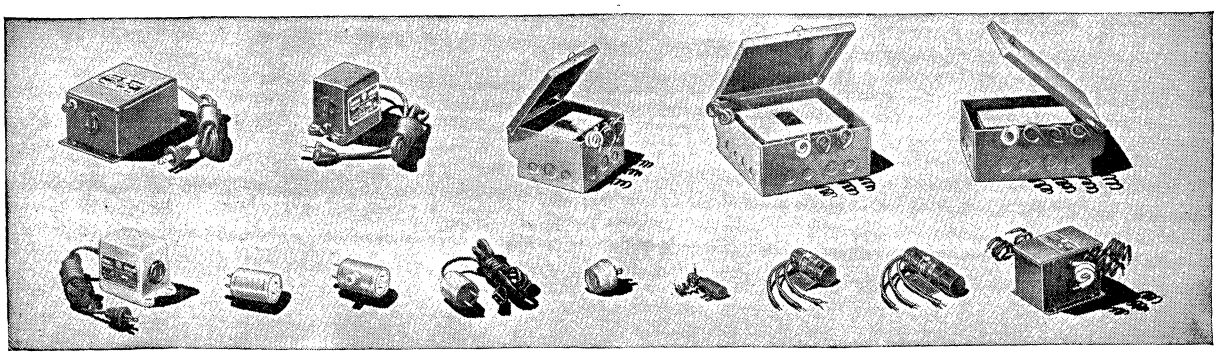
QUIETONE INTERFERENCE FILTERS



Top row—Types IF-18; IF-21; IF-11 & 12; IF-7A, 15 & 16, and IF-14
Bottom row—Types IF-19; IF-4 & 5; IF-6; IF-22; IF-20; IF-24; IF-25; IF-26; IF-27, 28 & 29

RADIO AND APPLIANCE QUIETONES

Most satisfactory results are obtained when Quietones are installed at the source of the interference. A Quietone installed in connection with an offending appliance corrects the noise caused by that appliance.

Where source of interference cannot be located a Quietone connected in the electric supply line of the radio receiver will alleviate, if not fully correct, the condition. When a Quietone is installed, interference will be greatly reduced. Remaining interference usually enters receiver through the antenna system.

Quietones for Use at the Radio Receiver

TYPE IF-4—For use on small radio receivers, such as A.C.-D.C. midget sets, etc., where noise level is not too severe. Connects in power line between the radio receiver plug and wall receptacle. Rating: 110 V.A.C.-D.C. 5 amps. Colors—Furnished in ivory, walnut, or green finish. List Price $1.10 **Net Price $0.66**

TYPE IF-18—For use in connection with all radio receivers where noise level is severe. Furnished in Bakelite case (see colors). Employs highly effective all-wave capacitive-inductive type filter. Ratings: 110 V.A.C.-D.C. 5 amps. Colors—Furnished in ivory or walnut Bakelite. List Price $8.35 **Net Price $5.01**

Quietones for Use at Appliances

TYPE IF-5—For small electrical appliances such as food mixers, hair dryers, etc., where radio interference is of low intensity. Plug type filter. Convenient to install. Rating: 110 V.A.C.-D.C. 5 amps. Colors—Furnished in ivory, walnut or green finish. List Price $1.10 **Net Price $0.66**

TYPE IF-6—For all types of home electrical appliances where interference is of moderately low intensity Installed between appliance and power supply line with short return lead which reduces radiation. Rating: 110 V.A.C.-D.C. 5 amps. Colors—Furnished in ivory, walnut or green finish. List Price $1.75 **Net Price $1.05**

TYPE IF-18—An efficient all-wave capacitive-inductive sectional band type filter for use in connection with all types of electrical appliances where interference conditions are severe. Provided with frame connection for reduction of radiation. Furnished in Bakelite case (see colors). Rating: 110 V.A.C.-D.C. 5 amps. Colors—Bakelite case, walnut finished. List Price $8.35 **Net Price $5.01**

TYPE IF-19—Capacitive-inducted type filter for use where interference is severe. Frame connection provided. Furnished in Bakelite case. Rating: 110 V.A.C.-D.C. 5 amps. Colors—Bakelite case, ivory or walnut finish. List Price $7.00 **Net Price $4.20**

TYPE IF-20—For use on small electrical appliances where interference is very low. Simply connected to cord plug of appliance and plugged into wall receptacle. Rating: 110 V.A.C.-D.C. 5 amps. Colors—Bakelite case. Ivory or walnut finish. List Price $0.75 **Net Price $0.45**

TYPE IF-21—All-wave capacitive-inductive type filter for use on appliances where return lead to the frame of appliance cannot be made, such as shaver, barber clippers, etc. Furnished in Bakelite case. Rating: 110 V.A.C.-D.C. 1.6 amps. Colors—Bakelite case. Ivory or walnut finish. List Price $4.00 **Net Price $2.40**

TYPE IF-22—For use in connection with electric shavers of all standard types. Line cord and plug provided with Schick and Packard type adapters which fit practically all type shavers. (Specify type desired when ordering.) Type IF-22A for Schick, Knapp Monarch, and similar type shavers. Type IF-22B for Packard, Zephyr, Remington-Rand and Ronson type shavers. Rating: 110 V.A.C. 5 amps. Colors—Bakelite case. Ivory or black finish. List Price $2.75 **Net Price $1.65**

INDUSTRIAL QUIETONES

The development of radio receiving and broadcasting equipment has been perfected to a degree where complete enjoyment of programs is within the reach of all. However, only too frequently is radio reception marred by disturbing noises commonly referred to as "man-made static." This condition does not have to be endured. It is unnecessary to tolerate the majority of these offending noises. Quietone Filters enable you to enjoy quiet, noise-free reception.

Although atmospheric disturbances in many instances cause radio noises, this condition is not chronically annoying. With the average radio receiver, noise is generally caused by the operation of electrical appliances or apparatus which create high frequency oscillations. Many types of equipment cause minute sparks as a result of a change in electrical conditions within the device, which are essential to its operation. In effect these appliances act as miniature radio transmitters, setting up a disturbance which may affect radio receivers at a considerable distance.

It is highly desirable to correct noise conditions at the source as one filter properly installed at this point may eliminate the noise in a number of radio receivers. Where it is impossible to locate the equipment which is causing the interference a Quietone installed at the receiver will correct the noise in that receiver.

The Quietones listed below will correct radio noise conditions caused by motors, generators, elevators, stokers and many other types of industrial electrical apparatus. They are designed for convenient mounting, and contain highest quality capacitors, with lowest possible impedance internal connections. There are no current limitations for (CP) Capacitive Quietones.

Capacitive (CP) Quietones

Type	Volts A.C.—D.C.	Connections	Housing	List Price	Net Price
IF-24*	110	Flex-Leads	Metal	$1.10	$0.66
IF-25	110–220	Flex-Leads	Metal	4.50	2.70
IF-26	110–220	Flex-Leads	Metal	6.00	3.60
IF-11	110	BX	Cutout Box	12.00	7.20
IF-12	220	BX	Cutout Box	16.50	9.90
IF-14**	110–220	BX	Cutout Box	22.50	13.50

** All Quietones listed above with exception of IF-14 are for single phase circuits. IF-14 is for 2 or 3 phase or 3-wire circuits.

* Dual unit for use on fluorescent lighting fixtures.

The Quietones listed below are for the more severe radio noise conditions caused by motors, generators, elevators, diathermy, oil burners, etc. They are designed for convenient mounting and quick connection to these machines. They consist of low-loss coils and highest quality capacitors with correct noise conditions in both broadcast and short wave receivers. They are the most efficient filters available for heavy duty application. All capacitive-inductive (CI) Quietones are for single phase circuits.

Capacitive-Inductive (CI) Quietones

Type	Volts A.C.—D.C.	Max Amps	Connections	Housing	List Price	Net Price

DUMONT MIDGET PAPER CAPACITORS

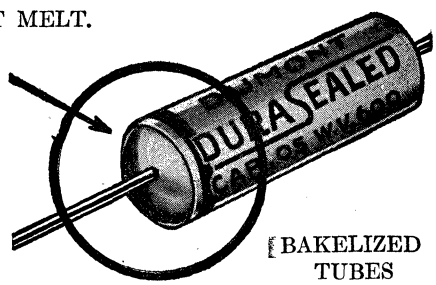
At Last . . .

A WAR TIME DEVELOPMENT
NOW RELEASED FOR PUBLIC USE

FEATURES:

1. HEAT-PROOF . . . CANNOT MELT OUT.
2. MOISTURE-PROOF . . . 100 R.H.
3. ANCHORED LEAD WIRES.
4. MUCH LONGER LIFE.
5. SMALLER . . . LESS ROOM.
6. NOT AFFECTED BY MOISTURE.
7. VACUUM SEALED.

BAKELITE RESINOID
CANNOT MELT.



BAKELIZED TUBES

Pats. Pending

DUMONT OIL PAPER CAPACITORS

Pats. Pending

TYPE . . . . P 7

- OIL IMPREGNATED UNITS
- BAKELITE TREATED TUBES
- BAKELITE RESINOID END SEALED
- OPERATES—60°c TO 125°c

Suitable for AC and DC Operation

IMPORTANT

Will not leak oil at 100 C. Continuous.

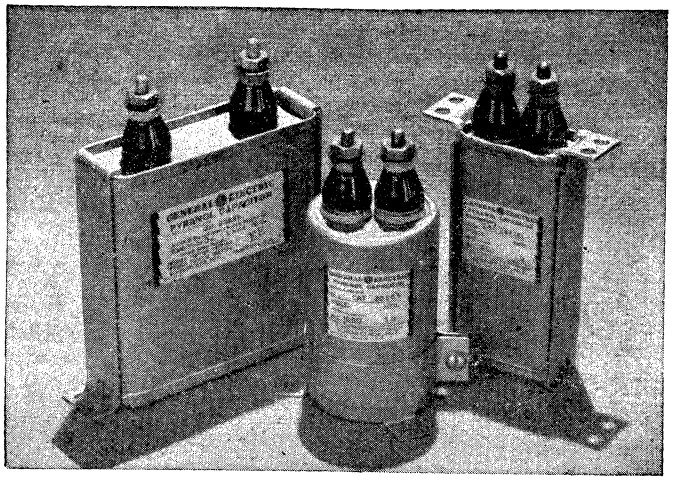
PYRANOL* CAPACITORS

For Amateur Radio Equipment



A COMPLETE LINE

Outstanding Characteristics

Continuous operation at 10 per cent above rating

Long life, for low cost per service-year

Small size—means easy portability

Upright or inverted mounting

Round or rectangular cases

Hermetically sealed for permanence

G-E Pyranol capacitors for d-c communications equipment are filled and treated with Pyranol, a non-inflammable dielectric developed and patented by General Electric. Pyranol has extraordinary dielectric qualities, and its use makes possible an unusually small and compact unit for all transmitter-capacitor ratings. Compare the size with that of a capacitor of conventional design.

The cases are hermetically sealed, assuring permanence of the characteristics of the capacitors, as contamination from air and moisture is impossible. Long life and ability to withstand temperatures as high as 75 C make these capacitors outstanding in their field.

*Trade-mark reg. U. S. Pat. Off.

The high quality of General Electric Pyranol transmitter capacitors is the result not only of extensive research into the design and manufacture of capacitors, but also of wide application experience. Thousands of units are in service in broadcasting stations, in commercial transmitters on shipboard, on airplanes—all over the world. Materials closely controlled as to quality, manufacturing processes under careful engineering and laboratory supervision, years of tested application experience—all these combine to give the amateur an unexcelled capacitor—the same high-quality capacitor as those used in the largest General Electric transmitters.

Prices are in accordance with OPA regulations applicable to General Electric Company. Dealers or distributors, however, should not use any list price suggested if it exceeds their ceiling price.

The rectangular-case-design Pyranol transmitter capacitors listed above and illustrated on opposite page, are hermetically solder-sealed and provided with ceramic insulators and mounting bracket as shown. The mounting bracket is rigidly attached to the capacitor, before shipment, by mechanical means and cannot loosen. All ratings are furnished with a durable silver-gray finish.

These capacitors may be operated continuously at voltage up to 10 per cent above the rated value.

G-E cylindrical-case Pyranol capacitors are hermetically solder-sealed and provided with ceramic insulators and an adjustable clamp-type mounting bracket, as illustrated. They may be mounted in any position. All ratings are furnished with a durable gray lacquer finish.

These capacitors are built to the same high standard of quality that has gained such great favor with radio amateurs for the rectangular-case Pyranol design. They may be operated continuously at voltages up to 10 per cent above the rated value.

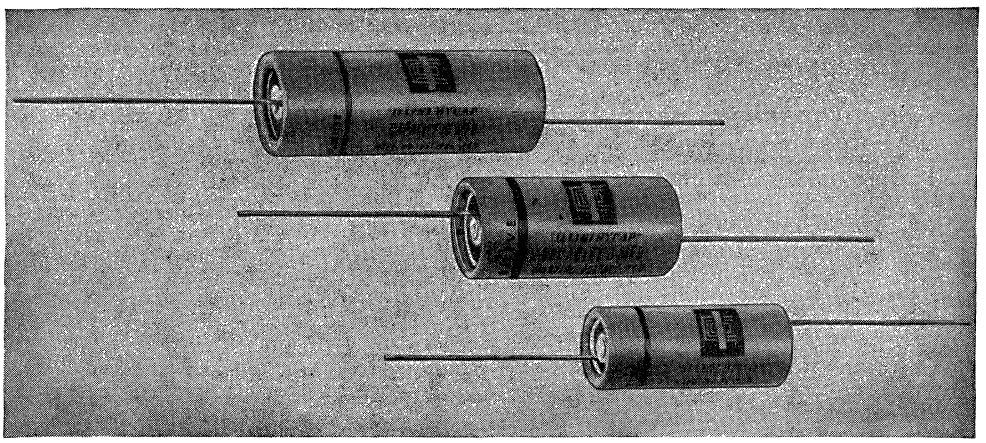
ILLINOIS CONDENSERS

TIME TESTED QUALITY



"ILLINI HYCAPS" are now manufactured in a new and modern plant designed especially for the manufacture of capacitors. Our thorough engineering, plus old manufacturing skills and a rigid policy of quality control enables us to produce a product that is of unexcelled quality.

"ILLINI HYCAPS" are again available, and you will agree after using them that they meet every requirement a superior condenser should have for long life and dependable service.

"ILLINI HYCAPS" are guaranteed unconditionally for a period of one year, from date of purchase.

1. Short proof—ample separation of foils by highest purity cellulose separator plus tough anodic film—will withstand the highest surge voltages.
2. Condenser hermetically sealed and anchored in an aluminum shell. Completely resistant to changes due to temperature and humidity. Built to withstand all kinds of vibrations and shocks.
3. Attractive kraft tube spun over condenser ends . . . prevents shorting of pig tail leads to condenser or other components. Aluminum lock-washers hold leads securely in place, will not loosen or break off.
4. Low power factor, low leakage, excellent shelf life.
5. Extremely longer life—due to our use of C. P. chemicals and highest purity foils and insulation materials available. A balanced non-corrosive electrolyte contributes to quiet stable operation.

Clamp Mounting Tubulars

"ILLINI-HYCAPS"

Through careful selection of high temperature sealing compounds and superior engineering design, these completely hermetically sealed, compact tubular electrolytic condensers are the acme of dependability. They operate efficiently under high temperatures and will give long life under all climatic conditions.

The small size and convenient mounting features of our type IHC "ILLINI-HYCAPS" make them popular in both manufacturing and replacement work.

Leads are color coded and securely anchored in the hard wax seal. Dual units have four leads for universal replacement work and are completely insulated.

Clamp may be moved to any position on tube for rapid mounting.

Inverted Screw Mounting
ALUMINUM CAN CONDENSERS

Type LN aluminum can condensers are manufactured to operate satisfactorily under the severest conditions. Units are completely sealed in an inner impregnated tube then resealed. Correct design has allowed for maximum heat dissipation with resultant ability of the condensers to operate at higher temperatures and higher voltage surges.

Separate negative and positive leads for each section for universal replacement work. Pal Nut furnished with each condenser. Individually packaged in attractive, varnished outer box. These units are ideal for long life and continuous service.

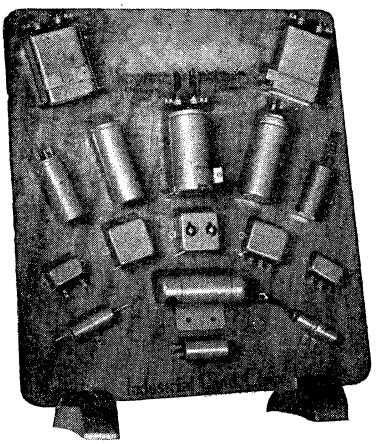
INDUSTRIAL CONDENSER CORPORATION

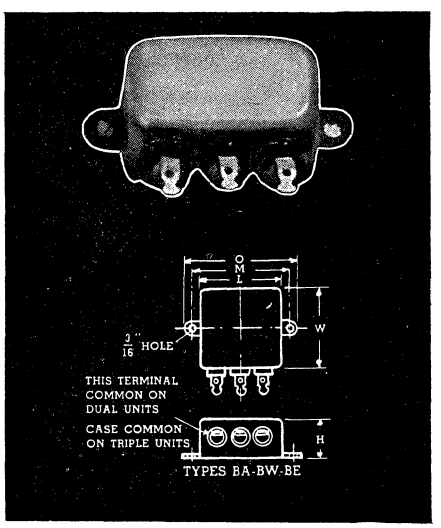


THE INDUSTRIAL CONDENSER CORP. was formed in 1940 in order to answer a definite need for a midwestern manufacturer of oil, wax, electrolytic and motor starting capacitors. Since this time INDUSTRIAL has grown to a leading place in the industry.

In addition to the standard types of paper and electrolytic capacitors covered in these pages (see Bulletin 1031A for complete line) and carried in distributors' stocks throughout the country, a wide variety of other types are available on special order.

The display shown at the left is on the counter of every INDUSTRIAL distributor. Reference to this will be of assistance in selecting the proper unit for each application.

Built to U. S. Signal Corps and Navy Specifications



DRY ELECTROLYTICS

Type "BE" electrolytic capacitor is the first commercially available unit of this type with the reliability of the total submersion type, oil filled capacitors.

Wound with the highest purity aluminum foil and cellulose separators available; impregnated in electrolyte having excellent temperature characteristics, these units will outlive their associated equipment.

TYPE "BA" OIL FILLED

1. INCCO OIL "A" permits efficient operation of these compact units over the widest range of temperature.
2. The use of the HIGHEST GRADE CONDENSER TISSUE insures greater safety factor and longer life.
3. Specially PROCESSED RIVETED TERMINALS are designed to withstand total submersion in salt water and changes in temperature from 50° below zero Centigrade to 90° above zero Centigrade without loosening or losing their integrity.
4. CONDENSER MOUNTINGS form an integral part of these drawn shell containers insuring permanent and rigid fastenings.
5. All units are NON-INDUCTIVELY WOUND providing efficient operation over the widest range of frequencies.
6. HERMETICALLY SEALED, they are unaffected by time, temperature or humidity.
7. CONSERVATIVELY RATED for safe and continuous uninterrupted operation at 10% above rated voltage for the lifetime of associated equipment.
8. Tested at twice the rated voltage between terminals and twice the rated voltage plus 1000 from each terminal to case.

Above units also available in 200 V. D. C., 400 V. D. C. and 1500 V. D. C. on request.

NOTICE—Most units are available with TERMINALS ON TOP, BOTTOM, OR ENDS. When ordering, add "T" for top terminals, "B" for terminals on bottom, or "E" for end terminals, i.e., 6BAT100 for terminals on top. Type "B" also available in WAX FILLED. When ordering, change catalog number A to W, i.e., 6BW100. If terminal position is not designated, side terminals are furnished. STANDARD CAPACITY tolerance of plus 20 per cent minus 10 per cent furnished on oil filled and wax filled units unless otherwise specified when ordering. Can be furnished in plus or minus 1 per cent capacity tolerance on special request.

INDUSTRIAL CONDENSER CORPORATION

INDUSTRIAL CONDENSER

TYPE "SA" OIL FILLED

1. INCCO OIL "A" IMPREGNATED AND FILLED—permitting efficient operation over widest range of temperatures.
2. HERMETICALLY SEALED CASE—is unaffected by time, humidity, or operating temperatures.
3. Use of HIGHEST GRADE CONDENSER TISSUES insures a long uninterrupted life.
4. HIGH-GLAZE PORCELAIN INSULATORS—insure low moisture absorption and high terminal to case flash over.
5. CONSERVATIVELY RATED—SAFE FOR CONTINUOUS OPERATION AT 10 PER CENT OVERLOAD.
6. Use of "SPACE SAVER" UNIVERSAL MOUNTING BRACKET provides adjustable capacitor heights.
7. LEAD COATED STEEL CASE—IS NON-CORROSIVE and lacquer finished.
8. TESTED FOUR TIMES BEFORE SHIPMENT—guarantees a 100 per cent perfect product electrically and mechanically.

If riveted terminal construction is wanted in place of porcelain stand-off insulators add "R" to catalog number. For example, 6SA50 changes to 6SAR50. Submersion proof terminal construction to meet Army and Navy specifications is optional; specify on order. Standard capacity tolerance plus or minus 10 per cent. Mounting brackets supplied in accordance with following catalog designations: **TYPE SA**—No mounting brackets. **TYPE SAU**—"Space Saver" universal bracket. **TYPE SAJ**—Soldered vertical mounting bracket. **Type SAL**—Reversible mounting foot bracket. **TYPE SAH**—Reversible spade bolt bracket.

For example: The 8mfd. 600V. type with "Space Saver" bracket has catalog number 6SAU800.

NOTE: To facilitate delivery we have standardized on container heights. In many cases units can be supplied in shorter containers if required.

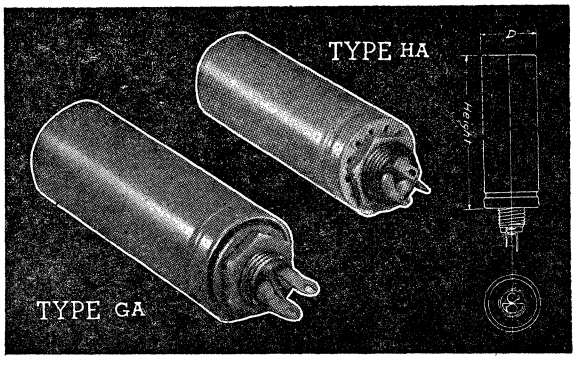
* Where G dimension is given, two spade lugs or mountings holes are supplied on each bracket.

TYPES "GA" and "HA" OIL FILLED

These inverted mounting capacitors fill a definite need where chassis space is the prime factor.

Types "GA" and "HA" are INCCO Oil "A" impregnated and filled.



The case is a one-piece metal extrusion with a "locked-in" molded neck. This construction meets and surpasses the Army and Navy requirements for a submersion-proof capacitor.

Type "GA" is available in the seven standard rating listed below, but can also be supplied in other capacities and/or voltages to manufacturers' specifications.

In the standard "GA" and "HA" types the container is insulated. A grounding lug can be supplied for connecting one terminal to the case. Fiber washer for insulating container from chassis, when case is grounded, and insulating cover for insulating the container from adjacent equipment, can also be supplied on special order.

Type "HA" differs from "GA" in container and mounting neck size, and also in the fact that it has three insulated terminals. Primarily, type "HA" is supplied to manufacturers specifications, to meet special requirements of multiple-section and multiple-terminal capacitors, with either insulated or grounded container.

Type	Case Diameter	Size of Mounting Neck
GA — GE — GW	1 1/2"	3/4" x 16 thread
HA — HE — HW	1 3/8"	7/8" x 16 thread

INDUSTRIAL CONDENSER CORPORATION

CAPACITORS TO 250,000 V.D.C.W.

INCCO OIL "A" IMPREGNATED AND FILLED assures smaller size, low power factor, and widest range of operating temperatures.

ELECTRIC ARC WELDED HEAVY GAUGE HOT TINNED STEEL CASES are non-corrosive—finished in durable lacquer.

GLAZED WET-PROCESS PORCELAIN INSULATORS—low moisture absorption and high terminal to case flash over.

WOUND WITH HIGHEST GRADE CONDENSER TISSUES—insures a long, uninterrupted life.

CONSERVATIVELY RATED—Safe for continuous operation at 10 per cent overload.

HERMETICALLY SEALED STEEL CASE — unaffected by time, humidity or operating temperatures.

AVAILABLE TO MEET U. S. SIGNAL CORPS AND NAVY SALT WATER SUBMERSION REQUIREMENTS.

MOTOR STARTING CONDENSERS

These motor starting condensers are all heavy duty three second start. Built of the finest materials obtainable, these capacitors are engineered to the Nth degree of perfection. They are used by all the leading manufacturers of high quality motors.

The listings shown will take care of 90% of all your replacement requirements.

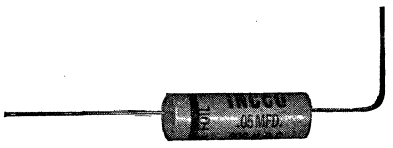
INDUSTRIAL CONDENSER CORPORATION

INDUSTRIAL CONDENSER

TUBULAR PAPER CONDENSERS



TYPE PT

INDUSTRIAL By-Pass Condensers are non-inductively wound and designed for maximum efficiency up to the highest radio frequencies. The units themselves are completely impregnated and sealed with a special non-hydroscopic sealing compound, thus preventing moisture penetration under the most humid conditions. The lead connected to the outside foil of the condenser is indicated by a black stripe around the end of the tube.

INTERFERENCE ELIMINATOR

No. 7249

Designed for eliminating radio interference caused by fluorescent lights. By installing this unit directly in the fluorescent fixture, it eliminates all interference from the fixture. It is small enough to fit in any corner and is light enough so as not to require any special mounting. **List Price** ..... $1.55 ea.

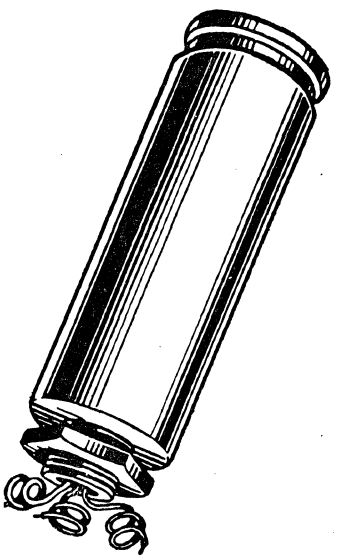
DIRECT REPLACEMENT

For Either Dry or Wet Types

No Drilling — No Changes

The "IL" type capacitor is a dry electrolytic assembled in an aluminum container having a threaded mounting neck which is an integral part of the container.

Our "IL" type capacitors may be used as replacements for the old type wet or dry electrolytic capacitors and will mount in the same mounting hole as the part replaced, eliminating the use of adaptors or auxiliary workmanship.



Electrically and mechanically this condenser is designed for heavy duty service. It incorporates the exclusive INDUSTRIAL etched foil process of construction.

Although these capacitors are not hermetically sealed, they are highly superior to the paper type units generally used for this kind of replacement.

These units are supplied with Underwriters Approved 75° C rubber covered leads.

Individually boxed in attractive carton with instructions.

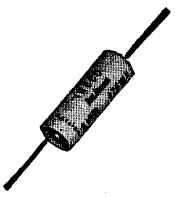
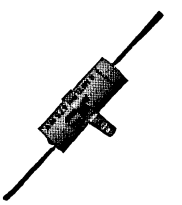
An extremely popular type of con denser due to its exceptional high quality and midget size. Hermetic ally sealed in a small metal case and scientifically vented, to protect against adverse operating conditions of voltage, temperature and humidity. Container is insulated by a high grade tube which is spun over the ends of the can to elimi nate shorts when wires are bent close to container. Easily mounted by their rigid wire leads.



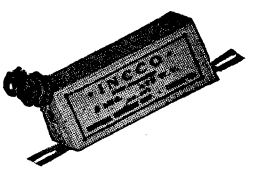
Type MM

All Type "MM" units are available with mounting strap. Recommended in cases of extreme vibration or when advisable to have unit solidly anchored. When ordering add the letter S before the catalog number.



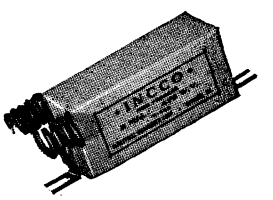
Type MMS

Each unit is completely embedded in a high grade wax and then sealed in an impregnated carton to insure efficient operation under the most adverse conditions. New, high voltage formation, gives complete protection against surges and high peak voltages. Supplied with color coded, Underwriters' Approved, rubber covered leads. Universal lugs permit easy mounting in any position.



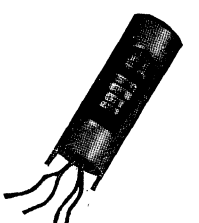
Type MC

Type "C" is similar to type "MC" above. It is designated, however, for older type sets where space is not limited.



Type C

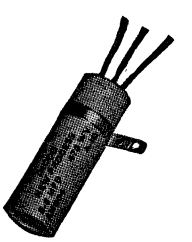
Spade bolt type "SB" of mounting has been very popular due to its wide use in many radio sets. Each unit is embedded in a high temperature wax and then sealed in a thoroughly impregnated cardboard tube, affording complete immunity to moisture penetration. New high voltage formation gives complete protection against surges and high peak voltages.



Type SB

Type "SM" has identical characteristics as "SB". The addition of the strap mounting bracket has proved favorable in its use due to its wide application in AC-DC and portable sets in the replacement field. The strap can be moved to the best mounting position and then bolted or soldered.

Supplied with color-coded, Underwriters' Approved, rubber covered leads.



Type SM

VARIABLE HIGH VOLTAGE VACUUM CAPACITORS

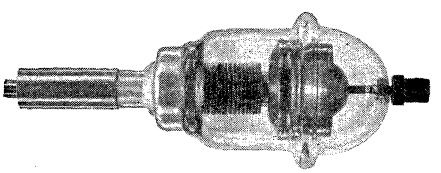
Jennings RADIO
VACUUM ELECTRONIC COMPONENTS

CHARACTERISTICS

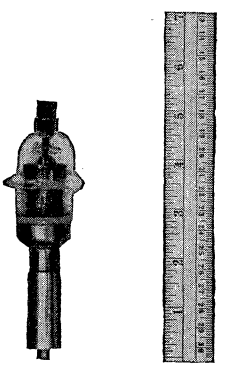
9. Electrical characteristics independent of atmospheric pressure and humidity.
10. Built-in external insulators.
11. Wide frequency operating range.
12. Self-healing after overloading.
13. Stainless steel working parts with ball bearing action.
14. Uniform capacitance change.

Special characteristics on a to-order basis

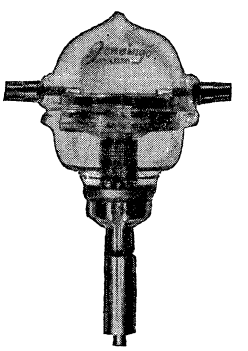
WRITE FOR BULLETIN "RM"



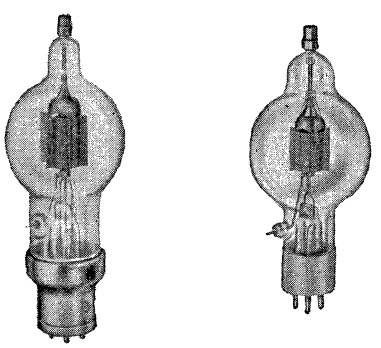
TYPE T—VACUUM VARIABLE CAPACITOR
Peak Volts 10,000 and 20,000.
Ranges of 5-25 mmfd.



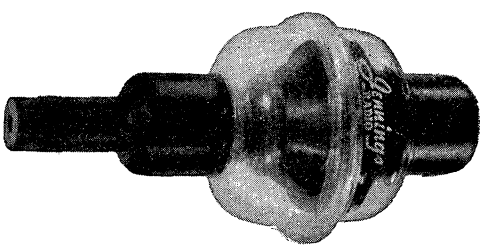
TYPE R—VARIABLE CAPACITOR
10,000 Peak Volts.
Capacitv range, 3-8 mmfds.



TYPE S—SPLIT STATOR VARIABLE CAPACITOR
15,000 and 30,000 Peak Volts.
Capacity range, 7-15 mmfds.



TYPE 250th **TYPE 100th**
Other special types on request
TRANSMITTING and INDUSTRIAL TUBES



TYPE U—VACUUM VARIABLE CAPACITOR
10,000 Peak Volts
Length 11¾", Diameter 4⅝"

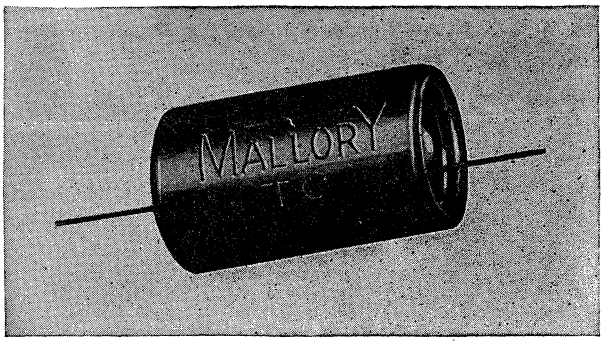
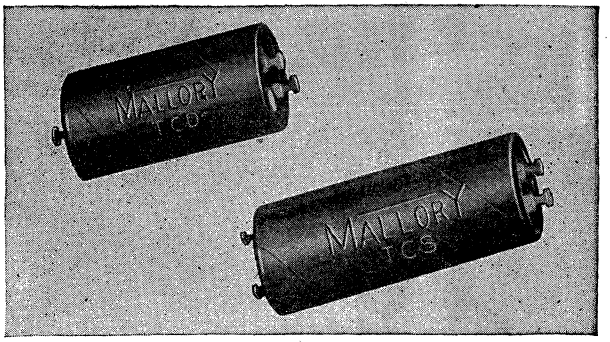
MALLORY DRY ELECTROLYTIC CAPACITORS





TC SINGLE TUBULAR CAPACITORS *(Aluminum Encased)*

● These compact hermetically sealed tubulars are ideal for under-chassis mounting and all applications where space is at a premium.

Furnished in aluminum tubes with external insulating covers, they are smaller than cardboard tubulars of equivalent rating.

Completely dependable under all climatic conditions, they assure many years of satisfactory performance.

Types TC-82 and TC-92 are especially designed for high working and surge voltage applications which may be continuously applied within the limits shown in the chart.

All TC units are supplied with 3″ bare wire leads and are available in the ratings listed below.

See page 5 for mounting hardware.

Cap. Mfd.	DC Wkg. Volts	Maximum Surge Voltage	Size Dia. Length	Mallory Cat. No.	List Price

TCD · TCS DUAL TUBULAR CAPACITORS *(Aluminum Encased)*

● These are aluminum encased dual tubulars similar in construction to the type TC single units.

Type TCD tubulars are the common negative type with three terminals.

Type TCS tubulars are the separate section type with four terminals. They may be used to replace either common negative, common positive or separate section capacitors by proper use of the four terminals.

Both types are extremely compact, as shown by the dimensions below, and all electrical characteristics are equal or superior to those of other types.

Cutting and stripping of covered leads has been eliminated through the use of solder lug terminals which may also be used as convenient anchor points for other wires.

A Mallory type TH mounting clip, described on page 5, is supplied with each unit.

DUAL COMMON NEGATIVE TCD

Cap. Mfd.	DC Wkg. Volts	Maximum Surge Voltage	Size Dia. Length	Mallory Cat. No.	List Price

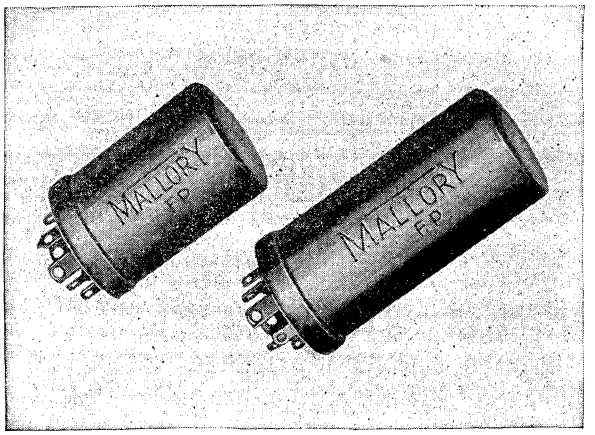
MALLORY DRY ELECTROLYTIC CAPACITORS



FP STANDARD CAPACITORS

● Accepted as the industry standard for vertical mounting, these low cost, compact capacitors are available in the ratings shown.

Originally designed to mount directly to the chassis by twisting the mounting ears provided, they may also be mounted through the use of several types of hardware described on page 5.

Available in single, dual, triple and quad arrangements, all types utilize the mounting ears as the negative terminal. A separate positive terminal is provided for each section. Since the case is grounded to the negative terminal, it is necessary to use some external means to insulate the unit from the chassis in circuits where the negative is not at chassis potential. Such cases are infrequent but may be handled by the use of the proper hardware available for this purpose.

Any 1" or 1⅜" diameter FP capacitor may be used as a plug-in type by employing the Mallory type PS sockets described on page 5. In such cases the blank mounting ear on the FP capacitor should be removed with diagonal cutting pliers in order to polarize the unit with respect to the socket.

In making replacements it is not necessary to use exactly the same ratings as the original capacitor. Higher capacity or voltage ratings are perfectly satisfactory and the electrical characteristics are not affected in such cases.

The wide variety of ratings originally used makes it impractical to stock all ratings for replacement. It is suggested, therefore, that the following system be considered where exact replacements are not at hand.

1. Use higher capacity or voltage ratings as explained above.
2. Use parallel connections on multiple units, (i.e., use dual 10 mfd. for 20 mfd. or triple 10 mfd. for a 20-10 mfd. etc.)
3. Leave some section unused. (i.e., use two sections of a triple 10 mfd. to replace a dual 10 mfd.)
4. Use high voltage sections to replace bypass units. (i.e., a triple 10 mfd. 150 volt unit can satisfactorily replace a unit rated 10-10-20 mfd. 150-150-25 volts. The 10 mfd. 150 volt section has approximately the same impedance as a 20 mfd. 25 volt section and impedance, not capacity, is determining factor.)

Type FP capacitors are supplied with one type BP mounting wafer. In replacement work this wafer is usually not required since the original equipment has the proper mounting facilities. This wafer may be used, however, for either insulated or grounded mounting where necessary. For grounded mounting simply connect one mounting ear to the chassis.

NOTE: Type FP capacitors are made with Mallory fabricated plate anodes. Type WP is made with etched plate anodes.

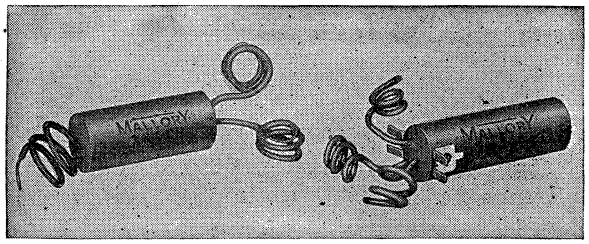
MALLORY DRY ELECTROLYTIC CAPACITORS



2N · 2S · 3N · 3S · 4S · ST · TN · UR

CARDBOARD TUBULAR CAPACITORS

● These capacitors are supplied in waxed cardboard tubes in the ratings shown in the chart. All units are furnished with an adjustable strap (type MS-1) for horizontal mounting except TN111 and UR182-193.

Those types marked (*) have leads out both ends and are intended for horizontal mounting only.

Other types have all leads out one end and are provided with mounting feet for vertical mounting in addition to the strap for horizontal mounting.

UR182-193 has 3 separate sections in one tube and replaces the former rectangular types UR182 and UR193.

Mallory type TH clips may also be used for mounting where the diameter falls within the TH clip range. See page 5 for hardware.

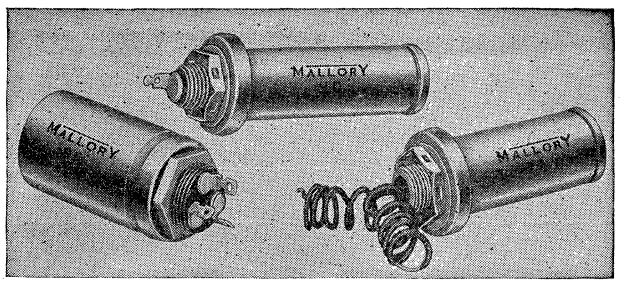
NOTE—Triple and Quad Separate Section units have first section separate, others common negative.



RS · RM · HD · HS · SR

THREADED NECK CAPACITORS

● This type is supplied in aluminum threaded neck type containers. Type RS is single section while type RM is multiple separate section.

Type HS is for high voltage applications.

Type HD684 is now designed to replace former types HD684, SR643 and SR644 and special hardware is included to fit all original mounting means.

Type SR638 and SR645 have ⅞" threaded necks and lug terminals. SR645 has one terminal common anode, one negative terminal and the other negative to container.

All are supplied with special hardware permitting their use in replacing original units regardless of diameter.

See page 5 for hardware.

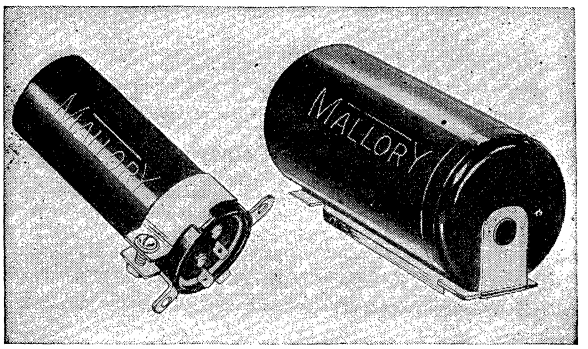
MALLORY DRY ELECTROLYTIC CAPACITORS



HC · NP HIGH CAPACITY—LOW VOLTAGE and NON-POLARIZED CAPACITORS

● Type HC capacitors are high capacity low voltage units for use in filtering dry disc rectifiers, electric fence equipment, talking picture equipment and other low voltage applications. (See page 1 for additional TC tubular types.)

Type HC1060A is a special design for electric fence controller replacement.

Type NP capacitors are non-polarized for use where polarity may be applied in either direction but are not for use on continuous AC applications. They are useful for welding and control equipment where capacitor is employed as a stored energy device. The non-polarized feature prevents loss of capacity due to reverse voltage encountered in this service.

Both HC and NP units are supplied in moisture-proof plastic containers and require no external insulation.

A type VR bracket for vertical mounting is supplied with each unit. See page 5 for description of VR and other available hardware.

Capacity Mfd.	DC Wkg. Volts	Maximum Surge Voltage	Size	Mallory Cat. No.	List Price

*This unit in Aluminum Case

WP · FP SPECIAL TELEVISION CAPACITORS

● The frequencies encountered in television applications require special capacitor ratings. The units listed below are similar to the standard FP or WP types except for special impedance ratings designed for television frequencies.

Type WP520 may be used for bypassing in the audio, and synchronizing amplifier stages, and also for bypassing the deflecting amplifier cathodes.

Type FP550 is suggested for filtering the low voltage power supply. Note that the 10 mfd. 450 volt section is designed as the input and the 80 mfd. 400 volt section as the output.

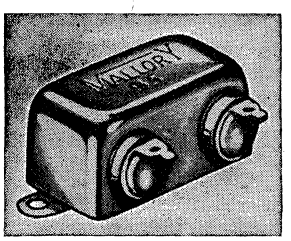
Type WP505 is designed for the Video amplifier cathode bypass.

Type WP510 is for the horizontal centering control bypass.

Type WP540 is intended for bypassing the vertical centering control.

Capacity or Impedance	Wkg. Volts	Max. Surge Voltage	Size	Mallory Cat. No.	List Price
40-40-40	25 DC	40	1 x 2	WP520	$1.83
10 80	450 DC 400 DC	525 475	1 3/8 x 3	FP550	4.17
10Z@30 cycles to 5 megacycles	3 NP	4	3/4 x 2	WP505	1.89
.5Z@15750 cycles	3 NP	4	1 x 2	WP510	2.59
1.0Z@60 cycles	3 NP	4	1 3/8 x 3	WP540	5.63

BS BATH-TUB CAPACITORS



● These are ideal for marine, aircraft, geophysical and other applications where extreme operating conditions are encountered.

Type BS81 and BS91, rated 500 and 600 working volts respectively, are excellent for power amplifier and other high voltage applications.

Capacitor cartridges are first sealed in aluminum tubes and then encased in sturdy corrosion-resistant hot-tinned steel cases. All units are internally insulated from case.

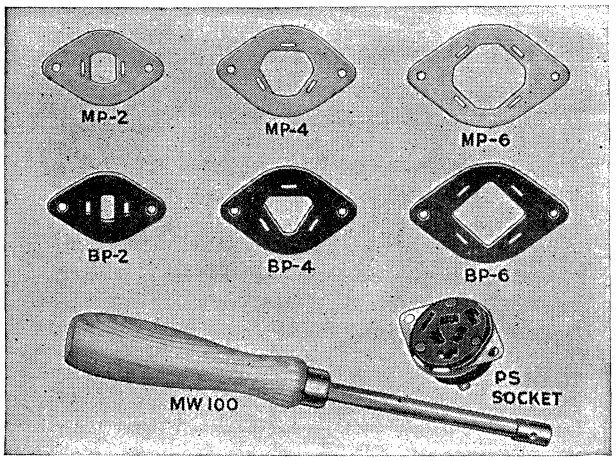
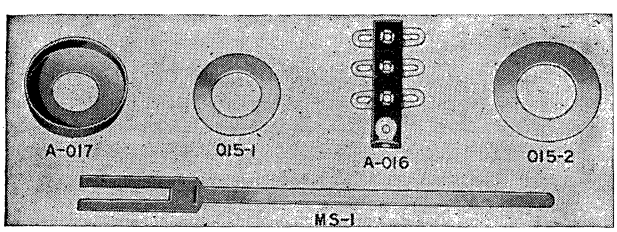
MALLORY CAPACITOR HARDWARE

● While hardware is included in the display carton with certain capacitors, as explained, the list below covers all types currently available.



TYPE MP—Metal plates for grounded mounting of FP and WP capacitors.
TYPE BP—Bakelite plates for insulated mounting of FP and WP capacitors.
TYPE PS—Molded plastic sockets for plug-in mounting FP or WP capacitors. (Blank ear on capacitor should be removed to permit polarization with respect to socket.)
TYPE MW-100—Special wrench for twisting mounting ears on FP or WP capacitors.

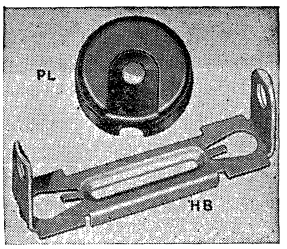
Cat. No.	Description	Size	List Price
MP-2	Metal mounting wafer for FP...	¾	**$0.06**
MP-4	Metal mounting wafer for FP...	1	**.06**
MP-6	Metal mounting wafer for FP...	1⅜	**.06**
BP-2	Bakelite mounting wafers for FP	¾	**.06**
BP-4	Bakelite mounting wafers for FP	1	**.06**
BP-6	Bakelite mounting wafers for FP	1⅜	**.06**
PS-4	Plug-in socket for FP.....	1	**.75**
PS-6	Plug-in socket for FP.....	1⅜	**.94**
MW-100	Mounting wrench for FP.....	Var.	**1.13**



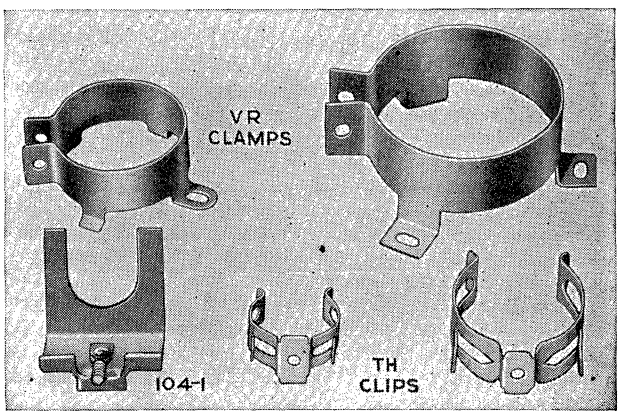
TYPE MS-1—Adjustable metal strap for horizontal mounting tubular types up to 1⅜" diameter.
TYPE A-016—Terminal connector or anchor strap for general use where required.
TYPE 015-1—Washer for RS type ⅝" neck when used in over-size chassis hole.
TYPE 015-2—Washer for use with RS, RM or HS units where chassis hole is too large for regular mounting. Use two washers, one above and one below chassis.
TYPE A-017—Special washer with turned over edge for ring clamp mounting 1" RS type in 1⅜" ring clamp.

Cat. No.	Description	Size	List Price
015-1	Washer for ⅝" neck in ⅞" hole..	Var.	**$0.06**
015-2	Washer for ¾" neck in 1" hole...	Var.	**.06**
MS-1	Adjustable mounting strip.....	Var.	**.06**
A-016	Terminal connector.....	Var.	**.06**
A-017	Washer for clamp mounting neck cans.....	Var.	**.06**

TYPE PL—Plastic end cap to protect terminals on HC or NP units when desired.
TYPE HB—Horizontal bracket for mounting HC and NP units complete with end cap type PL.



Cat. No.	Description	Size	List Price
PL-3	Plastic end cap.....	1 7/16	**$0.18**
PL-6	Plastic end cap.....	1 13/16	**.18**
PL-8	Plastic end cap.....	2 1/16	**.25**
HB-4	Horizontal bracket (Plastic Cases).....	3⅜	**.31**
HB-8	Horizontal bracket (Plastic Cases).....	4⅜	**.31**



TYPE TH—Special clips for horizontal mounting of any tubular or FP unit within the diameter range shown. Designed primarily to mount without tools under special chassis lances in original equipment, they may also be attached to chassis with 5-32 screw and nut in any ⅛" hole.
TYPE VR—Brackets for vertical mounting round units.
TYPE 104-1—Special bracket with spade bolt for mounting RS and RM units where spade bolt mounting was used.

Cat. No.	Description	Size	List Price
TH-13	Spring clip for TC.....	⅜ to 7/16	**$0.06**
TH-15	Spring clip for TC.....	½ to 9/16	**.06**
TH-17	Spring clip for TC.....	⅝ to 1 1/16	**.06**
TH-19	Spring clip for TC and FP..	¾ to 1 1/16	**.06**
TH-21	Spring clip for TC.....	⅞ to 1 3/16	**.06**
TH-23	Spring clip for TC and FP..	1 to 1 1/16	**.06**
TH-25	Spring clip for TC and FP..	1⅜ to 1 7/16	**.06**
VR-1	Clamps for vertical mounting	1 to 1 1/16	**.12**
VR-3	Clamps for vertical mounting	1⅜ to 1 7/16	**.12**
VR-4	Clamps for vertical mounting	1½ to 1 9/16	**.18**
VR-6	Clamps for vertical mounting	1¾ to 1 13/16	**.25**
VR-8	Clamps for vertical mounting	2 to 2 1/16	**.25**
104-1	Spade bolt mounting for neck type cans.....	Var.	**.18**

OE AND CE INSULATING SLEEVES

Cat. No.	Description	Size	List Price
OE-1	Open end FP insulating sleeves.	¾ x 2	**$0.06**
OE-3	Open end FP insulating sleeves.	1 x 2	**.06**
OE-4	Open end FP insulating sleeves.	1 x 3	**.06**
OE-5	Open end FP insulating sleeves.	1⅜ x 2	**.06**
OE-6	Open end FP insulating sleeves.	1⅜ x 3	**.06**
CE-1	Closed end FP insulating sleeve.	¾ x 2	**.12**
CE-3	Closed end FP insulating sleeve.	1 x 2	**.12**
CE-4	Closed end FP insulating sleeve.	1 x 3	**.12**
CE-5	Closed end FP insulating sleeve.	1⅜ x 2	**.12**
CE-6	Closed end FP insulating sleeve.	1⅜ x 3	**.12**

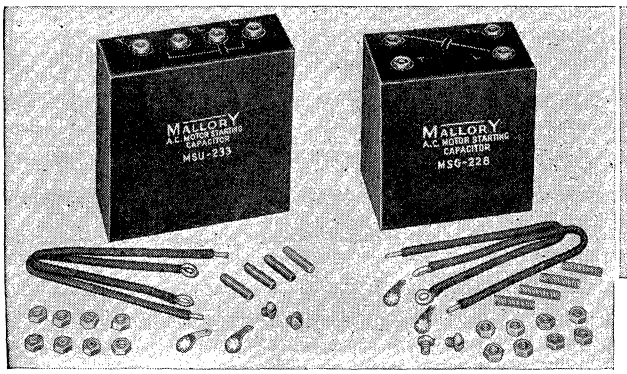
MALLORY AC MOTOR STARTING CAPACITORS



MSF · MSG RECTANGULAR CASED AC CAPACITORS

● Although the rectangular cased electrolytic motor-starting capacitor is seldom used in new motor production, there is sufficient demand for replacement to continue listing this type.

Original rectangular units were supplied in three styles, i.e., flexible leads, solder lugs and stud type. All Mallory units listed are of the universal type and can be used to replace all three types. This is possible due to the complete set of hardware included, as pictured, with each capacitor.

Complete instructions are supplied with each capacitor regarding the use of this special hardware.

All units are equipped with four terminals. The unmarked and L terminal are the capacitor terminals, the two others being dummies for additional connections where required. Terminal T is for the thermostat lead and is usually used as an anchor point for one side of the starting and running windings. TL is the anchor point for the other thermostat lead and one side of the line. The other line and running winding are connected to L. The unmarked terminal goes to the starting switch. If the original capacitor had only two terminals, then do not use T and TL. The relative location of these terminals to the original is unimportant.

Note that the minimum capacity will be used rather than the minimum-maximum capacity rating formerly employed.

P · MSU ROUND CASED AC CAPACITORS

● Type P capacitors are furnished in the new Mallory perfected plastic case. These are interchangeable with former types of same size and are superior from a moisture resistant standpoint.

Type P may also be used with the new end cap and bracket shown, where required.

Type MSU's are the same as type P but furnished in aluminum containers with insulating covers.

All units are now marked with minimum capacity only.

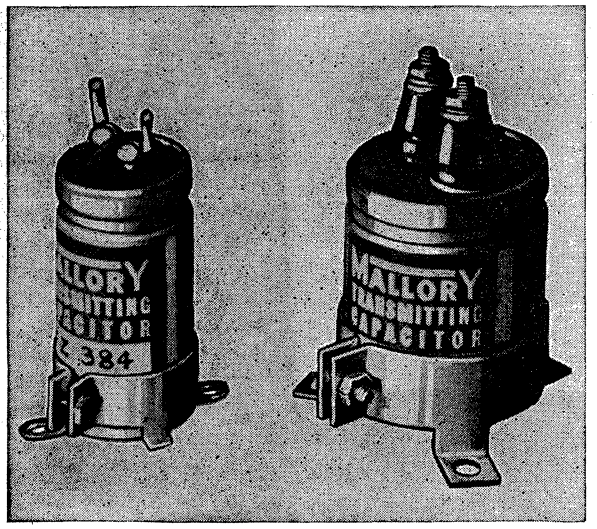
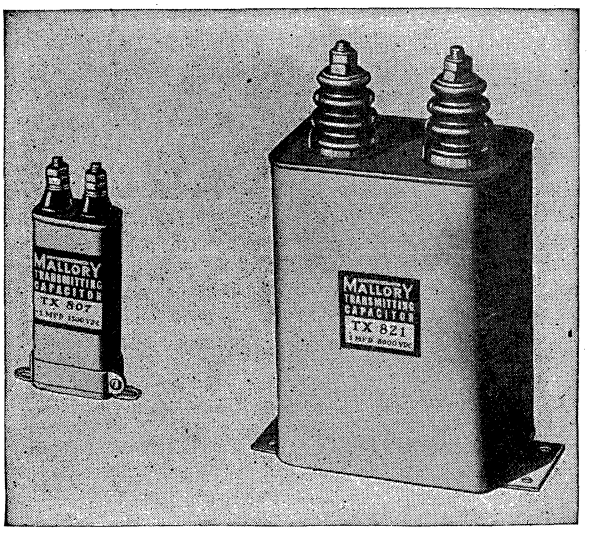
MALLORY TRANSMITTING CAPACITORS





TZ ROUND TRANSMITTING CAPACITORS

● Type TZ capacitors are designed for low-power transmitting, industrial, television and power amplifier applications. They may be mounted upright or inverted by means of the ring clamp supplied with each unit. All units are internally insulated from case.

TX RECTANGULAR TRANSMITTING CAPACITORS

● These Mallory transmitting capacitors are compact in size and conservatively rated. Type TX capacitors are heavy duty general purpose units ideal for commercial, amateur, broadcast, industrial and television applications. Latest type insulated, leakproof terminal construction is employed throughout. Ratings from 600 to 6000 volts DC are carried in stock as listed below. Mounting hardware is included in all cases.

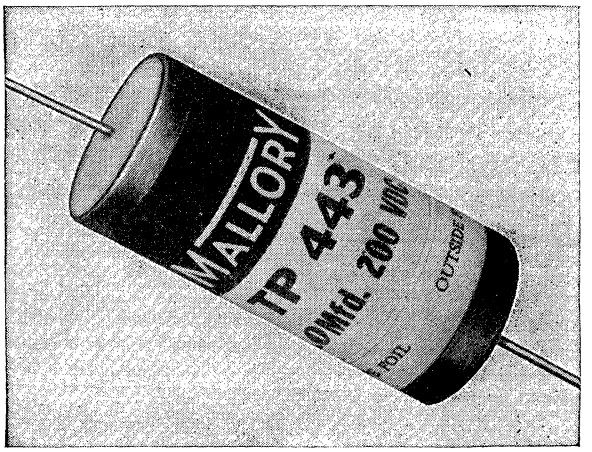
MALLORY PAPER TUBULAR CAPACITORS



TP WAX IMPREGNATED CARDBOARD TUBULARS

● Mallory type TP capacitors are wax impregnated and furnished in thoroughly waxed cardboard tubes. The substantial wax seal at each end and the type of wax used overall provide maximum protection from atmospheric conditions for this type of capacitor.

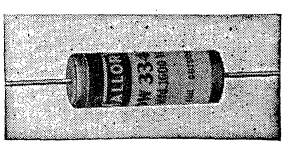
These tubular capacitors are attractively labelled and have as small physical dimensions as possible without sacrificing quality.

The chart below lists the wide assortment of ratings considered standard and available from stock.

The 200 volt ratings formerly listed have been dropped, since price and size differentials were small and the demand was of little consequence. The dual TP units formerly listed have also been dropped due to the lack of demand.

OW

OIL IMPREGNATED WAX FILLED TUBULARS



● These cardboard tubulars are oil impregnated and wax sealed. They provide an extra safety factor for voltage applications higher than recommended for regular wax impregnated units.

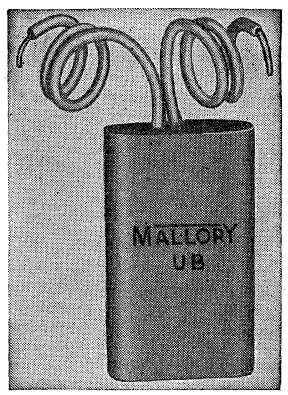
55	12	1 5/16 x 1 5/8	RF583	1.13

UB UNCASED WAX CAPACITORS



● Mallory type UB uncased capacitors are convenient as replacement sections in paper condenser block type filters. They may be used for any application requiring capacitors of this type.

For best results, these units should be potted with compound and not left unprotected from moisture in service.

MALLORY TECHNICAL MANUAL

● This simply written, practical book bridges the gap between radio theory and practice. Designed for the radio serviceman, engineer, amateur or experimenter who wants the latest technical information . . . presented so that he can easily apply it to everyday problems.

Contains 408 pages of information profusely illustrated. It's worth far more than its price.

$2.00 Net

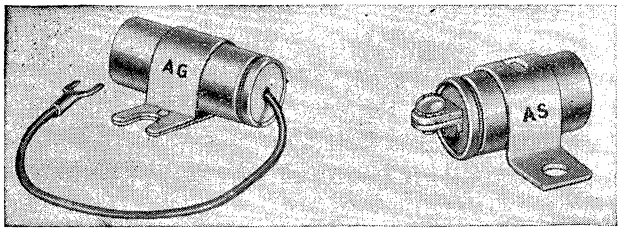
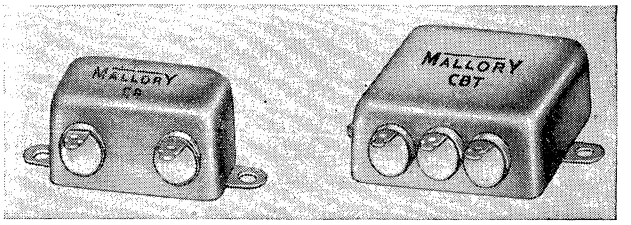
P.R. MALLORY & CO. Inc. MALLORY MISCELLANEOUS OIL-FILLED PAPER CAPACITORS





AG · AS AUTO NOISE SUPPRESSION CAPACITORS

● Type AG capacitors are designed for suppressing radio interference eminating from auto generators, oil and gas gauges, etc.

Type AS capacitors are for similar applications but embody the latest noise suppression technique developed during the war. These are extremely rugged units and are ideal for all suppression applications.

CB OIL-FILLED CASED BYPASS CAPACITORS

● Mallory cased bypass type CB capacitors are oil-filled leak-proof units of extremely rugged construction. While seldom used in ordinary radio broadcast receivers, they are ideal for all applications where the finest quality is desired.

Industrial electronic, geophysical equipment and other special requirements provide frequent need for this type.

Completely sealed in heavy hot-tinned steel cases, they assure long trouble-free service under such adverse atmospheric conditions as may be encountered in aircraft and marine applications.

Type CB should not be confused with the former unsealed wax-impregnated types.

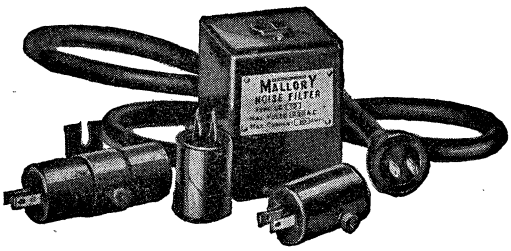
MALLORY RADIO NOISE FILTER CAPACITORS



GENERAL NOISE ELIMINATION INFORMATION

● All radio noise suppression devices should be applied at the source of the noise. Filters inserted in radio receiver cords are usually ineffective.

The filters described on this page are, therefore, designed for insertion at the offending device. They incorporate many improvements accomplished through the extensive research and war production experience of the P. R. Mallory Company. While there will be some exceptions, most of the types of interference found in the home can be effectively reduced by the Mallory filters described. Unusual cases should be referred to the Mallory Engineering Department for advice.

Each filter is supplied with a complete instruction sheet for proper installation.

X · Z PLUG TYPE NOISE FILTERS

Type X1 is for relatively slight interference. Use at radio or appliance cord plug. Size 1⅜" x 1¾", rated 110 volts, 5 amps.
List Price each..... **$0.75**

Type X3 is a capacitor type filter having greater efficiency than Type X1. Use at radio or appliance cord plug. Size 1⅜" x 2¼", rated 110-220 volts, 5 amps.
List Price each..... **$1.13**

Type X5 is a triple capacity filter with provision for return lead to appliance. Special safety feature prevents possibility of shock and makes this unit ideal for use with vacuum cleaners, food mixers, etc. Size 1⅜" x 2⅛", rated 110-220 volts, 5 amps., and equipped with binding post for connection to appliance or motor frame.
List Price each..... **$1.89**

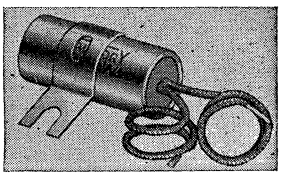
Type Z2 is a capacitor-inductance filter for medium interference. Use with electric razor, radio or appliance cord plugs. Most effective on grounded line systems where reversal of plug will affect operation. Size 1⅜" x 2¾", rated 110-220 volts, 3 amps.
List Price each..... **$1.77**

Type Z4 is a dual inductance-capacity filter for severe interference on appliances where a return lead from the filter is inconvenient. Ideal for electric razor, vibrators and household appliances. Use at radio or appliance cord plug. Size 1⅜" x 3", rated 110-220 volts, 3 amps.
List Price each..... **$2.08**

Type Z6 is a dual inductance-capacity filter with provision for return lead to ground. Recommended for suppressing severe interference. Use at radio cord plug or motor and appliance plugs. Size 1⅛" x 3⅜". Rated 110-220 volts, 3 amps.
List Price each..... **$2.65**

Type Z8 is same as Z6 but with provision for return wire connection to motor or appliance frame rather than ground. An efficient filter equivalent to box type within 3 amp. rating.
List Price each..... **$2.65**

W MOTOR BRUSH FILTERS



● These Mallory capacity type filters, while primarily designed for installation on motor brushes, may be used wherever permanent connection to the appliance is desired.

All type W filters are designed to automatically ground the common connection, via the filter case, to the motor or appliance frame. Where a shock hazard may exist type W followed by the letters SP should be specified as shown below. Type W has no ampere limit.

Type W7 115-220 Volts AC-DC
for Light interference—List Price..... **$1.13**

Type W9 115-220 Volts AC-DC
for Medium interference—List Price..... **$1.51**

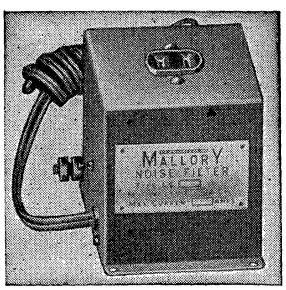
Type W11 115-220 Volts AC-DC
for Severe interference—List Price..... **$1.89**

Type W7SP 115-220 Volts AC-DC
for Light intereference—List Price..... **$1.13**

Type W9SP 115-220 Volts AC-DC
for Medium interference—List Price..... **$1.51**

Type Z8A 115-220 Volts AC-DC3 Amperes
for Fluorescent Lights—List Price..... **$3.03**

LC5 · LC10 HEAVY DUTY APPLIANCE FILTERS



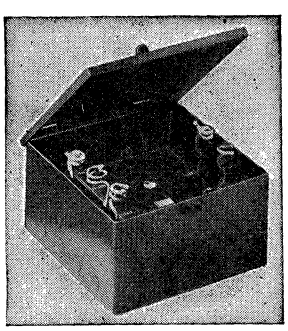
● Type LC filters are choke-capacity types for line insertion as pictured. They have provision for return lead to motor or appliance frame.

They are recommended for use where severe noise is encountered and a portable filter is desired.

Type LC5 rated 115-220 Volts AC-DC
5 Amperes—List Price..... **$7.59**

Type LC10 rated 115-220 Volts AC-DC
10 Amperes—List Price..... **$12.15**

LB HEAVY DUTY PERMANENT INSTALLATION FILTERS



● These are heavy duty filters for permanent installation at house meter board or permanently installed motors. Supplied in standard type cut-out boxes as listed below

Type	Rating	Size	List Price
LB-10	220V-10 Amp.	6" x 6" x 4"	$18.23
LB-20	220V-20 Amp.	10" x 10" x 6"	42.41
LB-40	220V-40 Amp.	12" x 10" x 6"	52.74

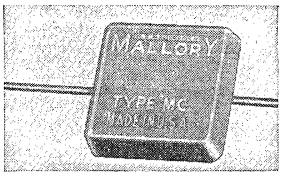
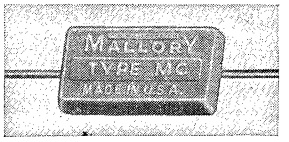
MALLORY MICA CAPACITORS

MC

MICA CAPACITORS





● Mallory type MC mica capacitors are furnished in standard brown bakelite cases.

Designed primarily for radio receiving applications, they may be used in television and other electronic circuits within their voltage ratings.

The standard mica type has a capacity tolerance of ±20%.

The silver mica type may be secured in ±10% or ±2% as shown in the chart. Molded in low loss bakelite, these units are ideal for circuits where extreme stability is required.

High quality bakelite case material and carefully selected mica are used throughout.

For color code identification see illustration at right.

Available in standard packages of 10 units.

RMA COLOR CODE

● The RMA color code, shown below, permits positive identification of the mica capacitors listed.

Reading in the direction of the arrow, top line first:—

1st dot —First significant capacity figure in *micro*-microfarads

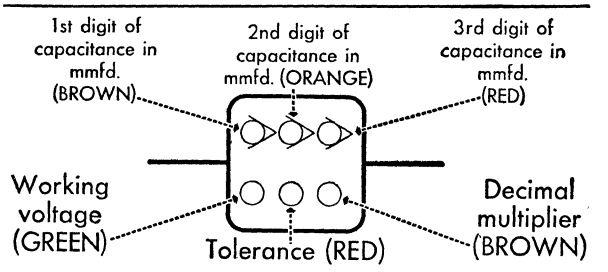
2nd dot—Second significant capacity figure in *micro*-microfarads

3rd dot —Third significant capacity figure in *micro*-microfarads

The figure thus derived is now multiplied by the decimal multiplier indicated by the fourth dot. This gives capacity in *micro*-microfarads. (Divide by 1,000,000 for microfarads, if desired.)

5th dot —Capacity tolerance in percent

6th dot —Working voltage rating.



Example Shown Above = 1320 mmfd. ±2%, 500 V. W

Case Size — 7/16" x 25/32" x 7/32" With 1⅛" Wire Leads • Voltage Rating = 500 VDC Working — 1000 VDC Test

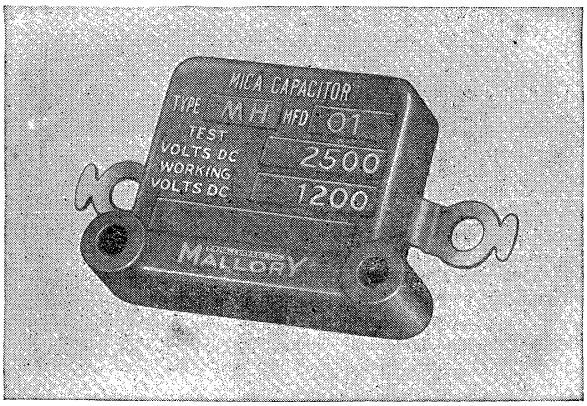
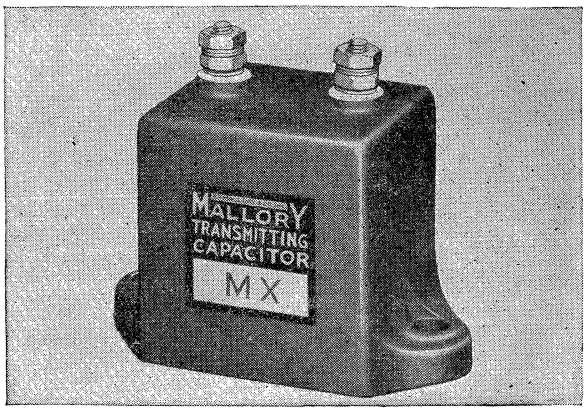
MALLORY MICA CAPACITORS





MH TRANSMITTING CAPACITORS

● Mallory type MH capacitors, molded in standard bakelite, are available for circuit voltages higher than permitted for type MC.

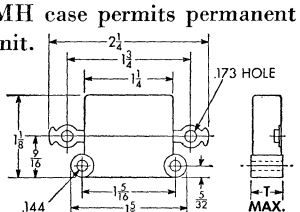
Transmitting and power amplifier equipment represent applications where they may be used to advantage in addition to the usual blocking and RF bypass requirements.

Furnished in the capacity and voltage ratings shown below, they have a capacity tolerance of ±20%.

Column T in the chart designates the case thickness, the only variable dimension.

The design of the type MH case permits permanent insulated mounting of the unit.

India mica of gauged thickness gives higher voltage breakdown and low power factor.



TYPE MH

Type MH capacitors are strong mechanically, well insulated, provided with short, heavy terminals for minimum RF and contact resistance.

MX TRANSMITTING CAPACITORS

● Mallory type MX mica capacitors are furnished in attractive porcelain cases in voltages from 2000 to 12,500 DC test as shown.

Ideal for amateur transmitting equipment, they may also be used in coupling, tank and bypass circuits at radio frequencies within their current ratings.

Note that the maximum amperes for several radio frequencies are given in the chart. The operating current should be kept within these limits.

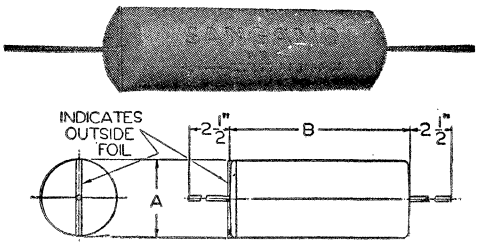
SANGAMO CAPACITORS

TYPE 30 PLASTIC MOLDED PAPER TUBULAR CAPACITORS

"Molded Like Micas"



Here is an entirely new concept in paper tubular construction: capacitors which are molded in plastic—just like micas! The immediate results are obvious: more stable capacity values, excellent seal characteristics, and application at higher ambient temperatures. In the long run, too, the result is obvious: a new standard of permanence. Halowax impregnation, identified by tan coloring of the molded plastic, is suitable for operation in ambient temperature ranges from —55° C. to +55° C. Diaclor impregnated capacitors, identified by a red plastic case, are recommended for operation at higher voltages or temperatures. A chlorinated dielectric, diaclor possesses a high dielectric constant, dielectric strength, volume resistivity and low power factor. The great chemical stability of diaclor permits prolonged operation at elevated temperatures with little change in capacity, breakdown characteristics or other properties. For 1000 or 1600 volt applications or for temperatures as high as 85° C., diaclor is definitely superior to wax as a capacitor impregnant.

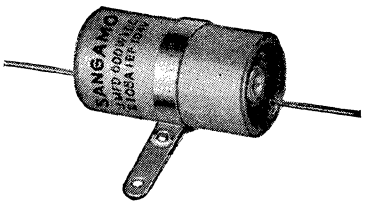
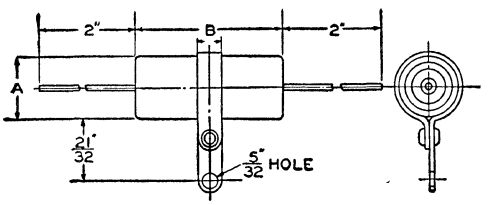
SANGAMO CAPACITORS

TYPES 20 AND 21 METAL CASED MINERAL OIL PAPER CAPACITORS





TYPES 20 AND 21

Designed for by-pass and coupling applications, types 20 and 21 are non-inductively wound paper capacitors impregnated in mineral oil of greatest stability and housed in metal tubes. Type 21, having terminals insulated from the case, is covered with a cardboard sleeve. Type 20, having one terminal grounded to the case, is similarly covered unless specified without sleeve, in which case for all ratings the diameter and length are reduced by 1/16 and 3/16 inches respectively. The Type 20 is the same price as the Type 21.

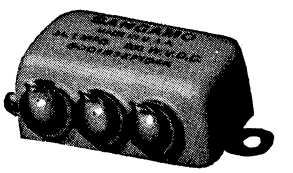
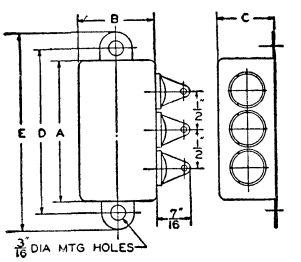
TYPES 50 AND 59 BYPASS PAPER CAPACITORS





TYPES 50 AND 59

Types 50 and 59 paper capacitors are non-inductively wound paper dielectric sections sealed in seamless containers. Primarily intended for bypass applications, their characteristics are excellent for R.F. and A.F. bypass, audio frequency coupling and A.C. circuits. The Type 50 capacitors are vacuum impregnated and filled with the finest mineral oil available for use; the Type 59 capacitors are vacuum impregnated and filled with diaclor; a chlorinated dielectric providing maximum capacity and voltage in minimum space.

SANGAMO CAPACITORS

TYPE 71 DIACLOR IMPREGNATED TRANSMITTING CAPACITORS

Sangamo Diaclor impregnated capacitors have the advantage of longer life, lighter weight, and smaller size. Diaclor is a specially compounded, chemically purified chlorinated liquid dielectric. This synthetic impregnant, whose characteristics can be controlled with great uniformity, assures a high dielectric constant, high volume resistivity, low power factor, high dielectric strength, and is non-inflammable and non-explosive.

Type 71 Diaclor impregnated capacitors are supplied with Type A universal bracket, Type B footed bracket, or Type C spade lug bracket. Mounting dimensions of these brackets are given from center to center, in inches, in column "F" below. Terminals: composition rivet or screw; pyrex glass; or, stand-off porcelain.

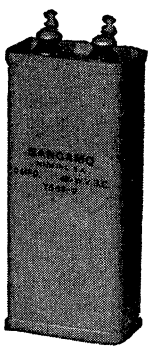
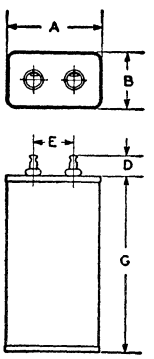
SANGAMO CAPACITORS

TYPE 75 DIACLOR IMPREGNATED A.C. CAPACITOR



TYPE 75



Type 75 Sangamo Diaclor Impregnated Capacitors are designed for continuous A.C. duty in ambient temperatures up to 75 degrees centigrade. These capacitors are recommended for use with capacitor motors—as power factor correction capacitors—and other similar A.C. applications. They are supplied with either the composition rivet or screw terminal, with pyrex glass terminals, or with stand-off porcelain terminal. Type mounting bracket desired should be specified when ordering.

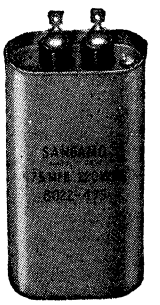
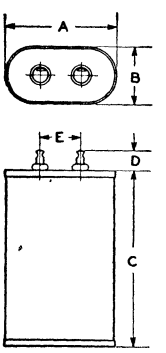
TYPE 80 DIACLOR IMPREGNATED A.C. CAPACITOR



TYPE 80



Sangamo Type 80 Diaclor Impregnated capacitors are especially recommended for fluorescent use but can be employed for numerous A.C. applications. These units are designed to operate continuously at 75 degrees centigrade.

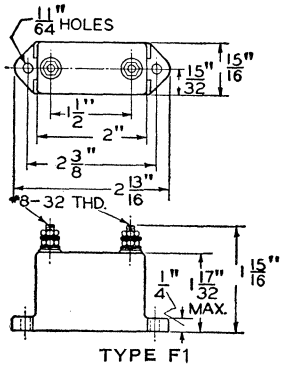
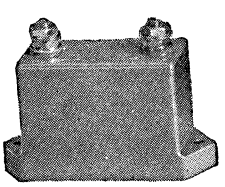
TYPES F1 AND F2 MICA CAPACITORS



TYPE F1



Types F1 and F2 capacitors, the smallest of the Sangamo line of transmitting types, possess a range of voltage and current ratings suitable for many applications. They are housed in low loss molded bakelite cases. The mica and foil sections are permanently clamped, vacuum impregnated, and installed in the case in such a manner as to provide stable characteristics and adequate moisture proofing.

Type G ceramic cased capacitors are intended for service where highest voltage and R.F. current ratings are required, such as in commercial transmitting or induction heating applications. All possible steps are taken in design and manufacturing operations to insure permanence of quality. Current ratings of these four sizes as well as detailed information on the Type G5 will be supplied upon request. Terminal plates are designed to permit any usual connecting or mounting practices.

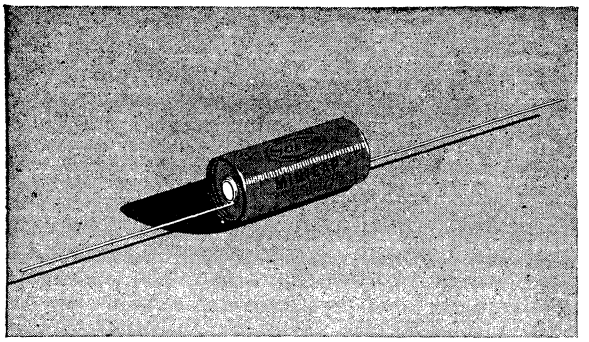
SOLAR CAPACITORS



"MINICAP" DRY ELECTROLYTICS

These high-quality compact capacitors are hermetically sealed in aluminum tubes, covered with kraftboard insulating jackets. All units have tinned copper leads for easy soldering. Dual capacitors have common negative. Assembled radial mounting strap furnished on high-capacitance low voltage capacitors and on all dual units. Individually packaged.

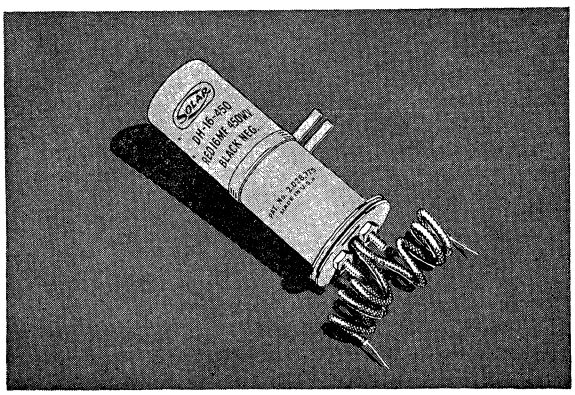
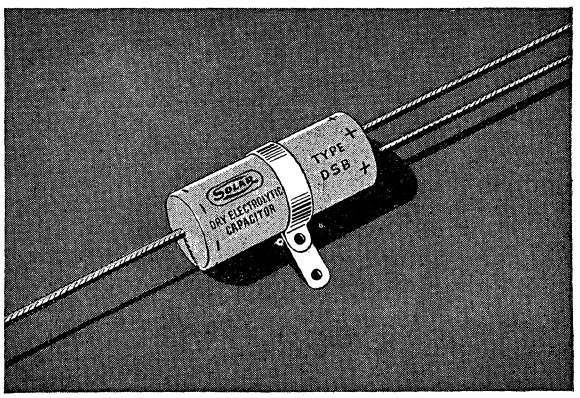
SOLAR CAPACITORS





TYPE DH "UNIVERSAL REPLACEMENT" DRYS

These popular service-type cardboard tubular dry electrolytics have an exceptionally long life because of the Solar-pioneered plastic-film inner wrap. The stud-disc mounting arrangement is ideal for replacement of ring-clamp, spade-foot, screw-base, and twist-prong mounting capacitors. A metal strap is also provided for horizontal mounting. Individually packaged.

SOLAR CAPACITORS

"SEALDTITE" WAX-MOLDED PAPER CAPACITORS

These famous paper tubulars are actually sealed tight against moisture by a distinctive Solar wax-molding process. The solid, squeezeproof molded housing over the Halowax-impregnated section is the mark of uniformly reliable capacitors in all climates. Non-inductive windings give Sealdtite capacitors excellent r-f characteristics. Tinned leads make for easy soldering.

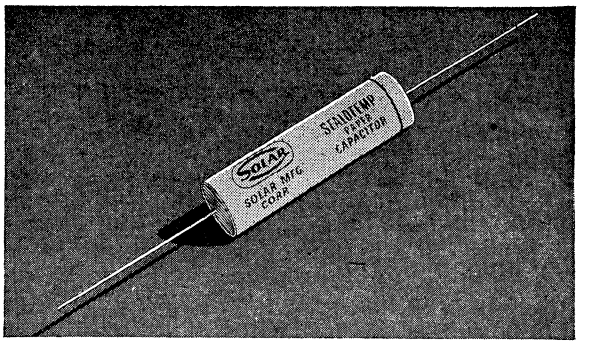
†Diameter x Length in inches. Leads 2" long minimum.

*Capacitors marked * are supplied in Duravolt construction in wax-impregnated Kraft tubes with wax end-seals. These units are given a final over-all wax coating for extra protection.



TYPE TM "SEALDTEMP" PAPER CAPACITORS

Protected against moisture by a resin end-fill and a heavy varnish coating, these mineral-oil impregnated paper tubulars are intended for use as buffer capacitors in automobile radios and for use in similar high-voltage, high-temperature applications in other types of electronic equipment.

The resin end-seals not only bond to the Kraftboard housings to keep out moisture, but also make for virtually pull-proof leads. The varnish coating on the tubes does away with dripping coating wax as on conventional tubulars.

"DOMINO" MOLDED PAPER CAPACITORS

Molded in thermosetting phenolic plastic, Type MPH "Domino" capacitors meet Underwriters' Laboratories requirements for units with a non-combustible housing. These Halowax-section units are widely used as line bypass capacitors up to 250 volts a-c, in instruments, electric fuel pumps, etc.

OTHER SOLAR CAPACITORS

The capacitors and radio interference filters shown on these pages include only the types in relatively popular usage in the radio and electronic industry and do not represent the limit of Solar production.

Many other types are regularly cataloged for specialty use in the electronic and electrical industries, while a large volume of capacitors are manufactured strictly to purchaser's specifications.

Where any question may arise concerning the correct standard types or new designs to meet unusual requirements, Solar's Engineering Department will gladly provide capacitor users with advice concerning proper choice of units for dependable service.

The right is reserved to change standard Solar designs or constructional details without notice.

SOLAR DEPENDABILITY

It is the unqualified Solar guarantee that all of the products shown in this catalog are manufactured of high-quality, carefully tested materials, under most rigid and exacting engineering control, with the sole purpose of achieving quality which is "Reliable in Every Climate." Solar capacitors are used in commercial and military electronic equipment throughout the world. This extensive acceptance of Solar products is the best testimonial of Solar dependability.

SOLAR CAPACITORS

RECTANGULAR-CASE SUPEREX CAPACITORS

The Type XLXP series of Superex-treated paper-dielectric capacitors is conservatively designed to meet the exacting requirements of industrial electronic equipment and commercial radio apparatus. The synthetic, non-flammable Superex impregnant and fill assures long life, small size, high insulation resistance, low power factor, and stability of electrical characteristics at elevated temperatures.

Capacitors are furnished in gray-lacquered hermetically-sealed fabricated terneplate containers with high-voltage porcelain terminal bushings.

Type XLXPL units are supplied with hook-on flat-flange mounting brackets; Type XLXPJ units are supplied with hook-on spade-bolt brackets; and Type XLXPU capacitors have wrap-around universal mounting brackets.

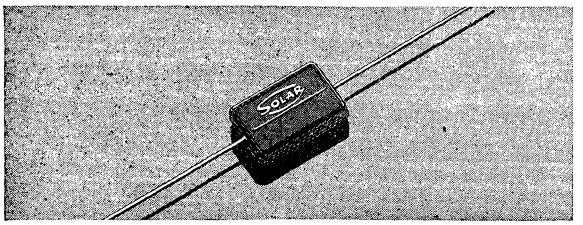
SOLAR CAPACITORS



TYPE MO MOLDED FOIL-MICA CAPACITORS

These small molded capacitors are widely used in applications where small capacitances with excellent "Q" and high insulation resistance are required. High quality phenolic molding material and wax impregnation for moisture resistance are standard. Size: $\frac{7}{32}$"x$\frac{15}{32}$"x$\frac{25}{32}$".

TYPE XRB MICA TRANSMITTER CAPACITORS

These small, potted mica-dielectric transmitter capacitors are housed in low-loss mica-filled phenolic cases. All metal parts are non-magnetic. Each capacitor is tested at 300 Kc and rated r-f current as part of the standard testing procedure. Individually packaged.

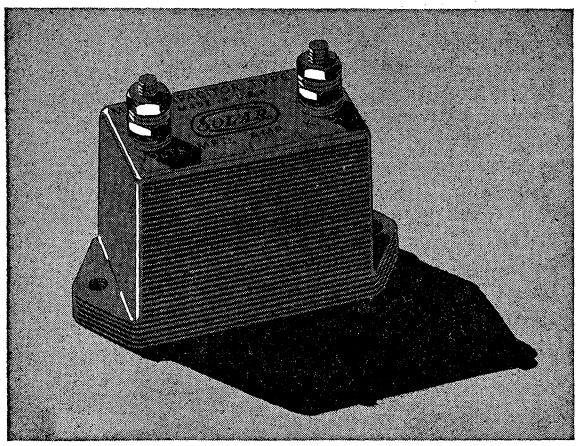
SOLAR CAPACITORS



TYPE XSB MICA TRANSMITTER CAPACITORS

Used where electrical requirements require larger units than Type XR capacitors, these potted mica capacitors have high insulation resistance and low r-f losses. Stable operation is assured by careful testing, including heat runs at 300 Kc and rated current. Individually packaged.

TYPE XHB MICA TRANSMITTER CAPACITORS

Largest of the low-loss phenolic-potted mica capacitors, Type XHB units are designed for exacting applications requiring both high breakdown voltage and high r-f current ratings. Long-cycle vacuum impregnation of the carefully constructed mica stacks and reliable sealing are followed by an r-f heat test at 300 Kc. Individually packaged.

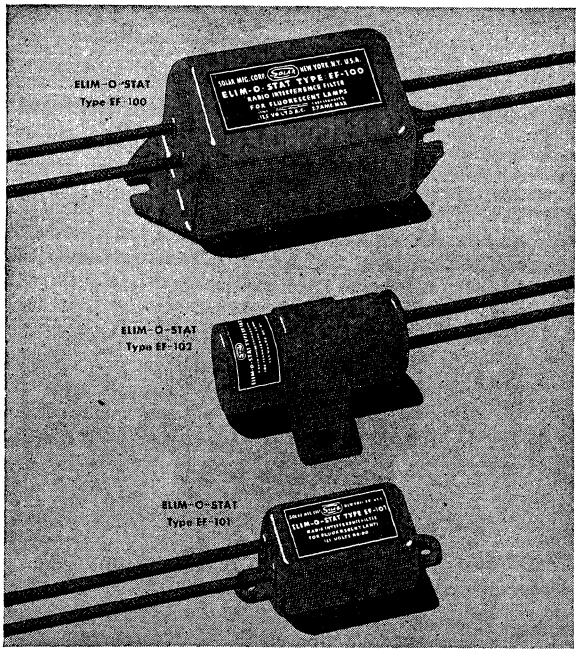
SOLAR FILTERS



ELIM-O-STATS FOR FLUORESCENT LAMPS

ELIM-O-STAT TYPE EF 100 Most effective of all radio frequency interference filters over the wide range of frequencies from 150 kilocycles to 150 megacycles used for audio and video entertainment and communications, the EF-100 is the Elim-O-Stat for fixtures in laboratories, radio salesrooms, rural homes, and wherever else sensitive receivers are used or station signal strengths are weak. Of carefully engineered symmetrical twin-pi construction, the EF-100 Elim-O-Stat is designed to be installed in series with the line leads within the fixture at the point where the power leads enter. Only one unit is needed per fixture. Filter is securely housed in a light-gray metal container. Rated Voltage: 125 volts A-C. Maximum Current: 2.7 Amperes. Will handle up to six 40-watt tubes. Underwriters' Approved.

List Price: $3.80 Dealer Net Price: $2.28

ELIM-O-STAT TYPE EF 101 This Elim-O-Stat, electrically a delta-capacitive network, is about 90% as effective as the Type EF-100 Elim-O-Stat. Its small size and low cost make it the overwhelming choice for the great majority of applications. EF-101 Elim-O-Stats are furnished in a standard light-gray metal "bath-tub" container. They are designed to be connected across 125-volt A-C or D-C lines as they enter fluorescent fixtures or lamps of any type or wattage rating. Only one Elim-O-Stat is needed per fixture. Underwriters' Approved.

List Price: $1.25 Dealer Net Price: $.75

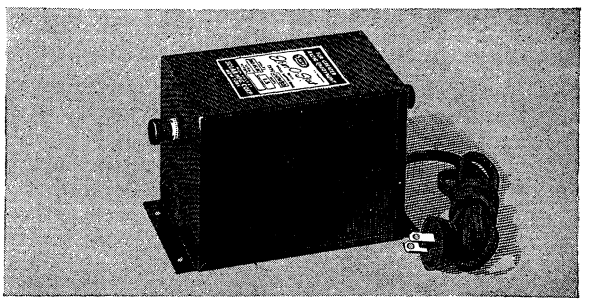
ELIM-O-STAT TYPE EF-102 This Elim-O-Stat is electrically identical with the Type EF-101 unit but is furnished in a cylindrical container with a tangential mounting bracket. EF-102 units have been found particularly useful in home lighting fixtures of various types, including those using the new "circular" tubes. Unfiltered home floor lamps of this type are especially prone to cause radio interference. Underwriters' Approved.

List Price: $1.20 Dealer Net Price: $.72

TYPE RP "ELIM-O-STAT"

This Elim-O-Stat is ideal for use with electric razors, small appliances, or midget radios with a maximum power consumption of approximately 125 watts. Suitable for suppression of interference on standard and short-wave broadcast bands and the new television channels. Furnished with 7-foot line cord. Rated voltage: 125 volts AC or DC. 1 Amp. Max.

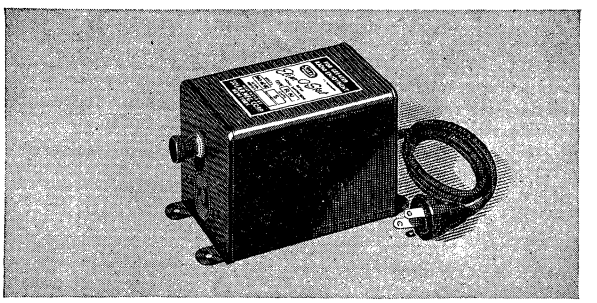
List Price: $4.50 Dealer Net Price: $2.70



JUMBO "ELIM-O-STAT"

This Elim-O-Stat is an effective capacitive-inductive type in large attractive container. It is popular as a merchandising leader. Designed for attachment to radio set or medium-sized appliances. Will effectively attenuate interference on the new television frequencies as well as on the regular and short-wave broadcast bands. Underwriters' Approved. Rated voltage: 125 volts AC-DC. Maximum current: 1.5 amperes.

List Price: $6.98 Dealer Net Price: $4.19

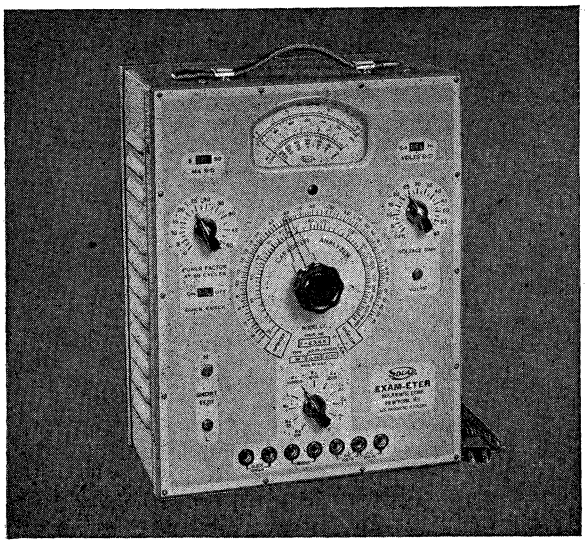


TYPE RN "ELIM-O-STAT"

A capacitive-inductive Elim-O-Stat of high efficiency. It is of sectional band-suppression construction. Designed to be effective over standard and short-wave broadcast bands, as well as the new television frequencies. Also useful with appliances. Rated voltage: 125 volts AC-DC. 5 Amps. Max.

List Price: $8.38 Dealer Net Price: $5.03

SOLAR ANALYZERS



MODEL CF EXAM-ETER WITH "QUICK-CHECK"

Most comprehensive of all capacitor analyzers, this sturdy, reliable instrument is designed to simplify electronic servicing.

- Has exclusive, patented "Quick-Check" circuit for qualitative tests and intermittent checks without unsoldering capacitor leads
- Capacitance range—10 mmf to 2000 mf by Wien Bridge
- Power Factor range—0 to 50 percent
- Insulation Resistance range—3 to 10,000 megohms
- Leakage Current—Reads electrolytic leakage current directly on large recessed 4½" meter
- Continuously Adjustable 0-550 volt D-C power supply for electrolytic tests
- 0-600 volt, 3-range D-C vacuum-tube voltmeter
- 5-50 volt, A-C vacuum-tube voltmeter
- 100 ohm to 7.5 megohm A-C resistance bridge
- JAN Quality Components for Long, Trouble-free Service
- Neat and attractive. Gray metal case with etched panel
- Size: 12¾" high by 10" wide by 5½" deep
- Weight: Only 12¾ lbs. for CF-1-60
- Clear step-by-step, 20-page printed Technical Manual

MODEL CF CAPACITOR EXAM-ETER

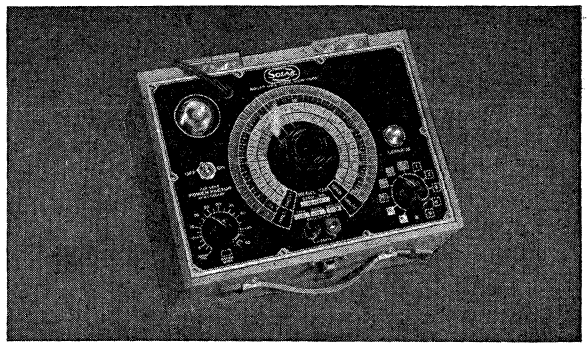
Complete with tubes and test leads—Ready to operate

Catalog Number	For use on	Dealer Net Price
CF-1-60	115 volts a-c, 50-60 cycles	$59.70†
CF-2-U	115-230 volts a-c, 25-60 cycles	70.45†

REPLACEMENT PARTS

TEST LEADS for Model CF Capacitor Exam-eters are especially adjusted for use with the balanced "Quick-Check" oscillator circuit. Use of non-standard leads will result in faulty operation.

Part Number		Dealer Net Price
QC-465	Quick-Check Test Leads	$.75
CF-27	Bridge Test Leads	.75



"QUICK AS A WINK" MODEL CBB ANALYZER

An up-to-the-minute version of the famous Solar Model CB, long-time standard analyzer of the radio service industry.

- "Magic-Eye" tube for "Quick As A Wink" bridge balance indication
- Capacitance range—10 mmf to 800 mf by Wien Bridge method
- Power Factor range—0 to 55 percent
- Simplified Neon-Lamp circuit for visual check of insulation resistance and electrolytic leakage
- Resistance Bridge—50 ohms to 2 megohm range
- Easy-to-read color-coded scales
- Self-contained and compact
  Size: 9½"x7⅛"x6¼". Weight: 7 lbs. for CBB-1-60
- Portable case with detachable cover has hand-rubbed finish
- Reliable components for operation in humid climate

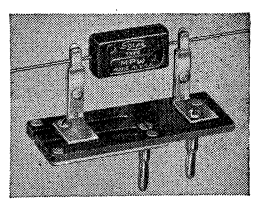
MODEL CBB ANALYZERS

Complete with tubes and test leads—Ready to operate

Catalog Number	For use on	Dealer Net Price
CBB-1-60	115 volts a-c, 50-60 cycles	$39.80†
CBB-2-U	115-230 volts a-c, 25-60 cycles	46.90†

TYPE RT-3 RAPID TEST FIXTURE

Adjustable rapid test fixture facilitates making capacitance and resistance measurements on axial-lead capacitors and resistors. It is an invaluable aid when checking "stock." Just slip part leads between spring clips for test. Standard ¾" spacing of banana plugs permits use on all standard test equipment.



Catalog Number		Dealer Net Price
RT-3	For wire lead terminal capacitors and resistors	$2.20

Solar Capacitor Analyzers are fully described in Catalog IN-2, available at your distributor or directly from Solar Capacitor Sales Corp., 1445 Hudson Boulevard, North Bergen, N. J.

SPRAGUE CAPACITORS

SPRAGUE ATOMS

THE UNIVERSAL MIDGET DRY ELECTROLYTICS

Sprague Atom Capacitors—"Mightiest Midgets of All"—are the answer to 90% or more of all radio service requirements for replacement dry eletrolytic units. A small stock of different capacities and voltages equips you for quick, dependable service on practically every job.

Sprague atoms will fit anywhere. The smaller units can be mounted by means of their sturdy, tinned-copper leads. Metal mounting straps are provided with all dual units and are available for the larger single units. (See Hardware page P-123.) Or if desired, you can mount them by any other suitable means. Despite their extremely small size, Atoms will last longer and stand far more punishment than much larger, old-style dry electrolytics.

Atoms are guaranteed to have low leakage, to withstand high surge voltages, and to have exceptionally long shelf life. They are fully sealed against moisture and blow-ups by an exclusive Sprague process.

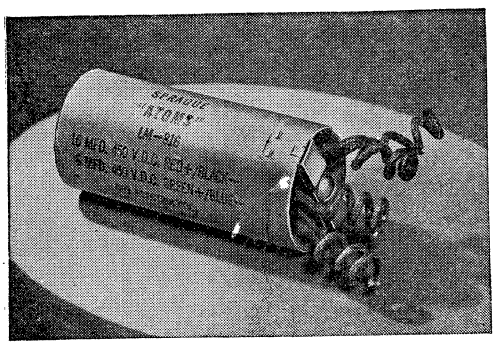
SPRAGUE LM UNIVERSAL MOUNTING REPLACEMENTS



Sprague Type LM are the handiest, most convenient dry electrolytics yet developed for vertical chassis mounting. Mount them in any position to replace inverted can or spade-lug capacitors, or any other type. Their special mounting arrangements are designed to replace screw type can mounting and will fit any chassis hole from 3/8" to 7/8" diameter. All Type LM units have separate positive and separate negative leads which can be connected together to get common positive or negative sections. They are particularly recommended to replace old common positive capacitors since they eliminate all possibility of section to section electrolysis, which causes common positive sections to fail. Units are of famous Sprague etched foil construction completely sealed and moisture-proofed.

SPRAGUE CAPACITORS

SPRAGUE 68P MIDGET TUBULARS WHERE SPACE IS AT A PREMIUM

Sprague 68P type capacitors are the ultimate in extra small paper tubular capacitors. These midget capacitors are especially designed for miniature radio applications where space saving is a prime factor. These units are of fundamentally new engineering design and construction. The outstanding humidity performance which these capacitors exhibit is a result of this new construction.

SPRAGUE UHC HIGH-CAPACITY, LOW-VOLTAGE TUBULARS

These miniature high-capacity, low-voltage tubular dry electrolytics are specifically constructed for use as cathode by-pass capacitors and as smoothing filters for low-voltage, high-current power supplies. Whereas ordinary high-capacity, dry electrolytics have high leakage current and relatively high power factor, Type UHC provides exceptionally low leakage current and low power factor. In by-pass applications, this means unusually high filtering action, without the introduction of shunt resistance across low-resistance bias units, and it is particularly important in controlled feedback amplifiers.

SPRAGUE HLV HIGH-CAPACITY, LOW-VOLTAGE ALUMINUM CAN TYPES

These aluminum can low-capacity, how-voltage capacitors are specifically designed for tough filter applications, in "A" eliminators, talking movie equipment, plant telephone systems and similar low-voltage, high capacity filter circuits where it is essential to have absolute reliability, and to eliminate all hum. All units have outer insulating tube.

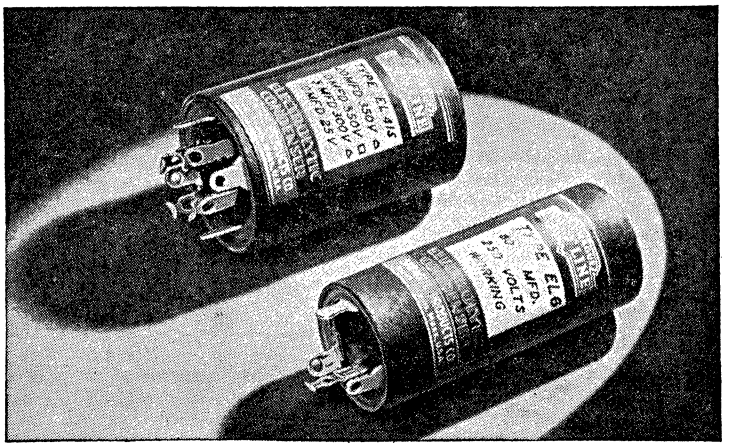
SPRAGUE CAPACITORS



SPRAGUE EL
SELF - MOUNTING
MIDGET CAN TYPE

The popularity of EL units is proved by their widespread use by leading manufacturers. They are easy to mount, and no other dry type gives so much dependability in such compact size. EL Capacitors are of highest quality etched-foil construction, hermetically sealed in aluminum cans and have twist-prong tabs for washer or direct to chassis mounting. Tabs have holes and are tinned for easy soldering. Each unit is supplied to you with Bakelite and metal washers, making them ideal for above-chassis mounting. The mounting tab ring, formed by the end of the metal container and serving as the negative terminal, is electrically welded to the capacitor cathode. Multi-Section EL Capacitors are concentrically wound and have common cathode construction.

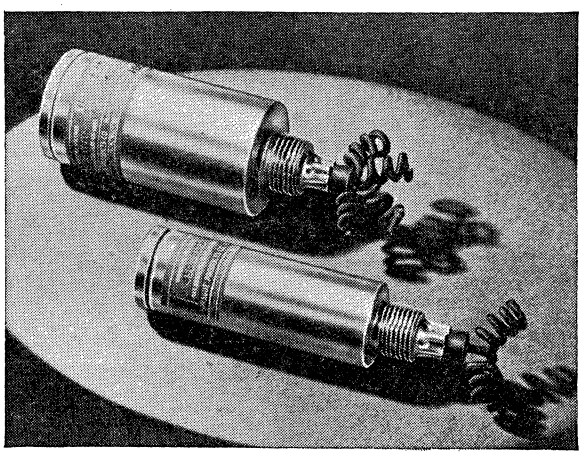
SPRAGUE CAPACITORS

SPRAGUE PLS "TINY MIKE" 450V



Type PLS Capacitors can be used with complete dependability on applications where much larger, old-style can-type dry electrolytics were previously necessary. Their exceptional quality and dependability in minimum size are made possible by the exclusive Sprague etched foil process which permits high capacity with very small leakage currents and low power factor. Aluminum cans have threaded bushing and locknut at one end for mounting. Cans are completely insulated from the capacitor sections.

Special ring clamps are available for upright mounting. (See Hardware, page P-123.)

SPRAGUE LS
ALUMINUM CAN TYPES, 450V

Popular units for replacing older can type capacitors. May be mounted in any position. Standard mounting through chassis by threaded bushing on can. Packed with mounting hardware and insulating washers for use where can must be insulated from chassis. Special ring mounting clamps are available for upright mounting with can partly extending through panels or chassis. (See Hardware, page P-123.)

TYPE LS UNITS have the can as negative terminal, and lug terminals for anode connections.

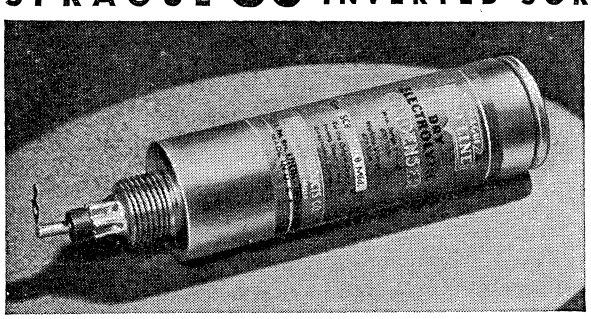
SPRAGUE SC INVERTED SCREW CAN MOUNTING TYPE, 475V
(WITH CAN AS NEGATIVE TERMINAL)



Can type dry electrolytics especially designed for the exacting continuous duty requirements of public address and power amplifier work. High surge voltage rating provides extra safety in high-current power supplies where high peaks often occur. Unexcelled for "extra tough" service replacement uses. Provided with threaded bushing for standard mounting in any position. Can is the negative terminal in all units. Positive terminal is lug connection. Supplied with mounting nut, and insulating washer to insulate can from chassis. Special ring clamps are available for upright mounting. (See Hardware, page P-123.)

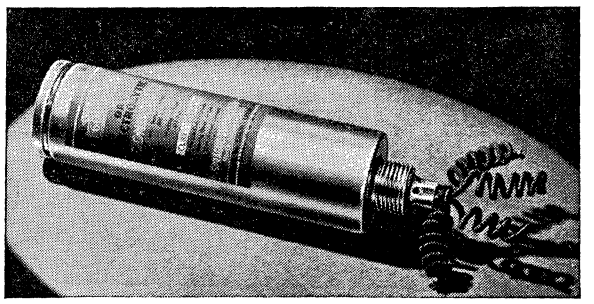
SPRAGUE CAPACITORS

SPRAGUE CL INVERTED SCREW CAN MOUNTING TYPE, 475V
(WITH CAN INSULATED FROM SECTIONS)

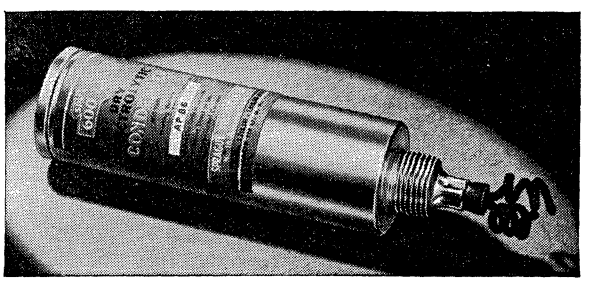


These can-type dry electrolytics are similar to Type SC Capacitors except that the can is insulated from the filter sections. Separate positive and negative terminal leads for each section. Especially recommended for high gain, high power amplifiers where minimum inter-stage coupling through power supply is desired. Special ring clamps are available for upright mounting. (See Hardware, p. P-123.)

CONTINUOUS WORKING VOLTAGE 475 VOLTS
MAXIMUM SURGE VOLTAGE 600 VOLTS

Catalog No.	Mfd.	Voltage DC working	Voltage Surge	Dimensions D	Dimensions L	List Price
CL-8	8	475	600	1 3/8	4 7/16	$2.25
CL-16	16	475	600	1 1/2	4 7/16	3.50
CL-88	8.8	475	600	1 1/2	4 15/16	3.65

SPRAGUE AP HIGH-VOLTAGE CAN TYPES, 600V



These sturdy can-type units are outstandingly popular for all public address and theater applications where the working voltage is high and surges run well over 600 volts. These high capacities and high voltage ratings are obtained by use of balanced dry electrolytic sections connected in series, assuring long, trouble-free performance. Full capacity, full working voltage and low power factor are GUARANTEED.

CONTINUOUS WORKING VOLTAGE 600 VOLTS
MAXIMUM SURGE VOLTAGE 800 VOLTS

Catalog No.	Mfd.	Voltage DC working	Voltage Surge	Dimensions D	Dimensions L	List Price
AP-46	4	600	800	1	4 7/16	$3.00

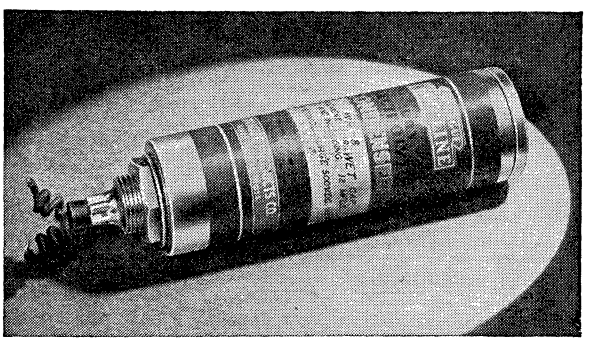
AP-16	16	600	800	1 1/2	4 7/16	5.00

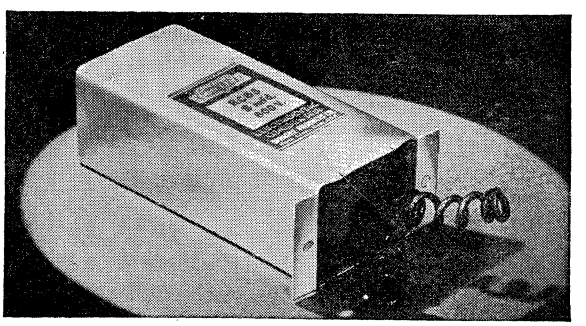
SPRAGUE WR
WET ELECTROLYTIC REPLACEMENTS



Sprague Type WR Capacitors are NOT SUBSTITUTES. Instead they are dry electrolytics of very high voltage formation specifically designed for use wherever wet electrolytic capacitors may have been used in the past. Not only will they stand high peak voltages, but they'll handle a-c ripples that might cause ordinary 450 volt drys to break down. Diameter is the same as standard wet mounting holes.

Catalog No.	Mfd.	Voltage DC working	Voltage Surge	Dimensions D	Dimensions L	List Price
WR-8	8	500	600	1	4 7/16	$2.50
WR-16	16	500	600	1 3/8	4 7/16	3.75
WR-25	25	500	600	1 1/2	5 7/16	4.00

SPRAGUE RC HIGH-VOLTAGE
METAL CONTAINER TYPE, 800V



These units are for use in portable public address and theater equipment applications where space is limited and working voltages are high and surges may run well over 600 volts.. Operation at full rated working voltage, low leakage and low power factor are FULLY GUARANTEED. Type RC-88 is recommended for use on requirements for capacities up to and including 8 mfd.

CONTINUOUS WORKING VOLTAGE 800 VOLTS
MAXIMUM SURGE VOLTAGE 1000 VOLTS

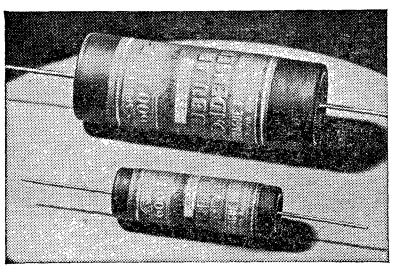
SPRAGUE CAPACITORS

SPRAGUE TC TUBULARS, 600V

"NOT A FAILURE IN A MILLION"

Under Sprague engineering leadership, cartridge by-pass tubular capacitors have reached their highest state of perfection. Of all that have been used in all parts of the world, the slogan "Not a failure in a Million" is far more than a boast. It is a fact proved by long experience under the most difficult conditions of use.



TC By-Pass Capacitors consist of non - inductively wound, tubular sections impregnated by a special process and assembled in wax-impregnated tubes with wax end seals. Tinned wire leads are 2½ inches long, and are firmly anchored so that they will not pull out. Tubes are clearly marked to indicate polarity.

SPRAGUE TR HIGH - VOLTAGE PAPER TUBULARS, 1600V

Oil-impregnated and wax-filled in cardboard tubes, Sprague TR Tubulars are especially designed for use as buffers and other high-voltage applications such as automobile radio, vibrator power supplies, etc. They are constructed throughout for long life under extreme conditions of vibration and heat. Full capacity — true voltage ratings.

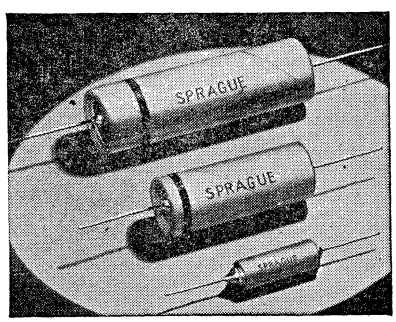
SPRAGUE PX

HERMETICALLY-SEALED OIL-IMPREGNATED METAL TUBULARS, 600V AND 1000V DC



Here is your answer to every need calling for higher-voltage tubular capacitors in the smallest possible size for real dependability under difficult operating conditions. Sprague Type PX Capacitors consist of specially wound sections, impregnated with an exclusive Sprague oil and hermetically sealed in metal containers for long trouble-free service. **Each unit is supplied with an external sleeve to insulate it from the chassis and other metal parts.** Mounting may be made by means of the tinned copper leads 2½" long, or by standard Sprague Mounting straps (see Hardware P-123).

OIL-FILLED TRANSMITTING CAPACITORS

Filled with

KVO

(KILO-VOLT-OIL — The Sprague wartime research oil development)

SPRAGUE CR

(With Universal Mounting Feature)

An oil-filled transmitting capacitor is no better than the oil with which it is filled—and Sprague brings you the best! KVO*—Kilo Volt Oil—is the result of extensive laboratory research and engineering tests and has proved its excellence throughout the world during the war in capacitors used on practically every type of equipment. KVO retains its dielectric efficiency at low temperatures to a greater extent than any other type of oil in common use. High insulation resistance and low power factor are maintained over a very broad range of operating temperatures. **Oil-filled** capacitors are essential for high-voltage use, and you can rely upon Sprague KVO units under all conditions. Terminals are insulated from the cans for AT LEAST TWICE the working voltage. Capacitor sections are hermetically sealed in sturdy rectangular metal cans which can be automatically grounded through the mounting clamps.

For special **industrial** applications, where extremely high insulation resistance requirements must be met, Sprague can supply special dielectric materials.

CR Capacitors are of convenient rectangular shape and have handy adjustable universal flanges for mounting in any position. Each unit is labelled with operating information based on A.R.R.L. standards and, in accordance with Sprague custom, ALL RATINGS ARE CONSERVATIVE. No need to "play safe" by buying most costly, higher-voltage transmitting capacitors than you actually need.

Unconditionally guaranteed against breakdown when used as specified.

SPRAGUE PC INVERTED ROUND SCREW CAN TRANSMITTING TYPES, 600V TO 1500V

These popular Sprague TYPE PC inverted round screw can capacitors are filled (NOT just impregnated) with KVO*, the famous Sprague 500°F. flash protection oil that has the added advantage of retaining its dielectric efficiency at low temperatures. The PC Capacitors find a wide field of usefulness in such applications as public address systems, medium-voltage transmitters, television and high-gain amplifiers. THEY ARE RATED CONSERVATIVELY and labelled according to A.R.R.L. standards. Ample safety factor is assured. Units include spade washer and insulating lug to insulate the round metal can containers from the chassis. Ring clamp is available for upright mounting. (See page P-123.)

SPRAGUE AR & LR AUTO GENERATOR AND VIBRATOR TYPES

Exceptionally sturdy design to withstand the bouncing and vibration of automobile use is a feature of these Automobile Generator and Vibrator types. They are oil-impregnated and metal-encased for long service under difficult conditions of heat and humidity.

The Ford Type has a special mounting bracket to accommodate cars of this make. All units are conservatively rated, and designed to withstand high surge voltages. Full capacity-true voltage ratings.

Sprague Type UC cardboard-cased capacitors cost only about one-third the price of conventional high-voltage units—and you can count on them fully for tip-top service for practically any transmitting or similar use up to 1000 volts as rated. They are equally popular with beginners as well as old-time amateurs who want to save money on their rigs without interfering with efficiency. These capacitors are oil impregnated, wax filled, fully cased and sealed in durable cardboard containers. **Handy mounting flanges may be cut off when not needed. Unconditionally guaranteed when used at rated voltages.**

SPRAGUE DR CAN-ENCASED PAPER DIELECTRIC TYPE, 600V (FOR DRY ELECTROLYTIC REPLACEMENTS)

The steady demand for Paper Dielectric Capacitors of the same sizes and shapes as Dry Electrolytics to serve as replacements for Dry Electrolytics has prompted us to bring you this line of capacitors. The actual capacity is one-third to one-half that of a Dry Electrolytic in the same size container. The leakage and power factor are extremely low. No polarity has been observed.

Ideal for replacements in high-voltage public address systems, power amplifiers and high-voltage filter circuits.

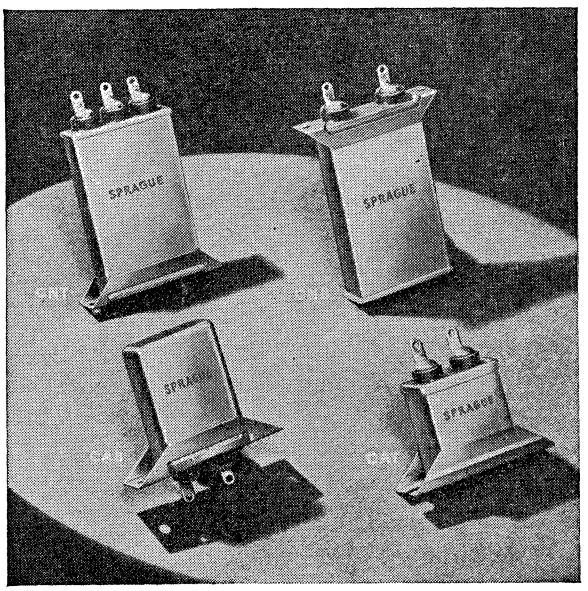
SPRAGUE CAPACITORS

SPRAGUE
CAB, CAT, CNB & CNT
WITH CHANNEL BRACKET MOUNTINGS



These oil-impregnated paper dielectric Capacitors meet many special needs where the call is for sturdy, small-size units to withstand severe operating conditions. Extreme care is exercised to assure hermetic sealing of the metal containers. Channel bracket mountings, firmly soldered to the containers, are supplied as standard.

These units are specifically designed for chassis and relay rack mounting, and are mechanically constructed to withstand severe vibration in automotive, aircraft, or industrial use.

The capacitors sections are oil impregnated and the units are oil filled with specially processed KVO*. All units are flash tested at twice rated voltage, and ground tested from terminals to container at twice rated voltage. Standard capacity tolerance for single and dual units is —10%, +20%, and for triple units is ±20%.

SPRAGUE MICA CAPACITORS
Twice Tested for R-F Characteristics

Sprague Mica Capacitors provide maximum quality for R-F applications where exacting requirements involving low-power factor and high-insulation resistance at high frequencies must be met. The line includes types for every requirement ranging from the tiny "toothpick" 1FM types to the giant ceramic-jacketed types 4CC. Each type incorporates outstanding developments based on far-reaching Sprague wartime engineering.

Mica units are perhaps the most critical of all capacitor types to produce properly—and it is in the handling of these essential details that Sprague engineering and production excels. Beginning with selection and handling of the mica itself, extreme care is taken in every operation to assure completed units which, although they look like conventional units on the surface, will far surpass ordinary mica capacitors in actual service.

Stocks of raw mica are carefully selected. So critical are Sprague requirements that far more mica is rejected than is actually selected for use. The selected mica is then hand split and each piece electrically graded by exclusive Sprague methods.

Particular care is exercised in the interleaving of section foils and in connecting them to terminals through specially designed low-resistance R-F bonds. Perhaps most important of all is the fact that each and every Sprague Mica Capacitor section receives a painstaking radio frequency test before being encased in its mold. After this test, each section is carefully impregnated and moisture-proofed prior to the molding operation.

Upon completion, all Sprague Mica Capacitors required to carry large R-F currents are actually R-F current tested for their peak ratings. This test combined with thorough testing before molding assures the serviceman, amateur, experimenter or industrial user of units of utmost dependability for any application or any condition of use.

SPRAGUE HARDWARE

Sprague Mounting Clamps and Straps provide quick, dependable means for securing a wide variety of capacitors and resistors to a mounting surface. All clamps and straps are made from plated steel.

CMC Vertical Mounting Clamps for Cylindrical Capacitors (Figs. 1 and 2) are ideally suited for vertical or "above chassis" mounting of Sprague Capacitor Types AP, CL, DR, EL, HLV, LM, LS, OT, PC, PLS, RW, SC or other round can units.

The RMC Wrap Around Clamps for Rectangular Capacitors (Fig. 3) are designed for mounting Type CR Capacitors or other rectangular units.

Type TMS Mounting Straps for Tubular Capacitors (Fig. 4) fit any tubular capacitor or resistor having a diameter of between ¼" and 1⅜", inclusive. They may be used with Sprague Types AT, PX, SW, TA, TC, TR, TU, UHC, UT or other tubular units and with Sprague *Koolohm Resistor Types 5KT/5NIT, 10KT/10NIT, 25KT/25NIT, 50KT/50NIT and 120KT/120NIT.

SPRAGUE KOOLOHMS

TRADEMARK REGISTERED U.S. PAT. OFF.

THE RESISTORS WITH THE CERAMIC-COATED WIRE INSULATION

Sprague Koolohm Wire-Wound Resistors are wound with wire that is insulated **before it is wound** with a flexible, ceramic coating that is impervious to heat as high as 1000° C. In addition, each resistor is doubly protected by a glazed ceramic coating and new type of end seals which guard it effectively against **any** moisture or other climatic conditions. Ordinary resistors may be designed to provide some degree of "tropicalized" protection at extra cost. STANDARD Koolohms give FULL protection at regular prices!

No Other Resistors Have These Features

Because of the complete protection afforded by both their wire insulation and outer ceramic shells, Koolohms may be mounted anywhere, even flat against a chassis or against grounded parts. They can safely be used at full wattage ratings, even on the high-resistance values because of the excellent insulation at high temperatures. No danger of shorts or current leakage! Thanks to their ceramic wire insulation, Koolohms can be wound in layers. This means higher ratings in much smaller physical sizes. Even more important, larger, sturdier wire sizes can be used. Actually, the wire sizes in Koolohm Resistors average 2¼ times greater in cross-sectional area than those in ordinary resistors of the same size!

High Insulation Resistance

Also standard Koolohms have the high insulation resistance to ground required for television and other high-voltage uses—10,000 volts from the surface of their sturdy ceramic jackets to their resistance elements!

The following listings include only the Sprague Koolohm Wire-Wound Resistor types commonly supplied for radio repair service and amateur radio applications. Various other types are also regularly produced in large quantities and to the most exacting standard or special applications. All have been thoroughly proved and tested for the most exacting military, naval and aircraft applications.

Other types not listed in this catalog include:

Hermetically-Sealed, Ferrule Terminal, Power Wire-Wound Resistors, with power ratings of 15, 20, 40, 50, 90, 120 and 150 watts. These are the famous Sprague Koolohm "Grade 1, Class 1" resistors that are impervious to salt water, thermal shock, and corrosive atmospheres.

Precision Meter Multiplier Resistors, Wire-Wound, Hermetically-Sealed. Resistance values up to 7.5 megohms per unit. Three types, MFA, MFB, and MFC. Resistance tolerances of ±0.5% and stability of ±0.1%. The most rugged meter multipliers in the world!

Voltage Divider Resistors. Wire-wound power resistors with ratings of 10, 15, and 25 watts. Designed for through bolt mounting as individual units, or in multiple sections of any size to provide tapped voltage dividers.

***MEGOMAX, High-resistance, High-Voltage, Resistors.** Ferrule terminal, hermetically-sealed, composition resistors of pressed and sintered ring construction, capable of high-temperature operation to 150° C. Three types with resistance values to 1000 megohms; power ratings of 6, 12 and 22 watts and voltages up to 20,000 volts.

BOBBIN Wire-Wound, Semi-Precision Resistors. Wound with ceramic-insulated wire on high-temperature plastic forms. Five high stability types with power ratings of 1, 2, 2.5, 3 and 5 watts, and resistance values to 500,000 ohms. Resistance tolerance down to ±0.5%.

Complete details on the above and other new types are contained in the Sprague Koolohm Industrial Resistor Catalog No. 100E, copy of which will gladly be sent on request by industrial users. Sprague engineers welcome the opportunity to be of assistance regarding industrial resistor applications.

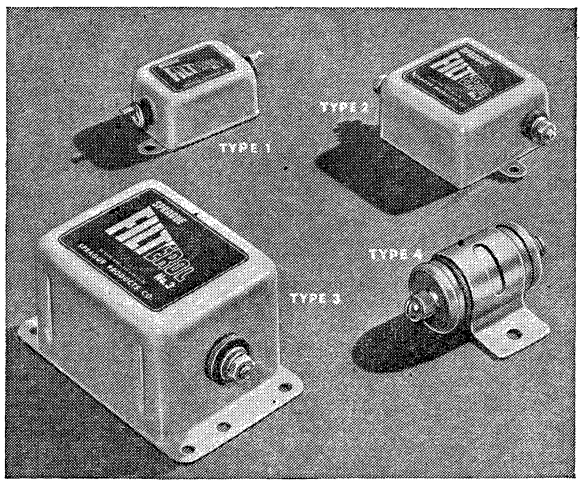
SPRAGUE FILTEROL

INTERFERENCE FILTERS

Sprague †FILTEROL Radio Interference Filters are a direct outgrowth of highly successful Sprague wartime engineering research, and offer for civilian use a war-tested, practical filter that suppresses man-made radio noises and television "scrambles" on practically any application. They are small, completely self-contained, and easily installed. Applicable to any electrical device within their current and voltage ratings, they provide maximum noise suppression on radio broadcast bands. A study of the Attenuation Curve (available on request) illustrating typical FILTEROL noise suppression performance will show that this surpasses anything normally available in the past.

SPRAGUE FILTEROL TYPES 1, 2 and 3 are designed for connection in series with power supply lines to interference-producing devices. Their basic circuit is a special three-terminal network of which the can is one terminal. The filter selected should have a rating higher than the continuous running current of the device. A single FILTEROL connected in one side of the line is usually sufficient. However, in severe interference cases a FILTEROL in each power line may be necessary. For three-or-four wire systems, a FILTEROL in each wire is necessary.

FILTEROL TYPE 4 is a new, exclusive Sprague invention incorporating a Sprague *HYPASS capacitor and provides exceptionally high attenuation at frequencies above 5MC. It is effective up to 150 MC or more. Intended for all small devices with continuous current ratings up to 20 amperes. Applied by mounting directly on the frame of the device to be filtered, and connecting the power supply line in series through the filter. In severe cases, a FILTEROL may be necessary in each line wire.



SPRAGUE IF TYPES

IF-15—A TRIPLE-SECTION FILTER for all small motor-operated devices. Especially designed to prevent accidental shocks from discharge of filter capacitors.

IF-21—COMPACT DUAL METAL-ENCASED TUBULAR FILTER for use across brushes of fractional horsepower motors with can grounded to motor frame. Also across line terminals of motors.

IF-11—A DUAL HIGH-CAPACITY FILTER with completely enclosed safety construction. Designed for motors over 1 horsepower and up to 220 volts AC or DC. Also used on high-current arcing or sparking devices.

IF-S1—SINGLE 2-LEAD FILTER SECTION with can completely insulated. For use across make-and-break contacts.

IF-37—3-SECTION DELTA-CONNECTED FILTER. Only one IF-37 required for each fluorescent lamp fixture. Also effective on make-and-break governor-type motors.

NEW! SPRAGUE TO-3 DELUXE TEL-OHMIKE

Universal Capacitance and Resistor Analyzer with Built-in DC Volt-milliammeter

$59.70 net

This fast, simplified operation is the keynote of the new TO-3 De Luxe Tel-ohmike. "Speedy check" locates open, intermittent, or shorted condensers WITHOUT REMOVING THEM FROM THE CIRCUIT. One pair of plainly marked binding posts and a total of only five controls assure quick, effective operation on all tests. Dial is of direct-reading, calibrated type, color coded to correspond to selector switch. It is easy to see, easy to read. In addition to all of its uses in radio work, Tel-ohmike checks motor-starting condensers, and measures insulation resistance of motors, transformers, etc.

SPECIFICATIONS

Capacity: .00001-2,000 MFD. in 4 ranges.

Power Factor: 0-50% at 60 cycles.

Insulation Resistance: 0-2500 Megohms (Direct reading on the meter).

Electrolytic Leakage: Measured in M.A. at rated D.C. voltage. Capacity and power factor of electrolytic condensers measured with rated polarizing voltage applied.

Resistance: 2.5 Ohms-25 Megs. in 3 ranges.

D.C. Meter Range: 0-15, 150, 750 volts — 0-1.5, 15, 75 M.A.

Size: 13¼" wide, 10⅛" high, — 5" deep.

Power: 35 watts at 115 volts — 60 cycle.

Shipping Weight: 15 lbs.

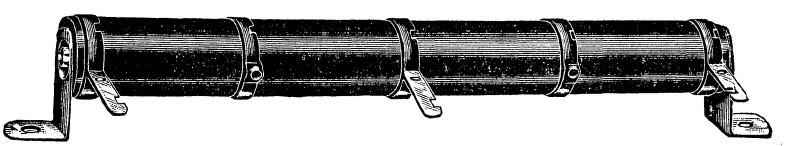
ATLAS HEAVY-DUTY IRON-OXIDE COATED NON-INDUCTIVE TRANSMITTING BLEEDER RESISTORS WITH CENTER TAP

4 or 8 Sections

Ruggedly built, accurately made and procurable in a practical non-inductive winding. Atlas high voltage bleeder resistors are designed to improve the performance of your transmitter by functioning quietly and effectively.

A most important feature found only in Atlas heavy duty bleeder resistors is the non-inductive winding. Each side of the center tap has two to four oppositely wound sections of equal resistance. Therefore should only one section be used, that section will be purely non-inductive as well.



Used for Grid Leaks as Well as for Bleeders by AMATEUR SHORT-WAVE AND BROADCAST STATIONS

Specify whether you want Inductive or Non-Inductive Bleeders

EQUIPPED WITH HEAVY MOUNTING BRACKETS

ATLAS RESISTORS

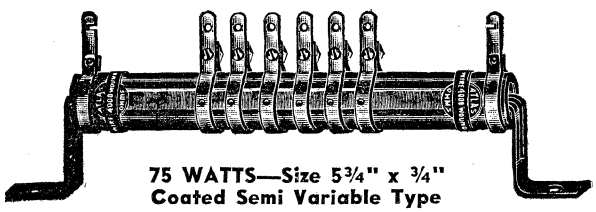
Atlas Heavy Duty Adjustalble Voltage Dividers

S-I-X OUTSTANDING REASONS W-H-Y

You Get Far More for Your Money When You Buy Atlas Variable Resistors . . .

1—Fully pack wire wound—not space-wound
2—Heavier wire and more of it—full safe wattage rating
3—Heavy duty iron-oxide coating—safely dissipating high heat
4—One band supplied free with every resistor
5—Accurately wound resistance values—well within 5% tolerance
6—Large, oversize non-hydroscopic tubing—affording plenty of area for heat dissipation

All Adjustable Resistors Are Supplied with



75 WATTS—Size 5¾" x ¾"
Coated Semi Variable Type

AUTOMATIC AMPERITE REGULATOR

BALLAST TUBE FOR AUTOMATIC REGULATION OF CURRENT AND VOLTAGE

110 Volts—A.C. Sets

AMPERITE IS A REAL REGULATOR—Its resistance automatically varies to compensate for supply voltage variations. It should not be confused with ordinary resistors.

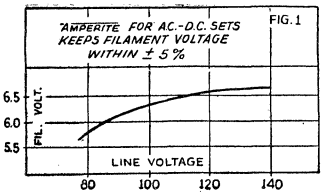
For 110-V. A.C. Sets—The proper Amperite is determined by the line current. A set drawing 0.7A requires Amperite 7A10, 1.2A requires Amperite 12A10, etc. Depending upon the line voltage, the voltage drop across an Amperite of—A10 series will vary from 8 to 30 volts and will control line voltages of 100 to 140 volts.

The line current drain of most 110 Volt A.C. Sets — except those using 6L6 or '50 tubes—average approximately 0.1 amp. per tube. A 7-tube set will draw 0.7A—use Amperite 7A10, etc. 220 Volt A.C sets have half the current drain of similar 110 A.C. sets. For proper Amperite see Chart at left.

HOW TO DETERMINE PROPER AMPERITE FOR A.C. SETS

Line Voltage	110 V	220 V
No. of Tubes in Set	Use Amperite No.	Use Amperite No.
4 or 5	5-A-5	2H-5
6 or 7	7-A-5	3H-5
8, 9 or 10	9-A-5	4H-5
11 or 12	11-A-5	5H-5

A. C. - D. C. SETS

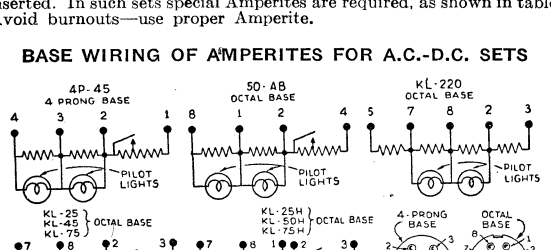


For A.C.-D.C. Sets

The Amperite Regulators are designed to pass only 0.3A through tube filaments. Filament voltages will be kept within ±5% with line voltage variations of 85 to 140 volts. Due to the fact that Amperite is a real regulator, 2 types of Amperite with four prongs and 2 with octal bases will replace 150—90% of all—o-called ballasts or resistors used in AC.-D.C. sets. No extra resistor equired.

Pilot Lights—None, one or two of either 0.150A or 0.250A can be used with same Amperite. Should a pilot light burn out, the set will continue to operate properly without any damage to the Amperite, tubes or other parts. The patented starting resistor in the Amperite preventf overloading and premature burning-out of tubes and pilot lights.
In some sets the ballast socket is purposely wired in such a way that the Pilot Light Resistors of standard ballasts would be burned out is inserted. In such sets special Amperites are required, as shown in table. Avoid burnouts—use proper Amperite.

BASE WIRING OF AMPERITES FOR A.C.-D.C. SETS



AMPERITES FOR 2-VOLT BATTERY SETS

Two-volt tube filaments are delicate and easily overloaded. Keeping the tube filaments at their proper voltage with a real regulator like Amperite invariably results in considerably more battery and tube life. The same Amperite can be used for dry cell, air cell, or 2 volt storage battery operation. The proper Amperite is determined by the total filament-current drain of the set. e.g.—for 0.5A use Amperite 5E1, etc

REPLACEMENT REGULATORS—A.C.-D.C. SETS. List $1.25

Amperite No.	Amperite Numbers Shown Replace All A.C.-D.C. Ballasts

PRICES

The proper AMPERITE Replacement may be determined by looking up the number under column "FOR" and noting corresponding Amperite in the column "USE AMPERITE". Numbers in "FOR" column run consecutively and then alphabetically.

★The letter code in the center column is interpreted as follows:

	List Price
a—For 110V. A.C.-D.C. Sets	$1.25
b—For 2V. Battery Sets	2.25

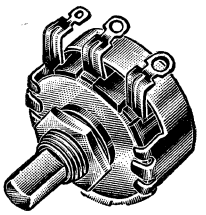
CLAROSTAT

SERIES "M" COMPOSITION-ELEMENT CONTROLS

★ Compactness—yet without sacrificing operating efficiency and long service life. Only 1⅛" dia. by $\frac{9}{16}$" deep (with switch, ⅞" deep).

Utilizes the exclusive Clarostat stabilized element, insuring the control's constancy in all weather and in all climates. Many years of painstaking research and experience are incorporated into the design of Clarostat Series "M" controls, assuring the user of the best results at all times.

The original Clarostat "Ad-A-Switch" feature makes it possible to adapt any of the Series "A" switches quickly to any of the "M" controls. Furthermore, for high-voltage television, oscillograph or other electronic circuits, the new Clarostat Series 55-110 High-Voltage Coupling Unit can be attached to all Clarostat controls (illustrated below) to assure safety at elevated voltages. The cost of this added feature is quite moderate. High-voltage couplers are installed at factory only. List price 3000v. **$1.25**; 10000 v. **$1.85**.



WITH Original "Ad-A-Switch" Feature

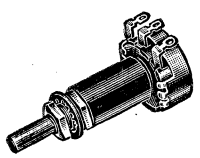
LIST PRICE $1.25 (Standard Packing—10 (ten) per carton.)



High-voltage coupler fitted to any Clarostat control at the factory, on special order.

THE ORIGINAL "AD-A-SWITCH" FEATURE FOR SERIES "M", "AM", "T" "AT" CONTROLS

Cat. No.	Wiring	List Price
SW-A	Single-Pole Single-Throw	$0.60
SW-A1	Three-Way. No "Off" position S.P.D.T.	.60
SW-A2	Double-Pole Single-Throw	.60
SW-A4	Four-wire (to control A, B and C voltages)	.60
SW-A5	S.P.S.T. (closes at full clockwise rotation)	.75
SW-A6	S.P.S.T. with dummy lug	.75

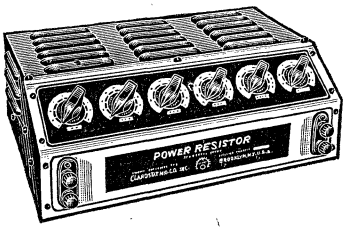
Ad-A-Switch is used in place of usual dust-protection cover, and lugs bent over to hold it in place.

POWER RESISTOR DECADE BOX

★ A "Must" for Every Laboratory. Power resistance measurements under actual load conditions are made possible by this welcome new addition to the Clarostat line.

Just imagine being able to obtain ANY VALUE OF RESISTANCE from 1 ohm to 999,999 ohms IN STEPS OF ONE OHM, and at a POWER RATING OF 225 WATTS using a maximum of 1000 volts DC (660 volts AC)!

Intended primarily for laboratory use and development engineering, this instrument simplifies and expedites the selection of correct resistance values for given circuits and functions. Many of these instruments are already in daily use in laboratories, engineering offices, plants, maintenance and service departments, and in schools.



Finish: The heavy-gauge metal case is finished in frosted gray wrinkle, with an etched black-and-aluminum front panel.

Dimensions: 13 in. long; 8½ in. deep; 5¾ in. high. Weight, 11 lbs.

Suggested Uses: Resistance determination. Load Resistance. Meter Multiplier. Calibrating Meters.

Providing any desired ohmage as a universal power resistor.

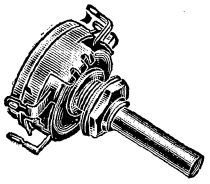
CLAROSTAT



SERIES "T" TAPPED CONTROLS
(Formerly Series TCP)
With the Original Ad-A-Switch Feature

★ There are many circuits in which the use of a tapped control affords special functional operation not possible or attainable with any other type of control. These standard units listed herewith permit replacement of tapped units with the assurance that the total overall resistance value as well as the taps satisfactorily substitute for the original.

Cat. No.	Ohms	Tap No. 1	Tap No. 2	Tap No. 3

Rotary Switches

Compact, positive contact, bakelite molded Underwriter's approved. Rated 1 Amp. 250 volt., 3 Amp. 125 volt. The physical dimensions of the switch are as follows:

Diameter $1\frac{3}{32}$", body depth $\frac{9}{16}$", lug protrusion ¼", locking projection on a $\frac{17}{32}$" radius, rotation for actuation 30 degrees.

All standard stock numbers have ⅜" bushing, 1½" length shaft, and one locking projection.

Cat. No.	Switch Description	List Price
8590	Single pole Single Throw	$0.60

8593	Single Pole Double Throw	.75
8594	Single Pole Reversed Action	.60
8595	Four Wire Single Throw	.75

Individual Packing 10 (ten) per carton.

SERIES 43 MIDGET WIRE-WOUND CONTROLS

★ A space-saving control of the wire-wound type. Similar in mechanical details and dimensions to the composition-element Series M control (page R-6). Precision-wound alloy wire on bakelite strip. Rotor sweeps over inside face of winding. Special lubricant for minimized frictional drag and wear. Molded bakelite casing—high resistance to leakage. Protective metal cover (as shown in illustration). Only 1⅛" dia. Body Depth, $\frac{9}{16}$"; ⅞" deep with switch. ⅜" bushing. Shaft 1½" long.

CLAROSTAT

SERIES "AM" AND "AT" UNIVERSAL AD-A-SHAFT CONTROLS

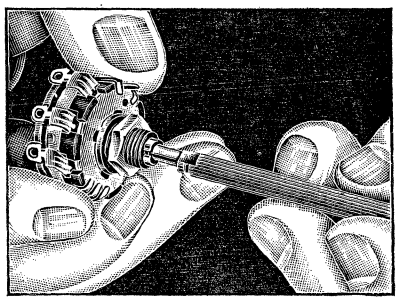
Standard and Tapped for Every Service Need

★ These universal controls are built to the same exacting specifications as Series "M" and "T". However, instead of having the usual integral shaft, these controls include the Clarostat "Ad-A-Shaft" feature whereby a choice of shafts may be used with any of these controls. This ingenious feature eliminates the stocking of special-shaft units. Instead, the Series "AM" or Series "AT" (tapped unit) takes the particular type of shaft desired by merely inserting such a shaft and holding it permanently and firmly in place with a C-washer supplied for the purpose.

Choice of AD-A-Shafts

★ A choice of four types of Ad-A-Shafts covers all requirements, as follows:

Cat. No.	Description	List Price
FS-3	Flatted shaft, 3″ long	$0.30
RS-2	Round shaft 2″ long	.30
RS-3	Round shaft 3″ long	.30
KSS-3	Knurled, split shaft 3″ long	.30
DFS-½	Philco shaft ½″ long	.30



One selected shaft furnished **FREE** with each Ad-A-Shaft control.

SERIES 58 WIRE-WOUND CONTROLS

★ Sturdy and reliable in construction yet capable of use for delicate control work, Series 58 Controls are without equal. Noiseless in operation, these units are standard equipment in laboratories, fine instruments, electronic equipment, and especially in the control rooms of radio stations and networks. If power switch is desired, specify switch type and order as 58-S. Add to list the price of switch selected. S.P.S.T. switch is supplied where no type is specified. All switches permanently fastened to control at factory.

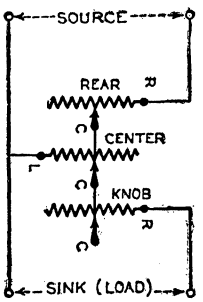
CLAROSTAT



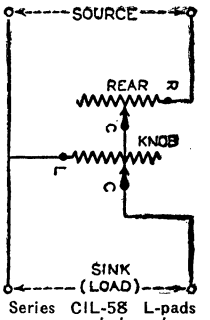
Series CIT-58 T-pads are connected as here shown.

CONSTANT IMPEDANCE CONTROLS

★ To provide for the highest quality of sound reproduction, whether in broadcast transmission, sound recording, or public address systems in which a multiplicity of loudspeakers are employed, it is essential that the proper type of self-compensating volume controls or attenuators be used in eliminating the distortion that would arise from the mismatching of impedances.

Therefore, volume controls or attenuators for this purpose must be of the so-called "constant-impedance" type. By the of these "T" and "L" pads it is possible to keep the input or output impedance of associated equipment in a circuit within the limits of a constant required value.

Safety rated at a maximum power dissipation of 2.5 watts, these "T" and "L" pads have a continuous range from 0.5 to 30 decibels attenuation in 90% of rotation, the last 10% affording infinite attenuation. Employable at either the source or the load in a circuit, these units are readily mounted by a one-hole mounting, and afford a wide range of use as mixers, faders, multiple-speaker controls, etc. Such controls can be used as individual volume controls for multiple speakers without affecting or changing the source impedance.



Series CIL-58 L-pads are connected as here shown.

CONSTANT IMPEDANCE OUTPUT ATTENUATORS

★ Developed to meet the need for a constant-impedance attenuator capable of handling considerable power without measurable insertion loss, Series CIB attenuators provide linear attenuation with ample power-handling capacity. Compact. Safely dissipate 10 watts at any dial setting. Recommended as output level control for power amplifiers or as an input attenuator for loudspeakers in P-A system. Unit furnished in black baked-enamel metal casing 2″ in dia. by 2¾″ long, equipped with dial plate and bar knob. Not available with power switch. One-hole mounting. ⅜″ dia. bushing. Shaft 1″ long.

POWER RHEOSTATS

★Exceptionally rugged. Trouble-free design. Withstand severe overloading without smoking, burning, charring. Element imbedded in cold-setting cement. Resistance winding supported on insulated metal core for maximum heat conduction and radiation, even at partial rotation settings. Single-hole mounting. Adjustable locking pin firmly anchors unit against bodily rotation. Shaft and bushing insulated from current-carrying arm for safety. 25 and 50 watt sizes.

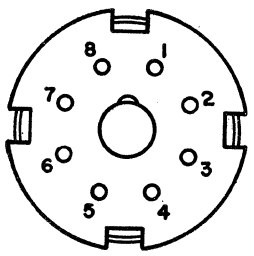
★ Clarostat developed and pioneered the tube-type resistor for voltage-reducing purposes, as used in AC-DC radios. Strictly non-flammable. Resistance element wound on mica form encased in metal tube and connected with base prongs.

Clarostat has selected the most popular values for so-called Universal numbers. Also the most popular types of Standard units.

Prefixes: K denotes 6.3 volt 150 ma. No. 40 pilot lamp; L, 6.3 volt 250 ma. No. 46; M, 6.3 volt 200 ma. No. 51. Numeral indicates total voltage drop across resistor tube.
Suffixes: A, no pilot lamp taps; B, 1 pilot lamp tap; C, 1 pilot lamp tap for 2 lamps; D, 2 pilot lamp taps for 2 lamps; E, 3 pilot lamp taps for 3 lamps; E1, 1 pilot lamp tap for 3 lamps; F, 1 pilot lamp tap for 1 lamp; G, 1 pilot lamp tap for 2 pilot lamps (tapped sections isolated from main reducing body); H, 2 pilot lamp taps for 2 pilot lamps (tapped sections isolated from main reducing body).



Letter "J" following any suffixes denotes shorted connection between two prongs of tube; i.e., K-49-BJ, the short is located between Nos. 3 and 4 prongs.

GLASOHMS* Glass-Insulated Flexible Resistors

★ This is a new development in resistors which has found instant acceptance in widespread applications.

Glasohms consist of a wire winding on a fibre-glass core, with a covering of braided fibre-glass, Each strand of glass is no thicker than usual cotton thread and just as flexible, so that the complete units can be bent or twisted and even knotted without breakage or weakening. Clarostat is the only manufacturer of Glasohms. These units are ideal for resistance boxes, attenuators, voltage-dividers, multipliers, step-by-step rheostats, and for use in point-to-point wiring jobs. Handy, inexpensive and very durable, these units can withstand heavy overloads without damage. There is nothing in them to burn or char. Glasohms are also suitable for use as miniature heating elements serving in hair curlers, immersion heaters, soldering irons, electrically-heated ovens for crystal oscillators, etc., especially in longer lengths obtained on special orders.

*Registered trade-mark.

AUTOMATIC LINE VOLTAGE REGULATORS

★ To maintain constant line voltage and thus prevent burning out the tubes of a radio receiver or other tube-using device, this handy unit, operating effectively on 110-volt A.C. or D.C. by simply plugging into the usual socket or outlet, safeguards against line voltage surges or increases even up to 140 volts. At the normal 110-volt, the resistance of the unit is low and the voltage drop across it is negligible. However, as the line voltage increases the resistance of the unit increases proportionately, with a constant increase in voltage drop across it. This automatic voltage control or ballast action insures a steady, practically constant and always safe operating potential.

Dimensions are 1¾″ dia. x 1¾″ long.
Prongs ⅝″ long.

Type No.	Rating Watts	For Use With Sets Consuming	No. of Tubes Used
O	50	Up to 60 watts	4

COMPOSITION RESISTORS

CONTINENTAL M-Type
Insulated Composition Resistors

M2-2 WATT

M1-1 WATT

M½-½ WATT

M¼-¼ WATT

- **Labeled or Stamped with Value**
- **Color Coded**
- **High Insulation**

The M-Type resistor with axial leads consists of a solid molded carbon core with molded-in leads. An outer insulating shell surrounds the carbon core and is impregnated with a waterproofing compound to seal the unit against humidity. These resistors, being well insulated, can be mounted side by side or against any metal surface without shorting or grounding. They are recommended where space limits and insulating quality require a rugged reliable and small resistor capable of withstanding severe service. All sizes made in the standard stock values.

Type	Wattage	Size	List Price —Tolerance— ±5%	±10%
M ¼	¼ Watt	$\frac{13}{32}$" x $\frac{5}{32}$"	$0.25	$0.15
M ½	½ Watt	$\frac{5}{8}$" x $\frac{7}{32}$"	.25	.17
M 1	1 Watt	$\frac{7}{8}$" x $\frac{9}{32}$"	.30	.20
M 2	2 Watt	$1\frac{13}{16}$" x $\frac{11}{32}$"	.40	.30

Type M ¼ supplied with No. 21 tinned copper wire leads 1½" long; all other M types supplied with No. 20 wire.

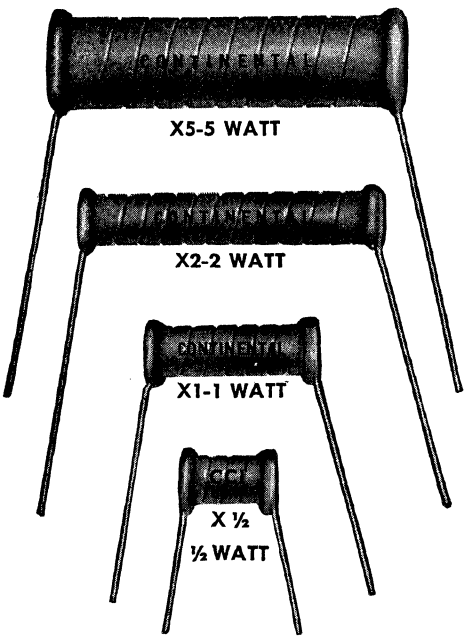
PRECISION RESISTORS

"Nobleloy" X-Type Resistors

Trade Mark Reg.



- **A new Continental Development!**
- **Not Wire Wound**
- **Not carbon!**
- **Stability of Wire Wound and Equivalent**

After several years of research work CONTINENTAL engineers have developed a new resistor involving the metal film principle, having the accuracy of a wire wound unit. Absolutely no carbon whatever is used in the fabrication of these resistors. The metallic resistance film is formed on the surface of a low loss ceramic tube using a patented pyrochemic process.

The metal film thus formed is hermetically sealed by a layer of vitreous enamel specially developed and patented by CONTINENTAL. The ceramic tube with its associated film is then spiralled to give a long resistance path and to accurately calibrate the unit to value.

Since the ceramic tubes are hollow they allow a larger surface for heat radiation, thus permitting the resistor to withstand overloads of 200% or better.

The copper-tinned lead terminals are soldered to extremely low resistance metal contact films which in turn are integral with the resistance film, thereby reducing contact resistance to a minimum. This type of construction produces a resistor unit having not only excellent resistance stability but also a negligible noise characteristic.

ELECTRICAL CHARACTERISTICS OF CONTINENTAL "NOBLELOY X" TYPE RESISTORS

VOLTAGE

The recommended voltage rating of Continental "NOBLELOY X" type resistors is the maximum r.m.s. voltage which the resistor is expected to withstand in continuous use and is determined from the formula $E = \sqrt{PR}$ Where E = rated D.C. or r.m.s. A. C. Voltage P = watts rating, R = resistance.

In no case shall the D.C. or r.m.s. A.C. voltage be greater than the maximum voltage shown in the table.

LOAD CHARACTERISTICS

Irrespective of value, Continental "NOBLELOY X" type resistors will not change more than 5.0% when the load is increased from 2% of rated wattage to 200% of rated wattage, and on cooling to room temperature returns to the original value. This is practically the temperature coefficient effect.

VOLTAGE CHARACTERISTICS

The voltage coefficient is so low that it is negligable.

NORMAL LOAD LIFE CHARACTERISTICS (All Values)

The permanent change in resistance will not be more than 1.0% when the resistor is subjected to a normal life test of 1000 hours.

OVERLOAD LIFE CHARACTERISTICS (All Values)

The permanent change in resistance will not be more than 2.0% when the resistor is subject to 200% of rated wattage for a period of 1000 hours.

TEMPERATURE COEFFICIENT (All Values)

The temperature coefficient of resistance will not exceed 0.0005 negative.

HUMIDITY CHARACTERISTICS (All Values 1.0 Ohm to 15 Megohms)

Continental "NOBLELOY X" type resistors will not change more than 1.5% when conditioned in an atmosphere of 100% relative humidity at 40° C. ambient, for a period of 1000 hours.

SHELF LIFE

When stored under normal conditions, the resistance will not change more than 0.1% during a period of 2000 hours. This is a negligable change.

NOISE CHARACTERISTIC

When tested for noise according to standard R.M.A. procedure, the inherent noise level will not exceed ¼ microvolt per volt, irrespective of resistance value. This level is equal to wire wounds.

FINISH

All "X" type resistors possess a smooth, uniform coating of a special rubberized enamel capable of resisting deterioration up to and including 400°F.

Type	Wattage	Size	Values	Max. Voltage	List Prices ±1%	±2%	±5%
X-½	½ Watt	9/32" x 5/8"	1 ohm to 1 megohm	700	$1.00	$0.90	$0.85

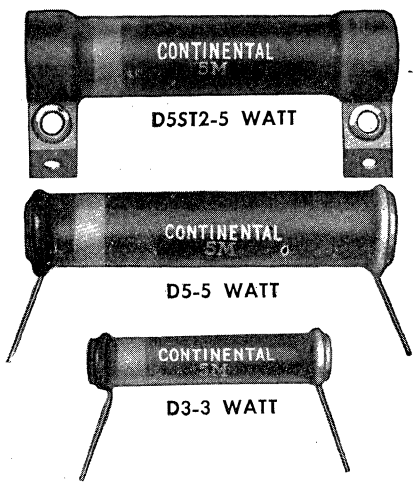
RESISTORS

CONTINENTAL RADIO Certified COMPONENTS CARBON INC

CONDENSERS

CONTINENTAL D-TYPE

- **Heavy Duty Carbon**
- **Operate safely on overloads**
- **Non-inductive**

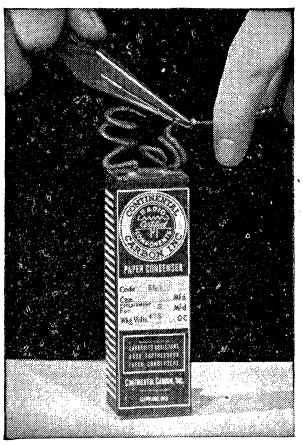


The D-Type resistor with radial leads is made with solid molded carbon rods, copper sprayed on the ends to which are soldered No. 18 copper tinned leads. The soldered contact construction gives a resistor noise-free and stable. They are known as the heavy duty type units because of their size—having a larger radiating area they operate safely on overloads. A baked-on insulation is a protection against shorts to subpanel and wiring.

Type	Wattage	Size	List Price —Tolerance— ±5%	±10%
D 3	3 Watt	2″ x ⅜″	$0.50	$0.30
D 5	5 Watt	3″ x $\frac{9}{16}$″	.75	.50
D 5ST2*	5 Watt	3″ x $\frac{9}{16}$″	1.25	1.00

*D5ST2 units have heavy copper eyeletted and soldered strap terminals ¾″ wide with holes of $2\frac{9}{16}$″ spacing. The outer holes can be used with either 6-32 screw mounting or solder wire loops, while the inner holes are for 8-32 screw mounting. The outer section of the terminal can be cut off or bent to any angle desired.

CONTINENTAL Paper Condensers



EE TYPE

IE TYPE

CONTINENTAL Carbon Model E condensers are high quality, paper dielectric capacitors built in shapes and sizes equivalent to electrolytic capacitors commonly found in radio receivers. They are flash tested at 3 times their d-c working voltage and have the advantage of low power factor at 60 cycles. They are non-inductive, non-polarized, and are of permanent capacity. No active chemicals are used which could cause corrosion of the foil or leakage. The tabulations at right show the actual capacity in microfarads and the rated sizes of electrolytic condensers occupying the same dimensions. Recommended for use on d.c. and rectified a.c. only. Model E, d-c working volts, 600; peak volts, 1000.

CONTINENTAL A-TYPE PRECISION CARBON RESISTORS

- **New Type of Carbon Resistor**
- **Hermetically Sealed in Glass**

MADE IN ALL STANDARD STOCK RESISTOR VALUES

Type A½—½ Watt—1″ x ¼″ dia. Type A1—1 Watt—1½″ x ¼″ dia.

	List Price
Types A1 and A½—Tolerance ±2%	$0.50
Types A1 and A½—Tolerance ±5%	.30

A new type of carbon resistor, impregnated, hermetically sealed in glass, impervious to moisture, of the utmost stability. The A Type sets a new high standard of perfection for precision applications. Suitable for any 1-watt or ½-watt application, the A type is particularly recommended for high resistance voltmeter multipliers, critical photo-electric circuits which must be extremely stable, and in military and naval applications where the dependability of each component is most vital.

FILTERNOYS FILTERNOYS

For Elimination of Electrical Radio Interference

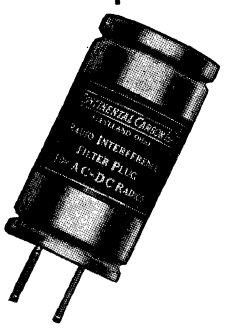
Filternoys units reduce or eliminate man-made static! With the development of ultra sensitive receivers, the problem of interference elimination has become a major factor in the sale and servicing of these radios. Vacuum sweepers, electric refrigerators, cake mixers, and other kitchen gadgets, electric shavers, sewing machines, and a host of other items all contribute their share to spoiling good reception. Every buzz, snap, or crackle heard on a new radio lessens the chances of a sale, but these same disturbances open the path for the alert dealer to sell **"noise elimination service"** along with the radio—and at a profit!

The offices of doctors, lawyers, dentists, and professional men—where radio provides entertainment and relaxation for waiting clientele—offer a lucrative market to radio servicemen who have the ability to locate man-made radio interference and quiet it with CONTINENTAL CARBON Filternoys devices. **Filternoys** are simple to install and profitable to sell. Never be without them in stock.

Filternoys F01DH

Most Popular and Universal Plug-in Type

for Radios and Electric Razors



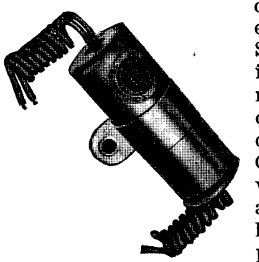
F01DH

Handy plug-in type suppressor with two r-f chokes and two condensers for use on electrical devices of 300 watts or less, creating interference of intermittent or temporary character, such as a sewing machine motor, small electric washing machines, electric shavers, drink mixers, cash registers, adding machines, or electric typewriters. Size 2⅝" by 1⅜" diameter. 300-Watt capacity on 120 volts, a.c. or d.c.

Filternoys F01DH ..... **List Price $1.40**

Filternoys G01DH

Suppression Type



G01DH

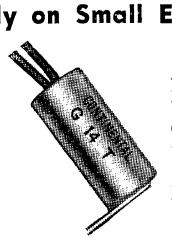
A wire-in suppressor with dual chokes and two condensers with a grounded frame. Suitable for equipment having grounded frame or a connection to metal BX wiring conduit. For diathermy and dental machines where the G01DH unit may be mounted within the interfering device and for small motors of exhaust fans, pumps, and compressors. Size 2¼" by 1¼" diameter, 6-inch leads, 300 watts, a.c. or d.c., 110-130 v.

Filternoys G01DH ..... **List Price $1.40**

Filternoys G01D and G14T

Designed to Be Mounted Directly on Small Electrical Devices

Filternoys Diverter G01D—Dual capacitors in a grounded container for any size electric motor operating on 120 v. or less. Through making use of the field coils as chokes, this is a most effective method to silence a noisy a.c. or d.c. motor. Size 2⅛" by ¾" diameter.



Filternoys Diverter G14T—Triple capacitors in a circuit which permits its use with all hand-operated motor driven devices without danger of shock. Particularly applicable to vacuum cleaners, flat-irons, etc. Size 1½" by ⅝". Flexible leads for direct connection.

G01D ..... **List Price $0.60**

G14T ..... **List Price $0.60**

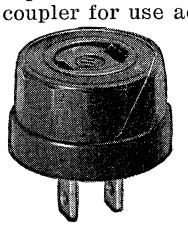
Oil Burner Suppressor

Filternoys Suppressor OB15, carbon element type, intended for use only with the high tension spark ignition of oil or gas burning heating systems. Must be connected in series with each line to the spark gap. Size of the suppressor 3½" x $\frac{13}{16}$" diameter. Universal connections at both ends for solderless contact.

OB15 ..... **List Price $1.80**

FILTERNOYS F18

Filternoys Diverter F18 is a compact 0.1 mfd capacitor in a conveniently small bakelite plug-in coupler for use across domestic power lines in which the neutral wire is grounded. The capacitor diverts interference from the high potential side of the power line to the grounded neutral side. Use on floor or table lamps, cigarette lighters, and the radio.



F18 ..... **List Price $0.70**

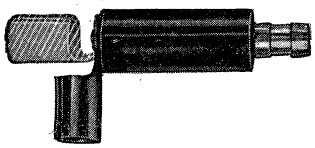
SUPPRESSORS SUPPRESSORS

AUTO-RADIO SUPPRESSORS AND FILTER UNITS

CONTINENTAL Suppressors have been subjected to years of laboratory development and actual road service. They effectively remove noise interference from spark discharge at the plugs and high-tension distributor—yet do not in any way affect the motor car ignition system.

They have mechanical strength to stand the most severe service. The resistance value has been scientifically determined and is not changed after years of the most adverse conditions. Sparking across the terminals is eliminated by careful shaping of the electrodes and cases.

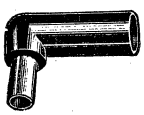
SPARK PLUG SUPPRESSORS — Each—List Price $0.30 — SPARK PLUG SUPPRESSORS



Code S-23 Spark Plug Suppressor—Flexo-Terminal type. Can be bent to any angle, snaps on to spark plug.

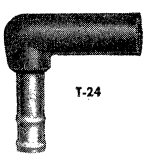
Code S-27 Suppressor—Thread will fit all spark plugs. Most universal type yet devised.

Code S-19 Spark Plug Suppressor—Snaps on to spark plug. Vertical mounting.



Code S-20A Spark Plug Suppressor—For Buick, Packard and Chrysler cars. Takes place of terminal on ignition cable.

DISTRIBUTOR SUPPRESSORS — Each—List Price $0.30 — DISTRIBUTOR SUPPRESSORS



Code T-24 Distributor Suppressor—Is an angle type with screw in cable. The spring brass insert has two rolled bosses, one to hold suppressor rigid and the other to snap into the groove of the distributor well.

Code C-11 Cable Suppressor—Meets requirements where it is necessary to cut ignition cable.

Code T-20 Distributor Suppressor—Cable clip snaps into suppressor. Not necessary to remove clip on cable and therefore suppressor can be quickly removed for ignition testing purposes.

FORD DISTRIBUTOR SUPPRESSOR

Brush

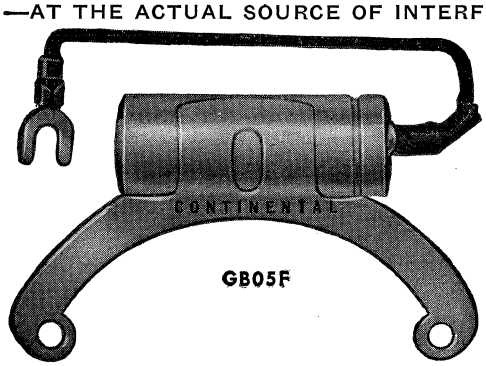
Sleeve

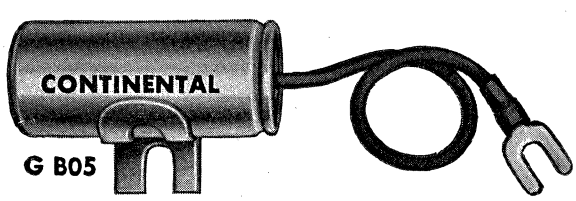
CODE T-17: Brush and Sleeve Supplied Together

Distributor Brush Suppressor of the right resistance to suppress interference from the spark at the rotor.

Universal Type: the brush can be inserted in the bakelite sleeve to fit models using the larger size brush.

THIS LINE OF EQUIPMENT HAS BEEN SPECIALLY DESIGNED TO GIVE THE SERVICEMAN A MEANS OF EASILY ELIMINATING EVERY CAUSE OF NOISE INTERFERENCE IN AUTO-RADIO INSTALLATION —AT THE ACTUAL SOURCE OF INTERFERENCE.





Code	Application	Capacity	Size	List Price

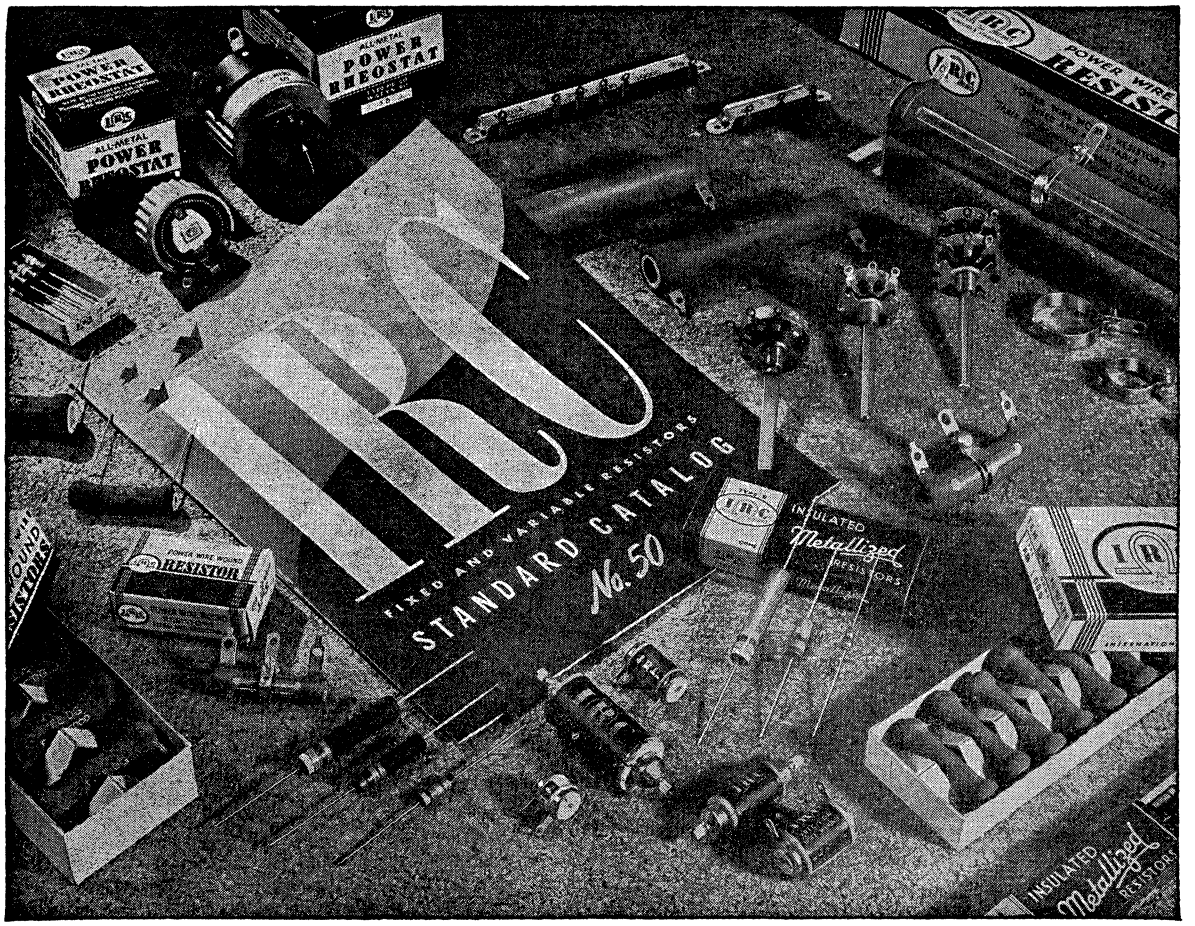
GB05F	Ford V-8 coil	.5 mfd	2⅛" x ¾"	.75



IRC INSULATED RESISTORS

TYPE BTS INSULATED FILAMENT RESISTOR

(½ watt)

13/32" x ⅛"—470 ohms to 22 meg
350 volts max.

List 13¢ **Net 8¢ each**

TYPE BTA INSULATED FILAMENT RESISTOR

(1 watt)

23/32" x ¼"—330 ohms to 22 meg
500 volts max.

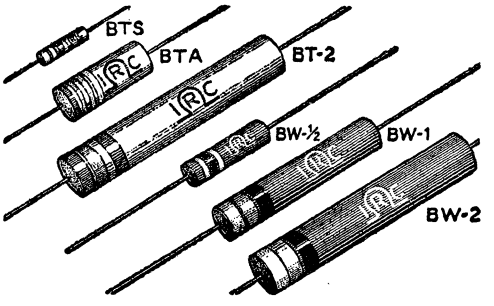
List 17¢ **Net 10¢ each**

TYPE BT-2 INSULATED FILAMENT RESISTOR

(2 watt)

1¾" x 21/64"—470 ohms to 22 meg
500 volts max.

List 25¢ **Net 15¢ each**



TYPE BT INSULATED FILAMENT RESISTORS are completely insulated with bakelite and unexcelled for stability, low-noise level, low voltage coefficient and mechanical strength. Insulation breakdown of Type BTS is 750 volts to ground; all other type BT's, 1000 volts. Standard tolerance ±10%. Special tolerance ±5% at slightly higher cost.

TYPE BW INSULATED WIRE WOUND RESISTORS are furnished with the same bakelite insulation as BT resistors. The wire resistance element is wound tightly around a special insulated core. Standard tolerance ±10%. Special tolerance ±5% at slightly higher cost.

Type BW-½ Insulated Wire Wound Resistor

(½ watt)

⅝" x 3/16"—0.47 to 820 ohms

List 15¢ **Net 9¢ each**

Type BW-1 Insulated Wire Wound Resistor

(1 watt)

1¼" x ¼"—0.47 to 4,700 ohms

List 17¢ **Net 10¢ each**

Type BW-2 Insulated Wire Wound Resistor

(2 watt)

1¾" x 21/64"—1.0 to 6,800 ohms

List 25¢ **Net 15¢ each**

IRC INSULATED RESISTORS

Preferred for Performance

BASIC KIT

Designed to meet your day-to-day resistor requirements, the IRC Basic Kit provides a wide variety stock in carefully selected values. Assortments are so arranged that a shortage of stock in one range can usually be compensated for by using two other ranges in series or parallel. Additional adjustable bands are included for use in making up bleeder sections.

The Basic Kit is sturdily constructed of heavy-gauge steel, and beautifully finished in blue and yellow. Hung on your wall or set on your service bench, the Basic Kit saves countless trips for supplies and provides your shop with a neat, carefully selected general purpose resistor stock.

The IRC Basic Kit is factory-packed with the following wide-variety resistor stock:

BTS —10 each—1,000, 2,200, 4,700, 10,000, 15,000, 22,000, 27,000, 47,000, 75,000 ohm; 0.1 meg., 0.22 meg., 0.47 meg., 1.0 meg., 2.2 meg., 10.0 meg., 15.0 meg.

BTA —5 each—470, 1,000, 1,500, 2,200, 3,600, 4,700, 22,000, 36,000, 75,000 ohm.
10 each—10,000, 15,000, 47,000 ohm; 0.1 meg., 0.24 meg. 0.47 meg., 1 meg.

BW-½ —10 each—100, 150, 220, 330, 470, 560 ohm.

BT-2 —5 each—1,000, 2,200, 4,700, 10,000, 22,000, 47,000 ohm; 0.1 meg.

BW-1 —5 each—47, 82, 100, 270 ohm.

BW-2 —5 each—47, 82, 100, 270 ohm.

AB —2 each—100, 250, 500, 750, 1,000, 1,500, 2,500, 5,000, 10,000 ohm.
2 each—15,000, 25,000 ohm.

ABA —2 each—100, 250, 500, 1,000, 1,500, 2,500, 5,000, 10,000 ohm.

EPA —1 each—1.000, 1,500, 2,500, 5,000 ohm.
1 each—10,000, 25,000 ohm.

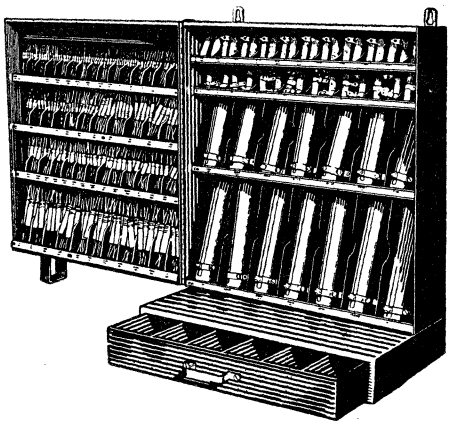
ESA —1—1,000, 1,500, 2,500, 5,000 ohm.
1 each—10,000, 25,000, 50,000 ohm.
6 "X-3" Bands.

MW-2J—2 each—10, 20, 50, 100 ohm.

M1034—2 each.

All-Metal Cabinet Furnished at No Extra Cost

List Price: $133.49 **Net Price: $80.12**



Serviceman's Special Assortment

Available in Basic Kit

The Basic Kit is also available stocked with a special "Serviceman's Assortment." This assortment contains a complete stock of ½, 1 and 10 watt resistors, plus a selection of controls, shafts and switches. The heavy-duty power wire-wound resistors are not furnished in this assortment—leaving space in the compartments and drawers for capacitors, lamp bulbs, solder, small tools and spare parts.

The "Serviceman's Assortment" is factory-packed with the following:

160—BTS resistors
115—BTA resistors
60—BW½ resistors
20—BW-1 resistors
22—AB power resistors
2—#41 switches
1—#42 switch
4—D13-133 controls
1—D13-133X control
1—D13-137 control
1—D13-137X control
1—D13-139 control
2—"E" shafts
1—"H" shaft

List Price: $80.12 **Net Price: $47.89**

RESIST-O-CABINET

End Cigar Box Confusion—
Keep Your Resistors in Order!

The sturdy, IRC Resist-O-Cabinet is specifically designed to hold resistors systematically and safely without the bending of leads. It puts an end to "cigar box confusion!" Its four "non-spill" drawers have seven ample-sized compartments in each which readily accommodate resistor sizes from ½ to 10 watts.

Attractively finished in blue, yellow and silver. Ohm's Law formulas neatly and permanently lithographed on top of cabinet for handy reference. Cabinet measures 11" long, 5½" high and 5½" deep. Bases of Resisto-O-Cabinets are arranged for stacking so that several cabinets may be used to increase stock capacity. This handy Resist-O-Cabinet is FREE with the purchase of any of the three well-balanced IRC resistor assortments listed. (Cabinet is not sold separately.)

ASSORTMENT No. 1—59 Resistors

Type BTS—One each 1,000, 4,700, 10,000, 27,000, 47,000 ohms; 0.1 meg, 0.27, 0.47 megs.

Type BTA—One each 39,000, 68,000 ohms; 0.15, 0.22 megs. Two each 1,000, 1,500, 2,200, 2,700, 4,700, 15,000, 27,000 ohms; 1.0, 2.2 megs. Three each 10,000, 47,000 ohms; 0.1 meg, 0.27, 0.47 megs.

Type AB 10 Watt—One each 1,000, 1,500, 2,500, 5,000 ohms. Two each 10,000 and 25,000 ohms.

Type ABA, 10 Watt Adjustable—One each 1,000, 2,500, 5,000, 10,000.

List price of Resistors, $15.03. **Net Price $9.02** (Cabinet Free)

ASSORTMENT No. 2—100 Resistors

Type BW-½—Two each 47, 100, 270 ohms.

Type BTS—Two each 3,300, 6,800, 33,000, 68,000, 82,000 ohms; 0.22, 0.33 megs. Three each 470, 1,500, 15,000, 22,000, 39,000 ohms; 0.15, 1.0, 2.2 megs. Five each 2,200, 2,700, 27,000 ohms; 0.27 megs. Six each 1,000, 4,700, 10,000, 47,000 ohms; 0.1, 0.47 megs.

List price of Resistors, $13.12. **Net Price $7.87** (Cabinet Free)

ASSORTMENT No. 3—83 Resistors

Type BW-1—Two each 47, 100, 270 ohms.

TYPE BTA—Two each 470, 1,500, 2,700, 3,300, 6,800, 33,000 39,000, 68,000, 82,000 ohms; 0.15, 0.22, 0.33, 1.0, 2.2 megs. Three each 15,000, 22,000, 27,000 ohms. Five each 1,000, 2,200, 4,700, 10,000, 47,000 ohms; 0.1, 0.27, 0.47 megs.

List price of Resistors, $14.11. **Net Price $8.47** (Cabinet Free)

1–D13-139X	2.0	F
1–D14-116	10,000	H
1–D16-119	20,000	B

A—Tone or Audio Circuit Control
B—Antenna Grid Bias Control
C—Potentiometer Voltage Divider
D—Tone Control
E—Tapped for A. V. C.
F—Tapped for Tone Compensation
G—Friction Clutch Auto Radio Type
H—Antenna Grid Bias of 2 Tubes

Switches: 5—No. 41 S.P.S.T.; 1—No. 42 D.P.S.T.
Shafts: 1—Type B Auto Radio; 4—Type E knurled and slotted—with thin web

IRC VOLUME CONTROL CABINET

For the Modern Service Shop

This handy stock of IRC Type D Universal Controls, quickly attached switches and easily installed shafts is factory-packed in an attractive all-metal cabinet. Proved by IRC Service Records to be a selection of the most popular controls—you can actually service over 87% of all replacements right from this cabinet. Here is your answer to speedier, more efficient servicing—reduction of costly exact-duplicate inventories—and modern appearance for your shop.

Cabinet measures 14½" long, 7⅜" high and 4½" wide. It is handsomely finished in yellow, blue and silver and provides separate compartments for controls and three handy drawers for switches, special shafts and spare parts. Each compartment and drawer is individually marked for identification. The hinged front cover snaps securely shut. The cabinet is furnished at no extra charge when factory- packed with the IRC controls, switches and shafts listed on the left. It is not sold separately.

ORDER YOUR IRC VOLUME CONTROL CABINET TODAY

List Price: $30.90 **Net Price: $18.54**

NEW IRC "JUNIOR" VOLUME CONTROL CABINET

IRC's latest volume control cabinet, popularly known as the "Jr." Control Cabinet, is a selection of the 9 "most-used" ½, 1 and 2 meg. Type D Controls, plus 4 switches and 4 additional shafts. Put this assortment of "hot-numbers" right to work on your bench—you'll use it every day.

The following IRC Type D Controls, Tap-In Shafts and Switches come factory-packed in the "Jr." Control Cabinet:

	IRC Control Type No.	Resistance	Purpose
5	D13-133	500,000	A
1	D13-133X	500,000	B
1	D13-137	1.0	A
1	D13-137X	1.0	B
1	D13-139	2.0	A

Purpose: A—Tone or Audio Circuit control; B—Tapped for tone compensation.

SWITCHES

3 #41 S.P.S.T.
1 #42 D.P.S.T.

SHAFTS

1 Type "A" double-flatted tap-in shaft is included with each control—plus:
3 Type "E" with universal knurl for special type push-on knobs.
1 Type "H" with universal groove for many Delco, RCA, Sears-Roebuck and Westinghouse models.

Sturdy cardboard cabinet measures 7¾"x7¾"x4½". It is attractively finished in yellow, blue and silver, and provides 4 drawers with 12 compartments individually identified for controls, shafts and switches.

Cabinet furnished at no extra cost.

List Price: $16.20 **Net Price: $9.72**

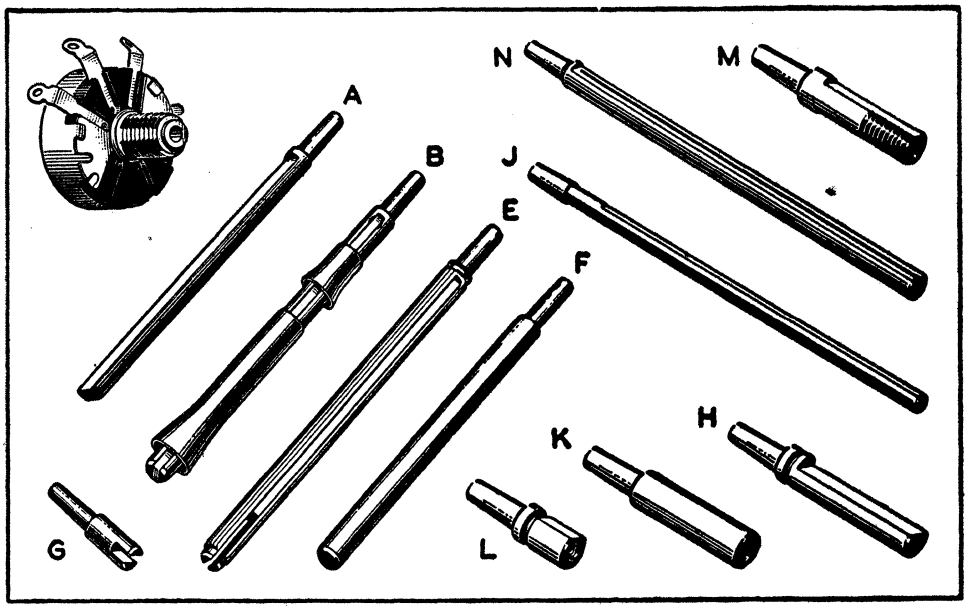
THE IRC "CENTURY" LINE

113 IRC CONTROLS THAT SOLVE 90% OF YOUR REPLACEMENT PROBLEMS



For miscellaneous service needs, 70 all-purpose controls are available for use with the popular IRC tap-in shafts. An A shaft is included with each control and shafts B, E, F, G, H, J, K, L, M and N may be had at slight extra cost.

Each D Control accommodates any of the eleven Tap-in Shaft types shown. Shaft flats may be located in any position. A few extra shafts greatly increase the utility of your D Control stock at a small investment. Of unusual convenience is the "Double-Flatted" A shaft, included with each D Control. Accommodates popular push-on knobs requiring either $\frac{1}{32}$" or $\frac{3}{32}$" flats and all set-screw knobs without filing of shaft or use of inserts. Dimensions: 1 ⅛" x $\frac{11}{16}$".

Single Control—Without switch .....List $1.25 **Net $0.75**
Tapped Control—Without switch .....List 1.85 **Net 1.11**
Prices include Shaft A packed with each control

	Rear	5.0 meg.	A

8 CLUTCH-TYPE DC CONTROLS

With Fixed Shafts

Practical for auto radio use and many other applications. Controls have friction clutch drive-arm and are equipped with a special shaft for use where either a slotted or tongued type shaft is required. Instructions tell how to cut shaft for either application. **Switches cannot be used with friction clutch controls.** Size same as Type D.

List Price $1.85 each, **Net $1.11 each**

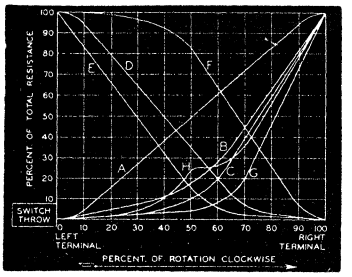
8 STANDARD TAPERS



A—Used as potentiometer or rheostat in any circuit where uniform resistance change is required.

B—A semi-logarithmic curve used as tone control or audio circuit control.

C—A logarithmic curve. Used as audio circuit control or antenna shunt control.

D—Tapered at both ends to provide control of grid bias and antenna circuit. Used where control of grid bias is of prime importance in controlling volume.

E—Used as a rheostat in cathode circuit to control grid bias.

F—Tapered at both ends to provide control of grid bias and antenna circuit. Used where control of grid bias is essential in controlling volume. Generally used where the control changes the grid bias of only one or two tubes. Must not be used with heavy currents.

G—A logarithmic curve with very gradual change in resistance from left terminal. Used as audio circuit control or antenna shunt control.

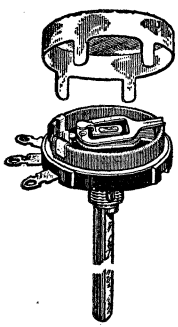
H—A tapped logarithmic curve used as audio level control for automatic bass compensation.

Copyright by U. C. P., Inc.

IRC VOLUME CONTROLS

Preferred for Performance

TYPE W WIRE WOUND CONTROLS



A dependable wire wound control of uniform resistance change for power requirements up to 2 watts. Tight, uniform windings assure utmost accuracy. Spiral Spring Connector between rotor arm and center terminal eliminates noise. Diameter 1¼"; depth behind panel $\frac{9}{16}$"; shaft length $2\frac{15}{16}$" from control face. Illustration shows cover removed, although covers are supplied with controls.

List without switch, $1.25; **Net 75c**

EXTENSION SHAFTS

These shafts attach to regular shafts, thus extending length to any needed size, and frequently make it possible to use standard controls for "special" jobs.

POWER RESISTORS

Preferred for Performance

IRC

"PREFERRED FOR PERFORMANCE"

Not only do these famous resistors excel electrically, but their "climate-proofed" cement coating provides the most dependable protection yet devised for resistors for heavy duty work. Both fixed and adjustable types are available. Mounting Brackets are packed with all resistors from 25 watts and up. One Adjustable Band is furnished with each adjustable resistor. The new Type X Band (described below) is included as standard on units of 25 watts and above. Extra bands supplied at prices indicated.

RESISTORS

Preferred for Performance

PRECISION Wire Wound RESISTORS

IRC Precision Wire Wound Resistors are scientifically designed and constructed of highest quality materials to combine the utmost in accuracy with dependability. Winding forms are of a non-hygroscopic ceramic having high insulation qualities, high mechanical strength and low-coefficient of expansion. Because of the special sectional construction which permits the winding of adjacent sections in opposite directions, a noninductive winding is made possible. This insures constant resistance at all frequencies up to 50,000 cycles.

These units are used by the leading instrument manufacturers for dependable precision meter multipliers and shunts, decade boxes and calibrated gain controls. 1% accuracy is standard. Closer tolerances available at slightly higher prices as follows: for ½% tolerance, add 10%; for ¼% accuracy, add 15%; and for 1/10 of 1%, add 25% to list prices.

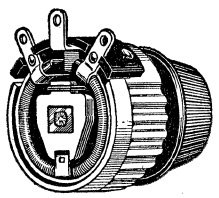
ALL-METAL RHEOSTATS



PR-25 (25 Watts)
$1\frac{31}{32}$" diam. Depth behind panel, $\frac{31}{32}$"

PR-50 (50 Watts)
$2\frac{3}{8}$" diam. Depth behind panel, $1\frac{3}{8}$"

Operating temperatures are cut almost in half by the unique, all-metal aluminum construction of these new IRC Rheostats. They dissipate heat more rapidly—give ample safety factor. Ratings based on hottest spot temp. rise of only 140 degrees C. with max. load distributed over entire element. With full load applied to as little as 25% of element, rise is only 160 degrees C. Exclusive IRC Spiral Connector gives positive contact between rotor arm and center terminal.

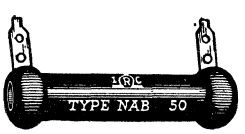
Type NAB Parasitic Suppressors

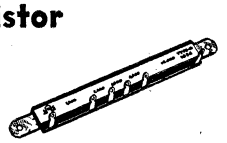
IRC Type NAB Non-Inductive Wire Wound Resistors are designed for use, one in each grid of audio driver or power amplifier tubes when paralleled, to prevent parasitic oscillations. 10 watts.



Type NAB—50 ohms.

List $1.17 each.....Net $0.70 each

Bleeder Resistor



Type M-1034—25,000 ohms, overall resistance, tapped at 7,500, 10,000, 12,500 and 15,000 ohms. 18 watts rating attached flat to chassis, 9 watts free air rating. Used as bleeder in any power supply up to 500 volts. Sealed in bakelite and insulated for 1,000 volts to ground. Bracket supplied.

M-1034—IRC Bleeder Resistor. List $1.25 each. Net 75c each.

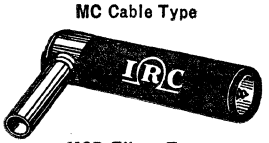
Center Tap Insulated Wire Wounds

Completely enclosed in molded bakelite and capable of standing high temperatures. Due to high power rating, these resistors may be used in balancing circuits for radio receivers or transmitters. They will carry up to five watts if mounted on chassis, using the detachable mounting bracket and heat-dissipating metal strip; or two and one-half watts if mounted in open air. May be mounted anywhere without danger to units from heat or grounding. **Dimensions:** Length of molded unit 2". With bracket mounting centers 2½". Six standard ranges: 10 ohms, 20 ohms, 50 ohms, 75 ohms, 100 ohms and 200 ohms.

Type MW-2J—Center Tap Resistors. List 35c each. Net 21c each.

Type MC and MCB Suppressors

MC Cable Type



MCB Elbow Type

IRC Suppressors are designed for the elimination of ignition noise in automobile and motorboat radio installations—and oil burner interference in home receivers.

Either Type: List 30¢ Net 18¢

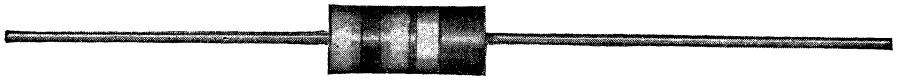
GENERAL ELECTRIC

COMPOSITION RESISTORS



½ WATT • 1 WATT • 2 WATTS

Meeting the rigid BF characteristics (most exacting requirements) of the joint Army-Navy Specification JAN-R-11, these Resistors will add that extra "plus" to any electronic equipment.

The allowance of a generous safety factor, a combination of small size, sturdy construction, excellent stability, high resistance to humidity, and more than ample insulation, make these resistors first choice on any list.

Specially engineered pigtail leads are constructed to increase their resistance to breakage, at the point where they enter the resistor body. Secure anchoring and heavy tinning of the leads, permits easy soldering.

G-E Composition Resistors may be operated at full rating in ambient temperatures up to 70° (158°F). 350 volts RMS may be applied continuously to the ½ watt unit, 500 volts RMS to the 1 watt unit, and 1000 volts RMS to the 2 watt unit, provided the wattage is not exceeded.

A part of the G-E Line of Electronic Parts, these resistors have met the G-E standards that have made G-E the first and greatest name in Electronics.

All resistance values are ± 10% and in accordance with R.M.A. standard progression.

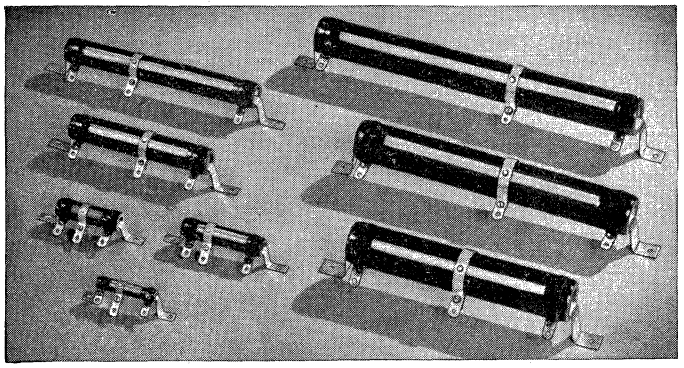
LECTROHM Vitreous Enameled RESISTORS

Quality—Accuracy—Dependability—Long Life



WIRE WOUND ADJUSTABLE TYPES

The same high quality and construction are used for LECTROHM Adjustable Resistors as are incorporated in LECTROHM fixed units.

These resistors are used for replacing voltage dividers in radio receivers, for radio transmitter power supply, and for general experimental work.

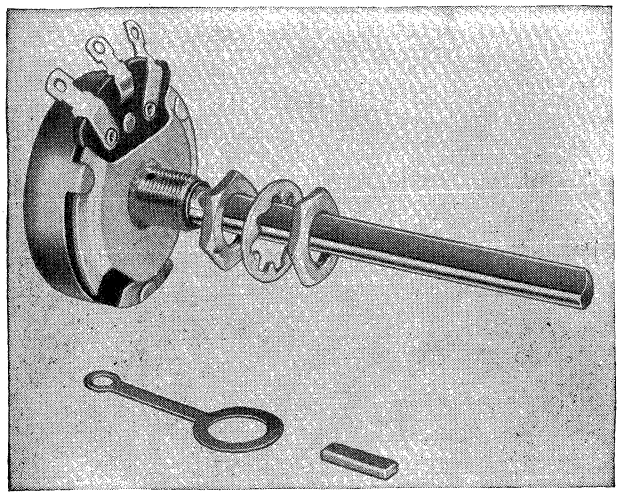
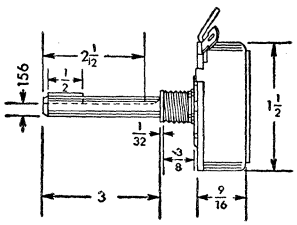
P. R. MALLORY & CO. INC. MALLORY UNIVERSAL STANDARD CONTROLS AND SWITCHES



STANDARD CARBON CONTROLS



● Mallory standard (1½-inch diameter) controls have detachable end cover plates, 3-inch channel shaft which may be easily cut to desired length, and knob adapter. In common with other Mallory controls, they have the features that assure satisfaction: quiet, smooth operation . . . gradual attenuation and long life . . . easy installation. Supplied with two No. 232 nuts, one No. 227 washer, and ground terminal.

LIST PRICE $1.25 (Switch is additional)

EXPLANATION OF TAPERS

● Taper Number 1 is a modified logarithmic left hand taper in the carbon type of control and an approximation to this logarithmic taper in the wire wound type. This taper should always be used in shunt circuits as in usual antenna and audio circuits, or where only the center and left hand terminals are used.

Taper Number 2 is a right hand logarithmic taper in the carbon and an approximation in the wire wound type. Used in series circuits, as in cathode voltage controls, or where only the center and right hand terminals are used.

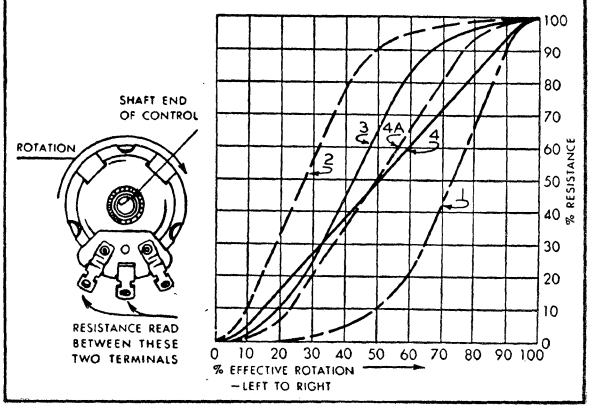
Taper Number 3 is a combination left and right hand taper. Has a limited use in circuits where the control must perform both as a shunt and as a series circuit control as in combination antenna shunt plus bias circuits. This is the most common use for such a taper.

Taper Number 4 is a linear taper. Strictly speaking it is not a "taper" although commonly referred to as such. A linear "taper" is used wherever a control should be such that voltage is proportional to the degree of rotation.

Taper Number 4A is a modification of the regular linear taper Number 4.

Taper Number 7 is made only in the wire wound type of control and is a form of left hand taper. This taper is desirable for the antenna shunt plus bias control, wherein greater attenuation is obtained by increasing the bias voltage. The slight left taper then suffices to gradually reduce the signal to zero volume by the shunting action in the antenna circuit.

TAPERS for Standard Controls



Attachable Switches (Standard)

For use with standard Universal Controls, Carbon and Wire Wound types, TRP Tapped Controls, and Universal Dual Controls.

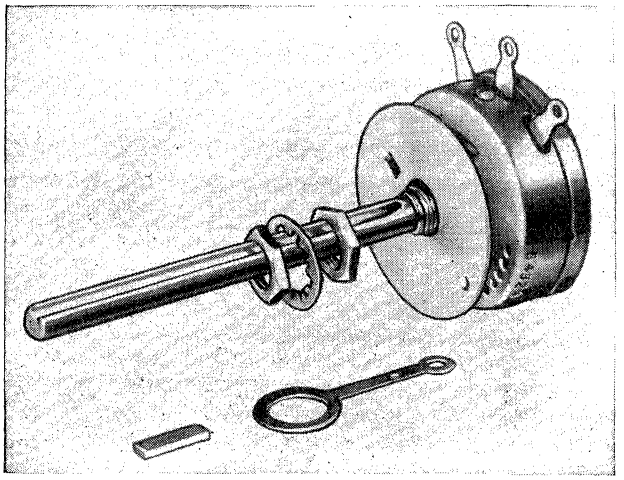
MALLORY UNIVERSAL WIRE-WOUND • DUAL • TAPPED CONTROLS



STANDARD WIRE-WOUND CONTROLS

● Mallory wire-wound controls have a nominal rating of 4 watts. Rugged resistance strip and contactor assemblies are completely enclosed in a dust-proof case. They have Universal channel shaft and insert to fit all types of knobs. Supplied with two No. 232 nuts, one No. 227 washer, and a ground terminal. See page 16 for attachable switches. Use Mallory dial plate No. 396 (Page 20) which compensates for rotation shorted out for switch action.

DTM • TRP DOUBLE TAPPED CONTROLS

● Type DTM's are midget (1⅛-inch diameter) controls with double tap and slotted shaft for use with the proper Type SS Plug-In Shaft for the individual application. One SS-1 shaft packed with each control. Two No. 232 nuts, one No. 227 washer, and a ground terminal are also included. See pages 14 and 15 for plug-in shafts and attachable switches.

Type TRP's listed below are standard (1½-inch diameter) controls with double tap and fixed channel shaft and insert to fit all knobs. Same hardware included as with DTM's. See page 16 for attachable switches.

LIST PRICE $1.85 (Switch is additional)

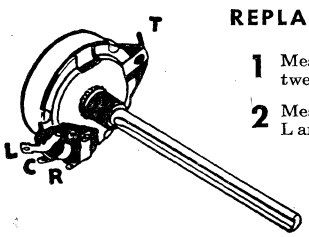
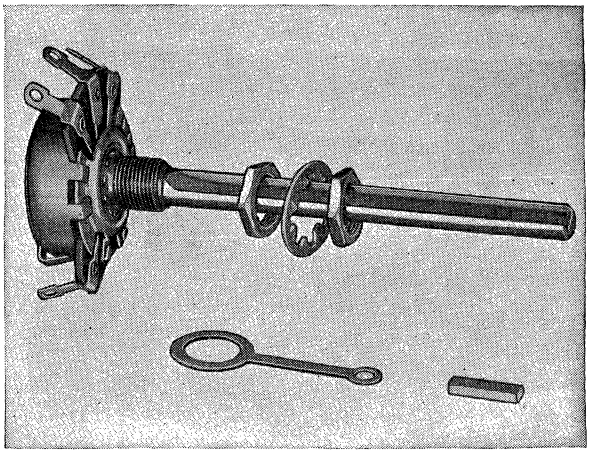
TO SELECT A MALLORY TAPPED REPLACEMENT CONTROL:

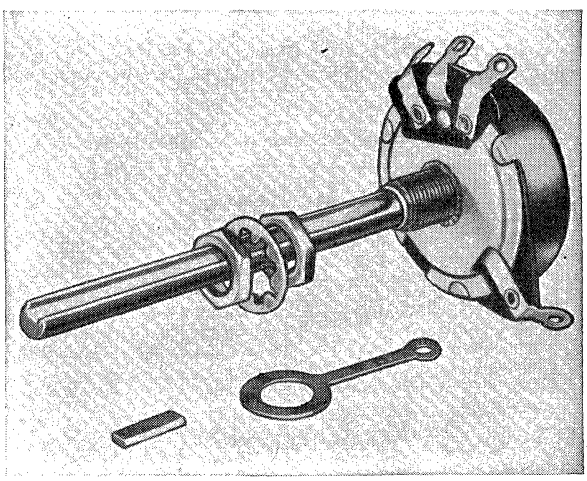


1. Measure overall resistance between L and R on old control.
2. Measure Tap resistance between L and T on old control.
3. Select Mallory Tapped replacement control having values nearest both those of the original.



MRT MIDGET CONTROLS WITH SINGLE TAP (Fixed Shaft)

Type MRT's are midget (1⅛-inch diameter) controls with single tap and fixed shaft for use in home radio receiver applications. Easy-to-cut channel shaft and insert fits all types of knobs. Midget switches listed on page 14 are easily attached. Two No. 232 nuts, one No. 227 washer and a ground terminal are included.



TRP STANDARD CONTROLS WITH SINGLE TAP

LIST PRICE $1.85

● Type TRP's are universal standard (1½-inch diameter) controls with single tap and fixed shaft. Where required shaft lengths are three inches or less, the TRP replaces large original controls using set screw or spring type knobs. Two No. 232 nuts, one No. 227 washer and a ground terminal are included. Attachable switches are shown on page 16.

MALLORY SPECIAL SINGLE AND DUAL CONTROLS

SRP STANDARD SPECIAL SINGLE CONTROLS

● Type SRP's are standard size Special Single Replacement Controls for use where the physical or electrical requirements of the original control cannot readily be met by Mallory controls of universal design. They should be used in accordance with the specific replacement recommendations of the 5th Edition Mallory Radio Service Encyclopedia.

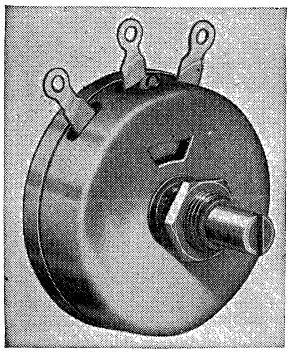
MALLORY INDUSTRIAL RHEOSTATS • POTENTIOMETERS



M

WIRE-WOUND TYPE VARIABLE RESISTORS

● Type M's are precision wire-wound potentiometers and rheostats with a normal rating of 4 watts, widely used in instruments where reliability is paramount. Ruggedly constructed—terminals are clamped under a live spring pressure of 600 lbs; resistance wire welded to terminals; silver-to-silver contact in time-tested design. Rheostats feature "off" position (no connection) type of construction which saves cost of switch. All Type M's have insulated contact arm, 294° rotation, 279° effective electrical rotation. One No. 232 nut included. See page 20 for No. 395 dial plate.

ATTENUATORS "T" PADS "L" PADS

● Specially designed to provide a convenient and simple method of controlling the level of low impedance audio circuits, and for volume control of microphones, electrical phonographs, talking picture amplifiers, and many varied sound amplifying and audio distribution systems.

These attenuators have a continuous DC dissipation rating of 4 watts in any position. They may be used with audio amplifiers having a peak audio rating of 15 watts.

Individually cartoned complete with No. 366 Bar Knob, No. 395 Dial Plate with matched rotation, two No. 232 Mounting Nuts, and one No. 227 Washer. Round shafts notched at ⅜-inch intervals for easy cutting.

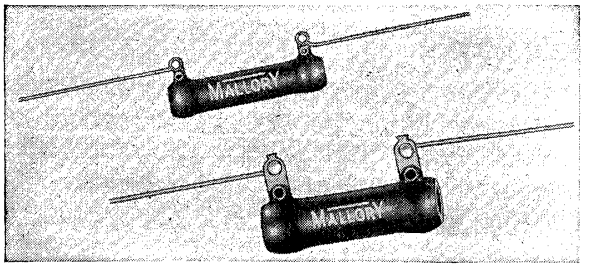
MALLORY VITREOUS ENAMELED FIXED RESISTORS



● Long considered standard by the industry, Mallory Vitreous Enamel Resistors in both the fixed and variable types are improved by war-born developments that mean even greater reliability, better appearance, greater accuracy—at no increase in price. Wound with an accuracy of ±5% (±10% for values of 50 ohms and less), these distinctive blue-coated resistors are capable of withstanding severe salt spray tests. Provided with a true vitreous enamel coating—a glossy covering that is impervious alike to the effects of moisture, fumes and heat. Baked at a temperature of 1200°F during manufacture.

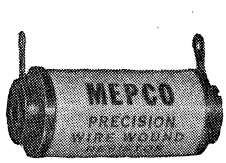
MEPCO TRU-TOLERANCE PRECISION RESISTORS

WIRE WOUND



WM 2

WM 1

WM 5

Mepco resistors are wound on highest quality non-hygroscopic forms, assuring high insulation value, low coefficient of expansion, high mechanical strength. Wire used is specially enameled to meet most rigid tests. A special feature of Mepco resistors is the insulation of all crossover wires on bobbin types to prevent shorts between down leads and windings. Two coats of special baking varnish to improve insulation and operating efficiency is another Mepco exclusive. This process not only resists heat better than wax, but also withstands humidity and salt water excepionally well. Tropicalized resistors available on request. Standard tolerance is 1%. Add 10% to list for ½% accuracy, 15% for ¼% accuracy, 25% for 1/10 of 1% accuracy.

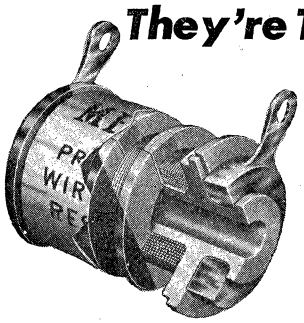
Why MEPCO "Tru Tolerance" RESISTORS are TOPS

with Manufacturers of Radio, Instruments Electronic Equipment



They're Triple Improved!

1. ADDED INTERNAL INSULATION
2. DOUBLE SEAL IMPREGNATION
3. ACETATE LABEL

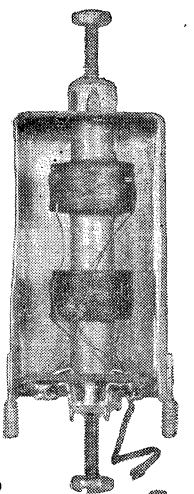
I. F. and R. F. TRANSFORMERS and CHOKES

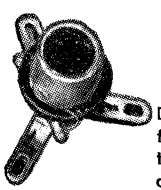
IF TRANSFORMERS

TYPE	FREQ.	PEAK FACTORY SETTING	USE
TRIMMER	455 kc. 456 kc.	within 2 kc.	input interstage output
IRON CORE	455 kc. 456 kc.	within 2 kc.	input interstage output



Standard, Midget and Cartwheel types.
Broadcast, F.M. and Television. Plug-in or Pig-tail.
Mepco features are: High Gain — Wide Range.
Trimmer types are Double-tuned mica-dielectric on ceramic or bakelite bases.

Iron core types are double permeability tuned.
Windings of highest grade Litz wire.
Available in 1⅛" square x 2½" long and 1¼" square x 2½" long cans.
Special Frequencies Available on Request



STANDARD OSCILLATOR COILS

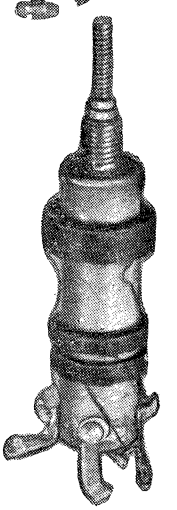
Designed to track on all frequencies. Two section or tapped circuit including capacity winding. Coils impregnated to resist severe climatic conditions.

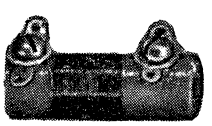
PHONO OSCILLATOR COILS

For record reproduction through radio. Slug tuned, manual adjustment, permitting minimum drift and limited frequency range. Midget sizes.

STANDARD ANTENNA AND R.F. COILS

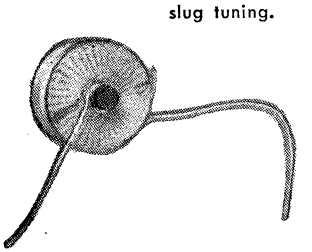
Humidity proofed, shielded or unshielded. Designed for condenser or slug tuning.



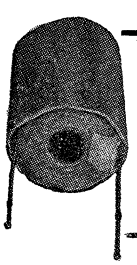


CHOKES

Air and iron core R.F. Chokes for all applications including tone control. Transmitter chokes 2.5 to 8 milli-henries—Standard inductances. Self-resonant midget chokes.



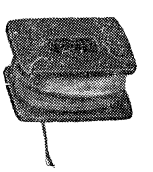
WAVE TRAPS



SHUNT TRACKING COILS

SPECIAL COILS

All types of layer wound, random wound, and bobbin wound coils. Wound for special and unusual applications as well as standard uses. MEPCO winds to customers' specifications. Prices of all units available on request.



PRICES OF ALL UNITS AVAILABLE ON REQUEST.

OHMITE ★ RHEOSTATS RESISTORS SWITCHES CHOKES

OHMITE RHEOSTATS

All-Porcelain — Vitreous-Enameled

The design and construction of these sturdy, compact Ohmite Rheostats insure permanently smooth, gradual, close control. The wire is wound over a porcelain core, bonded to porcelain base, and permanently locked in place by special Ohmite Vitreous Enamel. Nothing to smoke, char, shrink, or shift. Dissipates heat rapidly. Insulated shafts and bushings. Copper graphite contacts. Ratings are for "free air" use. Time-proved through long trouble-free service in countless installations the world over. Underwriters' Laboratories Listed.

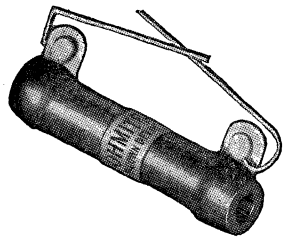
Popular OHMITE "BROWN DEVIL" RESISTORS



High quality, small size, wire wound resistors ideal for voltage dropping, bias units, bleeders, etc. They're extra-sturdy, all-porcelain, vitreous enameled. They give time-proved protection against shock, vibration, heat and humidity. Their long record of continuous trouble-free service—their wide use in all climates of the world—prove their complete reliability and economy. All units have 1½" tinned wire leads.

10 Watt—1¾" x 5/16" Core Size

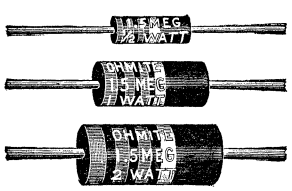
NEW OHMITE "LITTLE DEVIL" RESISTORS



INDIVIDUALLY MARKED

Ohmite Little Devils are full ½ Watt, 1 Watt and 2 Watt Insulated Composition Resistors and can be used at their full wattage ratings at 70°C (158°F) ambient temperature. They meet requirements of specification JAN-R-11. All units are color coded. Each resistor is marked with the resistance value, wattage rating and the Ohmite trade mark. AVAILABLE ONLY FROM OHMITE DISTRIBUTORS.

Stocked in RMA Values ±10% Tol.

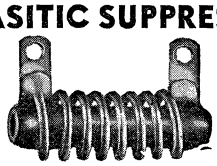
PARASITIC SUPPRESSOR



Designed to prevent unwanted ultra-high-frequency parasitic oscillations which occur in the plate and grid leads of push-pull and parallel tube circuits. The parasitics are suppressed without loss of driving power.

The P-300 is a non-inductive, vitreous-enameled resistor combined with a choke into one small integral unit. Only 1¾" long overall and ⅝" diameter.

Model P-300. List Price.....$1.95

OHMITE "WIREWATT" RESISTORS

1 Watt wire-wound Resistor

Wire-wound on porcelain and insulated with low temperature enamel. Ends of the wire are mechanically locked and then brazed to terminal lugs to insure freedom from noise. 1½" tinned wire leads. RMA color coded, and labeled with the resistance. Size 1¾" x ¼".

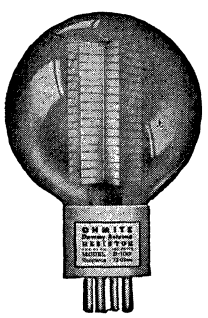
OHMITE DUMMY ANTENNA

To Check R.F. Power and Tune Up to Peak Efficiency



A compact, high-wattage resistor suitable for high radio-frequency measurements. Non-inductive, non-capacitive, constant in resistance. Used to determine transmission line losses—to check line to antenna impedance match—to keep signal off the air while tuning up—to eliminate unnecessary interference—and generally useful as a non-inductive resistor in other R. F. Circuits.

Space-wound resistance element of unusual design, mounted in a glass bulb, evacuated and gas filled. Four-prong steatite standard tube base.

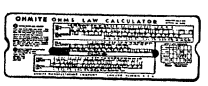
Model D-100. 100 Watt rating. In popular 73 ohm and 600 ohm resistance values. Also in 13, 18, 34, 64, 100, 146, 219, 300, 400, 500 ohm values. Diameter 3⅛". Height (from bottom of base) 4⅜".
List Price **$8.45**

Model D-250. 250 Watt rating. In 73 ohm and 600 ohm stock resistances. Diameter of bulb 2½". Height 9 1/16" (from bottom of base).
List Price **$16.90**

Non-Inductive Vitreous-Enameled Resistors also available. See Ohmite Stock Catalog.

NEW OHM'S LAW CALCULATOR

Pocket Size

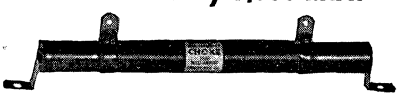


Solves Ohm's Law problems with only one setting of the slide. No decimal points to cause confusion—all values are direct reading. Requires no slide rule knowledge.

Ohmite Ohm's Law Calculator....NET Price $0.25

OHMITE R.F. PLATE CHOKES

Built to Carry 1,000 M.A.



High frequency solenoid chokes designed to avoid fundamental or harmonic resonance in the amateur bands. Single-layer wound on low power factor steatite core—insulated and protected by moisture-proof coating. No portion can resonate independently of any other portion. Designed also to prohibit breakdown from high R. F. potentials. Ample space allowed at the ends to prevent flashover to ground. Non-magnetic mounting brackets furnished with the three larger sizes. Rated at 1,000 milliamperes. May be used in diathermy and therapeutic equipment as well as in radio transmitters.

Stock No.	Amateur Band, Meters	Micro-henries	Current Rating	D.C. Resistance Ohms	Lgth.	Tube Dia.	List Price
Z-0	2½	2.0	1,000 M.A.	0.19	1¾"	¼"	**$0.33**

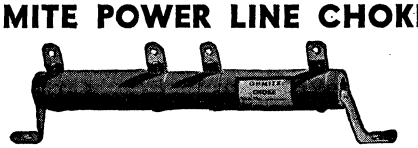
Z-4	20, 40, 80 and 160	200	1,000 M.A.	9	6½"	¾"	**2.15**

OHMITE POWER LINE CHOKES



Prevents high-frequency currents of radio transmitters, diathermy and therapeutic equipment from going out over the power lines and interfering with nearby radio receiving sets. Used as a filter in connection with two grounding condensers of 0.1 microfarad capacity each. The Z-20 Choke is also used at radio receivers to keep out interference. All chokes consist of two single-layer windings on a single ceramic core—insulated and protected by moisture-proof coating. Recommended for use in suppressing radio (not audio) frequency interference.

Stock No.	Micro-henries	Current Rating	Total D.C. Resistance Ohms	Lgth.	Tube Dia.	List Price
Z-20	14	5 Amperes	0.15	4"	1/16"	**$2.15**

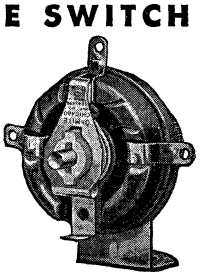
Z-22	18	20 Amperes	0.045	8½"	1⅛"	**5.20**

TRANSMITTER BAND CHANGE AND HIGH VOLTAGE SWITCH



For the rapid, convenient change of transmitter frequency by front-of-panel knob control. Suitable for circuits up to 1 K. W. rating. Adaptable for general use requiring high voltage insulation.

Model BC-3. Complete with Knob and Mounting Bracket.
List Price **$4.29**

TYPES 183 AND 193—±1% IN COMMON VALUES—IN STOCK

In addition to the popular standard types listed here, Shallcross Akra-Ohm Resistors are made in a complete line of standard and special designs for precise electronic equipment demanding great stability and long life even under difficult conditions of temperature and humidity.

Shallcross achievements include the development of really practical hermetically-sealed units; BX processed resistors "tropicalized" against moisture and fungus; the use of spun glass insulated wire for applications where considerable power must be dissipated; bifilar wound resistors, 1000 ohms or less, for exacting instrument use; heavy-duty surge resistors; accurate heavy-duty power resistors, and various others. Write for the Shallcross "Engineering Data" wall and file Chart.

ACCURATE FIXED WIRE-WOUND TYPES (JAN R93) PRICES ON REQUEST.

Shallcross Type	** JAN Style	Wattage	* Maximum Ohms	Std. Terminal	Mounting	Dimensions Length—Diam.

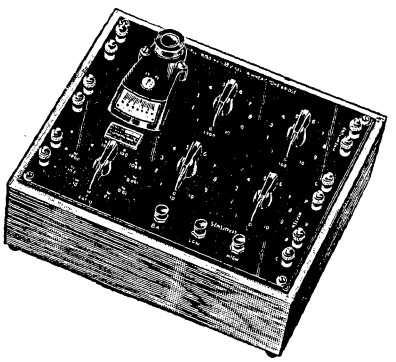
SHALLCROSS D-C BRIDGES



No. 638–2
KELVIN WHEATSTONE BRIDGE

Resistance range 0.0001 ohm to 11.11 megohms

SPECIFICATIONS

ACCURACY—0.3% between 1.0 ohm and 11.11 megohms. Below 0.1 ohm, 3%.

GALVANOMETER—Built-in—sensitivity 0.25 micro-ampere per millimeter division.

RHEOSTAT ARM—Four decades—1.0 ohm steps in Wheatstone and 1.0 micro-ohm steps in Kelvin ranges.

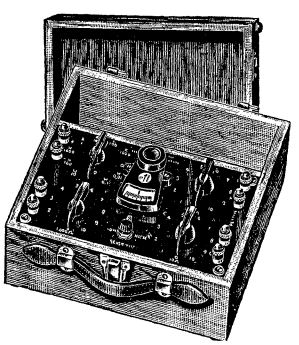
RESISTANCE BOX—Binding posts allow using rheostat as Resistance Box.

SEPARATE KEYS—Provided for battery and galvanometer circuits.

CASE—Carrying type with removable cover (not illustrated) and compartment for 4½ volt battery (not supplied) for Wheatstone range measurements.

DIMENSIONS—Length 12¼″, width 10⅛″, height 6½″.

WEIGHT—Approx. 9 lbs. Price $160.00



No. 637
KELVIN WHEATSTONE BRIDGE

Resistance range 0.001 ohm to 11.1 megohms

SPECIFICATIONS—Same as No. 638–2 except:

ACCURACY—1.0% between 1.0 ohm and 1.0 megohm; 2.0% above 1.0 megohm; and 3.0% below 0.1 ohm.

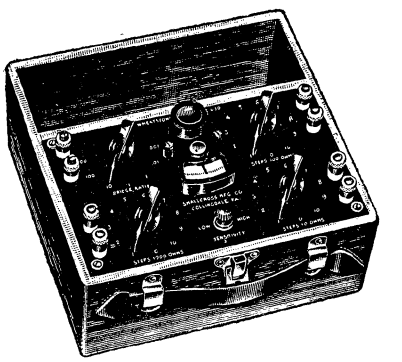
GALVANOMETER—Sensitivity 1.0 micro-ampere per millimeter division. Built-in.

RHEOSTAT ARM—Three decades—10 ohm steps in Wheatstone and 10 micro-ohm steps in Kelvin ranges.

CANNOT be used as Resistance Box.

DIMENSIONS—Length 10″, width 9¾″, height 5¼″.

WEIGHT—Approx. 7 lbs. Price $105.00



No. 630
WHEATSTONE BRIDGE

Resistance range from 0.1 ohm to 11.1 megohms

SPECIFICATIONS

ACCURACY—1.0% between 10 ohms and 1.0 megohm—2% over 1 megohm.

COMPONENT RESISTORS—0.1% accurate except 1 ohm, which are 0.25%.

RHEOSTAT ARM—Three decades—variable in 10.0 ohm steps.

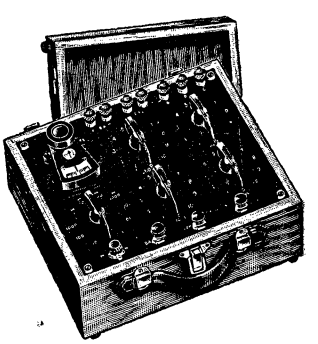
RESISTANCE BOX—Binding posts allow using rheostat as Resistance Box.

CAM SWITCH—Provided for battery and galvanometer circuits.

CASE—Carrying type with removable cover and compartment for batteries and leads (not supplied).

DIMENSIONS—Length 10″, width 9¾″, height 5¼″.

WEIGHT—Approx. 6 lbs. Price $80.00



No. 629
FAULT LOCATION BRIDGE

Resistance range 0.1 ohm to 11.11 megohms

SPECIFICATIONS

ACCURACY—COMPONENT RESISTORS—0.1% accurate except 1.0 ohm, which are 0.25%.

GALVANOMETER—Built-in—sensitivity 1.0 micro-ampere per mm. division.

RHEOSTAT ARM—Four decades—11,110 ohms—variable in 1 ohm steps.

RATIO DIAL—Marked 0.001, 0.01, 0.1, 1.0, 10.0, 100 and 1000 for resistance measurements and Varley tests. M1, M 10, M 100 and M 1000 for Murray tests.

SEPARATE KEYS—Provided for battery and galvanometer circuits.

CASE—Carrying type with removable cover, concealed compartment for 4½ volt battery (not supplied).

BINDING POSTS—Provided for use of external galvanometer where required.

DIMENSIONS—Length 10⅜″, width 8⅞″, height 5⅝″.

WEIGHT—Approx. 7 lbs. Price $90.00

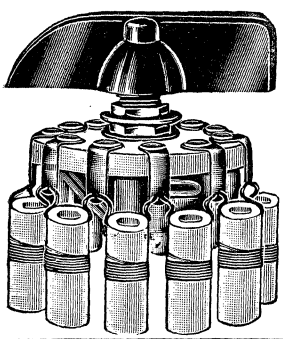
UNMOUNTED DECADE RESISTANCES



In response to a demand from engineers, manufacturers and physicists who design and construct their own electrical measuring instruments, we have made the Shallcross Unmounted Decade Resistances available. They are of the same construction as those used in the popular Shallcross Resistance Decades described above and consist of ten Shallcross Resistors mounted on a ceramic instrument switch.

SPECIFICATIONS

Type No.	Total Resistance Ohms	Unit Resistance Ohms	Switch No.	Accuracy	Price
435	1.0	.1	536	1.0%	$8.00
436	10	1.0	531	0.25%	8.00

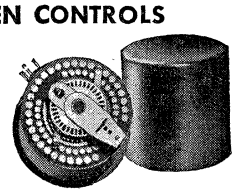
SHALLCROSS VARIATEN CONTROLS AND FIXED PADS



Type 0411 (with detent)

Shallcross Variaten (variable attenuator) controls are characterized by their smooth quiet action, low noise level, trouble free service, and long life. Zero temperature coefficient resistance alloy non-inductively wire-wound resistors are used in all Shallcross Variaten controls. Variaten controls can be used up to 30 kc. with no leakage. The resistance networks are completely impregnated in a special compound protecting the unit against moisture and shock.

The Variaten controls listed in the table below are a very few of the wide variety of standard and special attenuators manufactured by Shallcross. Other standard types not listed include turntable faders, loudspeaker controls, matching attenuators, VI and VU meter range extenders, balanced H attenuators, and carbon and wire-wound potentiometers.

Type New No.	Type Old No.	No. of Steps	Db. per Step	Description and Circuit	List Price

....	2702	....	....	Fixed pad—T	$3.00
....	2702	....	....	Fixed pad—H	3.30

Shallcross Variaten controls are available in any impedance combination on special order; standard impedances either in or out, are 600 – 500 – 250 – 200 – 50 – 30 ohms. Detents (indexing devices) are also available on order. Knob or dial for any type $.50 extra for each.

Shallcross Fixed Pads No. 2702 can be furnished in any loss value up to 40 db. Resistor accuracy ±2%. Size: 1½" x ⅞" x 1 5/16". They are also available in a wide variety of other circuits on request.

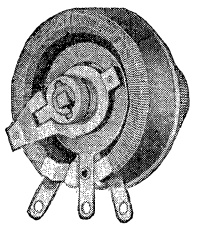
WARD LEONARD • VITROHM RESISTORS and RHEOSTATS

VITROHM RING TYPE RHEOSTATS



The core and base of Ward Leonard Ring Type Rheostats are made of the highest grade ceramic materials. The resistance wire is wound toroidally on the core, and is coated with a tough, heat resistant, acid resistant, crazeless vitreous enamel.

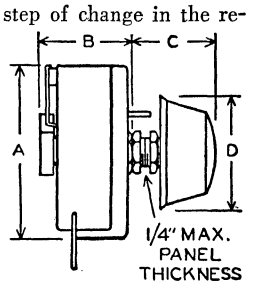
The contact is a special alloy and is of large area to avoid sticking, pitting, local heating, or oxidation when setting remains fixed for a long period of time.

Watt Ratings

Based on continuous operation in free air with a temperature rise not to exceed 300° C, which is within the limits specified by Underwriters' Laboratories and NEMA.

Number of Steps

Each turn of resistance wire on the core of a Vitrohm Ring Type Rheostat constitutes a step of change in the resistance value.



Vitrohm Ring Type Rheostats are made with three terminals with no "off" position, and can be used as potentiometers or rheostats, as desired. Rheostats with an "off" position can be furnished on special order.

Heavy Duty Rheostats

Pressed steel plate type.

300 watts — 1 to 2500 ohms, 20 steps, 6" diameter.
500 watts — 1 to 5000 ohms, 33 steps, 8" diameter.

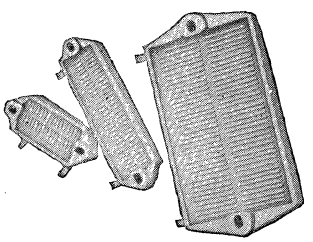
VITROHM PLAQUE RESISTORS



Vitrohm Plaque Resistors are flat in form. The resistance wire is arranged on a rectangular ceramic base to give the lowest obtainable values of inductance and distributed capacitance. Inductance at frequencies up to 1000 kilocycles and distributed capacitance up to 5 megacycles are so low in value that they are negligible.

Vitrohm Plaque Resistors are rated 20, 40, and 125 watts with full ventilation. Since full ventilation is usually impossible to attain, the watt rating should be decreased to compensate for the reduction in ventilation. A single plaque resistor mounted on a panel should operate safely about 80% of the full watt rating.

WARD LEONARD • VITROHM RESISTORS and RHEOSTATS

VITROHM FIXED RESISTORS

Wire wound resistors, sturdy construction, using low temperature coefficient materials. Coated with Ward Leonard's own crazeless Green Enamel.

5 WATTS — Type 5F

Size 1" x 5/16" No Mounting Brackets

WARD LEONARD · VITROHM RESISTORS and RHEOSTATS

ADJUSTABLE RESISTORS -- ADJUSTOHMS

Adjustohm Resistors are for use in any application where it is necessary or desirable to have one or more intermediate resistance values; or in circuits that need to be changed from time to time to meet varying electrical conditions.

Adjustohm Resistors are built of the highest grade low temperature coefficient materials, and are coated with Ward Leonard's tough crazeless Vitreous Enamel.

WATT RATINGS

Nominal watt ratings for Adjustohm Resistors apply when the entire resistor is in the circuit. For most practical purposes the watt rating for each part of the resistor is approximately proportional to the amount of the resistance that is in the circuit.

Mounting brackets are furnished with all Adjustohm Resistors, except the 10-watt size, Type 10A.

Price of resistor includes brackets and one adjustable band.

ADJUSTABLE BANDS

Each Adjustohm Resistor is furnished with one Screw - Driver Type Adjustable Band Terminal (at right in illustration). Additional band terminals are available. See list in the accompanying table.

Size of Resistor	Screw Driver Type		Bakelite Knob Type	
	Cat. No.	Price	Cat. No.	Price

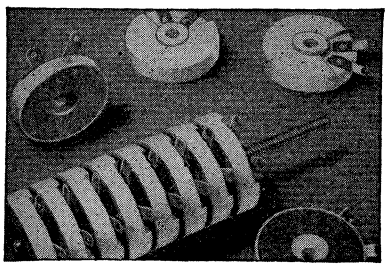
WARD LEONARD · VITROHM RESISTORS and RHEOSTATS

DISCOHM RESISTORS

18 WATTS Type 18D



Discohms are flat refractory discs having resistance wire arranged to minimize the values of inductance and distributed capacitance.

Discohm Resistors are especially useful in equipments where space is limited and where a power resistor having low value of inductance and distributed capacitance is required.

They are mounted by means of No. 8 wood screw or bolt through the countersunk hole cast in the refractory base. Two or more units can be mounted together to obtain various resistance values and watt ratings.

Discohm Resistors are rated at 18 watts with free ventilation. A single Resistor mounted on a panel should operate safely at 80% of the full watt rating or 90% of the full current rating.

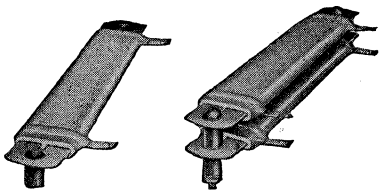
VITROHM STRIP RESISTORS

Vitrohm Strip Resistors lend themselves readily to applications where space is limited, such as aircraft control circuits, radio instruments, and similar apparatus.

Vitrohm Strip Resistors are built on a strong flat reinforced core that has no sharp angular surfaces, providing a smooth continuous form of the resistance winding. The resistors are vitreous enamel coated.



Each unit is fitted with a self-sustained mounting bracket and spacer, the end pieces being riveted to a metal strip that passes through the core and serves as a conductor for the internal heat generated while the resistor is in service.

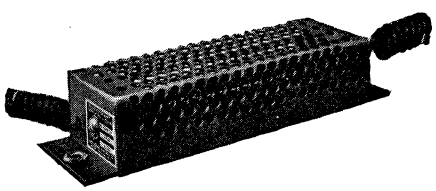
6	6¾	1.40	66,000	75

FLUORESCENT LAMP RESISTORS

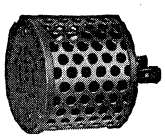


Ward Leonard Fluorescent Lamp Resistors are designed for use in buorescent lamps operating on direct current. They meet the requirements of lamp and fixture manufacturers and are listed as standard by the Underwriters' Laboratories, Inc., and by the New York City Department of Water Supply, Gas and Electricity.

Ward Leonard Fluorescent Lamp Resistors are mounted in well-ventilated metal enclosures for installation on standard fixtures. They are made for use on 115-volt, 120-volt and 220-volt circuits and in various resistance values to meet the requirements of the lamps with which they are to be used.

Long, flexible asbestos covered leads facilitate connections.

Plug-In Type
For Portable Fixtures



Ward Leonard also provides a Fluorescent Lamp Resistor in a metal enclosure for use with portable lamps operating on 120-volt circuits. It is fitted with a plug on one end for inserting into the line receptacle and a receptacle on the other end into which the plug on the figure is placed.

The Plug-In Resistor is made for use on 15-watt and 20-watt lamp fixtures.

LINE VOLTAGE REDUCERS

Ward Leonard Line Voltage Reducers protect radio sets, soldering irons, Christmas tree lamp strings, and other electrical appliances within the ratings of the Reducers, from high line voltage.

Line Voltage Reducers consist of a resistor network encased in a perforated metal enclosure provided with standard parallel prongs on one end and a standard receptacle on the other. Connection is made by plugging the Reducer into a receptacle and then inserting the plug on the appliance in the receptacle on the enclosure.

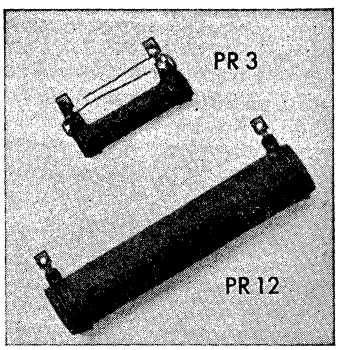
WIRT WIRE WOUND FIXED RESISTORS

WIRE WOUND FIXED RESISTORS



To satisfy the most exacting needs of the Radio and Electronic Industries, Wirt Fixed Wire-wound Resistors are regularly furnished in PHENOCOTE protective coatings, developed and steadily improved over a period of many years in the Wirt Laboratories. The resistor wire is space wound on low loss ceramic tubes. The PHENOCOTE covering is an exclusive organic cement coating offering maximum protection to the resistance winding against the detrimental effects of moisture, humidity and electrolysis. Absolutely inert chemically, it will not effect the most delicate windings. It is particularly recommended for fine wire sizes and all applications where the maximum temperature of the unit will not exceed 300° F. These Resistors are universally used in the Radio, Electronic, Instrument, Public Address and Test Equipment fields.

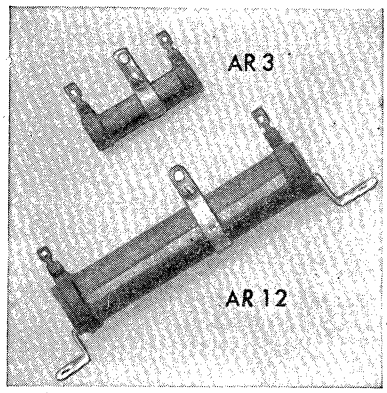
WIRT

WIRE WOUND ADJUSTABLE RESISTORS



WIRE WOUND ADJUSTABLE RESISTORS

WIRT Adjustable Resistors are space wound on low loss ceramic tubes to which the resistance wire is bonded, resulting in dependability and long life. Protection of the windings is afforded by the PHENOCOTE covering which is described fully on the preceeding page. One adjustable Slider Band, screw driver type, is furnished as standard. Bakelite knob type bands can be furnished on special order at slightly higher prices as shown below. These bands are made with small contact buttons located on the inside of the band so that a number of taps may be made without shorting out excessive resistance.

WIRT

MINIATURE RHEOSTATS and POTENTIOMETERS

MINIATURE RHEOSTATS AND POTENTIOMETERS

General: WIRT Metal Housed Rheostats and Potentiometers are rugged and compact affording high quality and dependability in operation. Due to size and construction these controls are moderately priced. Housings are made of tin-plated steel. Highest quality resistance wire is space wound on specially treated laminated phenolic strips. The Phosphor Bronze contact-arm is grounded to the metal casing and all terminals are silver plated. Switches cannot be furnished. These Rheostats and Potentiometers are adaptable to a wide variety of uses in the Radio Instrument, Electronic and Test Equipment fields. The types available are listed below:

Cat. No. WC801—Two Terminal Rheostat, 2 Watt rating. Resistance Range: 5 ohms to 10,000 ohms with linear winding and standard tolerance of ±15%. Diameter is 1⅛" and thickness ½". Shaft is Cadmium plated steel, grounded to housing. 5/32" from end of bushing and slotted for screw driver adjustment. Brass mounting bushings, ⅜"-32 x ¼" long are standard. Each control is equipped with one 9/16" hex mounting nut. **List Price** ..... **$0.90 Each**

Cat. No. WC802—Three Terminal Potentiometer. 2 Watt rating. Resistance Range: 5 ohms to 10,000 ohms with linear winding and standard tolerance ±15%. All other specifications are the same as those listed under the WC801 control shown above. **List Price** ..... **$1.25 Each**

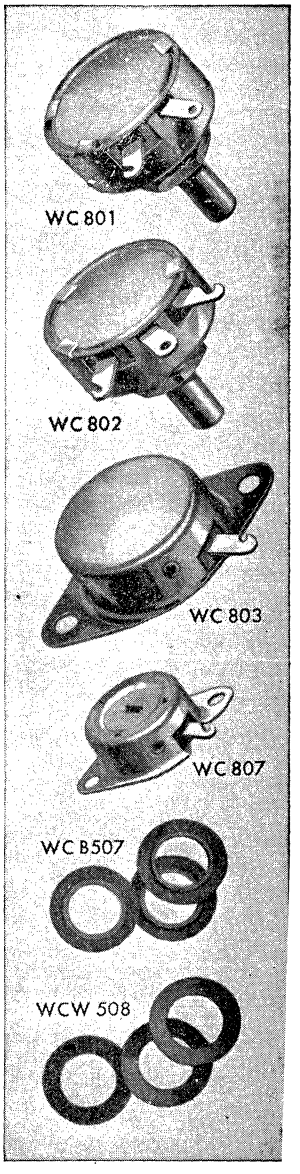
Cat. No. WC803—Sensitivity Control, 2 Watt rating. Resistance Range: 5 ohms to 12,000 ohms with linear winding and standard tolerance of ±15%. Diameter is 1⅛" and thickness is ½". A slot is provided in the Rotor mechanism allowing for screw driver adjustment from front only. **List Price** ..... **$0.50 Each**

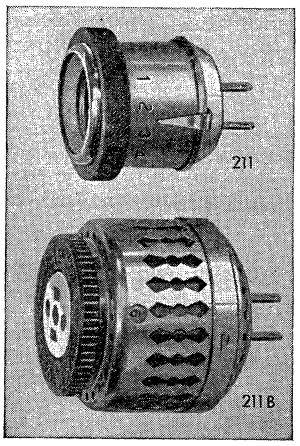
Cat. No. WC804—Sensitivity Control. Identical with WC803 Control, except provided with an opening in back of control to permit screw driver adjustment from either front or back. **List Price** ..... **$0.55 Each**

Cat. No. WC807—Miniature Sensitivity Control, 1.5 Watt rating. Resistance Range: 5 ohms to 3000 ohms with uniform winding and standard tolerance of ±15%. A slot is provided in the Rotor mechanism allowing for screw driver adjustment from either front or back. **List Price** ..... **$0.50 Each**

Cat. No. WCB507—Insulating Bushing for ⅜" Brass bushing and used with Cat. Nos. WC801 and WC802 Controls. **List Price** ..... **$.095 Each**

Cat. No. WCW508—Insulating Washer for ⅜" Brass bushing and used with Cat. Nos. WC801 and WC802 Controls. **List Price** ..... **$0.75 Each**



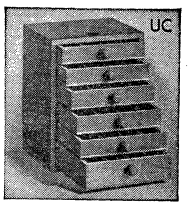


VARIABLE VOLTAGE REGULATOR

Cat. No. 211 — Variable Voltage Regulator is wound with high quality alloy wire on an insulated metal core with the winding encased in Di-El-Ite. It can be used as a Radio Voltage Regulator where the Receiver draws not more than 65 watts. For industrial use it can be wound up to 600 ohms maximum and will dissipate up to 8 watts. It is adjustable to 5 positions.
List Price ..... **$3.00 Each**

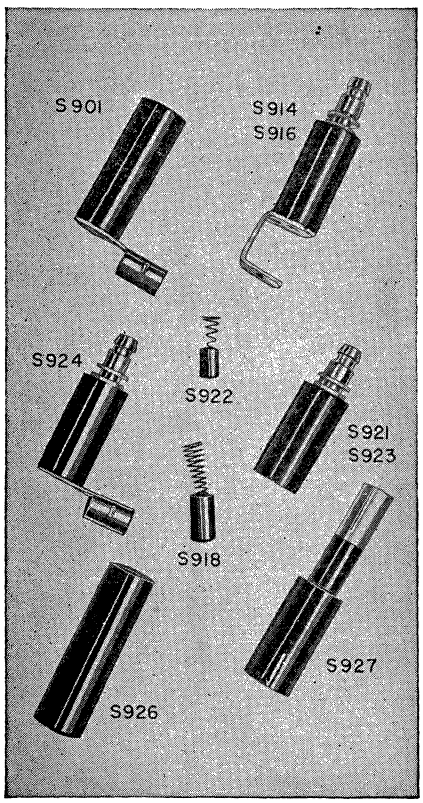
Cat. No. 211-B—Regulator has air-cooling features which promote rapid heat dissipation. When used as a Radio Voltage Regulator the Receiver must not draw more than 150 watts. In industrial use for control of voltage and to regulate speed or heat it can be wound with a maximum resistance of 300 ohms and can dissipate up to 20 watts with maximum resistance setting. It is adjustable to 8 positions. **List**..... **$5.00 Each**

UTILITY CABINET



Cat. No. UC—Utility Cabinet is constructed of bass wood with corners dadoed and glued for strength; varnished and rubbed to give a beautiful finish. It has six drawers, each one having three removable partitions. The upper five drawers are 1" deep and the lower one is 1½" deep. Overall dimensions of the cabinet are 7" wide by 5⅝" deep by 9" high. Drawer guides, bottom and partitions are made of three ply laminated wood to prevent warping. Knobs are of wood and securely fastened. It is ideal for the storage of such parts as resistors, condensers, bolts, nuts, washers, small tools, etc. **List**..... **$8.00 Each**

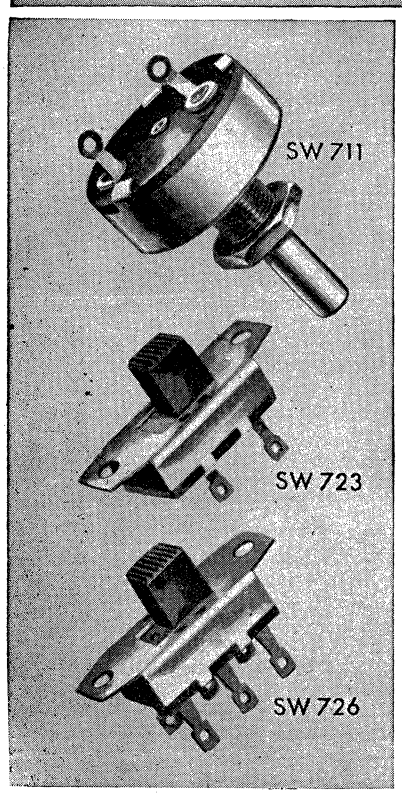
WIRT SUPPRESSORS and SWITCHES



AUTO RADIO IGNITION SUPPRESSORS

Wirt Suppressors are made with moulded black bakelite housings. All metal parts are made of rugged unfinished brass. Terminals are securely fastened to casings and sealed with special moisture and heat resisting dielectric cement. Resistor pills are sprayed with zinc and then double impregnated with a special moisture-proofing compound. Resistance value of all standard types is 10000 ohms ±20%; for FV8 types 50000 ohms ±20%. The distributed capacity is less than 1.5 mmf. Resistance values will not change more than 7% after being submerged in water for 100 hours. Test by sparking 1800 times per minute at 10,000 volts for 100 hours produces resistance change of not more than 3%. Wirt Suppressors are impervious to heat, oil, moisture and mild acids, and will not change in resistance more than 10% in 50,000 miles of operation.

Cat. No.	Type	List Price
S914	Bracket—Standard	$0.40 Each
S916	Bracket—For FV-8	.40 Each
S918	FV-8 Brush—Years 1933-34-35	.40 Each
S922	FV-8 Brush—Years 1936 to 1940	.40 Each
S921	Universal Screw—Standard	.40 Each
S923	Universal Screw—For FV-8	.40 Each
S924	Snap-on Plug	.40 Each
S926	Cable—Screw Fitting	.40 Each
S927	Distributor—Screw Fitting	.40 Each



WIRT ROTARY AND SLIDE SWITCHES

Rotary Switches

General: Wirt Rotary Switches are of the quick break type, have positive contact, are rugged and neat in appearance. They are constructed with tin plated steel housings. The outside diameter of the switch is 1⅛" and thickness ½". Standard bushings are of brass, ⅜"-32 x ⅜" long. Steel shafts are ⅝" from end of bushing, and made with a flat. Wiping contacts and terminals are silver plated. Terminals are securely fastened in place. Activating spring is positive in action. One 9/16" hex. nut is furnished. These switches are successfully used in conjunction with Radio, Phonograph, Signal and Instrument Circuits.

Cat. No.	Type	List Price
SW711	—SPST Rotary Switch, 3A-125V-AC-DC 2 Terminals	$0.50 Each
SW711A	—SPDT Rotary Switch, 3A-125V-AC-DC 3 Terminals	.55 Each

Slide Switches

General: All Wirt Slide Switches are compact and sturdy. Housings are made of steel and are cadmium plated. The physical dimensions of the switches have been standardized, width 35/64", length 1-13/32" and mounting centers 1⅛". Standard buttons are of black bakelite. All contacts and terminals are silver plated. Switches SW723 and SW725 are supplied with a dot which indicates the "On" position. These switches are used in the Radio, Signal, Phonograph and Instrument industries.

Cat. No.	Type	List Price
SW723	—SPST Slide Switch, .75A-125V-AC-DC, 2 Terminals	$0.31 Each
SW724	—SPDT Slide Switch, .75A-125V-AC-DC, 3 Terminals	.37 Each
SW725	—DPST Slide Switch, .50A-125V-AC-DC, 4 Terminals	.44 Each
SW726	—DPDT Slide Switch, .50A-125V-AC-DC, 6 Terminals	.55 Each

ALPHA-WIRE-PRODUCTS

LACQUERED HOOK-UP AND LEAD-IN WIRE
High Gloss Lacquered Braid

GENERAL PURPOSE: For point to point soldering connections on transformers, amplifiers, panel hook-up, etc., where a low loss dielectric is required. It is not a pushback wire but will strip easily.
CONSTRUCTION: Stranded tinned conductor, free stripping rubber, silk braid highly lacquered.

No.	Length Feet	Size	Tinned Strand	Rubber Thickness	Voltage Breakdown (60 Cycles)	D.C. Resistance Per Foot (Megohms)	O.D.	List Price

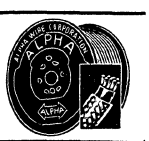
SHIELDED LEAD-IN AND GROUND WIRE



GENERAL PURPOSE: Eliminates interference caused by motors, high tension wires, X-Ray machines or other apparatus that radiate electrical impulses. Can also be used for grid and plate leads.
CONSTRUCTION: Stranded tinned conductor, free strip rubber, braided tinned copper shield overall. Frequency: 3000 K.C.

LACQUERED PRIMARY WIRE

GENERAL PURPOSE: For automobile head, tail, side, dashboard lamps, horn, spotlight, instrument leads and general primary voltage applications.
CONSTRUCTION: Stranded soft annealed tinned copper, insulated with rubber, over which is a highly lacquered braid. Oil, heat, and moisture-resistant.

FLEXIBLE VARNISHED TUBING

RADIO TUBING—(Spaghetti). A sleeving with a heavy coat of varnish, in high gloss vivid colors. Average dielectric strength: **5,000 volts.**

SATURATED SLEEVING—A fibre yarn sleeving saturated with high grade insulating varnish. Cuts clean and has a smooth interior wall. Average dielectric strength: **1,200 volts.**

MAGNETO TUBING—The production of this type of tubing is under rigid control so as to insure a maximum in quality. It is thoroughly impregnated with a varnish of maximum insulating value. It is resistant to heat, oil, gas and acids. Colors are bright and vivid. Average dielectric strength: **7,000 volts.**

Note: Sizes follow the B & S System of gauging wires. For instance, a #10 tubing will fit over a #10 bare wire or any wire with an insulation of which the O.D. is equivalent to #10 B & S gauge. If in doubt, it is best to submit a sample of the wire or product to be covered.

AC-DC ANTENNA WIRE

GENERAL PURPOSE: Ideal replacement wire for universal midgets, indoor aerials and loop antennae.

CONSRUCTION: Single conductor #23-20/36 stranded bare copper, extra flexible, covered with a dark brown cotton braid overall.

Number	Length	Put-Up	List
1281	25 Ft.	Disc	$0.18
1282	100 Ft.	Spool	.65
1283	500 Ft.	Spool	2.75
1284	1000 Ft.	Spool	5.25

AC-DC RESISTANCE LINE CORDS

These line cords are built with a third element voltage drop resistor to take care of reducing line voltage and also increase life of coils and condensers as well as eliminate heat generated by the receiver. Equipped with a soft rubber unbreakable attachment plug.

INDIVIDUALLY BOXED

ALPHA-WIRE-PRODUCTS

SHIELDED DUPLEX SPEAKER CABLE

GENERAL PURPOSE: For PA systems, photo-electric cell circuits, master control sound systems, etc.
CONSTRUCTION: Two conductors twisted, each #18-16/30 stranded tinned copper, 1/32" "Hi-Tension" rubber, color coded, paper wrap over both conductors, close tinned copper shield overall.

No.	Ft. per Spool	Conductors	Maximum Capacity per Ft. Cond. to Shield	Bet. Cond.	O. D.	List Price
1265	500	2	65 mmf.	23 mmf.	.250"	$27.50

ARMORED DUPLEX SPEAKER CABLE
Varnished Cambric Type

GENERAL PURPOSE: For PA systems, oil burner installations, automotive wiring, etc.
CONSTRUCTION: Two conductors parallel, each #18-16/30 stranded tinned copper, varnished cambric wrapped, color coded waxed cotton braid, galvanized steel armor overall.

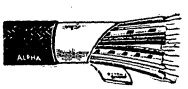
Number	Spool	O. D.	List Price
1272	500 Ft.	.132" x .182"	$21.40

Rubber Insulated Type

GENERAL PURPOSE: Loud speaker wiring in master control sound systems.
CONSTRUCTION: Two conductors parallel, each #18-16/30 stranded tinned copper, color coded cotton serve, 1/64" 40% rubber, paper wrap over both conductors, galvanized steel armor overall.

Number	Spool	O. D.	List Price
1273	500 Ft.	.190" x .245"	$21.40

COMMUNICATION SYSTEM CABLE



GENERAL PURPOSE: For interior use designed for connecting inter-communication systems, annunciators, telephones, etc.
CONSTRUCTION: Each conductor solid tinned copper wire, two cotton reverse serves paraffined, color coded, conductors twisted into pairs, then covered with an impregnated double paper wrap, and overall a cotton braid saturated with a moisture-proof, slow-burning, rodent-proof compound.

Number	Spool	Size	No. of Pairs	O. D.	List

ALPHA-WIRE-PRODUCTS

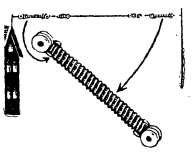
SPRING AERIAL ADJUSTER



Prevents sagging and swaying. Powerful springs, cadmium plated and corrosion proof.

List Price

No. 1285 Individually Boxed..$0.45

RADIO LIGHTNING ARRESTER

Made of high quality glazed porcelain with nickeled screws and nuts. For indoor or outdoor use. Furnished with two wood screws.

List Price

No. 2001 Individually Boxed....$0.19

DOUBLET LIGHTNING ARRESTER

Made of high quality glazed porcelain with nickeled screws and nuts. For complete protection on doublet antenna systems. For indoor or outdoor use. Furnished with two wood screws.

List Price

No. 2000 Individually Boxed $0.30

LEAD-IN AND GROUND WIRE

GENERAL PURPOSE: Lead-in, ground, hook-up, all purpose wire. CONSTRUCTION: Stranded tinned or solid tinned copper conductor, insulated with live free stripping rubber, jet black waxed finish overall.

No.	Length Feet	Put-Up	Size	Tinned Strand	Rubber Thickness	O. D.	List Price

BATTERY AND TEST CLIPS

For protection against rust and corrosion, these clips are completely cadmium plated. Strong spring jaw for permanent contact.

No.	Type	Amps.	Per Box	List Price
2071	Midget	5	50	$6.25
2072	Pee-Wee	10	50	6.25
2073	Medium	25	50	9.00
2074	Large	50	30	15.00

ALLIGATOR CLIP

These clips are nickel plated as protection against rust and corrosion. Strong spring jaw for firm contact.

Number	Per Box	List Price
2075	50	$6.25

UNBREAKABLE SOFT RUBBER PLUG

Made of sturdy live soft rubber. Brass blades. Unbreakable, easy to attach.

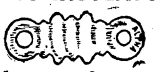
No.	Per Carton	List Price
1964	100	$8.00

BUS-BAR WIRE

This copper wire is tinned and receives several wipings to insure cleanliness and brightness. Is cut in uniform 2 ft. lengths.

Number	Size	List Price
2078	10 Round	$5.00
2080	12 Round	3.40
2081	14 Square	2.90
2082	14 Round	2.50

GLASS INSULATORS



Crystal clear, of great tensile strength, moistureproof, waterproof and weatherproof.

Number	Length	Per Carton	List Price
2020	3″	100	$5.00
2021	3 5/8″	100	7.50

PORCELAIN INSULATOR

Made of glazed porcelain. Will withstand great strain.

Number	Per Carton	List Price
2022	100	$3.75

SCREW EYES

A cadmium plated sharply pointed #6 gauge screw with glazed porcelain eye.

Number	Length	Per Carton	List Price
2052	3″	100	$4.15
2056	7″	100	5.00
2058	12″	100	17.50

NAIL KNOB

A 2-piece knob of glazed porcelain and a heavy nail for secure holding.

Number	Per Carton	List Price
2031	100	$3.50

STAPLES

Made of coppered steel with sharply pointed tips for easy tacking. Properly insulated. Furnished in standard construction and also in brown, white and buff.

No.		Per Box	List Price
2041	Standard Type	50	$0.12
2043	Colors	40	.12

LEAD-IN STRIP—CLIP TYPE

(SOLDERED)

Weatherproofed and fully covered with a heavily lacquered braid. Fahnestock clips riveted and soldered to strap for firm contact.

Number	Length	Per Carton	List Price
2002	12″	50	$6.00

(UNSOLDERED)

Constructed exactly like our No. 2002 but the clips are unsoldered.

Number	Length	Per Carton	List Price
2003	12″	250	$5.00

LEAD-IN STRIP—SCREW TYPE

A heavily lacquered braid makes this strip weatherproof. The screws, nuts and washers are nickeled brass. Makes positive contact.

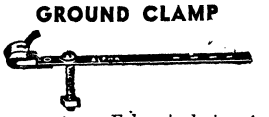
Number	Length	Per Carton	List Price
2005	12″	50	$8.75

LEAD-IN STRIP—DOUBLET TYPE

Same construction as No. 2005 but 2 strips laid parallel and staggered to prevent contact, held apart by riveted fibre pieces. Especially adaptable to doublet antennas.

Number	Length	Per Carton	List Price
2004	12″	50	$18.75

GROUND CLAMP



Heavy gauge strap, Fahnestock terminal and brass screw and nut. Makes a quick and positive connection. Fits 3/8″ to 2″ pipe.

Number		Per Carton	List Price
2012	Strap Type	50	$5.00

PIPE CLAMP

Cadmium plated. Is of neat appearance. Attaches the ground wire to the pipe easily and securely. Will last indefinitely.

No.		Per Carton	List Price
2011	"C" Type	50	$6.25

ALL PRICES SUBJECT TO CHANGES WITHOUT NOTICE. PRICES WILL BE THOSE IN EFFECT ON DATE OF SHIPMENT AND WILL NOT EXCEED SUCH OPA CEILING PRICES AS MAY BE IN FORCE AT THE TIME.

COPPERWELD ENAMEL AERIAL WIRE

GENERAL PURPOSE: Ideal for short wave and marine antennas, directional and doublet systems. Will not sag or stretch.

CONSTRUCTION: A solid steel core, heavily covered with pure electrolytic copper over which is baked black insulating enamel.

Number	Size	Carton	Tensile Strength	O. D.	List Price
1158	10	100 Ft.	1050 Lbs.	.103"	$2.50

PHOSPHOR BRONZE AERIAL WIRE

GENERAL PURPOSE: Recommended especially for ship, short wave, and transmitting aerials where high tensile strength is required.

CONSTRUCTION: 7 strands #18 Phosphor Bronze.

Number	Length	Tensile Strength	O. D.	List Price
1162	100 Ft. Carton	1000 Lbs.	.122"	$4.40
1163	500 Ft. Spool	1000 Lbs.	.122"	22.00

DOUBLET TRANSMISSION LINE

GENERAL PURPOSE: Doublet style twisted lead-in designed for low loss coupling between antenna and receiver.

CONSTRUCTION—Braided Type: Two conductors #22-7/30 stranded tinned copper, 1/32" "Hi-Tension" Rubber, color coded, conductors twisted, cotton braid overall, saturated weather-proof finish.

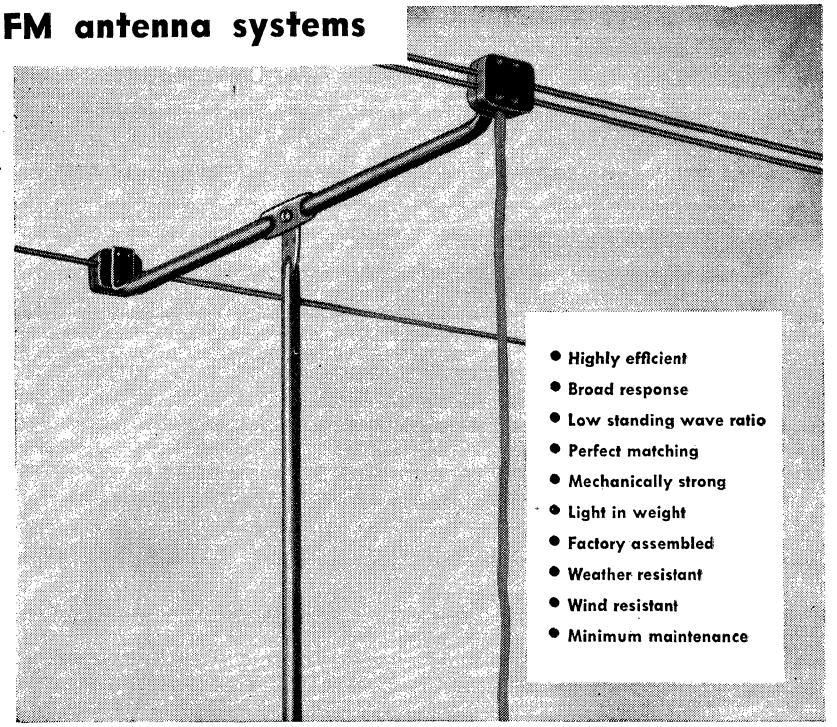
Belden FM antenna systems



- Highly efficient
- Broad response
- Low standing wave ratio
- Perfect matching
- Mechanically strong
- Light in weight
- Factory assembled
- Weather resistant
- Wind resistant
- Minimum maintenance

Trade Number	†Pkg.	Description	Contents
		FM DIPOLE ANTENNA	
8320	1K	The Belden FM Dipole Antenna System is scientifically engineered and may be used on all FM radios. It can be used for Standard Broadcast as well as FM reception. Its performance has been proven in laboratory and field service tests. Careful electrical design has resulted in excellent response over the entire FM band. Maximum signal and trouble-free reception are assured.	1—65′ 300-OHM Transmission Line 8225 1—Aluminum Antennae Element 1—Porcelain Junction Block 1—5′ Aluminum Standard 2—Stand-off Insulators 2—Mounting Straps 1—Instruction Sheet
		FM REFLECTOR	
8321	1K	For greater radio signal strength, use the Belden FM Reflector with the No. 8320 Belden FM Dipole Antenna to form an antennae reflector array. The addition of a reflector improves FM reception for any installation and is necessary in locations where the radio signal is weak, for example, due to its distance from radio stations or its location among buildings. Also, a reduction in interference may be effected to the rear or reflector side of the antenna.	1—Aluminum Reflector Element 1—Porcelain Junction Block 1—Aluminum Cross Member 1—Instruction Sheet

*Complete installation instructions accompany each Belden System.

Belden microphone cables

Performance and appearance are the outstanding features built into Belden microphone cables. Polyethylene insulation is used for outstanding dielectric properties and vinyl plastic jackets for protection.

Dielectrically, Belden microphone cables have low capacitance, high insulation resistance and low attenuation at audio frequencies. In addition, they provide resistance to physical abuse, aging and moisture.

multiple conductor cables

Belden multiple conductor cables are developed for long service life, excellent mechanical and electrical characteristics and uniform quality. These cables are used for a multitude of applications including power and interconnecting cords on radio receivers, electronic devices, speakers, analyzer test equipment, remote control circuits and press-to-talk microphone circuits.

Belden transmission line cables

Belden transmission cables are available for every receiving and low power transmitting antenna application. Coaxial, twisted pair and parallel type lines are represented.

These cables are designed to meet exacting electrical requirements and are mechanically strong, weather resistant and give long service life. Cables constructed with polyethylene insulation are especially suitable for very high frequency (VHF) and ultra high (UHF) ranges where the losses in ordinary types of transmission line cables are excessive.

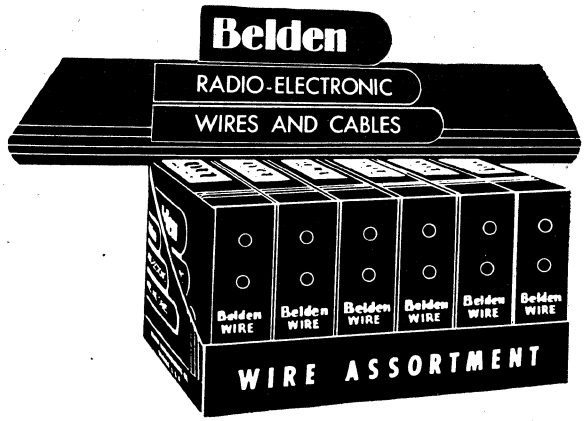
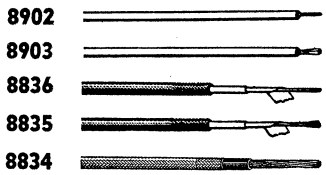
Belden hook-up wire assortments

Popular combinations of Belden Hook-up Wires are provided in standard convenient assortments. They consist of 25-ft. rolls in individual cartons, packed 6 rolls in display carton.

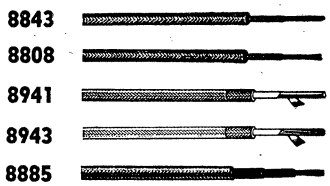
Trade Number	HOOK-UP WIRE ASSORTMENTS
8864	Contents: 6 rolls 8941. One each black, blue, green, red, yellow and white.
8865	Contents: 6 rolls 8943. One each black, blue, green, red, yellow and white.
8858	Contents: 6 rolls 8908. One each black, blue, green, red, yellow and white.
8859	Contents: 6 rolls 8912. One each black, blue, green, red, yellow and white.
8860	Contents: 2 rolls 8941, black and red; 2 rolls 8943, blue and green; 2 rolls 8912, yellow and white.



Belden hook-up and lead wires



There is a Belden hook-up and lead wire construction for every service requirement—for receivers, transmitters, amplifiers, rectifiers, aircraft radio, geophysical instruments, and in all other types of electric equipment.



PLASTIC INSULATED. General-use hook-up wire and leads for radio components such as transformers, chokes and controls. Furnished in the eight following colors: Black, Blue, Green, Red, Yellow, White, Brown and Orange. SPECIFY COLOR.

Wires with $\frac{1}{64}$" plastic insulation are designed for use within the chassis of radio receivers, amplifiers, instruments, controls and other electronic devices. Wires with 0.25" plastic insulation are designed for use inside or outside the chassis but within the radio cabinet. The operating temperature limit for these wires is 80 C (176 F).

Belden intercommunicating and public address system cables

FOR EVERY INSTALLATION REQUIREMENT

A completely new line of Belden intercommunicating cable for all systems and every installation arrangement. Especially developed for intercommunicating service, these cables meet every requirement for indoor use.

Cables for general wiring from station-to-station, for station additions, for speaker extensions and flexible station-to-terminal leads are available.

test prod wire

High-voltage lead wire for use with portable testing equipment, instruments, and other radio units where excellent dielectric properties of the insulation and extreme flexibility and limpness of the cable are essential considerations. Furnished in either red or black.

Belden auto and aircraft radio wires and shielding

Belden supplies a complete line of auto radio wires and shielding to handle every wire requirement in installation and servicing.

In installations of this type, the use of the correct wire is particularly important. Applications are indicated in the listings below.

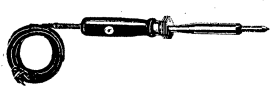
Belden soldering irons • cords • terminals • magnet wire

soldering irons



Belden soldering irons take care of practically all radio service and communications work. Sturdy construction throughout assures long service life.

Features include:

1. High quality Nichrome heating element.
2. Machined copper tips extended into element for faster heating.
3. A 6-ft Belden "Corditis-free" 3000-cycle heater cord.
4. Easy replacement of tips or elements.
5. "Easy-Grip" handle.
6. Hexagonal baffle plate prevents rolling.
7. Portable soldering iron stand as indicated.
8. Approved by Underwriters' Laboratories, Inc.

Trade Number		
8110	1K	80-Watt iron with ⅜" tip. For light work. Complete with stand including tip cleaner.
8113	1K	100-Watt iron with ⅜" tip. For medium light service. Complete with stand including tip cleaner.

soldering iron replacement parts

8111	1K	80-Watt element for 8110
8114	1K	100-Watt element for 8113
8112	5K	Tip (⅜") for 8110 or 8113
8119	1K	Heater cord only. 6-Ft Belden 3000-cycle heater cord with Belden Unbreakable Soft Rubber Plug. Opposite end stripped and tinned.

replacement and extension cords • head phone cords

1725	1K	7½ Ft. brown only. Replacement Cord—Consists of Belden Extra Flexible All-Rubber Lamp Cord with Belden Unbreakable Soft Rubber Plug; opposite end stripped and tinned—ready for easy attachment.
1701	1K	10 Ft brown only. Extension Cord—Both ends unbreakable rubber—can't mar floors or furniture—safe for use on table tops. Underwriters' Blue Label of Approval.
8872	1K	Head phone set, pin tips all ends. 5 Ft of extra flexible moisture-resistant rubber-insulated tinsel cord, over-all durable brown cotton braid. "Y" arm sections 15", coupled in series.
8873	1K	Head phone set, spade tips 4 phone ends, pin tips plug end. 5-Ft of extra flexible moisture-resistant rubber-insulated tinsel cord, over-all durable brown cotton braid. "Y" arm sections 15", coupled in series.

8925	1K	960.	Red	***72.	38.	43.	48.

To determine the proper ac-dc line cord, add the filament voltages of the individual tubes in the receiver. From the chart at right, select the nearest figure under the heading SUM OF TUBE VOLTAGES in the column headed by the available power supply. Length 6 ft. Size 18.

*When line voltages other than those shown must be used, subtract sum of tube voltages from available line voltage to obtain voltage drop. The nearest figure in "Voltage Drop" column gives proper ac-dc cord to use.

**Voltage drop at 0.175 amp

***Voltage drop at 0.75 amp

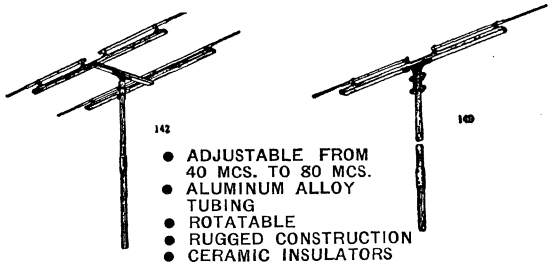
Birnbach F-M and TELEVISION ANTENNAS

F-M and TELEVISION DOUBLET ANTENNAS

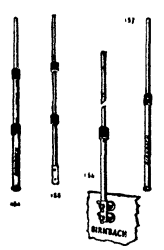


- ADJUSTABLE FROM 40 MCS. TO 80 MCS.
- ALUMINUM ALLOY TUBING
- ROTATABLE
- RUGGED CONSTRUCTION
- CERAMIC INSULATORS

A superior antenna construction for television reception. Consist of corrosion proof aluminum alloy tubes adjustable to all frequencies between 80 mcs. and 40 mcs. mounted on high grade low absorption glazed porcelain standoff insulators which maintains its efficiency under all weather conditions. Strong wooden supports. Adjustments can be made in the horizontal planes. This will permit the antenna to be properly adjusted in respect to the transmitted wave and the signal strength. There are two types available: No. 140 Doublet and the No. 142 Doublet with reflector to eliminate interference. Complete with mounting poles and steel coupling.

No.		List Price
140	Doublet	$12.50
142	Doublet with reflector	22.50

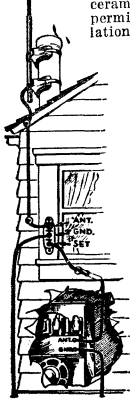
ULTRA HIGH FREQUENCY ANTENNAS
(VERTICAL RODS)



They are constructed of hard drawn aluminum alloy tubing, telescoped together and adjusted by forcing down with a turning motion a specially designed brass nickel-plated taper lock bushing. They cover all requirements for stationary or portable use. Two types of mountings are available: stand-off mounting having ¼ - 20 threaded bushing on No. 154 and 10-32 threaded bushing on No. 157, and binding post mounting consisting of a reinforced flattened end with two holes drilled 1" between centers. The frequency range listed is for ¼ wavelength antenna.

No.	Sections	Frequency Range in Mcs. Open	Telescoped	List Price
154	3	55	145	$3.30
155	3	55	145	3.30
156	2	112	200	2.00
157	2	112	200	2.00
161	2	40	75	2.20
164	Taper Lock Bushings $\frac{5}{16}$ and $\frac{3}{8}$			.15

MAST AERIAL

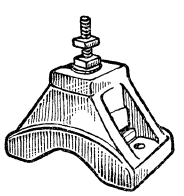


The Birnbach Mast Antenna is made of four tempered carbon steel tube sections which will instantly go back to an erect position when flexed by the wind. They make an actual height of 12 ft. and are treated to prevent corrosion. Two heavy duty ceramic mounting insulators permit every type of installation to be made with ease. The Safety Lightning Arrester protects the antenna from excessive static charges of atmospheric electricity. The accumulated charges bypasses the receiver and discharges to the ground.

No. 169—Includes: 1 12 ft. 4 section Mast Aerial and Clamps, 2 porcelain mounting insulators and securing clamps; 4 nallit knobs; 1 safety lightning arrester; 35 ft. leadin wire; 1—6" insulated screw eye; 1 ground clamp; mounting screws; and directions. **List $5.00**

No. 170 — Includes: Everything contained in the No. 169 with the exception of 1 Safety lightning arrester. **List ... $4.75**

BASE INSULATOR



Ideal for replacement and well suited as a base insulator for ultra high frequency antennas as it permits a connection to be at the bottom of the insulator. Made of highly vitrified low absorption glazed porcelain.

No. 146—Base Insulator, Std. Pkg. 10.....**List, $0.60**

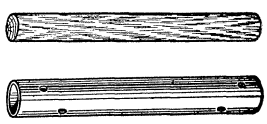
SEE PAGE S-20 for complete line of TRANSMISSION CABLE suitable for FM and TELEVISION

ADJUSTABLE DIPOLE ANTENNA
For Television or Frequency Modulation

An adjustable antenna that can be used as a vertical or horizontal doublet. Can be rotated to any angle for any degree of polarization. Impedance at center 72 ohms, matched by EO1 Cable. Aluminum alloy tubing permits outdoor mountings. Special tapered lock bushings hold each section in place simply by turning and pushing down. The center mounting insulator is 4½" high.

No.	Frequency Range in Mcs. Open	Telescoped	List Price
158	82	155	$5.50
160	40	75	6.60

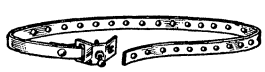
Wooden Mounting Poles



Made of straight grain ash and finished with a weatherproof varnish. With the use of the couplings, several poles can be joined together. The couplings are made of steel tubing and are cadmium plated.

No.		Std. Pkg.	List
144	Coupling	10	$1.00
145	4 ft. Wooden pole	10	1.00

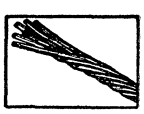
MOUNTING STRAP



A very useful aid in securing poles of Television or mast antennas to vent pipes. It is made of cadmium plated steel and is 24" long.

No. 626—Mounting Strap.....Std. Pkg. 25..... **$0.30 List**

GUY WIRE



Constructed of high tensile strength galvanized steel wires. Ideal for guying up transmitter and receiver towers and poles.

No. 19—Guy Wire, 25 ft. Coil.....each **$0.30 List**

No. 20—Guy Wire, 50 ft. Coil.....each **.60 List**

No. 148 UNIVERSAL WAVE ANTENNA
(FOR EVERY TYPE OF RECEIVER)

The No. 148 All Wave Antenna is the same as the No. 150, but is packed in a special attractive two color box imprinted to customer's specifications. This kit is designed for efficient operation with all types of receivers. Standard cartons of 20 kits.

No.		List Price
148	All Wave Kit with Receiver Coupler	each $4.00
149	All Wave Kit without Receiver Coupler	each 3.50

STRANDED COLORED RUBBER WIRE

It is constructed of carefully annealed stranded tin-copper conductors with a cotton wrap, insulated with a special grade of non-cracking live colored rubber compound. It strips readily and is available in various colors for easy identification.

Birnbach AERIAL ACCESSORIES

LEADIN STRIPS

Covered with a heavy cotton braid, weather-proofed, with numerous coats of lacquer. The Clips are riveted and soldered at both ends

No.	Lgth.	Std. Pkg.	List Price Each
611—Black	12"	50	$0.07½
612—Black	16"	25	.15
613—White	12"	50	.08

DOUBLET LEADIN STRIPS

Two strips held parallel to each other by a piece of bakelite prevents them from moving back and forth. Available in black or white.

No. 2611—Std. pkg. 25. **Ea. $0.17 List**

Screw Terminal Leadin Strip

Locks the wire together with the strip in a secure connection assuring perfect contact. Has weather-proof covering over a copper strip with cadmium plated terminals. Available in white or black.

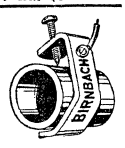
No.	Std. Pkg.	List Price Each
617—Leadin Strip	50	$0.11
2617—Doublet Leadin Strip	25	.25

COPPER STRAP CLAMP

Will take ¾" to 2" Pipe. Made of copper with Birnbach clip riveted and soldered to strap. oCmplete with nut and bolt.

No. 600—Std. pkg. 50. **Ea. $0.07 List**

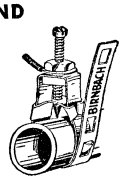
C-CLAMP



Attaches easily to a water or radiator pipe. The cone-pointed screw cuts through and makes positive contact. Cadmium finish prevents rusting.

No. 615—Std. pkg. 25. **Ea. $0.10 List**

SADDLE GROUND CLAMPS



These ground clamps have a hard pointed screw which digs through rust and makes a positive contact. Fits a ⅜" to 2" pipe.

No.	Std. Pkg.	List Price Each
625—Heavy Saddle Clamp	50	$0.12
630—Light Saddle Clamp	50	.08

GLASS INSULATORS

Made of crystal clear glass and have a smooth surface which prevents dirt or ice to collect.

No.		Std. Pkge.	List Price
00—3"		100	C $5.50
660—3⅜"		100	C 8.25

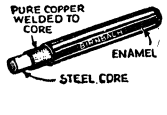
COPPERWELD ANTENNA WIRE

(STRETCHLESS)



Has a steel core covered with copper and heavily enameled. It will not elongate because of its high tensile strength — which is several times that of enameled copper wire. It has low R.F. resistance and is ideal for transmitting doublet and directional antenna systems as it will maintain the frequency characteristics of the antenna because of its stretchless qualities.

The above items meet all requirements of Army-Navy joint specification JAN-C-76, Type SRIR for plain resin construction where highest resistance to fungus growth is required.

SPECIFICATIONS FOR THE JAN-C-76

I—Electrical Properties:
A—Dielectric strength
B—Insulation resistance
C—Creepage resistance

II—Mechanical Properties:
A—Low temperature flexibility
B—High temperature stability
C—Resistance to heat deformation
D—Abrasion resistance
E—Low moisture absorption

III—Chemical and Other Properties:
A—Resistance to common solvents
B—Flame resistance
C—Fungus resistance

SHIELDED LEAD-IN WIRE

Used to prevent the pickup of interference or man-made static. Consists of a stranded tinned copper conductor with a wall of live rubber over which a tinned copper braid is woven.

RADEX SLIPBACK HOOKUP WIRES

It has a covering of rubber over a cotton wrap and is then covered with a bright color cotton braid and dipped into parafin. This construction will not cause the cotton insulation to fray or bunch up when pushed back. It has a high dielectric strength and will withstand all climatic changes without breakdown.

Rubber Shielded Microphone Cable

Consists of individual flexible tinned copper conductors, each insulated with a heavy wall of colored rubber for easy identification. A tinned copper shield is woven over all conductors, and then cotton wrapped. A 1/32 wall of tough rubber is placed overall. It is a weatherproof cable, ideal for outdoor use, and will withstand hard and rough usage.

EO1 Transmission Cable (GENUINE)

This cable has a surge impedance of 72 ohms which accurately matches the impedance at the center of the half wave Hertz Antenna. It is constructed of 2 No. 12 Bare Copper conductors having a paper wrap. A special high frequency rubber insulates each side of the line and accurately maintains the impedance. It has a special weatherproofed cotton braid overall with a mica finish.

No. 12 Solid Twisted

For Television or Frequency Modulation (100 ohm)

Designed for use with television and Frequency Modulation (FM) receivers. It is constructed of 2 No. 12 bare conductors insulated with a paper wrap with a special grade of rubber insulation which separates and insulates the conductors and helps maintain the correct impedance. Over this is placed a cotton braid impregnated with a weatherproof finish.

2578-B	2	500	No. 16	.325	62.50

Commercial Type Twisted Pair (No. 22 STRANDED)

This cable is used extensively for replacement on all antenna systems. Consists of 2 No. 22 tinned stranded conductors rubber covered and weatherproof braid overall. Available in black or white.

No.	Ft.	List Price
950—	50 Coil	$1.80
951—	100 Coil	3.50
952—	500 Spool	16.00

72 Ohm Rubber Jacket (No. 16 Stranded)

A very good transmission line designed for long satisfactory use with Television F.M. and Master Antenna Systems. Constructed with 2 No. 16 tinned stranded conductors insulated with a special non aging low loss rubber compound covered with a tough abrasion resisting 40% rubber jacket.

No.	Ft.	List Price	Freq.	Surge Imp. (Ohms)	D.B. Loss per 100′

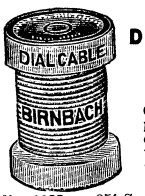
Birnbach BIRACO TUBING DIAL and MAGNET WIRE

BIRNBACH

NOTE: CODE "B" FOLLOWING CATALOG NUMBER INDICATES USE OF "BUNA-S"



DIAL CABLE

42 Strand Phosphor Cable

Constructed of the finest phosphor bronze wire over a linen thread center. Due to its high tensile strength, it will not stretch.

No. 1025— 25′ Spool List Price $1.20 each
No. 1050— 50′ Spool List Price 2.25 each
No. 1051— 100′ Spool List Price 4.00 each
No. 1052—1000′ Spool List Price 33.00 each

Phosphor Bronze (Light Cable)

A lower quality cable than No. 1025, but a cable that will give good service. This is a braided Phosphor Bronze cable.

No. 1053— 25′ Spool List Price $0.66 each
No. 1054— 50′ Spool List Price 1.25 each
No. 1055— 100′ Spool List Price 2.50 each
No. 1056—1000′ Spool List Price 18.50 each

Extra Heavy Linen Dial Cable

Made of the finest linen for replacement on all receivers, same as used for Philco. It is extra heavy for exceptional long service.

No. 1057— 25′ Spool List Price $1.30 each
No. 1058— 50′ Spool List Price 2.50 each
No. 1059— 100′ Spool List Price 4.50 each
No. 1060—1000′ Spool List Price 36.00 each

Heavy Linen Cable

This braided cable is used for replacement for all Philco Receivers.

No. 2025— 25′ Spool List Price $1.30 each
No. 2050— 50′ Spool List Price 2.50 each
No. 2051— 100′ Spool List Price 4.50 each
No. 2052—1000′ Spool List Price 36.00 each

Light Linen Dial Cable (Silk Core)

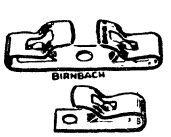
High quality linen cable used on many receivers specially treated to prevent slipping.

No. 3025— 25′ Spool List Price $1.30 each
No. 3050— 50′ Spool List Price 2.25 each
No. 3051— 100′ Spool List Price 4.00 each
No. 3052—1000′ Spool List Price 25.00 each

Extra Light Linen Cable

It is a strong extra thin linen cable for replacement. Braided of the finest black linen.

No. 4025— 25′ Spool List Price $0.75 each
No. 4050— 50′ Spool List Price 1.40 each
No. 4051— 100′ Spool List Price 2.50 each
No. 4052—1000′ Spool List Price 18.50 each



SPRING WIRE CLIPS

They will hold a wire, up to No. 10 B&S Gauge, in a secure contact. All clips are brass nickel-plated.

No.	Length	Std. Pkg.	List Price Per C
32—Spring Clip	1″	100	$1.50
33—Twin Clip	1¾″	100	6.00

ALL RUBBER LAMP CORD (BUNA-S)

This cord is an all rubber covered insulated parallel cord which can be separated by starting with a knife. Connects easily and cannot fray. Sanitary and neat.

COLORS: Black, White, Brown

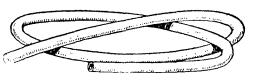
BIRACO TUBING (Extruded)



It is an extruded tubing made of the new synthetic plastic material. Extremely flexible and when stretched returns to its original form. Withstands the effects of heat and will not support combustion. Will only soften at 300°F and will not flow at 425°F. Its dielectric strength:—750 volts per mil. when dry and 350 volts when wet. It is not affected by oil and is resistant to most coal tar solvents and petroleum solvents. Resists acids, alkalies in concentrations up to 30% by weight. Available in continuous lengths. Dielectric strength—10,000 volts.

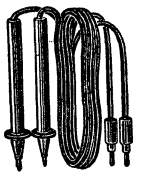
BIRNBACH Birnbach TEST LEADS and ACCESSORIES

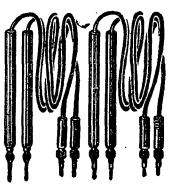
High Voltage Test Leads



The high dielectric strength and low leakage resistance of these test leads recommend them for for testing high voltage high sensitivity devices such as Meggers and Megohmeters. They are particularly well suited for use in testing breakdown voltages up to 1200 volts. The prods and the tip handles are made of black and red bakelite with special designed tips for application. The prods are 6" long and ½" dia. and have a guard ring near the metal tip to prevent accidental touching of the exposed metal part. Extra heavy kinkless test lead wire 7/32" dia. is used throughout. The leads are 60" long.

No.	List Price
562—High Voltage Test Leads	$4.50

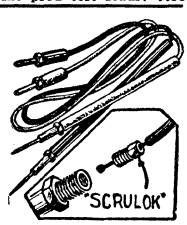
DeLuxe Test Leads



Constructed with 5" long cast phenolic red and black handles with removable needlepoint chucks or solderless tips. Black and red heavy kinkless instrument 48" long is used to connect the prods with the insulated red and black cast phenolic solderless tips. Either needlepoint or solderless tip available.

No.	List Price
560—Solderless prod test leads	$1.35
561—Needlepoint prod test leads	1.35

Bakelite Pencil Type Test Leads



Red and black bakelite handles, 6" long and 5/16" in dia. and red and black bakelite insulated phone tips. Heavy kinkless wire is used together with the Birnbach Scrulok system of solderless wire connection. The Universal needle and phone tip prod have the same dimensions as the standard phone tip and are useful for piercing insulation without damage. The needlepoint is extra heavy to prevent breakage and should it become broken can be readily replaced. Available only in combination of needlepoint prods and insulated phone tips. Length overall 60".

No.	List Price
408—Bakelite Pencil Type Test Lead	$2.00
439—Needlepoint Prod Tip for Replacement	.17

Test Leads (Bakelite Handles)

Have 4" red and black insulated handles. Needles can be replaced when broken simply by loosening the knurled collar. Available with either phone tips or spade lugs. Length overall 50".

No.	List Price
4420—Phone Tip Test Leads	$1.12½
4421—Spade Lug Test Leads	1.12½

Standard Test Leads

Same as above with a Sr. solderless phone tip.

No.	List Price
4422—Phone Tip Test Leads	$1.12½
4423—Spade Lug Test Leads	1.12½

Insulated Solderless Phone Tips

Insulated handles ⅜" dia. by 1" long fitted to solderless phone tips. The wire can be easily attached by threading through the hole in the handle and tightening the knurled nut. Colors:—red, black, green, and yellow.

No.	List Price
409—Insulated Sr. Solderless Tip—2¼" Long ..... each	$0.15
415—Insulated Jr. Solderless Tip—1 13/16" Long ..... each	.14

Insulated Phone Tip

The insulated handle is 1" long, 5/16" dia. Connection is made by threading wire through the Scrulok threaded bushing (see drawing). Colors: red, black, green and yellow.

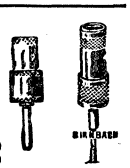
412—Scrulok Pin Tip, 1 9/16" Long ..... each	$0.17
419—Scrulok Pin Tip, 1 15/16" Long ..... each	.22

Phone Tip

Ideal for replacement on headset, speaker and extension cords.

No.	List Price
402—Std. Pkg. 100	$1.90 per C

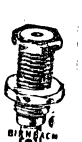
Solderless Phone Tips



Milled of solid brass and nickel-plated. Designed for easy insertion of the wire.

No.	List Price per C
24—Junior	$8.00
24—Senior	9.00
Std. Pkg. 100.	

No. 26 Phone Tip Jack



Milled of brass and nickel plated. The bronze springs are specially made to hold the phone tip tight and straight. Mounts in a ¼" dia. hole.

No.	List Price
26—Std. Pkg. 100.	$9.00 per C

No. 407 Insulated Tip Jack

Has a 7/16" insulated top and mounts in a 5/16" dia. hole. The specially designed bronze springs hold the phone tip tight and straight. Colors:—red, black, yellow, and green. Std. Pkg. 100.

No.	List Price
407—Insulated Phone Tip Jack	$0.13

No. 411 Bakelite Pencil Test Prods

These prods have the Birnbach Scrulok solderless needlepoint tips. They are made of bakelite and are 6" long and 5/16" dia. The connection is made by threading the wire through the handle and securing to the needlepoint tip by locking the Scrulok. The tip is then screwed into the handle. Available in red or black only.

No.	List Price
411—Bakelite Pencil Test Prods	$0.75

Solderless Tip Prod

Made of highly polished cast phenolic resin. A solderless phone tip is threaded at end permitting replacement of tip, Available in red or black.

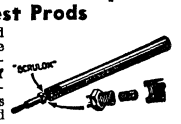
No.	List Price
410 .....4" Handle.....	$0.33
343 .....5" Handle.....	.40

Needlepoint Test Prod

A threaded shank needlepoint chuck is threaded into the end of handle. Made of highly polished cast phenolic handle. Available in red or black.

No.	List Price
344—Needlepoint Test Prod, 4" Handle	$0.35
345—Needlepoint Test Prod, 5" Handle	.40

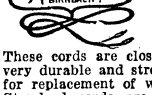
SCRULOCK Needlepoint Test Prods



These insulated prods have the Scrulok solderless system of wire connection. Wire is easily attached without soldering. An extra heavy needle is fitted into the tip. Colors:—black or red.

No.	List Price
417—Needlepoint Test Prod, 4" Handle	$0.35
418—Needlepoint Test Prod, 5" Handle	.40

Headset Phone Cords



These cords are closely woven and are very durable and strong. They are used for replacement of worn headset cords. Standard cords are listed which will match practically all headsets manufactured. We will be glad to quote on cords having special terminal requirements.

AC-DC Resistance Cords

Designed for replacement of the internal voltage dropping resistor on the present and older type of AC-DC sets. It consists of a line cord into which a third element has been incorporated. The voltage dropping resistor reduces the voltage to that needed for the filament of the tubes.

No.	Cord Rating	Sets Having Following Tubes	List Price Each

1012—100	ft.	Spool	1/2"	22.00

Ford V-8 Distributor Suppressor

Designed to be inserted in the distributor of Ford V-8. Unit consists of a resistor brush which replaces the regular brush.

No. 365 ..... List Price $ .28

AUTO ANTENNA CONNECTOR

Permits quick connection of the auto antenna leadin to the receiver.

No.		List Price
366—Auto Connector	per C	$7.50

FUSED ANTENNA CONNECTOR

This connector takes a standard 3 AG automobile fuse. Used in auto radio power supply cables.

No.		List Price
367—Fused Connector	per C	$11.00

HIGH VOLTAGE LACQUERED WIRE

Recommended for use as leads for wiring high voltage devices, and transmitter power supplies. Constructed of tinned stranded copper conductor with a wall of rubber covered with a highly lacquered cotton braid.

No.	Ft.	Size	Puncture Voltage	O.D.	List Price
2810—100		10 1/32	9500	.225	$7.40
2812—100		12 1/32	9500	.192	4.40
2814—100		14 1/32	9500	.167	3.05

2818—100		18 1/32	9500	.145	2.05

Shielded Varnished Cambric Wire

Used where an oil and water resistant wire with a shielded covering is required. Constructed of tinned stranded conductor with 2 layers of varnished cambric and a lacquered cotton braid with a tinned copper shield overall.

No.	Ft.	Size	Capacity per Ft. mmfds.	O.D.	List Price
1800—100		16	142	.145	$7.00
1818—100		18	102	.131	6.25
1820—100		20	100	.125	5.75

SHIELDED GRID LEAD WIRE

High insulation of of this wire will reduce the loss in shielded grid circuits. Constructed of tinned stranded conductor with a rubber insulation, waxed cotton braid with closely woven shield overall.

No.	Ft.	Size	Capacity per Ft. mmfds.	O.D.	List Price
818—100		18 1/32	75	.180	$4.75
820—100		20 1/32	70	.150	4.25

AUTO RADIO SHIELDED LEAD-IN

Consists of a stranded tipped copper conductor, insulated with rubber and filled with hemp and a tinned copper braid overall.

No.	Ft.	Capacity mmfd per ft.	O.D.	List Price
799—100		49	.275	$10.00
800—100		34	.500	14.00

7 MM HIGH TENSION CABLE

Useful in reducing interference from auto secondary circuits. Also used as photo electric cell leads and wherever a low loss shielded lead is required.

No.		List Price Per 100'
1600—7 MM. High Tension Cable		$6.50
781—7 MM. Shielded Secondary Wire		10.00

RAYON BRAID LACQUERED WIRE

Constructed of stranded tinned copper conductor for easy soldering, with heavy wall of live rubber over which a rayon braid is woven. A high gloss lacquered finish over braid. Conductor consists of 16 strands of No. 30.

No.	Ft.		Puncture Voltage	Size	List Price
3425—	25	Coil	9000	18 1/32	$ .55
3450—	50	Coil	9000	18 1/32	1.05

3600—500		Spool	9000	18 1/32	10.00

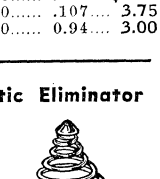
Colors: Black, red, green, yellow, brown, blue

VARNISHED CAMBRIC WIRE

Widely used in automotive wiring because of oil and waterproof construction. Consists of tinned stranded conductor with two layers of varnished cambric over which a lacquered cotton braid is woven.

No.	Ft.	Size	Puncture Voltage	O.D.	List Price
3416—100		16	1000	.108	$4.50
3418—100		18	1000	.107	3.75
3420—100		20	1000	0.94	3.00

No. 340 Wheel Static Eliminator



An effective means of reducing static created by the front wheels. Installation is made by placing the broad base of the spring against the hub cap and the cone point into the hole of the axle.

No. 340—Std. Pkg. 50

List Price ..... $8.50 per 100

PHONO-PICKUP WIRE

Small diameter—ideally suited for replacement in pickup arms of any make.

No.	Ft.	Size	List Price
1822A	100 ft. Spool	22	$ 4.50
1822B	500 ft. Spool	22	19.50
1822C	1000 ft. Spool	22	37.50

AUTO RADIO SHIELDING

Used for shielding leads of interference creating circuits; and for bonding motor block and other parts of the automobile to the chassis.

TINNED

BIRNBACH IGNITION FILTERS

These Ignition Filters completely eliminate all ignition and high tension circuit interference, making clear auto radio reception a certainty. The only ignition filters having a copper wound inductance, which accounts for the low resistance of 120 ohms for the Ignition Filter. Less gasoline is consumed than when high resistance filters are used.

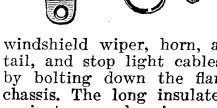
No.		List Price each
350—Ignition Filter—Bracket Type		$ .60
351—Ignition Filter—Cable Type		.60
352—Distributor Filter		.60
353—Ignition Filter—Screw Type		.60
359—Ignition Filter—Slip-on Type		.60

BIRNBACH MASTER FILTER

Eliminates all ignition interference and does away with the necessity of having a separate filter for each spark plug. Available in two types, namely, the Distributor type for easy insertion into distributor head, and the Cable type to be placed into the distributor lead where it is impossible to insert it into the distributor head.

No.		List Price each
354—Cable or Distributor Type		$2.50

AUTO NOISE FILTER



These are especially designed for the elimination of noise created by generator commutator, electrical windshield wiper, horn, and especially dome, tail, and stop light cables. Connections made by bolting down the flange of container to chassis. The long insulated lead with a convenient screw lug is connected to the source of interference.

No.		List Price
355—Auto Noise Filter—1/2 Mfd.	ea.	$ .55
356—Auto Noise Filter—1 Mfd.	ea.	.65

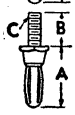
Birnbach PLUGS and JACKS

GIANT PLUGS

396
397

Used for heavy current, they are rated at 25 amps. The long life nickel silver alloy spring is secured over a pin preventing a collapse of the spring and also maintaining the full action of the spring when inserted into the jack. The No. 398A plug has a hole in the threaded shank to permit soldering to it. It is used extensively on diathermy electrode pad cables. Standard Package 25.

398



No.		A	B	C	List Price
396	Plug	$1\frac{5}{32}$	—	10-32	each $0.25
397	Plug	$1\frac{7}{16}$	—	¼-20	each .30
398	Plug	$1\frac{5}{32}$	⅝	¼-28	each .25
398A	Plug	$1\frac{5}{32}$	⅝	¼-28	each .25

BANANA PLUGS

400
404A

Large area of contact is one of the outstanding features of these jacks and plugs. The No. 400 series of packages have a nickel silver contact spring secured over a full length central pin, making these plugs non-collapsible and assuring a low resistance contact. Capacity 5 amperes. Standard Package 100.

401

No.		A	B	C	List Price

401	Plug	$\frac{31}{32}$	—	6-32	each .10
404A	Plug	¾	⅜	¼-28	each .14

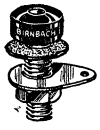
No. 403 BANANA JACK

Accurately milled and has a precision reamed hole to help maintain the tight and smooth action of the plug. It is made of brass nickel plated and comes complete with nut and lug. Standard Package 100.

No.		A	B	C	List Price
403	Jack	½	⅜	¼-28	$0.09

INSULATED BANANA JACKS

391

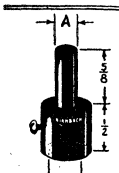


406

The No. 391 Jack is very popular with the electric therapeutic manufacturers. The ½" dia. insulated head admits all of the exposed metal part of the metal plug when inserted. Mounts in a $\frac{5}{16}$" dia. hole on a panel up to ⅜" thick. The No. 406 Jack has a $\frac{7}{16}$" dia. insulated top. It fits into a $\frac{5}{16}$" dia. hole and takes up to a ⅜" panel. Both come complete with insulating shoulder washer, nut and lug.

	Std. Pkg.	List Price
391—Insulated Jack—red or black	50	$0.14
406—Insulated Jack—red, black, yellow, or green	50	.13

SHAFT COUPLINGS, REDUCERS AND EXTENDERS



By the use of these units all ¼" and ⅜" dia. shafts and knobs can be assembled together. The insulated units are for use where electrical isolation is desired. Furnished complete with set screws shown. Be sure to specify whether Brass or Insulated is desired.

Brass No.	Insulated No.	Shaft A	Hole B	List Price

395....Jack	25	$\frac{11}{16}$"	½"	⅜-24	each .20
399....Jack	25	⅞"	⅝"	½-20	each .25
399A...Jack	25	$1\frac{3}{8}$"			each .30

No. 392 INSULATED GIANT PLUG

Made so that no projecting edges are exposed, thereby protecting the user from unnecessary contact. Connection is made by soldering into the hole at the end of the threaded shank of the plug. Handle is 1⅞" long by ⅝" dia.; length overall 3". Colors: red or black.

No. 392—Insulated Giant Plug.....List Price $0.45

No. 393 INSULATED GIANT JACK

Designed to leave no metal part exposed on the panel. The ⅜-24 brass nickel plated sleeve has a 10-32 threaded hole at the end permitting a connection at the end of the jack or to the lug under the head. Either assembly available complete with nut, insulaing shoulder washer, lock-washer and lug. Length overall 1⅜". Colors: red or black.

No.	List Price
393 —Insulated Giant Jack under head lug	$0.40
393A—Insulated Giant Jack end lug	.40

HARD RUBBER INSULATED GIANT PLUG

Especially designed for use with diathermy cables. It has a ⅝" dia. hole in the handle to take the largest cable. It is made of polished black hard rubber. The handle is 3" long by ⅞" dia. Overall length is $4\frac{3}{16}$".

No. 342—Hard Rubber Insulated Plug.....List Price $1.25

No. 341 Insulated Banana Plug

This plug consists of our No. 404A plug with a larger handle 1⅞" long by ½" dia. Used on a therapeutic apparatus and test equipment. Overall length 2⅝". Colors: red or black.

No. 341—Insulated Banana Plug.....List Price $0.35

No. 404 Insulated Banana Plug

The plug is for experimental test leads because of its Scrulok solderless connection and the non-collapsible special alloy springs assembled on a pin preventing collapse of the plug spring. The handle is made of phenolic resin and is ⅜" by 1" long. Colors: red, black, yellow and green.

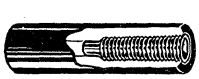
No. 404—Insulated Banana Plug.....Std. Pkg. 50.....List Price $0.18

No. 604 BANANA PLUG

Made of solid brass nickel-plated, with the end being slotted. The cast phenolic handle is 1" long by ⅜" dia, and is held on by the screw that secures the wire to the plug. Colors: red, black, yellow and green.

No. 604—Plug.....Std. Pkg. 50.....List Price $0.14

No. 605 HANDLE JACK



Consists of a banana jack inside an insulated sleeve. Connection is made by soldering to the end of the jack. Handle is made of cast phenolic resin ⅜" dia. by 1¾" long. Colors: red, black, yellow and green.

No. 605—Handle Jack.....Std. Pkg. 50.....List Price $0.18

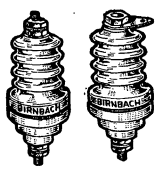
CORRUGATED FEEDTHRU INSULATORS



The six new corrugated type feedthru insulators have more than twice the leakage path of the straight type because of increased surface of the corrugations and recommends itself where a straight side insulator of equal height is not satisfactory because of its shorter leakage path. Brass nickel-plated hardware and cork mounting washers supplied.

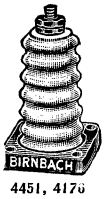
HIGH VOLTAGE FEEDTHRU INSULATOR

This insulator has been designed to meet the demand for an insulator having high dielectric and mechanical strength. The extra long leakage path is made possible by the corrugations on the top insulator. The bottom sleeve taper from a base dia. of 1 3/16" where the electric stress is greatest.

Height 1 5/8"....Base Dia. 2"....Mounting Hole 1 1/4"... Hardware 1/4-20
No. 4233 ..... List Price $0.55

METAL BASE INSULATORS



4451, 417ü

867

Designed to replace conventional porcelain insulators where failure of the base is due to cracking when fastened down. Extremely long leakage paths due to the corrugated surface is one of the important characteristics. They are made from high tensile strength low absorption porcelain smoothly glazed all over. Supplied with nickel-plated brass screws and nuts and cadmium plated drawn steel bases.

"LUCITE" FEEDTHRU INSULATORS

These feedthru insulators are ideal for bringing high frequency leads thru a panel. They are made of genuine Dupont Lucite. Because of its low loss at high frequency, it is well adapted to insulated elements of high frequency circuits. The 1/2" dia. insulators have brass nickel plated 6-32 hardware and the 3/4" have 10-32 hardware.

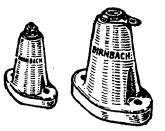
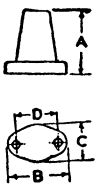
STANDOFF INSULATORS



The sizes range from 5/8" to 4 1/2" high in five properly graduated heights. Made of highly vitrified low absorption glazed porcelain. No washers are necessary for mounting as the mounting surface is ground flat; but for the No. 405 and No. 966 Standoff insulators, it is advisable to use cork washers which are available as they will permit mounting securely without breakage. All brass nickel-plated hardware is supplied. Available in white or brown glaze.



No.	Height A	Std. Pkg.	B	C	D	Mounting Holes	Hardware*	List Price each

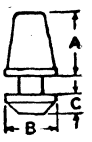
FEEDTHRU INSULATORS

Made of highly vitrified, low absorption porcelain smoothly glazed to prevent accumulation of dust or dirt. Maximum strength is achieved by the proper proportions and flat mounting surfaces. Long insulating sleeves on the lower part of the insulator contribute much to their performance on high voltages. Brass nickel-plated hardware.



No.	Height A	Std. Pkg.	B	C	Mounting Hole	Hardware	List Price
458	5/8"	50	11/16"	1/4"	5/16"	6-32	ea. $ .14

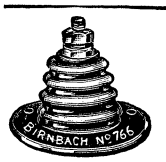
BEE-HIVE STANDOFF

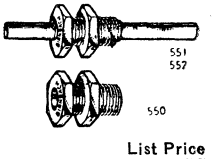


Base measures 2" dia. with 3 holes on a 1 5/8" circle, for No. 6 screws. Supplied complete with 12-24 nickel-plated brass screw and nuts. The No. 766J has a No. 403 Jack. Available white or brown glaze.

No.	Hardware	Std. Pkg.	List Price
766—Standoff Insulator	12-24 Screw	10	$0.17
766J—Jack Type	No. 403 Jack	10	.22

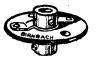
FRONT PANEL BEARING

The No. 550 Front Panel Bearing is cadmium plated brass for panels up to 3/8" in thickness and for 1/4" dia. shafts. The No. 551 and No. 552 are complete assemblies of the No. 550 and 1/4 dia. brass shaft cadmium plated.



Cat. No.		List Price
550	Front Panel Bearing	each $ .18
551	Front Panel Bearing, 1/4 shaft, 3" long	each .36
552	Front Panel Bearing, 1/4 shaft, 6" long	each .50

FLEXIBLE COUPLINGS



These flexible couplings cover all needs of the constructor. Tandem operation of two or more units is possible without having the shafts in exact alignment. Flexibility without back-lash is obtained by the cadmium plated phosphor bronze springs, which are rigidly riveted to the insulation. All units fit 1/4" dia. shafts.

No.	Dia.	Insulation	List Price
360	1 1/4	Fibre	each $ .35
361	1 1/4	Bakelite	each .50
362	1 1/16	Steatite	each .60

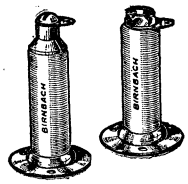
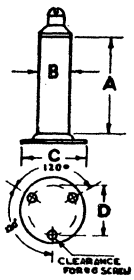
Birnbach INSULATORS

STEATITE PILLARS



These (steatite) pillar insulators have great tensile strength with extremely low losses at very high frequencies and are glazed on the outside to decrease surface leakage.. They are tapped on both ends and are supplied complete with nickel-plated mounting base and top hardware.



No.	Height A	Std. Pkg.	B	Hardware	Base Dia. C	D	List Price each
450	1"	10	½"	6-32	1⅛"	⅞"	$ .35

LUCITE SPREADERS

They are made of Dupont Lucite rod which has a very low loss at radio frequencies. It is water clear and has very low water absorption. The holes are drilled to take a No. 12 wire. A screw at the end of the spreader locks the wire in position.

No.	Wire-Spacing	Std. Pkg.	List Price Each
436	2"	25	$0.28
437	4"	25	.33
438	6"	25	.40

LUCITE RODS

No.	Dia.	List Price per Ft.
455	¼"	$0.50
459	⅜"	.60
460	½"	1.05
461	¾"	1.80

Available in lengths up to 48 inches

FEEDER SPREADERS

They have a cross section of ⅜" x ½". Made of highly vitrified, low absorption, high tensile strength porcelain with a smooth while glaze overall.

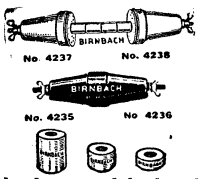
No.	Std. Pkg.	List Price
462—Spreader, 2" long	25 each	$0.14
464—Spreader, 4" long	25 each	.19
469—Spreader, 6" long	25 each	.24

ANTENNA INSULATORS

These Antenna Insulators have exceptional low moisture absorption. The leakage path is long and the cross section is small and is consistent with the strength required. A smooth white glaze overall prevents the accumulation of dirt or ice.

No.	Std. Pkg.	List Price
668—4¼" long	25 each	$ .17
470—7" long	10 each	.68
471—12" long	5 each	.85
468—4½" long Center Insulator	10 each	.30

LEADIN INSULATORS



Each cone is 2¾" high and made of low absorption, highly vitrified glazed porcelain. The Nos. 4237 and 4238 Leadin Insulators have sufficient insulating bushings to insulate the rod that goes through the wall. In addition, 2 bushings are included, ¼" and ½" long, allowing complete insulation of the threaded rod of any length in multiples of ¼". They come complete with brass nickel-plated hardware and lead and cork washers to permit a water-tight seal.

No.	Description	List Price
4235	10" Rod	$1.15
4236	15" Rod	1.30
4237	10" Rod with bushings	1.50
4238	15" Rod with bushings	1.90

STEATITE BUTTON

These specially designed steatite buttons are intended for use to simplify wiring and to be used as a binding post or a binding post insulator, or as a standoff insulator. Attention is called to the uniqueness of the design which prevents either section of the insulator from turning in respect to the special screw. The specially designed screw locks both sections.

A 5/16"..... B ½"..... C ¾"..... D ½"..... E 6-32

No. 457 ..... Std. Pkg. 25 ..... List Price $ .25

STEATITE PILLARS
(Without Hardware)

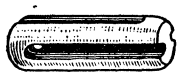
In many constructions, these unmounted threaded steatite pillars will facilitate assembly because of the one hole mounting and parallel mounting surfaces. They are made of glazed Steatite with threaded holes on both sides.

No.	Height	Dia.	Threaded Hole	List Price
445	1"	½"	6-32	$0.25
446	1½"	½"	6-32	.30
447	2½"	½"	6-32	.35
448	2½"	¾"	¼-20	.55
449	4"	¾"	¼-20	.90

AIRPLANE INSULATORS

Used on mobile antenna installations, particularly on aircraft, as they are shaped for the least air resistance. They are made of white glazed low absorption porcelain.

No.	Length	Std. Pkg.	List Price
473	2"	100 each	$0.08
474	1½"	100 each	.07



STEATITE AIRPLANE INSULATORS

A very small compression type insulator with small wind resistance. It is 1½" long and ½" dia.

No. 463—Std. Pkg. 25, List Price $.30 ea.

TUBE CLAMPS

These tube clips will be found extremely desirable when mounting resonant lines or elements of directive beam antennas. They are made of hard drawn aluminum and are available for 5/16", ⅜", ½", ¾" and 1" dia. tubes. The 5/16", ⅜", and ½" have a clearance hole for No. 10 screw and the ¾" and 1" dia. clamps have holes for ¼" bolts.

Cat. No	To Fit Tube	List Price
51—Clamp	¼" Dia.	each $0.15
52—Clamp	5/16" Dia.	each .15
53—Clamp	⅜" Dia.	each .15
54—Clamp	½" Dia.	each .15
55—Clamp	¾" Dia.	each .25
56—Clamp	1" Dia.	each .25
57—Clamp	⅞" Dia.	each .30

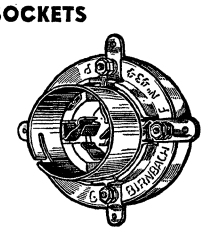
FLEXIBLE SHAFTS

At times there is difficulty getting the controls to the proper position on the panel. With couplings and these flexible shafts, locations can be made with ease on an offset and angles up to 90 degrees. The flexible shafts are made of phosphor bronze and fitted into ¼" dia. hubs.

Cat. No.	List Price
553—Flexible Shaft, 3" long	each $0.45
554—Flexible Shaft, 6" long	each .60

TRANSMITTING TUBE SOCKETS

Improved design and additional features of the Birnbach transmitting sockets has increased their popularity and are accepted as standard. The 50 watt socket has extra heavy side-wiping phosphor bronze contact spring with the filament spring having a double contact to safely carry the heavy current. The tube base is supported by the highly polished nickel-plated brass shell set in a highly vitrified low absorption porcelain base which is ground flat to prevent breakage. All brass nickel-plated screw and milled nuts are used.



Cat. No.	List Price
434—50 Watt Socket	each $1.40
435—10 Watt Socket	each .95

RADIO HOOK-UP WIRE

"CORLAC" HOOK-UP WIRE

For the discriminating service man who knows the importance of voltage break down and insulation resistance. Special under-insulation makes this hook-up wire moisture-proof and gives voltage break-down of 3100 volts (as per certified report of Electrical Testing Laboratory, N. Y. C.). Excellent push-back in waxed finish. Tinned copper conductors.

— ELECTRICAL WIRE AND CORD SETS —

LINE CORD SETS

Rubber-covered cord set for Lamps, Radios, Fans, etc. Underwriters approved molded rubber plug and cord. Free end stripped and tinned ready for attaching.

No.	Size	List Price
608	6 Foot	$ .35
618	9 Foot	.43

CUBE TAP EXTENSION CORD SETS

Made with underwriters approved rubber cord, and molded rubber plug, with 3 outlet bakelite cube tap. Excellent for extension cord and convenience outlets for home, office and shop.

No.	Size	List Price
629	6 Foot	$ .70
639	10 Foot	.83

ELECTRICAL INSULATED WIRE

We carry in stock many other gauges and insulations other than those listed. Your inquiries will receive our prompt attention.

No.	DESCRIPTION	List Price Per 100 Feet
	18 - 2 POSJ	
500	UNDERWRITERS APPROVED For small appliances such as Lamps, Radios, etc. 18 Ga.—2 Cond. Parallel Rubber Covered Rip cord Integral Synthetic Rubber Sheath.	$7.60
	18 - 2 POT	
510	Same as No. 500 except plastic insulation. Highly resistant to oils, water, abrasion and flame. Underwriters approved.	$9.00
	18 - 2 SV	
520	Ideal for Appliances, Vacuum cleaners, Food mixers, etc. Underwriters approved.	$12.95
	18 - 2 SJ	
530	UNDERWRITERS APPROVED For appliances, small equipment such as Refrigerators, Washing machines, etc. 18 Ga.—2 Cond. Type SJ Round Rubber Jacket. 300 O.D.	$15.65
	18 - 3 SJ	
540	UNDERWRITERS APPROVED For appliances, small equipment such as Refrigerators, Washing Machines, etc. 18 Ga.—3 Cond. Type SJ Round Rubber Jacket. 340 O.D. For use where ground lead is required.	$19.80
	16 - 2 SJ	
550	Used on hard usage Equipment, Machine Tools Grinders, Drills, etc. Underwriters approved.	$19.50
	HEATER CORD	
560	Underwriters approved for all Heating appliances, Irons, Toasters, Electric Heaters, etc.	$11.95

VACUUM CLEANER CORD SET

Columbia's replacement cord and plug set, widely used for Vacuum Cleaners. Consists of 21 feet of round rubber jacketed cord, with molded rubber plug. Underwriters Approved. Free end stripped and tinned.

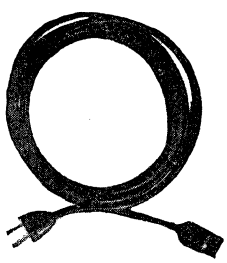
Size	No.	List Price
21′ 18-2 SV	660	$1.37

HEAVY DUTY POWER CORD SETS

Heavy duty rubber power cord set. Molded non-breakable rubber plug. For portable tools, refrigerators, washing machines, etc. Underwriters approved. Open end stripped and tinned for ease of attaching.

Description	No.	List Price
8′ 18-2 SJ	671	$ .75
8′ 16-2 SJ	681	.90

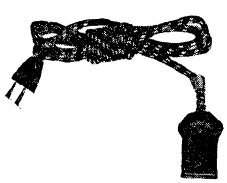
HEAVY DUTY EXTENSION CORD SET



Ideal for extending power to motors, washing machines and portable tools. Constant service round rubber jacketed cord with heavy duty non-breakable molded rubber plug on one end. Other end has female connector. Underwriters Approved.

Description	No.	List Price
10′ 18-2 SJ	692	$1.25

HEATER CORD SET



A replacementer heater cord set made by Columbia for all heating appliances. Insulated asbestos cord, molded rubber plug and universal bakelite appliance connector. Underwriters Approved.

Description	No.	List Price
6′ Cord Set	650	$ .83

AC-DC RESISTANCE CORDS

AC-DC Line cords with built in resistance reduces line voltage and eliminates heat generated by Radio receivers and Electronic devices. Non-breakable rubber plug.

Ohm	No.	Ohm	No.
135	810	250	850
160	820	290	860
180	830	330	870
220	840	360	880

List Price.....Each $.73

220-110 VOLTAGE DROP CORD

Made for reducing line voltage of 220 volts to 110. Non-breakable rubber plug one end. Other end has female attachment.

Description	No.	List Price
220-110 Cord Set	890	$1.67

We have a large assembly plant for the manufacture of cord sets and cable assemblies, of all types. We also attach switches, lugs, terminals, feed thru switches, markers, sleeves, etc. Send us your prints or specifications for prompt action on all your electrical wire problems. Our wire mills have a capacity for manufacturing wire, gauges No. 22 to 2 Cables and special wires made to print.

Aeronics

NOISE-REDUCING ANTENNA

A modern antenna devised to bring you the full benefits of to-day's perfected radio transmission.

•

It covers domestic broadcast, overseas short-wave and high fidelity FM channels.

•

It will supply more efficient and clearer reception over wider frequency bands.

•

Its design combines good appearance with ingeniously simple methods for quick installation.

•

The AERONICS antenna is the result of extensive laboratory and field investigation by qualified men experienced in the theoretical and practical requisites of antennas.

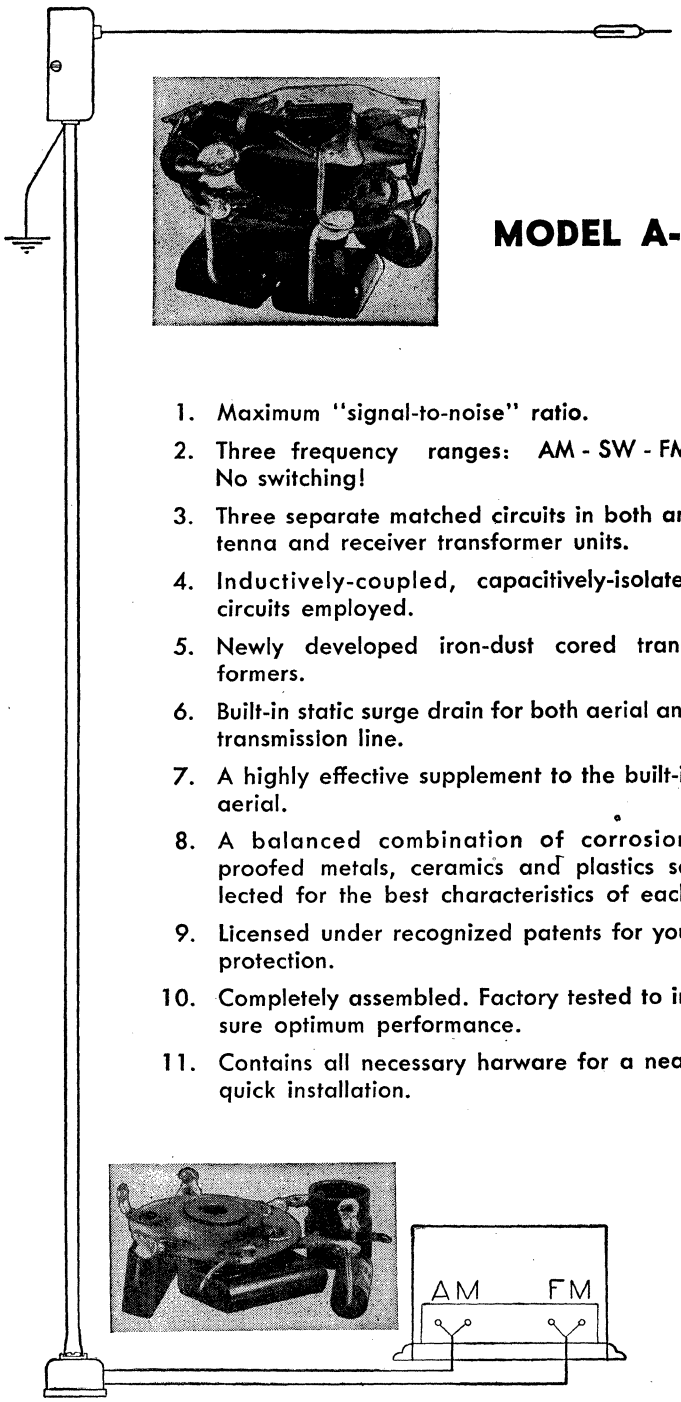
•

The electrical ciruits used are based on fundamental principles incorporated in established patents under which this product is licensed.

•

AERONICS, INC.

NEW YORK 7, N. Y.



MODEL A-1

1. Maximum "signal-to-noise" ratio.
2. Three frequency ranges: AM - SW - FM. No switching!
3. Three separate matched circuits in both antenna and receiver transformer units.
4. Inductively-coupled, capacitively-isolated circuits employed.
5. Newly developed iron-dust cored transformers.
6. Built-in static surge drain for both aerial and transmission line.
7. A highly effective supplement to the built-in aerial.
8. A balanced combination of corrosion-proofed metals, ceramics and plastics selected for the best characteristics of each.
9. Licensed under recognized patents for your protection.
10. Completely assembled. Factory tested to insure optimum performance.
11. Contains all necessary harware for a neat, quick installation.

LIST PRICE $12.00

The performance of even the finest receiver is limited by the amount of noise accompanying a desired program. It is no longer necessary to tolerate the buzzing, hissing, crackling background which mars radio reception. The AERONICS A-1 antenna overcomes this.

The receiver encounters noise chiefly of man-made origin. Noise fields may be radiated in the vicinity of the receiver by defective appliances, electric signs, auto ignition, faulty electric wiring, sparking motors, etc. Most frequently such noise is carried over surprisingly long distances via power lines which normally supply the radio receiver. These noise currents find their way into the receiver input circuit in defiance of even the best "line filters" or so-called static eliminator devices.

The AERONICS antenna minimizes such interference by "isolating" the receiver from the antenna-ground signal pickup circuit. The most modern type of iron-dust core radio-frequency transformers are used in a tandem arrangement of inductively-coupled, capacitively-isolated antenna and receiver units. Such a double isolation method blocks out power line conducted noise currents from affecting the receiver input circuit. Three separate circuits are used, one for each band (BC - SW - FM) peaked and matched for maximum signal. Low loss transmission line is used. It can pass through noise areas without affecting the signal within the antenna system. Thus the clean signal picked up in the quiet area of the elevated aerial wire is virtually "piped" into the receiver.

The AERONICS antenna will aid in FM reception! Wide band frequency modulation is inherently noise-reducing. However the signal-to-noise ratio at the radio set must be great enough so that the FM principle may be fully operative in its noise suppressing action. In distant areas or in buildings which are effectively shielded, signal strength can fall below a prevailing noise level with the result that the benefits of FM will not be enjoyed. The AERONICS antenna offers a solution to this problem.

AERONICS, INC. NEW YORK 7, N. Y.

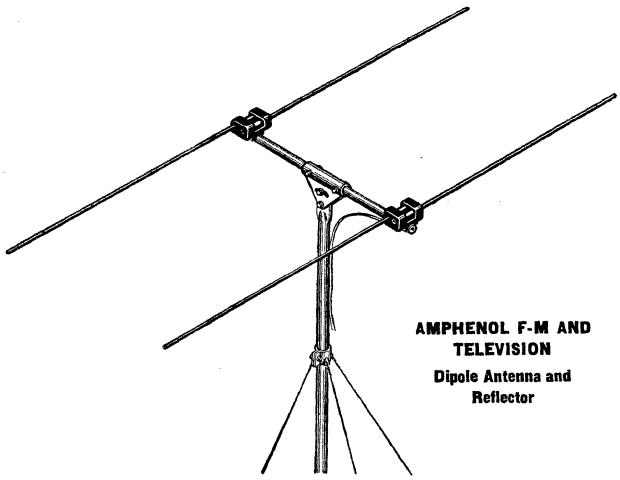
BETTER F-M AND TELEVISION RECEPTION WITH AMPHENOL DIPOLE ANTENNAS



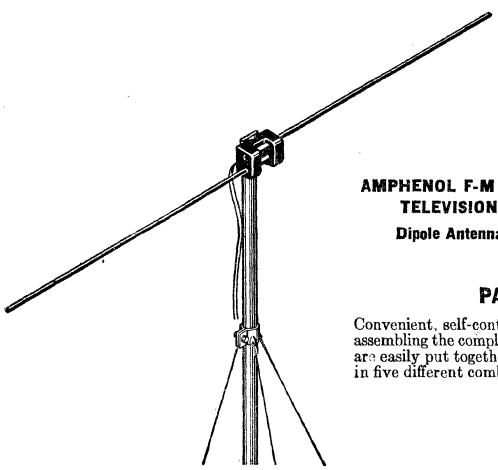
AMPHENOL F-M AND TELEVISION
Dipole Antenna and Reflector

Amphenol F-M and Television Antennas are engineered to provide satisfactory reception in zones of low signal strength. Directional array helps eliminate interfering signals and builds up desired signal.

- High gain that assures improved reception in the F-M and Television bands.
- Swivel feature on mounting bracket and mast head allows polarization adjustment in two planes.
- Innovation in parallel low-loss transmission line for antenna to receiver connection.

AMPHENOL ANTENNA AND ARRAY EQUIPMENT PACKAGED AS FOLLOWS

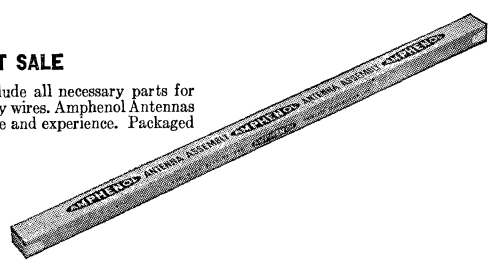
	Shipping Weights	List Price
107-114 — Dipole Antenna — 88-106 Mc	3 lbs. 12 oz.	$ 7.00
107-104 — As above with 75 feet Amphenol 300 ohm Twin-Lead	4 lbs. 14 oz.	10.55
107-113 — Dipole and Reflector Array — 88-106Mc	5 lbs. 8 oz.	11.75
107-103 — As above with 75 feet Amphenol 300 ohm Twin-Lead	6 lbs. 10 oz.	15.25
107-109 — Reflector Array Conversion Kit — 88-106 Mc	2 lbs. 3 oz.	5.50
107-110 — Extra Mounting Bracket (when required for Side Mounting)	6 oz.	1.50



AMPHENOL F-M AND TELEVISION
Dipole Antenna

PACKAGED FOR UNIT SALE

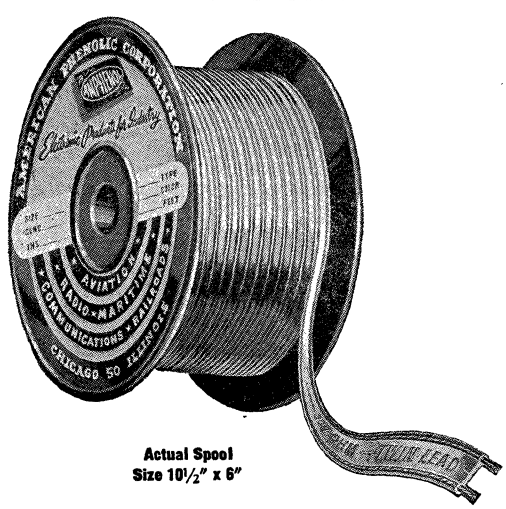
Convenient, self-contained Amphenol kits include all necessary parts for assembling the complete antenna, except the guy wires. Amphenol Antennas are easily put together with a minimum of time and experience. Packaged in five different combinations.



THE IDEAL LEAD-IN WIRE

TWIN LEAD

EXTRUDED WITH POLYETHYLENE DIELECTRIC



Actual Spool Size 10½" x 6"

This is Amphenol's latest development — a highly efficient, low-loss, transmission line that is inexpensive, weather-resistant and rugged in service. Twin-Lead carries signals from antenna to F-M and Television receivers with minimum loss.

AMPHENOL 300 OHM TWIN-LEAD TRANSMISSION LINE provides best match of impedance to F-M receivers. It is further recommended by RMA for television, being most efficient over broadband operation.
14-056 — Per 1000 Feet.....$48.50 list

AMPHENOL 150 OHM TWIN-LEAD also supplied to those who desire it for particular applications and experimental work.
14-079 — Per 1000 Feet.....$40.37 list

AMPHENOL 75 OHM TWIN-LEAD was especially designed for amateurs who are going to operate in very narrow bands of frequency or one particular frequency. Suitable for dipoles that have a nominal impedance of 72 ohms at the frequency for which they are cut.
14-080 — Per 1000 Feet.....$33.45 list

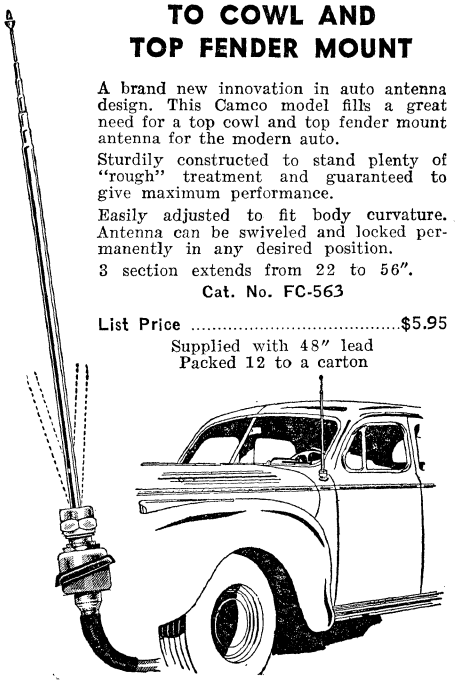
Camco AUTO ANTENNAS
"for top performance"

TO COWL AND TOP FENDER MOUNT



A brand new innovation in auto antenna design. This Camco model fills a great need for a top cowl and top fender mount antenna for the modern auto.

Sturdily constructed to stand plenty of "rough" treatment and guaranteed to give maximum performance.

Easily adjusted to fit body curvature. Antenna can be swiveled and locked permanently in any desired position.

3 section extends from 22 to 56".

Cat. No. FC-563

List Price $5.95

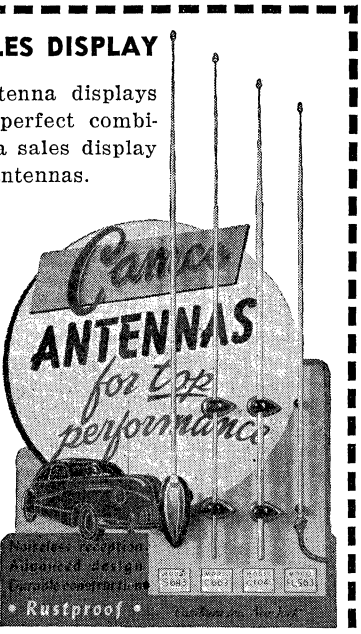
Supplied with 48" lead
Packed 12 to a carton

FREE . . . FIVE COLOR SALES DISPLAY

One of the most attractive antenna displays made, a real "sales-getter". A perfect combination . . . a self-selling antenna sales display and "top performance" Camco antennas.

Display consists of:

One Model C663
One Model C104
One Model S683
One Model FC563



You pay for antennas only

Cat. No. 12
List Price

$25.90

All leads supplied with Pin Tip and Delco Fitting.

Camco antennas are rattle proof, rustproof and precisely engineered to prevent moisture and dirt from entering tubes.

Tested for perfect mechanical performance.

SIDE COWL MOUNT

Insulators—Bakelite and Brass Chromed Combination. Individual in design.

Low Loss Lead—Last word in science and plastics. Vinylite jacketed moisure and corrosion proof. Aircraft type fittings insuring positive ground of lead, shield prevents shorts to car body. Installation simplified.

Conversion Kit—Adaptor supplied for curved cowls.

Construction—Rattle Proof. Swaged part of tube prevents entry of dust and moisture.

Cat. No.	List Price
C-663—3 Section Extends from 26" to 66"	$5.45
C-963—3 Section Extends from 36" to 96"	6.45
C-104—4 Section Extends from 30" to 100"	7.25

Packed 12 to a carton.

"Swivel" FENDER OR SIDE COWL MOUNT

Fits all body contours by simple adjustment. Beautifully designed chromed casting, nested in a special compound rubber cushion . . . (NOT breakable porcelain). Installation therefore is made moisture and rain proof. Two hole mounting.

Cat. No.	List Price
S-683—3 Section Extends to 68"	$7.25

Packed 12 to a carton.

ANTENNAS

WOODSIDE LONG ISLAND NEW YORK

AUTOMATIC SELECTING • NOISE REDUCING • ALL WAVE RECEIVING ANTENNAS

Models 80, 100, and 500 shown below are furnished with multi-winding *patented transformer couplers which automatically tune the antenna to the same frequency as the receiver. The antenna coupler is mounted in a porcelain transformer housing which acts as the center insulator of the doublet antenna. The radio energy is picked up by the antenna, passed through the antenna transformer and down the transmission line, through the receiver coupler to the receiver. This balanced 2 wire isolated transmission system reduces noise pickup to a minimum. Each antenna is furnished complete with tested transformer couplers, antenna wire, transmission line, nail it knobs antenna insulators, lead strips and easy to understand instructions.

*Model 100 ALL WAVE. Covers Standard Broadcast Band and Shortwave Bands. Freq. Range 540 kc. to 20 Mc. Consists of 2-30 ft. coils 7/22 antenna wire—50 ft. Twinnax transmission line—2 transformer couplers. List Price $10.00

*Model 80 ALL WAVE Amateur Communications. Freq. Range 540 kc. to 30 Mc. Consists of 2-30 ft. coils 7/22 antenna wire—60 ft. twinnax transmission line. The transformer couplers in this kit are designed to work into a communications type receiver. List Price $13.50

*Model 500 ALL WAVE Covers Broadcast band—Shortwave—Frequency Modulation Band. Uses 7/22 copper wire for antenna and twinnax high frequency low loss transmission line for maximum efficiency. Furnished with 2 transformer couplers plus specially designed frequency dividing network for FM reception. List Price $14.00

Model 1000 All wave doublet—Covers broadcast and shortwave. Consists of 2-30 ft. coils 7/24 copper antenna wire—50 ft. twisted pair transmission line—For use in noise free locations. List Price $3.50

VERTICAL WHIP ANTENNAS

Noise Reducing - ALL Wave - Built Like an Auto Antenna

A tapered aluminum alloy mast with a bakelite rotor mounted on an aluminum swivel base. Mounts in 3 inches of space—Ideal for window mounting.

Designed for standard broadcast and shortwave receivers.

Frequency range 500 kc. to 30 Mc.—600 to 10 meters. Furnished with or without balanced transformers and special low loss twin transmission line.

*Model 9X An all wave—automatic frequency selecting—noise reducing antenna using a 9 ft. 3 section mast. Provided with an upper unit transformer which matches the vertical mast to the low loss twinnax transmission line. Another lower unit transformer matches the transmission line to the receiver. This gives a balanced—isolated transmission system which reduce noise to a minimum. The transformers are mounted in bakelite shells and thoroughly impregnated. Furnished complete with 35 ft. high frequency low loss twinnax transmission line—2 lead strips, 2 porcelain nail it knobs, mounting hardware and instructions. List Price $15.00

Model 9 A 9 ft. 3 section mast. Furnished complete with 15 ft. lead in wire, window lead in strip, mounting hardware and instructions. List Price $5.00

Model 12 Similar to Model 9 except the vertical mast is made in 4 sections and is 12 ft. long. List Price $6.50

*Model 12X Has the same noise reducing features as the Model 9X but uses the 12 ft. vertical mast. List Price $16.50

AMATEUR BEAM ANTENNAS

Model 400 Series

The 400 Series of antennas are designed for the amateur 10 meter band. They are rigidly constructed of ¾" aluminum tubing telescoping to ⅝". The elements are mounted on 1" aluminum angle and supported by 2½" steatite standoff insulators. Elements are adjustable over a range of several feet.

Model 400-RA 3 element 10 meter beam using .1 wavelength spacing for the director and .15 wavelength spacing for the reflector. Designed to be fed with 300 ohm twinnax. Furnished complete with all aluminum ladder. Elements are ¾" aluminum tubing telescoping to ⅝". Adjustable from 14 to 18 ft. Weight 15 lbs. List Price $45.00

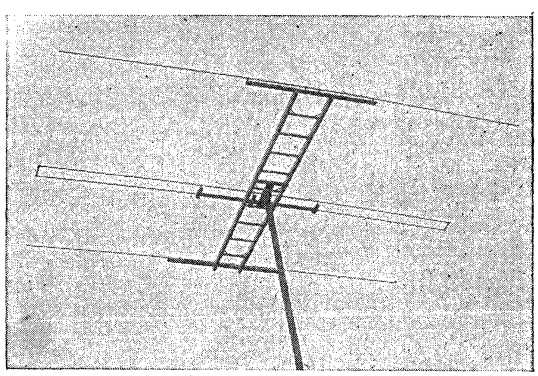
Model 400-EA 3 element 10 meter beam with folded di-pole driven element. Uses .1 wavelength spacing for the director and .15 wavelength spacing for the reflector. Furnished complete with aluminum ladder. The folded di-pole gives a much broader response than the regular single di-pole beams and allows this beam to be fed directly with 50 ohm coaxial cable. Weight 17 lbs. List Price $52.00

Model 400-BA 2 element 10 meter beam with .2 wavelength spacing, Furnished complete with 7 ft. aluminum ladder. Designed to be fed directly with 50 ohm coaxial cable, RG8/U or equivalent. Weight 12 lbs. List Price $34.00

Model 400-AA 10 meter di-pole with adjustable elements. All aluminum with steatite insulators. List Price $13.00

Model 405-CA 10 meter folded di-pole—5 inch spacing. Aluminum supporting angle and adjustable elements. Designed to be fed directly with 300 Ohm twinnax line. Weight 5 lbs. List Price $22.00

Model 401-AA Set of 10 meter director and reflector elements with aluminum supporting angles. Elements are adjustable over a range of several feet. Can be used with either the 405-CA or the 400-AA to make up a 3 element beam. Ideal for the ham who wants to build his own ladder. List Price $22.00



MODEL 400EA

Model 200-EA Five element beam for the amateur 2 meter band, with folded di-pole driven element—3 directors and 1 reflector. Constructed entirely of aluminum with steatite standoff insulators. Designed to be fed with low impedance coaxial cable. List Price $14.00

TELEVISION AND FM ANTENNAS

*Model 250 Combination FM and Television Antenna. A multi-element array using 2 folded di-poles coupled together by frequency dividing networks which automatically select the desired band of frequencies.

Prices slightly higher in the far west.

We also manufacture a full line of FM and Television antennas consisting of single, folded, fan type and cone type di-poles both with and without reflectors. Literature available on request.

*Licensed A.A.K. Pats. 1938092, Re 19854, 2002844.

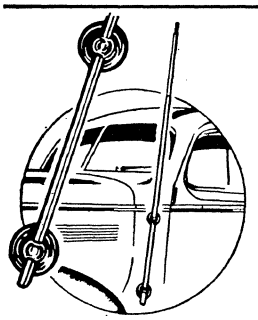
GENERAL ELECTRIC

AUTO ANTENNAS

For the Finest in High Efficiency, Low Noise Reception, Together with Lasting Durable Construction, SELECT General Electric Antennas.

NEW EXCLUSIVE FEATURES

- Completely equipped with a newly developed low capacity, low loss lead cable
- Speedy installation. positive interference-proof, lead coupling
- Ferrule-set connection with bayonet adapter
- Rattle-proof, no-slip, fluid type construction
- High efficiency, low resistant silver to silver contacts
- Finest Admiralty brass, beautifully chrome plated



MODEL UZA 007

DELUX RECEPTION MASTER

Side Cowl Mount

- 4 Section—100 inch
- 2 Stanchion ceramic insulators
- Includes Bayonet Adapter and conversion kit for Torpedo Bodies

Shipping Wt. 1 lb. 15 oz.

Suggested List $7.45

MODEL UZA 006

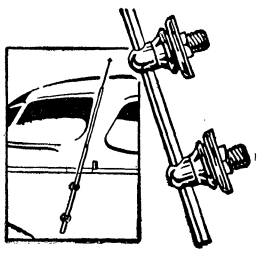
STANDARD RECEPTION MASTER

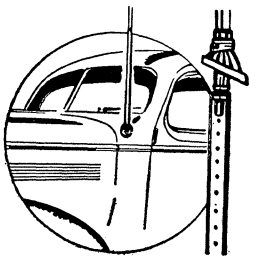
Side Cowl Mount

- 3 Section—66 inch
- 2 Stanchion ceramic insulators
- Includes Bayonet Adapter and conversion kit for Torpedo Bodies

Shipping Wt. 1 lb. 4 oz.

Suggested List $5.45





MODEL UZA 010

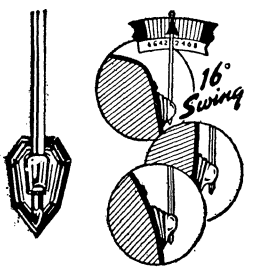
COWL ANGLE-JUST

Universal Top Cowl Mount

- 3 Section—56 inch
- Single stanchion ceramic insulator, Chrome trim
- Fits all car cowls regardless of contour

Shipping Wt. 1 lb. 5 oz.

Suggested List $5.95



MODEL UZA 008

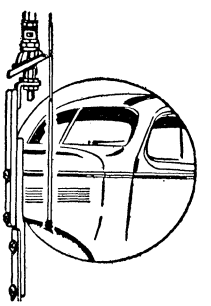
UNIVERSAL ANGLE-JUST

Fender or Cowl Mount

- 3 Section—68 inch
- Single stanchion ceramic insulator, chrome trim
- New positive shielding eliminates use of prewar shield cans

Shipping Wt. 1 lb. 8 oz.

Suggested List $5.95



MODEL UZA 009

FENDER ANGLE-JUST

Fender Mount

- 3 Section—56 inch
- Single stanchion ceramic insulator, chrome trim
- Fits all car fenders regardless of contour

Shipping Wt. 3 lbs.

Suggested List $8.75

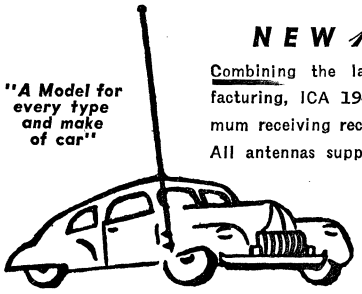
ICA INSULINE ICA RADIO PRODUCTS

I. C. A. "DE LUXE" AUTO RADIO ANTENNAS

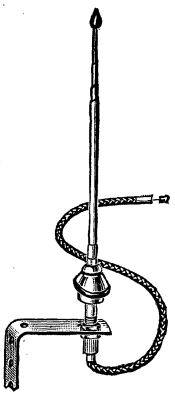
"A Model for every type and make of car"



NEW 1947 ICA AUTO ANTENNAS

Combining the latest engineering features with precision manufacturing, ICA 1947 Series automotive radio antennas ocers maximum receiving reception. There's an ICA antenna for every purpose. All antennas supplied with both Delco and Motorola fittings.

ICA TOPPER ANTENNA



For tops of fenders and cowls of newest streamlined cars.

Has these latest features:

- Rust-proof Admiralty brass. Triple chrome-plated.
- Snug - fitting tapered telescopic joints.
- Patented brass shim contacts prevent rattling and vibration.
- Fitted with static-discharge ball.
- Patented swivel coupling for easy mounting.
- Shielded loom cable.

No. 4575.....**Net $3.87**

3 Section—Extends from 20" to 63"

10 to a Standard Carton—Weight 10 lbs.

ICA DISAPPEARING ANTENNA

For Cowl and Fender Mount

Rustproof - Rattleproof - Weatherproof

Fits on either fender-top or cowl-top. Suitable for all cars—old and new.

- 3" of exposed Antenna telescopes to 50".
- Quickly and easily installed.
- Does not obstruct vision.
- Insulator of bakelite and chrome-plated brass for long service.
- Cable protected by ICA Shielded loom Vinylite insulation.

No. 4586—Three Section

Net $4.47

10 to Standard Carton

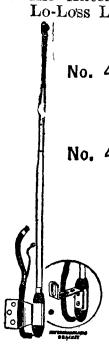
Weight 11 lbs.

UNI-MOUNT UNDERHOOD ANTENNA

Only One Aerial for All Type Mountings

Fits all model cars including latest '40 styles

- Dual Brackets designed so that they can be interchanged in a minute for both Underhood and Alligator types.
- Eliminates drilling of holes on body of car.
- Made of Admiralty Brass. Triple Chrome-Plated. Guaranteed Rust-proof, Rattle-proof.
- Both Underhood and Alligator Mounting Brackets are included as standard equipment with every aerial.
- All Antennas are supplied with Shielded Lo-Loss Lead-in Cable.



The "WASP"

2 Section Telescopic—49"

No. 4800.....**Net $2.55**

The "TRAVELLER"

3 Section Telescopic—63"

Extends from 20" to 63"

No. 4801.....**Net $2.97**

The "CLIPPER"

3 Section Telescopic-72"

Extends from 23½" to 72"

No. 4802.....**Net $3.30**

The "NEW YORKER"

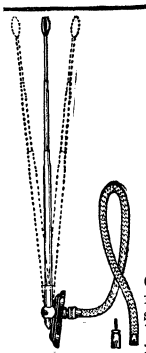
3 Section Telescopic-96"

Extends from 31½" to 96"

No. 4803.....**Net $3.57**

ICA "ROCKER" AERIAL

A Variable Angle Antenna to Fit the Contours of All Car Bodies



- The adjustable mounting mechanism is concealed so as to make it both tamper-proof and weather-proof.
- Beautifully fashioned — Rugged construction.
- Easy to install, requiring the drilling of only 2 small holes, adjusting the antenna to the desired angle and tightening.

Completely assembled, ready for installation with 36" shielded Lo-Loss Cable and Universal plug - in attachment.

"ROCKER" ANTENNA

2 Section Telescopic—49"

Extends from 23" to 49"

No. 4540.....**Net $3.00**

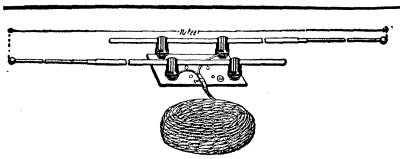
10 to a Standard Carton—Weight 12 lbs.

3 Section Telescopic—72"

Extends from 23½" to 72"

No. 4541.....**Net $3.45**

10 to a Standard Carton—Weight 16 lbs.



FM AND TELEVISION ANTENNAS

Newly designed, highly efficient television antenna. Admiralty brass; nickel plated. Highly di-electric, bakelite insulators and base. Covers continuous frequency range 42 to 112 megacycles covering all television frequencies and the 42 and 84 megacycles FM Band. Consists of two tubular collectors, each 5 feet long.

Cat No. 6001....**Net $5.10** **Cat. No. 6002** (with 60 ft. transmission cable).....**Net $6.30**

ANTENNA REFLECTOR

Increases effectiveness of television reception when used with ICA Television Antenna.

Cat. No. 6003.....**Net $4.50**

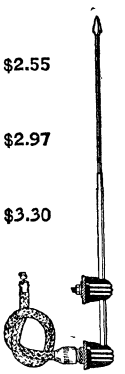
SIDE COWL AERIALS

Noiseless! - - Rattle Proof!

Lifetime Guarantee Against Rusting

Admiralty Brass and Stainless Steel Antennas

- Static Discharge Ball supplied on all aerials
- All Antennas supplied with 36" Fool-proof Spring Tensioned Lo-Loss Cables protected by Heavy Shielded Loom to prevent noise pick-up.



The "GOVERNOR"

Two Section Telescopic

49" Total Length

Extends from 23" to 49"

No. 4551.....**Net $2.55**

The "CHANCELLOR"

Three Section Telescopic

63" Total Length

Extends from 20" to 63"

No. 4566.....**Net $2.97**

The "COMMODORE"

Three Section Telescopic

70" Total Length

Extends 23½ to 70"

No. 4555.....**Net $3.30**

The "PRESIDENT"

Three Section Telescopic

93" Total Length

Extends from 31½" to 93"

No. 4553.....**Net $3.57**

The "COUNSELLOR"

FOR LONG DISTANCE RECEPTION AND POLICE WORK

Four Section Telescopic

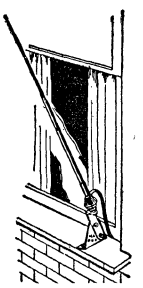
106" Total Length

Made of Extra Large Diameter Brass Tubing

No. 4558A.....**Net $4.47**

DE LUXE WINDOW ANTENNAS

8 Feet—12 Feet



Made of Admiralty Brass with Beautiful Nickel-Plated Finish

- For Homes, Apartments, Hotels, Office Buildings, and places where it is inconvenient to install outdoor aerials or to improve reception on indoor installations.
- Quickly and easily installed.
- Adjustable Bracket at base, permits the antenna to be focused in any position for best reception.
- Furnished completely assembled with mounting flange, insulator and lead-in strip.

Individually boxed.

3 Section Telescopic Antenna Opens to 96" Total Length

No. 4527B.....**Net $3.60**

10 to a Standard Carton—Weight 14 lbs.

4 Section Extra Long Window Antenna

12 Feet Long

Ideal for DX Reception and Rural Sections where extra length is needed for best results.

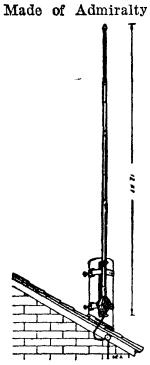
No. 4513.....**Net $4.05**

10 to a Standard Carton—Weight 33 lbs.

HOME ANTENNAS

12 Feet—4 Sections

Made of Admiralty Brass—Guaranteed Rust Proof



- The Latest Type Home Antenna suggested by leading Radio Set Manufacturers for best results.
- Eliminates unsightly and dangerous wires.
- Clear, noise-free reception with no power line interference.
- Very sturdy construction—made of Admiralty Brass with Beautiful Nickel-Plated Finish.
- Guaranteed Rust-proof for the Life of Antenna.
- Universal Bracket allows permanent and convenient installation on soil pipe, window pipe, chimney, roof, gables, cornices, wall copings, etc.
- Individually boxed.

Vertical Mast with all accessories for Universal Mounting — including Lead-in Wire, Ground Wire, Brackets, Lightning Arrester, Screws, Insulators, etc.

No. 4516.....**Net $4.17**

10 to a Standard Carton—Weight 33 lbs.

PREMAX TELESCOPING VERTICAL RADIATORS

For satisfactory operation under the most critical conditions found in marine installations and other commercial uses where high strength and unusual resistance to corrosion are prime considerations, Premax has developed special Monel and Aluminum Antennas which successfully resist the action of sea air, salt spray and other corrosive agents. These Antennas have satisfactorily stood up under the most severe wind and shock strains, and found extensive military application on the PT Boats and other craft of the Navy and Coast Guard in World War II.

Aluminum Radiators

Premax Adjustable Type Aluminum Antennas were first introduced to provide lightweight combined with corrosion resistance and adequate strength to meet the most exacting conditions. During World War II improvements were made in their design and versatility until today they are generally accepted in standard designs for marine and mobile installations where lightweight, convenience in erection and dependable performance are important considerations.

They are ideally adapted for use in radio telephone installations on fresh water craft and for commercial installations where convenience in extending and collapsing and attractive appearance are important considerations. Other popular uses are for police, fire, forestry, public utility and similar services, as well as for home receiving sets. Amateurs have discovered the excellent performance of these Antennas and they have a wide acceptance among the "hams" for both transmitting and reciving on any and all radio frequency bands.

The tubing is special drawn bright finish seamless tempered aluminum with diameters, gauges and temper engineered to withstand wind velocities up to 60 miles per hour. The locking device is simple in operation and provides efficient low-resistance contact between sections. Six units are available, all fully telescoping exeepting the tapered top section.

HEAVY-DUTY NON-ADJUSTABLE MASTS

For special installations under extraordinarily trying conditions, the Heavy-Duty, Non-Adjustable Aluminum Antenna is recommended. In either the 17½-foot or the 35-foot lengths this special heat-treated aluminum alloy antenna is designed to withstand wind velocities up to 100 miles per hour. The tubing is graduated in steps from a base diameter of two inches to a top of one-half inch on the 35-foot mast and a base diameter of 31/32-inch to a top of one-half inch on the 17½-foot mast. The antenna has a smooth, polished finish to resist corrosion. The 35-foot mast is in two sections, with closely-machined joint, secured by two cross bolts.

Monel Radiators

Monel has proven to be the most practical material for radio antennas as it is far more resistant to corrosion than either the nickels or coppers which enter into the formulation of the monel. Its properties enable it to withstand weather conditions in the Tropics as well as above the Arctic Circle. Its mechanical properties enable it to satisfactorily resist shocks as its toughness and fatigue strength far exceed the limits of mild steel or all brasses and bronzes. This means freedom from internal structural failures, season cracking and other weaknesses which, in ordinary metal, result in poor contacts, increased resistance or mechanical breakdown. Rigid tests by both Government and private agencies have shown Premax Monel Antennas to be the most dependable units available for high efficiency and satisfactory service under all conditions.

Premax Monel Antennas are built up of multiple sections of hard-drawn monel tubing of a tensile strength exceeding 100,000 pounds per square inch and represent a cooperative development of Premax engineers and the Superior Tube Company of Norristown, Pennsylvania. Their rich, highly-polished, chrome-plated finish conforms perfectly with the equipment of even the finest craft, yet their cost is not excessive for the more modest installations when their long life and operating efficiency are considered.

Premax Monel Antennas are available in five standard units, fully telescoping and adjustable. The special knurled thimble and friction clutch sleeve locking device secure the sections firmly at any desired height and also provide perfect electrical contacts.

Various types of recommended mountings and supports are shown on page S-38 of this Catalog.

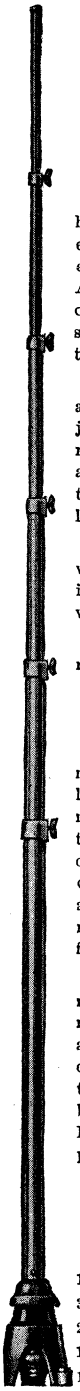
PREMAX TELESCOPING VERTICALS AND ELEMENTS

Premax Tubular Steel Antennas and Elements have been known to the radio field for a long period of years and have shown exceptionally efficient, dependable performance under most severe conditions. The low initial cost of these Antennas has put Premax equipment within the budget requirements for amateur, commercial and municipal installations of all types.



Steel Radiators

Premax Tubular Steel Antennas are made of high-tensile, copper-nickel steel tubing of carefully engineered diameters and wall thicknesses, heavily electro-plated and highly resistant to corrosion. These Antennas will withstand all ordinary stresses without guying, but should be supported by guys or standoff insulators against abnormal winds or extreme conditions.

Standard Premax Tubular Steel Antennas are available in two, three, four, five and six-section adjustable models, ranging from about twelve feet minimum to about thirty-four feet maximum height as shown in specifications below. While these Antennas possess unusual tensile strength, they are light in weight, easily handled and readily portable.

All units are fully telescoping and adjustable within the limits shown below. The locking device is simple in operation, positive in action and provides a secure, efficient contact between the sections.

Cadmium-plated Steel Antennas are NOT recommended for marine use on salt water.

AVAILABLE IN FIVE STANDARD LENGTHS

The adaptability of Premax Tubular Steel Antennas is almost universal because of the five standard lengths available. By selecting the proper approximate height, the Antenna may be adjusted or tuned to the proper frequency by raising or lowering at one or more section locks. Because of their extreme durability and excellent performance, hundreds of amateur, public and commercial users are recommending them as dependable, low-cost equipment for a wide variety of radio services.

There are many practical and commonly used methods of mounting these Antennas, of which the most popular is the Heavy Duty Insulator Base, available in several styles. Special insulators are designed for use where installations are made through a roof or deck and others for offset or wall bracket mountings. Complete details of Premax Base Mountings and Insulators will be found on page S-38 of this Catalog.

Corulite Elements

Premax Corulite Elements have been designed to meet the need for light-weight but sturdy elements for use in horizontal arrays and similar applications. They are exceptionally light in weight and their special design provides the necessary strength and rigidity so essential in horizontal types of installations —and at an extremely low cost.

The walls of Premax Corulite Elements range from twelve thousandths of an inch to twenty-two thousandths of an inch in thickness. The special steel tubing used in the construction of these Elements is a development of Premax Engineers to secure unusual stiffness and strength. All parts are heavily electro-plated to provide corrosion resistance and high electrical conductivity.

A positive clamp, spot-welded to the tubing, permits adjustment to any desired length and also assures rigid joints and positive electrical contact between the telescoping sections of the Elements.

Corulite Elements are available in one, two, three and four-section units, fully telescoping one within the other and adjustable between the limits shown in the table below. These Elements meet all requirements for various five to twenty-meter arrays in general use and are also ideal for combinations in the amateur, commercial, FM or television band. Ease of adjustment between the two halves of each complete element is provided by the Premax "Hairpin" Tuning Bar. By its use it is possible to have all of the elements set at a single physical length and the variation in their electrical length may be accomplished by the "Hairpin." Premax Corulite Elements are conveniently mounted on Premax Standoff Insulators shown on page S-38 of this Catalog or by special Premax Mounting Clips on any standard Standoff.

PREMAX POLICE ANTENNA — Receiving and Sending

Antenna Rods for Mobile Installations

Premax Engineers have developed many highly successful types of Police and Mobile Antennas which are finding wide use in Municipal and Commercial service because of their rugged strength and practical design. The solid rod or "whip" types, styles A and B, are designed of steel of an extremely high carbon content, heat-treated and oil-tempered to carefully develop physical properties. Rods of varying diameters, cold-drawn to rigidly-held tolerances, are joined securely and permanently into a single graduated length which provides high flexibility, minimum wind resistance and long life. Where ordinary antennas bend or break under stress of striking tree branches, bridges, garage doors and similar obstructions, Premax Antennas merely flex under the strain and immediately return to normal position when the obstacle is cleared. This eliminates the usual replacement costs and insures long and useful life for every Premax Antenna.

While Premax Antennas are heavily plated to give protection against corrosion in all ordinary atmospheres, the same designs in polished, hard-drawn stainless steel are available where corrosive conditions are extreme.

Premax Police Antennas are available in two styles of bases: Style A with a plain quarter-inch end and Style B which has a 7/16-inch threaded stud complete with hexagon nuts and lock washers.

Style A will fit the following Mountings: Styles K, L, TA, NA, R, S and SA. Style B Rods will fit only Style G or N Mountings.

For the larger mobile units, standard Premax Antennas in steel, aluminum and monel as described on the preceeding pages are employed. Their collapsing feature permits even a 35-foot radiator to be mounted on a truck, using the standard Premax Mounts. These radiators have a surprisingly long range and are widely used by state police, forestry and commercial mobile units.

ONE-PIECE MONEL TAPERED TUBULAR ROD

In order to provide a "whip" type Antenna of unusually light weight, extreme flexibility and the ability to withstand severe climatic and corrosive conditions, Premax has developed a one-piece tubular, tapered Monel Rod.

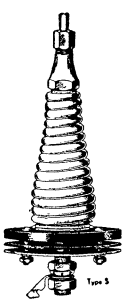
This consists of cold-drawn monel tubing with four graduations . . . the base section being from 36″ to 48″ long by ¼″ in diameter; the second portion 16″ long by 13/64″ diameter; the third portion 16″ long by 5/32″ diameter and top portion 16″ long by 7/64″ diameter. The finish is polished chrome plate which gives added protection. Will fit all standard type Premax Mountings except Type G or N.

Amateur and commercial users will find these Antennas admirably suited for use as Dipoles where corrosion resistance is important.

SPECIFICATIONS—MONEL TUBULAR RODS

No.	Length	Base	No.	Length	Base	No.	Length	Base
MP-372	6′	¼″	MP-384	7′	¼″	MP-396	8′	¼″

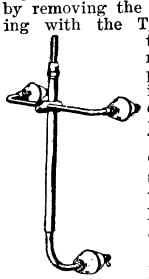
MOBILE TYPE MOUNTS



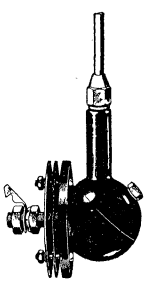
Premax Mountings for Police and other mobile type antenna installations have been designed to meet the need for sturdy, dependable, low-cost mountings that will withstand the shocks and jolts which are unavoidable in any installation of a mobile character. These Mountings are particularly adapted to use with "whip" antennas on police cars, utility and service vehicles where the shock of rough terrain demands the utmost in flexibility of the antenna.

TYPE S—Spring Mounting is primarily designed for auto roof-top installation or for use on any other flat surface. A special plastic insulating disc is part of the base of the Mounting. This is held to the flat surface by means of four bolts and a leak-proof insulation is secured by use of a rubber gasket and steel backing plate. A lug is attached to the 7/16″ lead-in stud for wire connection. This Mounting will take any Premax Type A Antenna. A retaining nut and tapered split bushing lock the antenna securely in the top socket and yet permit easy removal when necessary. The fittings are of solid brass, electroplated and will not corrode. The spring is of heavy tempered steel, electroplated for weather-resistance. Overall height of Mounting is about 5″; diameter of insulator disc about 3″. Comes complete with rubber gasket, steel backplate, lead-in lug and necessary mounting screws.

TYPE SA—Spring Adapter Mounting is similar in all details to Type S above, except that in place of the insulator disc it is equipped with an adapter stud and tapped base plug to fit any Premax Type K, L, NA, R or TA Mounting. These types of standard mountings may thus be quickly converted to a spring type by removing the clamping nut at the top and replacing with the Type SA Spring Mounting which is threaded to fit. The special stud extends into the mounting tube to give extra strength and support at the threaded end. The Type SA Mounting will take any Premax Style A Antenna. The overall height is about 4¾″ and the base diameter of the spring is about 1⅝″.

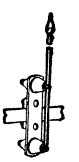


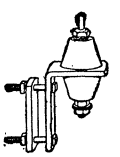
TYPE TA for attaching Style A Rod to trunk or car body. Lower support is solid brass rod securely joined to 12″ brass tube carrying antenna. Upper mounting assemblies to fit contour. Insulators are high-tension, white-glazed ceramic cones. Antenna tube provides maximum 10″ adjustment in antenna height. All metal parts heavily plated.



TYPE R Universal Mount; attaches to any surface and adjustable to any angle. Solid brass, black baked finish. Split sleeve antenna locking clamp. Fits Style A Rods. Complete with insulator disc, rubber gasket, steel backplate and necessary mounting screws.

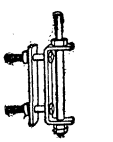
TYPE NA Adjustable Bumper Mount, same as Type N except locking nut and split sleeve permits removal of antenna. Fits Style A Rod.





TYPE N Bumper Mount; cadmium plated steel with high tension ceramic cones. Fits Style B Rod.

TYPE L Adjustable Bumper Mount; similar to Type K in adjusting feature. Has 6″ spacing between insulators giving extra base support. Fits Style A Rod.



TYPE K Adjustable Bumper Mount; similar in design to Type NA but with longer socket tube which permits 10″ adjustment in height of Style A Rod.

TYPE G Grounded Bumper Mount; designed for Style B Rod.

PREMAX INSULATORS AND ACCESSORIES

BASE INSULATOR, TYPE 1—Heavy-duty type, employing wet-process, brown-glazed porcelain cones, held in compression for maximum strength. A Lapp design with compression rating up to 10,000 pounds. Height to top of cone 7". Bolt circle 5¼". Weight about 7 lbs. Complete with mounting bolts and nuts. In galvanized malleable iron or chrome-plated bronze.

Galv. No.	Bronze No.	Diamete Top Post	Fits Antennas
1PG-24*	1PB-24	3/4"	318-M, MM-425
1PG-26	1PB-26	13/16"	AL-324
1PG-30	1PB-30	15/16"	224-M, MM-430, MM-435, SM-725

1PG-41	1PB-41	1-9/32"	AL-535
1PG-44*	1PB-44*	1-3/8"	136-M

*—Can be used with adapters to fit other sizes of masts.

BASE INSULATOR TYPE 2—Light design for masts up to 18' or longer lengths if guyed or supported with standoff insulators. Brown-glazed porcelain with galvanized malleable iron top post and base support cemented into insulator. Porcelain diameter 3¼". Height to top of porcelain 6". Flange diameter 3¼". Weight 4 pounds. Furnished complete with necessary mounting bolts and nuts.

No.	Diameter Top Post	Fits Antennas
2P-24*	¾"	318-M, MM-425

*—Can be used with adapters to fit other sizes of masts.

ADAPTERS FOR BASE INSULATORS TYPES 1 and 2—Short lengths of cadmium plated steel tubing fitted with connection clamp to permit use of standard Type 1, 2 or 6 Base Insulators with other sizes of tubular masts.

No.	Used With Insulator No.	To Fit Antennas	Weight Each
A-20	1P-24, 2P-24, 6P24	MM-313 or ⅝" O.D.	½ lb.
A-21	1P-24, 2P-24, 6P-24	112-M or 21/32" O.D.	½ lb.
A-24	1P-24, 2P-24, 6P-24	AL-518, MM-419 or ¾" O.D.	½ lb.
A-40	1P-44, 6P-44	AL-530, 130-M or 1¼" O.D.	¾ lb.

BASE INSULATOR TYPE 6—For marine, mobile unit, tower platform, roof-top, etc. Simple to install, neat and compact. Lead-thru construction permits antenna connections below deck. General construction similar to Type 1. Flanges are 6" diameter with six bolt holes on 5" circle. Furnished with center stud and flange bolts for deck ½" to 3" thick. Total height above deck to base of post 4½". Weight 11½ lbs.

Galv. No.	Bronze No.	Diameter Top Post	Fits Antennas
6PG-24*	6PB-24*	3/4"	318-M, MM-425
6PG-26	6PB-26	13/16"	AL-324

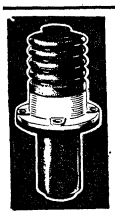
6PG-44*	6PB-44*	1-3/8"	136-M

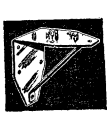
*—Can be used with adapters to fit other sizes of masts.



DECK BUSHING—Of brown-glazed porcelain cemented into hot galvanized malleable flange which bolts through rubber gasket to the deck or other surface. Provides additional support for antenna in lieu of guying.

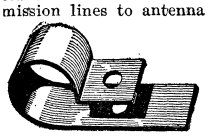
No.	I.D.	Total Length	Above Deck	Flange Diameter	Weight Each
5D-24	¾"	6"	3"	4"	2 lbs.
5D-40	1¼"	8"	4¼"	4½"	3½ lbs.
5D-56	1¾"	8½"	4½"	5⅜"	4½ lbs.

WALL BRACKET—A heavy steel bracket designed for mounting Vertical Radiators on side walls, parapets or posts. Drilled to fit Premax Type 1 and Type 2 Base Insulators. Black baked enamel finish. Standoff Type 3, 4, 7 or 10 suggested for use with this mounting, in order to give additional support.



No.	Weight
WB-1	7 lbs.

BRONZE MOUNTING CLIPS—Formed bronze clips or clamps for mounting horizontal elements or vertical antennas on standard standoff insulators. Also used for connecting feed wires and transmission lines to antenna or elements. ¾" wide, cadmium plated.



No.	Description
618C	Fits 1" tube
113C	Fits ⅞" tube
108C	Fits ¾" tube

TYPE 10-S STANDOFF INSULATORS—A heavy, carefully engineered support specially developed for rugged military service. Chrome-plated bronze base and head caps cemented to brown-glazed, wet process porcelain insulator. Recommended for severe demands, especially commercial and marine. Weight each, about 2 lbs.

No.	Fits Tube Size	Height to Center
10S-28	7/8"	4-1/4"
10S-34	1 1/16"	4-1/4"
10S-40	1-1/4"	4-7/16"

TYPE 3 STANDOFF INSULATORS—For standoff support of vertical antennas, etc., or for use in pairs as complete mountings of vertical or horizontal elements. Galvanized or brass fittings attached to threaded studs cemented in brown-glazed porcelain body. Porcelain 3" diameter. Height to top of porcelain 3". Weight about 2 pounds each.

Type 3

TYPE 4 STANDOFF INSULATOR—Similar in design to Type 3 but with double clamp. Top clamp sizes available in same range as Type 3. Bottom clamp made to fit all standard pipe sizes from ¼" to 3". Available in galvanized or polished brass. State size of clamps desired, both top and bottom.

Type 4

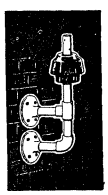
WALL MOUNT INSULATOR—Firm, serviceable side mounting which fastens securely to wall or post. Brown-glaze porcelain insulator similar to Type 2. Metal parts hot galvanized malleable iron. Standoff Insulator Type 3 or 4 suggested for use with this mounting.



No.	Post Diameter	Weight
2-WP	¾"	5 lbs.

TYPE 7 STANDOFF INSULATOR—A low-priced but substantial standoff mounting with wide application. Galvanized malleable iron frame enclosing white porcelain split bushing. Height 6". Weight each, about 2½ lbs.

No.	Fits Tube O.D.
7S-20	⅝"
7S-24	¾"
7S-28	⅞"
7S-32	1"

TYPE 8-C INSULATED MOUNTING CLAMP—A better-than-ordinary insulated mounting support for horizontal elements, verticals, etc., in many of the new arrays. Galvanized malleable iron frame with white porcelain split bushing. Overall width 3½". Weight each, about 1 pound.

No.	Fits Tube O.D.	No.	Fits Tube O.D.
8C-20	⅝"	8C-28	⅞"
8C-24	¾"	8C-32	1"

(Other sizes available to order)

TYPE 9-C INSULATED MOUNTING CLAMP—A simple, more compact mounting for horizontal elements, verticals, etc., as suggested for Type 8-C. Gray iron galvanized frame with white porcelain split center bushing. Height to center, 2". Weight each, about 1 pound.

No.	Fits Tube O.D.
9C-20	⅝"
9C-24	¾"
9C-28	⅞"
9C-32	1"

TYPE 10-C INSULATED MOUNTING CLAMP—Similar to Type 9-C but with stamped steel electroplated frame. More compact, lighter in weight. Recommended for rotary beam and other dipole installations. Height to center 2". Weight each, about ¾-pound.

No.	Fits. Tube O.D.
10C-20	⅝"
10C-24	¾"
10C-28	⅞"
10C-32	1"

PREMAX TELE AND FM ANTENNAS

Premax FM and Television Antenna No. FMT-150

Extended "V" Type with Dividers

Excellent response for all televis'on and FM bands, old and new. Patented feature provides the equivalent of two dipoles in one structure.

Novel "V" type design allows proper impedance matching to 300-ohm line.

Sturdy mechanical construction makes it easy to erect for home or apartment house use.

Simple design with pleasing appearance.

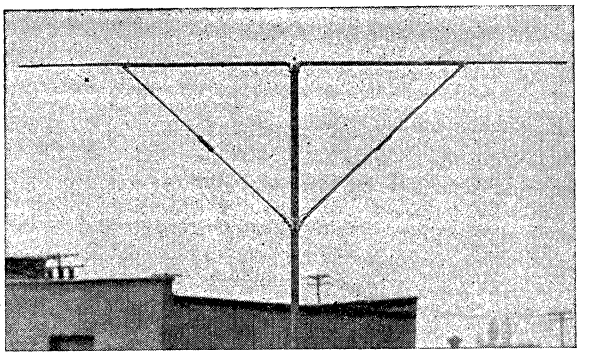
Requires less horizontal space than any other conventional dipole for the same frequency response.

For proper reception of both television and FM, a simple dipole will not suffice. Theoretically at least two dipoles should be used. This will require a more complicated structure and its higher cost may frighten the prospective purchaser of moderate means. It is for this reason that the Premax Antenna Extended "V" type Model FMT-150, was designed. Structurally, it looks like a single dipole, but electrically it is the equivalent of two dipoles. Again, its great simplicity of construction and its neat appearance, combined with its remarkable electrical characteristics, will appeal strongly to every owner desiring the utmost performance from his FM and Television instrument.

The Premax Model FMT-150 has two dipole arms, each one-quarter wave length long for the mean frequency in the lower television band. In each arm an ingenious patented device called a "dipole divider" is inserted to break up the electrical continuity of the dipole for certain frequency bands. These dividers are so designed that the dipole will function with its full arm length for the 44-88 mc. television band and the 88-108 mc. FM band, but will be restricted in length for the upper television band of 174-216 mc. due to the action of the dividers. Consequently, we have two dipoles combined in a single physical structure.

These "dividers" contain carefully designed electrical circuits (made under A.A.&K. patent No. 2282292) which are anti-resonant for 195 mc. and thus of "infinite" impedance at that frequency. In practice the impedance is well above 15,000 ohms at 195 mc. and several thousand ohms at any frequency within the 174-216 mc. band. The action of the dividers, therefore, is to effectively cut off for the 174-216 mc. band, all that portion of the dipole arm beyond the divider and hence there is no reduction in signal strength as compared with a simple dipole of about 14-inch arms designed solely for that band.

At the same time, for the lower television band of 44-88 mc., the reactance of the dividers is low compared with the impedance of the dipole and, therefore, they act as small inductances in series with the arms which makes it possible to use somewhat shorter



arm lengths than would be calculated from theoretical considerations.

For FM reception, the entire arm length is utilized. By this design, with the further advantage gained from the "V" arrangement of the elements (as explained in the description of Model FM-130), Model FMT-150 provides excellent response on both old and new FM bands. This feature will be recognized as an important consideration during the present transition period when both old and new FM frequencies will be utilized in many sections of the country and often provided for in the same receiver.

FEATURES

Dipole elements of seamless heat-treated aluminum tubing. Assembly fittings and connections are solid aluminum castings.

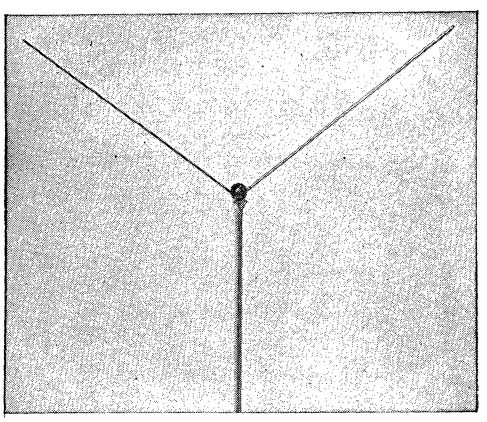
Support mast and cross arm, straight-grained, hardwood, varnished finish. Universal Mounting Bracket included. If installed on side wall or gable end without guying, two brackets are required. Packed partially assembled. Final assembly consists of a few simple operations in mounting elements and fittings to the support structure. Dipole Divider Coils furnished assembled in element arms as shown by diagram. These coils are electrically weatherproof and require no replacement. Entire assembly strongly constructed, well braced and compactly proportioned. Easy to install on any type of building and will adequately resist normal wind strains and other stresses. Should be guyed, unless mounted on side wall or chimney with double brackets or supports.

Shipped complete in single carton. Weight, each 4½ lbs.

ALSO ASK ABOUT MODEL No. FMT-254, WITHOUT DIVIDERS

Premax FM Universal Dipole Antenna Model No. FM-130

Adjustable "V" Type



Designed for maximum response for FM bands. Each dipole arm adjustable for any angle. Simple, lightweight design with pleasing appearance. Provides better FM reception than single dipole in congested city areas where signals are reflected from high buildings. Simple to erect and install. May be used with 100 to 300-ohm transmission line.

Where the FM reception band is the only object of the antenna design, a well-engineered simple dipole type may be found very effective. Premax Products has developed a novel dipole that can be very easily installed, and possesses the valuable feature that the two arms of the antenna can be set at any desired angle with respect to the horizontal, by means of a clamp nut, thereby affording an adjustment of the plane of polarization of the dipole for different angles of polarization of the electro-magnetic waves.

Television and FM transmitters emit horizontally polarized waves. However, near the receiving antenna, due to reflections from buildings and other structures, especially in large metropolitan areas, there is bound to be a vertical component in the incoming waves which, when combined with the horizontal component, will raise the angle of polarization somewhat above the horizontal plane. Therefore, the receiving dipole may have to be tilted at an angle for best reception. The simplicity of the Premax "V" dipole antenna, Model No. FM-130, its low cost and all-around efficiency will, therefore, be appreciated by every owner of an FM receiver.

FEATURES

30" dipole arms of heat-treated aluminum solidly mounted in black phenolic insulator discs. Wire terminals provided for lead-in connections. Supplied with 50-inch tubular steel support mast finished in baked aluminum enamel, and universal mounting bracket. Dipole arms pivoted on support mast, permitting any desired angular adjustment. Arms may be securely locked, in horizontal plane, or at any angle against accidental loosening due to vibration or wind strains. Adjustment to an angle from 35 to 45 degrees above horizontal plan will generally be found most responsive setting.

Packed complete in single cartons. Weight, each 3½ lbs.

• INSTALLED IN MINUTES
• LASTS FOR YEARS

RIG-FAST antennae are fully assembled and ready for service in a few effortless minutes through use of the patented "BARREL T CLAMP" incorporated in each antenna. *The closed spun ends* on the NON-SAG ⅜" O.D. quarter wave elements *prevent interior corrosion.* Insulated with LUCITE for low loss. Superior engineering of the RIG-FAST line permits interchangeability of all component parts, eliminating any possible waste. RIG-FAST antenna components are completely standardized to permit formation of any other RIG-FAST assembly from a single dipole antenna at any time before or after installation. The 5 ft. upright is fashioned from durable ¾" O.D. aluminum and is threaded on the bottom to permit threading into a mounting flange or into an extension upright. Boxed singly with instr.—Less trans. line.

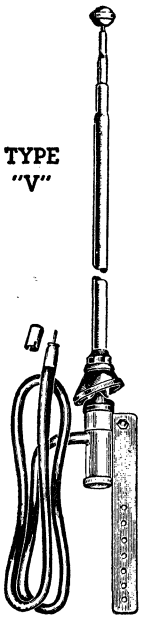
RADIART AERIALS

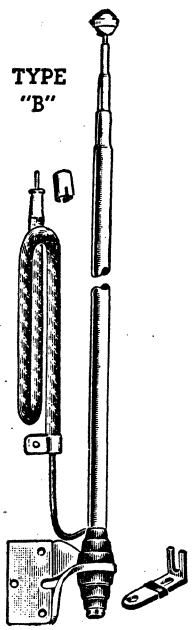


"DELUXE V"
Vertical Mount

Vertical mount for top of cowl or fender.
Specially designed insulators permit easy fitting to body curvature. When collapsed extends 19" above mounting surface. Complete with 40" Radiart "Plasti-loom" waterproof lead, Radiart Deluxe Aerial Rod and "Static Muffler Ball." 10" extension lead LA-19 available as accessory for special installations requiring extra-long lead.
Special Model 358V2 (not illustrated) for Chevrolet and other small General Motors Bodies—a "natural" for replacement of automatic or manual original equipment aerials. Furnished with 36" Radiant "Plasti-loom" lead.

"DELUXE CF"
Two Insulator Mount

Popular two-stanchion model for cowl or fender mounting will fit most surfaces—curved or straight—with insulators and wedge adapter furnished. Available as accessory for special installations—long 5° insulator and eyebolt—SA-68 for 3-section and SA-72 for 4-section aerial.
Complete with 40" Radiart "Plasti-loom" lead, Radiart Deluxe Aerial Rod and "Static Muffler Ball." 10" extension lead LA-19 or 50" waterproof lead LA-21 available as accessories.

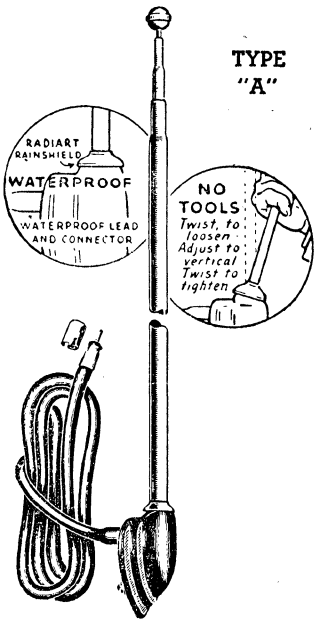


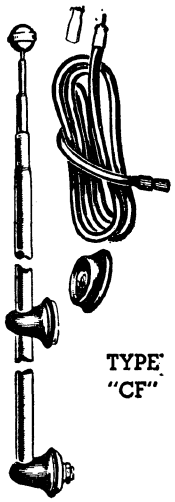
"B"
Underhood Bracket Mount

Popular underhood mounting aerial. Requires no holes in finished surface of the car body. Furnished with two brackets enabling mounting on most cars with either side or front opening hoods. Also available as accessories are AHP-35 bracket for Ford, Mercury and certain General Motors bodies, and AHP-36 for certain late-model cars requiring an off-set bracket. Complete with 36" Radiart "Plastic-loom" lead, Radiart DeLuxe Aerial Rod and "Static Muffler Ball."

"DELUXE A"
Adjustable Angle Single Insulator Mount

Fits either cowl or side of fender. Simplified one-man installation. Easily adjusted to all angles without tools.
Complete with 40" Radiart "Plasti - loom" waterproof lead, Radiart Deluxe Aerial Rod and "Static Muffler Ball." Available as accessories for special installations requiring extra-long leads . . . 50" waterproof lead LA-21 or 10" extension lead LA-19.





"X"
Standard Cowl Mount

One-hole single insulator mounting for straight side cowls. Easy installation with only one mounting hole, yet will not twist out of position. Radiart "Deluxe" Aerial Rod with Plastic Ball and 30" shielded lead.

RADIART AERIALS

OUTSTANDING FEATURES OF
RADIART "Standard of Comparison" AERIALS

RADIART "STATIC MUFFLER BALL"

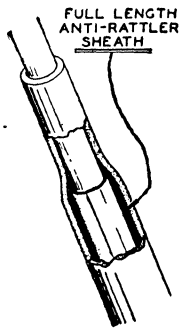
A pre-war advantage featured only by Radiart. Designed specifically to minimize disturbing static noises caused by corona discharge on the tip of the rod.

RADIART DELUXE AERIAL ROD

The finest auto aerial rod assembly ever offered by anyone. Top rod of stainless steel. Tubing of extra heavy wall thickness "ANTIMONIAL ADMIRALTY BRASS." Admiralty Brass, first introduced by Radiart, has maximum load limit consistent with extremes in flexibilty, BUT ONLY if heavy wall thickness is maintained. With ANTIMONY added, permanent nonpeeling plating is assured, and the inner tube surface is protected against corrosion by high humidity and salt air. All tubing sections are protected by the famous pre-war Radiart plating consisting of copper, then nickel and finally a heavy coating of chromium. Just another reason why Radiart Aerials are "The Standard of Comparison."

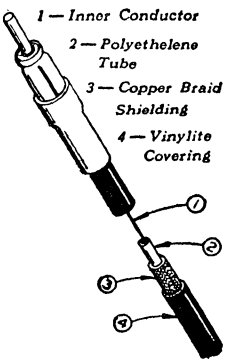
RADIART PERMANENT "ALL METAL ANTI-RATTLER"

Another famous Radiart patented feature. Carefully preformed phosphor bronze anti-rattler strips securely anchored by means of high-frequency welding reduces mechanical rattle to a minimum. It also contributes to high conductivity between sections and provides for smooth and quiet operation. This anti-rattler eliminates grease packing—insures operation during temperature extremes while maintaining lowest possible contact resistance—and prevents any danger of soiling hands or clothing.



RADIART "PLASTI-LOOM" LEAD

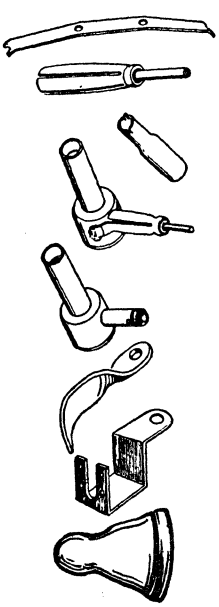
The Radiart "Plasti-Loom" lead represents the greatest scientific advance in lead construction—provides for the first time a lead which is impervious to moisture—so low in capacity and so high in "Q" that the maximum in signal transfer efficiency is accomplished. The conductor is suspended in a polythelene tube. This tubing is covered with a special tape wrap and then with a closely woven copper braid shield over which is applied an extruded coating of abrasion resistant vinylite. Each lead is fitted with a single-pin (Motorola style) connector and is furnished complete with a bayonet (Delco or Philco) style adaptor.



LEADS, FITTINGS, ADAPTORS

LEADS

Part No.	List Price	Description
LA-2	$1.50	Replacement lead for "B" type aerial.
LA-5	1.40	Replacement lead for "X" type aerial.
LA-7	1.35	20" Extension lead, male and female pin connectors.
LA-8	1.20	8" Extension lead, female pin to male bayonet connectors.
LA-9	1.35	20" Extension lead, female pin to male bayonet connectors.
LA-16	2.15	40" Radiart "Plasti-loom" replacement lead for "A" and "CF" types.
LA-19	1.25	10" Extension lead, male and female pin connectors.
LA-21	2.45	50" Radiart "Plasti-loom" waterproof lead for "A" and "CF" types for use where an extra-long one piece lead is required.



ADAPTORS and FITTINGS

Part No.	List Price	Description
AK-1	$0.12	Hood grounding clip complete with Parker-Kalon screws.
AK-2	.20	Single pin, solder on connector.
AK-3	.10	Adaptor, single pin to male bayonet.
AK-4	.65	Angle adaptor with built-in booster coil. Single pin socket to single pin male connector.
AK-5	.65	Same as AK-4 except male bayonet output connector.
AHP-35	.25	Bracket for adapting "B" aerials to Ford, Mercury, etc.
AHP-36	.25	Bracket for adapting "B" aerials to cars requiring off-set bracket.
SA-68	.45	Long 5° insulator and eyebolt for "CF" type 3-section aerial 363CF1 and 392CF1 for special installations on deeply curved surfaces.
SA-72	.50	Same as SA-68 for "CF" type 4-section aerial 4102CF1.

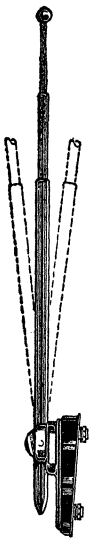
RAD-EL-CO AERIALS



ADJUSTABLE SIDE COWL *Do-All* AERIAL

An improved aerial for side mounting on either sloping or vertical body surfaces of cowl or fender. Two hole mounting through ½" holes. Mast swing of 35° to match body angle. Locks securely and simply with set screws. Complete with 36" Radar type polyethylene coaxial lead cable and bayonet adapter.

THREE SECTION — 30" to 72"

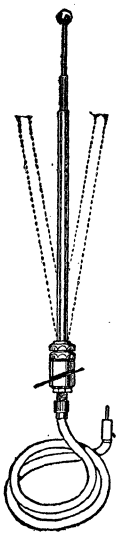
Model	List	Dealer Net	Ship. Wt.
DA-3	**$5.45**	**$3.27**	**1⅓ lbs.**

TOP COWL - TOP FENDER *Roto-Lok* AERIAL

A dual purpose model for mounting in either top cowl or top fender position. Featuring Roto-Lok design which permits mast adjustment of 25° in any direction. No brackets and braces necessary. Half inch mounting hole. For all new or replacement installations. With 48" Radar coaxial screw on lead cable and bayonet adapter.

THREE SECTION — 23" to 57"

Model	List	Dealer Net	Ship. Wt.
CO-3A	**$5.95**	**$3.57**	**1¼ lbs.**



RADAR LEAD CABLES

Radar type ultra high "Q" coaxial cables with polyethylene insulation and 100% shielding. Type L has aircraft connector to aerial, pin plug and bayonet adapter. Extension type LE has male and female pin plug fittings.

Model	List	Dealer Net	Length	Ship. Wt.
LE-12	**$0.75**	**$0.45**	**12"**	**2 oz.**

SHUR-ANTENNA-MOUNT, INC.

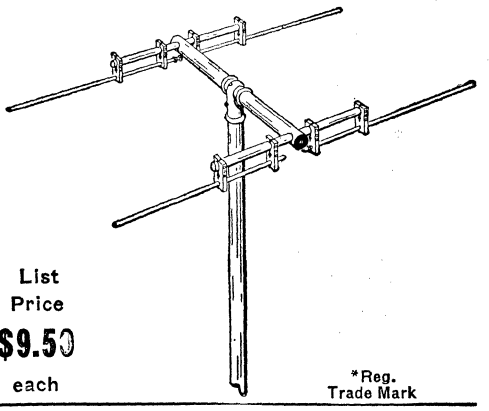
EASTERN DIVISION

SEA CLIFF, N. Y.

*INTERCEPTOR
FM—Television—Amateur

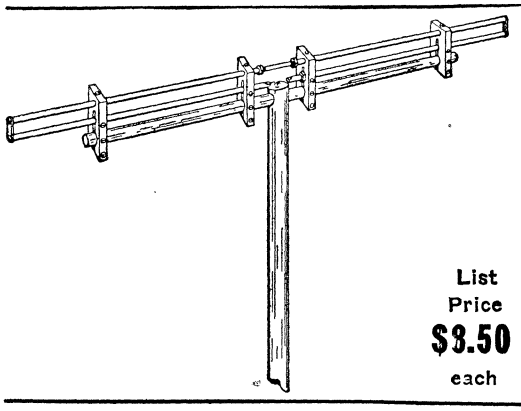
Here is the ideal FM, television, and high frequency amateur antenna, which makes possible good induced signal voltage under the most undesirable conditions. Shur engineers have developed the Interceptor with all tunable factors easily and simply adjustable. Each model is marked for the middle of its band and may be tuned with simple screw adjustments. Director, polarization, orientation, front-to-back ratio, reception pattern; in short all factors are adjustable. Shipped completely knocked down in compact container, with full instructions, complete with 6 ft. weather treated and wind tested wood mast. Wood will not affect line impedance. Can be used as a transmitting antenna. Easily mounted anywhere with the MC Mount shown below.

Model I-98—FM. Model I-52—6-meter Amateur.
Model I-62—Television. Model I-146—2-meter Amateur.



List Price **$9.50** each

*Reg. Trade Mark



List Price **$3.50** each

FOLDED INTERCEPTOR
A Broad Response Antenna

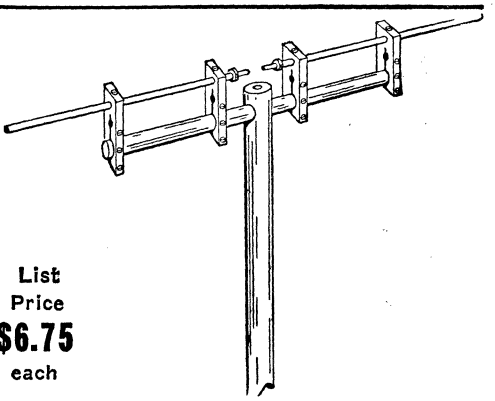
Gives good gain and essentially flat response over the entire band. This antenna is desirable when signals can be received from opposite directions as it is bi-directional. It is simple, light, and easy to install. Insulated with low loss Synthane. Has dural elements. Simple screw adjustments for tuning elements. Excellent match for 300 ohm line. Compactly packed with 6 ft. treated wood mast and full instructions. Use MC Mount for installing.

Model FI-98—FM. Model FI-52—6-meter Amateur.
Model FI-62—Television. Model FI-146—2-meter Amateur.

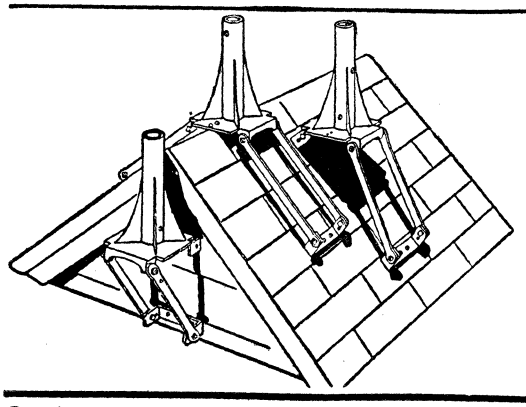
DIPOLE

This dipole antenna is easily tunable with its unique screw lead-in connectors and its low loss Synthane insulators. The light weight non-sagging elements are of dural. Lead-in connectors are marked so that they may readily be set to the middle of the band. Assembly and adjustments can be made before the dipole is taken to the roof. The whole assembly is light and easy to handle. The 6 ft. mast is hardwood, birch or maple, and will not affect line impedance. The mast is fully weather treated and wind tunnel tested. Compactly packed with complete instructions, less transmission line. Use the MC Mount for easy installation anywhere.

Model D-98—FM. Model D-52—6-meter Amateur.
Model D-62—Television. Model D-146—2-meter Amateur.



List Price **$6.75** each



ANTENNA MOUNT
Universal—Cast Aluminum

The Shur-Antenna-Mount can be installed on any roof surface of any pitch, can straddle the peak of any roof, or can be mounted on any vertical or flat surface. Three typical installations are shown here. It weighs only 1¾ lbs., being cast aluminum, and will sustain the weight of any fixed standard FM or television antenna. Furnished with complete set of hardware to take care of any style of installation. Will accommodate 1¼ inch or 1⅛ inch mast. This is an exceptionally convenient and permanent mount. Packed with full instructions.

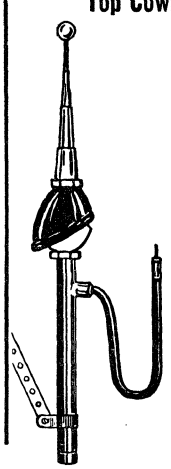
List Price **$6.45**

Model SC-4100
Extends from 30" to 100"
List Price **$6.95**

MODEL DFC 4

Streamlined Concealed Fender or Top Cowl Mount Antennae



Perma-Tension Telescoping, self-aligning rocker which insures a snug fit with either flat or convex surface. Easily installed, WATERPROOF, VINYL - PLASTICIZED, Polyethylene, Lo-Loss shielded Hi-Q coaxial cable. Indvidually packed in carton.

Four sections, showing only 3" when closed. Extending to 60".

List Price **$7.25**

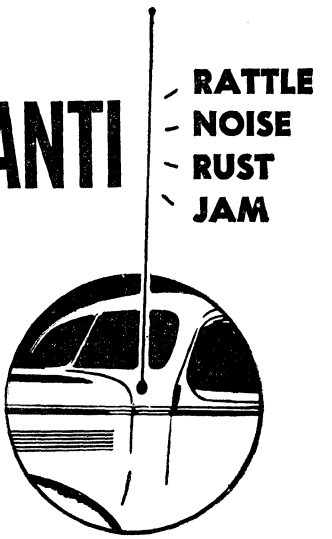
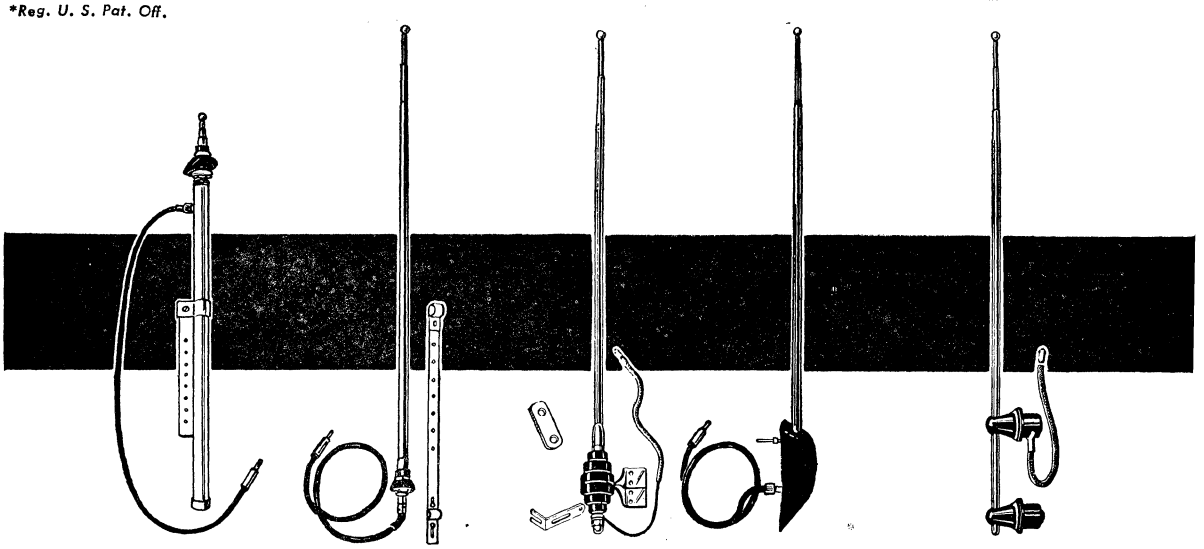
New Improved Pur-a-tone* AUTO RADIO BRACH ANTENNAS

ANTI - **RATTLE** - **NOISE** - **RUST** - **JAM**



Brach Antennas, improved in design and streamlined for lustrous beauty, have smooth-sliding telescopic joints and patented contacts that prevent vibration. The scientifically tapered, heavily chrome plated, antimonial-admiralty brass tubing prevents moisture and dust from entering tubes. Special Brach features prevent jamming. All are equipped with stainless steel spring-type rods of high tensile, flexible strength . . . with unbreakable static discharge balls, and high Q-H.F. low loss poly ethylene air-gap type shielded cables to prevent noise pickup. Brach Antennas are noted for their easy and permanent installation.

**Reg. U. S. Pat. Off.*



FENDER WELL ANTENNA
MODEL FW-4801-5

Fully enclosed, protects against dust and dirt. Disappearing fender well antenna, 60″ length in four sections. Furnished with hex nut, pad, rocker, lockwasher and 48 1/16″ coaxial cable. Shipping weight, 16 lbs. per carton of 10 individually boxed antennas.

Model FW-4801-5
List Price $7.95

COWL WELL ANTENNA
MODEL CW-3602-4

Three sections, 60″ length with 43½″ of coaxial cable. Complete with necessary mounting accessories. Shipping wt., 12 lbs. per carton of 10 individually boxed antennas.

Model CW-3602-4
List Price $6.25

DE LUXE UNIVERSAL MOUNT ANTENNA

Designed for three different mountings: Alligator Hood, Side Cowl or Hinge Whip. Complete with 48 1/16″ coaxial cable and necessary mounting accessories.

Model CB-2521-2
Size 52″. Wgt. per carton of 10, 11 lbs.
List Price $4.75

Model CB-3601-2
Size 60″. Wgt. per carton of 10, 12 lbs.
List Price $4.95

ADJUSTABLE SIDE COWL

Adjustable to fit contour of car body. Complete with special mounting pad, 48 1/16″ coaxial cable and necessary mounting accessories.

Model SC-3622-3
Size 62″. Wgt. per carton of 10, 11 lbs.
List Price $5.45

Model SC-4802-3
Size 80″. Wgt. per carton of 10, 12 lbs.
List Price $6.25

Model SC-41102-3
Size 110″. Wgt. per carton of 10, 13 lbs.
List Price $6.95

SIDE COWL ANTENNAS

Two stanchion side cowl model with 38 1/16″ coaxial cable and necessary mounting accessories. Includes special pad for installation on bodies with large cowl contour.

Model SC-3621-1
Size 62″. Wgt. per carton of 10, 11 lbs.
List Price $4.95

Model SC-4801-1
Size 80″. Wgt. per carton of 10, 12 lbs.
List Price $6.25

Model SC-41101-1
Size 110″. Wgt. per carton of 10, 13 lbs.
List Price..... $6.95

EVERY BRACH ANTENNA Is Complete With Necessary Mounting Accessories and Installation Instructions

PLASTIC RADIO PLIERS

Model PRP, List Price . . . $1.50 each

Not a substitute for metal pliers but a **necessity** for specialized jobs on radios, electrical appliances, etc. Unusually light in weight, does not sag pockets, comfortable grip. See features below.

- Weighs only 1½ ounces
- Absolutely shock-proof
- It's non-magnetic
- Heat resistance 240° to 300°
- Tensile strength of material is 5,000 lbs. per sq. inch
- 6,000 volt breakdown
- Picks up nuts, screws and washers without danger of shorting
- For relocation of wiring without introducing a magnetic field while equipment is in operation.

TACO

NOISE-REDUCING ANTENNA SYSTEMS

BETTER ANTENNAE for BETTER RADIOS

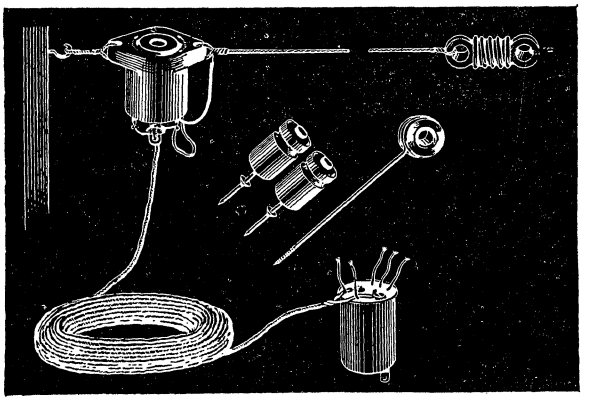
TACO antenna systems provide the most favorable signal-to-noise ratios. The selection of any one of the several types depends on these considerations. (1) If standard broadcast and shortwave are to be received; (2) If combination of standard broadcast AM and FM must be received; (3) If the location is quiet; and (4) If the location is noisy.

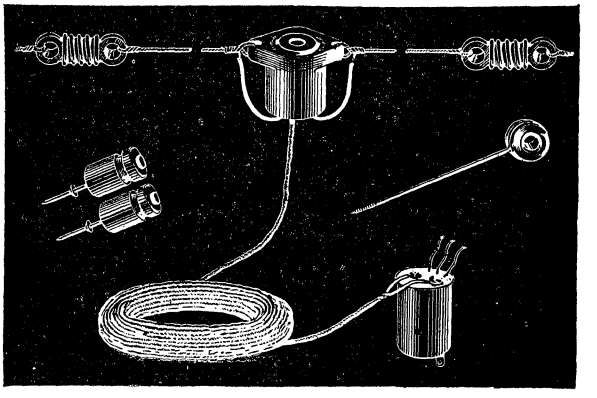
For condition (1), any one of the kits listed is recommended. For (2) or AM-FM reception, kits Nos. 220-V-FM, 220-FM or 228-FM.

In quiet locailities, any one of the kits is recommended. But regardless how quiet the location may be, the TACO noise-reducing antenna system, due to its impedance-matching transformers, will always improve signal-to-noise ratio.

TACO transformers match recommended standards for receiving set input circuits. Such standards are 2000-ohm impedance, with tap for 50 ohms, which is a common input where external antenna replaces or supplements the loop. For FM, the input impedance is 300 ohms.

All TACO kits are attractively packaged and include all components, insulators, antenna wire, downlead cable, and complete instructions.





NOISE-REDUCING ANTENNA SYSTEMS

***CAT. No. 228 FM.** L-type antenna system (above left). Recommended where inconspicuous installation is desired. Full noise reduction. Covers standard broadcast, shortwave and FM bands. Shpg. Wt. 4 lbs. **List Price $9.65.**

***CAT. No. 228.** Broadcast and shortwave only. Shpg. Wt. 4 lbs. **List Price $9.10.**

***CAT. No. 520.** Economy system (above right). Broadcast and shortwave only. Ideal for low-noise-level locations. Set transformer has leads for both high and low impedance input for standard broadcast band. Shpg. Wt. 4 lbs. **List Price $6.30.**

CAT. No. 520L. Same as foregoing but less set transformer. Shpg. Wt. 4 lbs. **List Price $5.35.**

***CAT. No. 220-V-FM.** Covers standard broadcast AM and FM bands, and shortwave. Noise-reducing in all bands. Automatic frequency selection. Doublet antenna rig, high-frequency transmission line, antenna and set transformers. Shpg. Wt. 5 lbs. **List Price $11.10.**

***CAT. No. 220-V-L.** Same as foregoing but less set transformer. Used with communication receivers having 100-200 ohm input. Shpg. Wt. 5 lbs. **List Price $9.20.**

***CAT. No. 220-FM.** Balanced doublet covering broadcast, shortwave and FM. Set transformer has FM terminals; also high and low impedance AM input. Fully noise-reducing in all bands. Shpg. Wt. 4 lbs. **List Price $11.30.**

***CAT. No. 220.** Doublet. Same as foregoing but for broadcast and shortwave only. Shpg. Wt. 4 lbs. **List Price $9.00.**

CAT. No. 85. Farm special. Built to a price. Recommended for rural installations where noise level is low. Antenna wire, lead-in wire, ground clamp, window strip, nail knobs, insulators, lightning arrester. **List Price**

CAT. No. 85-L. Same as foregoing but without lightning arrester. **List Price**

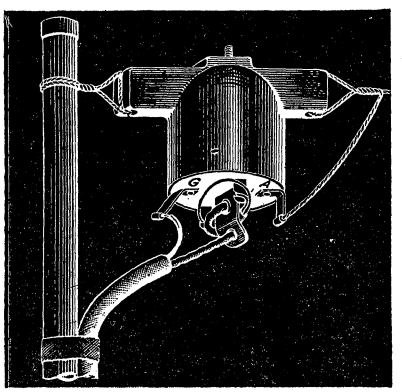
ANTENNA AND SET TRANSFORMERS. Unless system includes both antenna and set transformers, it cannot be true noise-reducing system. Therefore these components are made available separately for addition to any system. at **list prices ranging from $2.00 to $3.50.** Also for concentric cable lines.

TACO MASTER ANTENNA SYSTEM

For apartment houses, hotels, radio stores and other installations calling for simultaneous operation of several sets on single aerial. Because of wartime developments, the TACO postwar system now attains a high degree of noise reduction and covers a frequency range heretofore not believed possible in the standard broadcast, shortwave and FM bands.

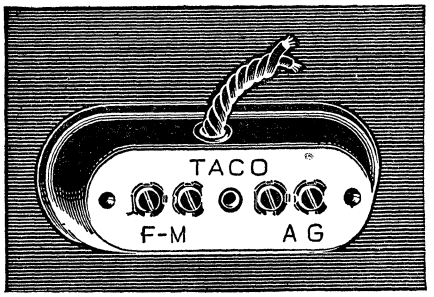
System consists of roof kit, transmission line, and a coupler for each connected radio. Single antenna and transmissoion line can feed 15 to 20 radios, depending on height of antenna and reception conditions.

Installation guide furnished with each roof kit. TACO engineers are ready to provide engineering aid for any particular layout.



ROOF KIT

***CAT. No. 345.** Basic kit for Master Antenna System. Takes care of aerial or roof installation. To this antenna transformer (left) should be connected one or several transmission lines depending on layout of building to be wired. The Underwriters' Labs. approved lightning arrester built into transformer shell requires grounding of the ground wire connected to the transformer. Kit comprises 15 ft. transmission line, 25 ft. ground wire, 80 ft. aerial wire, 2 heavy-duty insulators. Shpg. Wt. 10 lbs. **List Price $9.10.**



Other Components

***CAT. No. 346.** Master Antenna Transformer as used in roof kit. Shpg. Wt. 2 lbs. **List Price $4.20.**

***CAT. No. 347.** Master Coupler (left) covering standard broadcast, shortwave and FM bands **List Price $3.00.**

***CAT. No. 348.** Master Coupler (right) covering broadcast and shortwave only. **List Price $2.50.**

For other needs, see Accessories and Supplies.

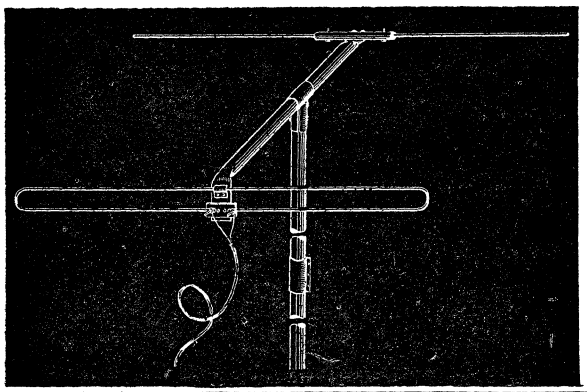
FM ANTENNA

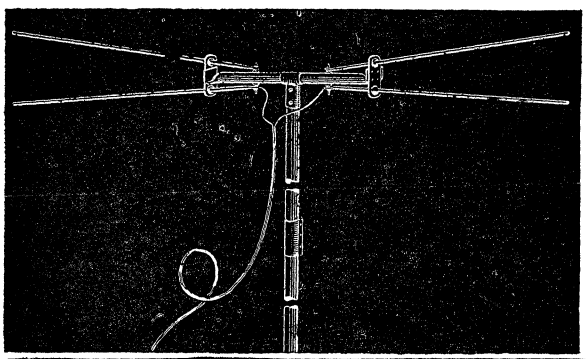


FOLDED DIPOLE ANTENNA

Single unit is directional both front and rear—broadside to transmitter. Ideal for areas of low signal strength. Extremely rugged. Easy to face in desired direction. May also be used for AM reception with Type 625 transformer (see Accessories). For use in low-signal-strength areas, the antenna-reflector combination (shown at left) is recommended. Its flat characteristics—standing wave ratio less than 3 over entire FM band—make it ideal where uni-directional reception is desired, since the reflector eliminates both interference noises and signals from the reflector direction.

CAT. No. 621. FOLDED-DIPOLE ANTENNA. Consists of 1 folded dipole with terminal block; 1 60-ft. coil of TACO high-frequency 300-ohm transmission line; 1 5-ft. wood mast; 2 mounting straps and screws for mast; 3 special screweyes for high-frequency transmission line; complete instructions. Shpg. Wt. 6½ lbs. **List Price $9.00.**

CAT. No. 622. REFLECTOR. Consists of 2 aluminum reflector rods (one with mounting coupling attached); 1 cross-arm with mast clamp attached (heavily enameled steel); miscellaneous hardware. Shpg. Wt. 3 bs. **List Price $4.00.**

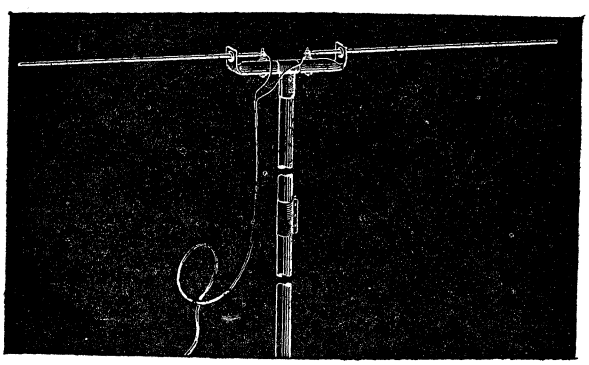


FM DOUBLE-V ANTENNA

An extremely broad band receptor. Nearly flat frequency response from 40 to 110 MC. For this reason it is especially recommneded for localities where it is desirable to receive both the old and the new FM bands. In the 88-108 MC band the frequency response is well below a standing wave ratio of 2, which is equivalent to a variation of approximately ½ DB. Durable construction of heavily-enameled steel. Rod support has a permanently attached mast clamp. Polystyrene insulation for terminals to insure low-loss performance.

CAT. No. 655. DOUBLE-V ANTENNA. Consisting of 4 aluminum dipole rods; 1 rod mounting assembly; 60 ft. of TACO high-frequency transmission line; 5-ft. wood mast; mounting and assembly hardware; 3 special screweyes; complete instructions. Shpg. Wt. 8½ lbs. **List Price $11.50.**

CAT. No. 656. REFLECTOR.....List Price $4.75



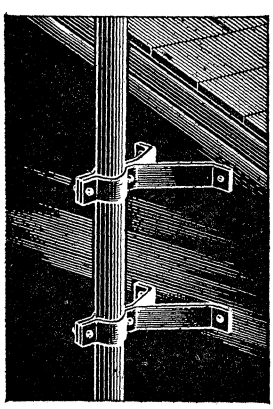
DOUBLET ANTENNA

CAT. No. 651. DOUBLET ANTENNA (left). 2 dipole rods; 1 rod support; 60 ft. transmission line; 2 strain insulators; 5-ft. wood mast; 2 mounting straps with hardware; 3 special screweyes; instructions. Shpg. Wt. 8½ lbs. **List Price $9.50.**

CAT. No. 652. REFLECTOR. 2 aluminum reflector rods (one with mounting coupling attached); 1 crossarm with mast-mounting clamp attached. Heavily enameled steel assembly. Shpg. Wt. 4 lbs. **List Price $4.00.**

FM ANTENNA SELECTION

Due to wide range of frequencies—88 to 108 MC—in which channels FM stations now operate, it is essential that the antenna be of the broad-band type with signal response reasonably flat over entire band. This can be achieved with several designs depending upon flatness required, price range, and preference for one type or another. In general, for low-signal-strength areas, the Folded Dipole (Type 621) or the Double-V (Type 655) is preferable. For local reception or in high-signal-strength areas, the Single Dipole (Type 51) is satisfactory. All TACO FM antennae come complete with 5-ft. mast, low-loss transmission line, standoff insulators, mounting hardware, and instalation instructions.



ACCESSORIES and SUPPLIES

***CAT. No. 625. FM-AM SET TRANSFORMER.** Provides both FM and AM reception with usual FM antenna. Normally, this is impractical since most FM-AM receivers have separate terminals for both bands. With this transformer both bands are automatically available to the receiver. Shpg. Wt. 1½ lbs. **List Price $3.25.**

CAT. No. 627. AM EXTENDER. Used with FM antenna when same is also used for AM, in areas with low AM signal strength. Simply a 30-ft. length of antenna wire terminated in a choke coil. Increases AM signal pickup about five times, but does not upset the delicate balance of FM dipoles. Shpg. Wt. ¾ lb. **List Price $2.25.**

CAT. No. 100. LINE FILTER. Thoroughly engineered unit comprising r. f. choke coil with by-passing capacitors to ground. Most effective between set and outlet. Also used between noise-producing equipment and line. Shpg. Wt. 4 lbs. **List Price $9.00.**

CAT. No. 185. TWO-SECTION MAST. 10 ft. high. Sections held tgoether by mast coupler. Upper section can be rotated. **List Price $3.50.**

CAT. No. 189. MAST COUPLING. Joins together two sections of 1-5/16″ dia. **List Price $1.00.**

CAT. No. 190. MAST BRACKETS (shown at left). For mounting 1-5/16″ dia. mast on side of house or parapet, where clearance is not over 7″. Heavy steel, enameled. Pair. **List Price $2.50.**

CAT. No. 309. LIGHTNING ARRESTER. Carbon-pile type Double-pole, Underwriters' Labs. approved. **List Price $0.75.**

CAT. No. 383. C-TYPE GROUND CLAMP. For pipes from ¾″ to 1½″ dia. Hard screw point makes positive contact. Cadmium-plated to resist corrosion. **List Price $14.50 per C.**

*Licensed A.A.K., Inc., Pats.

Price will be those in effect at date of shipment,

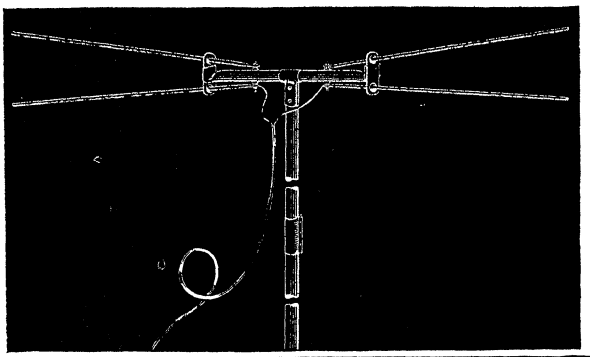
TACO

NOISE-REDUCING ANTENNA SYSTEMS

TELEVISION ANTENNA

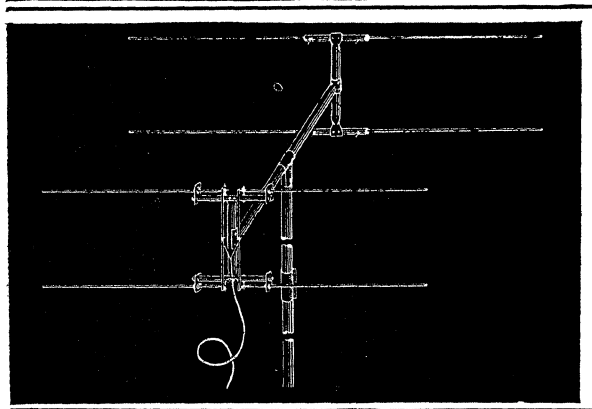


DOUBLE-V ANTENNA

Same construction as No. 655 listed in FM Antenna section except that dipole rods are of a different length to favor the television bands. Nearly flat response from 40 to 110 MC. In the 50-88 MC bands, the frequency response is well below a standing wave ratio of 2, or equivalent to a variation of approximately ½ DB. Durable steel construction, heavily enameled. Rod support has a permanently-attached mast clamp. Polystyrene insulation for terminals, insuring low-loss performance.

CAT. No. 457. DOUBLE-V TELEVISION ANTENNA. Consisting of 4 aluminum dipole rods; 1 rod mounting assembly; 60 ft. of TACO high-frequency transmission line; 5-ft. sectional mast; mounting and assembly hardware; 3 special screweyes for transmission line. Complete instructions. Shpg. Wt. 8 lbs. **List Price $12.00.**

CAT. No. 458. REFLECTOR. Consisting of 4 dipoles with connectors; 1 cross-arm; 1 spacer post; mounting hardware. Shpg. Wt. 5 lbs. **List Price $4.75.**

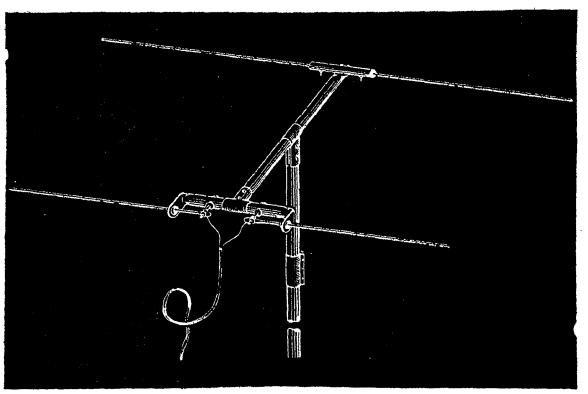


H-TYPE ANTENNA

Single H-type (not shown) receives in both directions, broadside. Due to double-decked design, this type provides additional gain in the horizontal plane and greatly diminishes reflections from ground. This discrimination gives a cleaner picture than is possible with a single dipole antenna. To provide rigidity, the antenna support is built of steel. Covers the two television bands in addition, both old and new FM bands, with a frequency response that is flat within less than 3 DB. Single H-type recommended for areas of average signal strength (say within 15-20 miles of typical television transmitter). Beyond, the antenna-reflector combination (illustrated) should be used.

CAT. No. 436. H-TYPE ANTENNA. Consists of 4 aluminum dipole rods; 2 rod supports with terminals and neoprene grommets; a spacer post with mounting clamps for mast; 60 ft. of 300-ohm high-frequency transmission line; 2 jumpers with terminal screws; 5-ft. sectional wood mast; 3 special standoffs; mounting hardware; complete instructions. Shpg. Wt. 10 lbs. **List Price $14.00.**

CAT. No. 437. H-TYPE REFLECTOR. Consists of 4 dipole rods with connectors; 1 crossarm (heavily enameled steel); 1 spacer post; mounting hardware. Shpg. Wt. 5 lbs. **List Price $7.50.**



DIPOLE ANTENNA

Matched to 300-ohm transmission line by special matching device. Single dipole type (not illustrated) is recommended in areas of high signal strength or when only one or two stations are desired on adjacent frequency bands. This type antenna is not as broad as the V and H types. Rugged streamlined construction makes it a favorite among television set owners. Not recommended, however, in areas with low signal strength.

CAT. No. 453. SINGLE DIPOLE ANTENNA. Consists of 2 aluminum dipole rods; 1 dipole support assembly with mast clamp; 60 ft. of TACO high-frequency transmission line; 1 5-ft. wood mast with mounting hardware; 3 special standoff insulators; complete instructions. Shpg. Wt. 8½ lbs. **List Price $9.50.**

CAT. No. 454. DIPOLE REFLECTOR. Consists of 1 steel crossarm; 2 dipole rods (one with coupling attached); assembly hardware; complete instructions. Shpg. Wt. 5 lbs. **List Price $4.75.**

CAT. No. 851. RIBBON TRANSMISSION LINE. Especially for FM and television use. 300-ohm surge impedance. Two stranded conductors insulated with polyethylene ribbon between. 500 ft. coil. **List Price $48.50.**

CAT. No. 853. HIGH-FREQUENCY SPLICING TAPE. Indispensable for splicing high-frequency transmission lines. Ordinary tape may actually short-circuit such conductors. 12" length in envelope. **List Price $0.35.**

CAT. No. 850. TWISTED-PAIR TRANSMISSION LINE. Two No. 22 stranded twisted-pair conductors. Surge impedance 100 ohms. **List Price $35.00/m f.t**

CAT. No. 305. BUFF TRANSMISSION LINE. Two No. 18 stranded conductors, twisted. Surge impedance 100 ohms. **List Price $47.50/m ft.**

CAT. No. 306. BLACK TRANSMISSION LINE. Same as No. 305 but with black braid for use against dark walls. **List Price $47.50/m ft.**

CAT. No. 392. STANDOFF FOR RIBBON TYPE LINES. (Illustrated). Slotted low-loss rubber insulator with metal screweye. **List Price $16.00/c.**

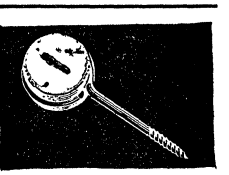
CAT. No. 393. BASEBOARD STANDOFF. (Illustrated). Fibre. Nailed to support. Ribbon snaps in place. Minimized leakage. **List Price**

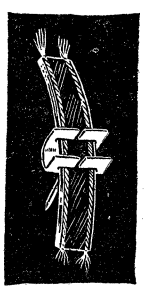
CAT. No. 389. FEED-THROUGH INSULATOR. For passing antenna downlead through panel or well. Low-loss bakelite. 1¼" dia. x ¾" h. **List Price $0.90.**

CAT. No. 384. SINGLE WINDOW-STRIP LEAD-IN. Readily bends to accommodate closed window. Fully insulated. **List Price $0.10.**

CAT. No. 377. SCREW-EYE 3". List Price $0.12.

CAT. No. 394. DIPOLE RODS. For replacement use. Supplied in pairs for any antenna replacement. Specify antenna type. **List Price $1.50.**





*Licensed A.A.K., Inc., Pats. **Price will be those in effect at date of shipment,**

Vertrod

NOISE REDUCING ANTENNAE

BUILDERS of NOISE REDUCING RECEIVING ANTENNA for the HOME

The **VERTROD** Antenna is the most perfect scientific development approaching complete freedom from man-made static yet evolved — at the same time providing greatest efficiency on all frequencies. No single Antenna Kit is packed before it has been laboratory tested for perfection.

- For Communications, Broadcast and Short Wave Receivers — Broadcast and Long Distance Foreign Reception — WITHOUT NOISE!
- Can be used on AC or AC-DC Receivers.
- Frequency Range 500 KC to 30 MC (600 to 10 Meters).
- No Line Filters necessary — so perfectly Balanced.
- No Lightning Arrestor required.
- Can be mounted on Wall, Window or Roof.
- Only 4 inches of space needed to mount **VERTROD.**
- Only a screwdriver neccessary to mount **VERTROD.**
- Matched Transformers and Transmission System balanced against NOISE at all frequencies.
- Greatest Noise-Excluding Antenna yet developed in a Laboratory.
- Transmission Cable length may be increased without upsetting the Transformer Balance.
- Patented **VERTROD** Base which smoothly rotates in an arc of 180° to mount on any surface.
- **VERTRODS** are built 9, 12, 15 and 18 feet tall.
- Special Heavy Duty Rotary Base used for the tall models.
- Hard Aluminum Alloy Rod Elements.
- No Poles—No Insulators—No Climbing —No Hanging Aerial Wires.

This **VERTROD** consists of a Hard Aluminum Alloy mast mounted on a sturdy patented Rotary Base. The Base rotates smoothly in 2 mounting brackets to decribe an arc of 180°, permitting **VERTROD** to be mounted erect on any surface having 4 inches of space. Inside the Base of the Matched Transformer group is hermetically sealed an Antenna Transformer to match the impedance of the rod to the Transmission Cable. The Radio Set Coupler, another transformer sealed in a plastic shell, matches the impedance of the Transmission Cable to that of the Radio Set in-put. This electrical combination forms a completely balanced Transmission System capable of piping Noise-Free Radio Frequency signals of frequencies 500 KC to 30 MC (600 to 10 meters) from Rod to the Radio Set in-put. Each **VERTROD** is laboratory tested for perfection.

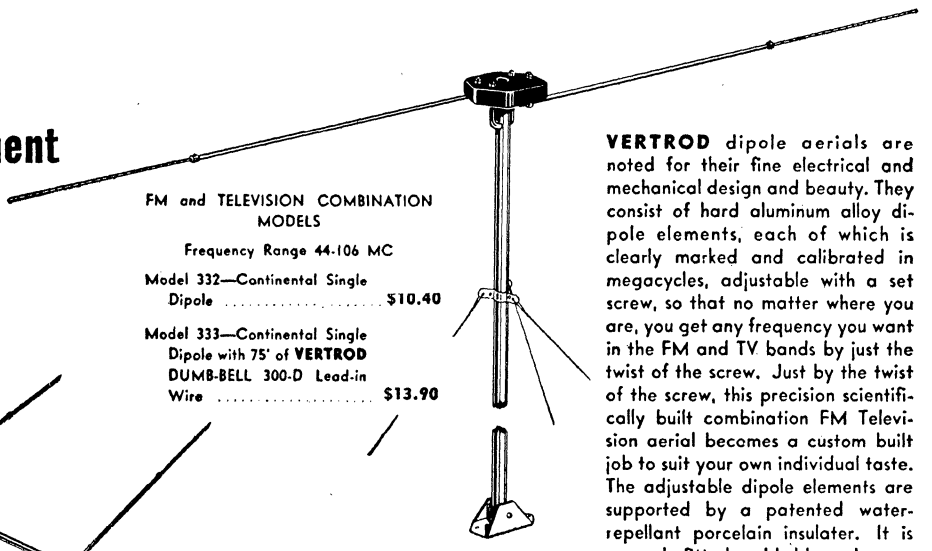
FM and TELEVISION *Antennae*

Continental Adjustable Dipole and Dipole-Reflector Types

For use everywhere on western continent

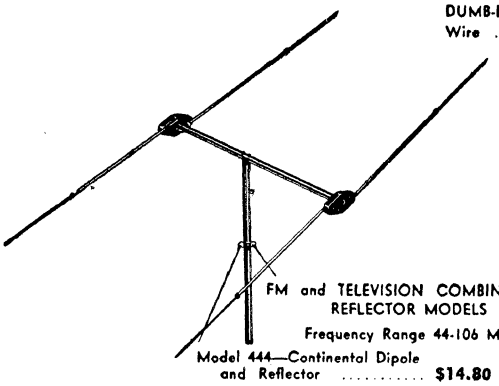


FM and TELEVISION COMBINATION MODELS

Frequency Range 44-106 MC

Model 332—Continental Single Dipole **$10.40**

Model 333—Continental Single Dipole with 75' of **VERTROD** DUMB-BELL 300-D Lead-in Wire **$13.90**



FM and TELEVISION COMBINATION REFLECTOR MODELS

Frequency Range 44-106 MC

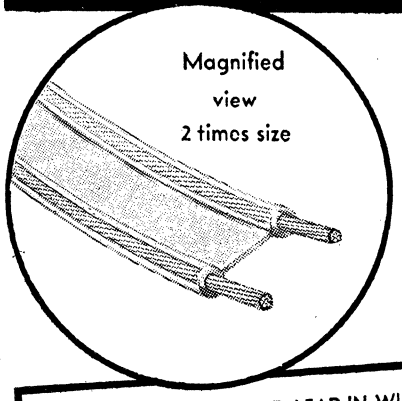
Model 444—Continental Dipole and Reflector **$14.80**

Model 445—Continental Dipole and Reflector with 75' of **VERTROD** DUMB-BELL 300-D Lead-in Wire **$18.30**

VERTROD dipole aerials are noted for their fine electrical and mechanical design and beauty. They consist of hard aluminum alloy dipole elements, each of which is clearly marked and calibrated in megacycles, adjustable with a set screw, so that no matter where you are, you get any frequency you want in the FM and TV bands by just the twist of the screw. Just by the twist of the screw, this precision scientifically built combination FM Television aerial becomes a custom built job to suit your own individual taste. The adjustable dipole elements are supported by a patented water-repellant porcelain insulater. It is properly fitted and held snugly on a five foot steel mast. The steel mast is heavily enameled as a weather-proofing precaution and provided with plated steel guy wire brackets and universal base mounting brackets permitting flat, angular or vertical mounting. These new **VERTROD** Continental models come with or without **VERTROD'S** 300-D polyethylene covered lead-in wire and with or without reflector assembly, depending upon your needs. All models completely packed in individual kit form containing all necessary hardware and instructions. *They are adjustable for use anywhere on the western continent.*

U. S. Patent 2259628

FM and TELEVISION *Wire*



Both F-M and television require components of the highest quality if the ultimate possibilities of each system are to be realized. This is particularly true in television where a band width of 6 megacycles should be transmitted with equal amplitude and with as little as possible phase distortion, delay and reflections. For a given receiver in a given area, the sensitivity developed by the receiver is a function of the antenna transmission line taken as a unit. A well-designed antenna with the proper transmission line should supply adequate signal strength at the receiver over the frequency bands acceptable by the receiver. But even more than this is required. Reflections at impedance discontinuities all along the system must be minimized, since the picture quality will suffer if such reflections attain even minute proportions.

R.M.A. has standardized on 300-ohm transmission lines. A 300-ohm line using high grade dielectric generally provides signal passage with very low attenuation. In addition, the use of polyethylene insulation and relatively large conductors has made the **VERTROD** 300-ohm line outstanding in performance. A copper area of 1118.6 circular mils is provided for each conductor and together with the low loss insulation (having a power factor of less than .03% at 100 megacycles) the attenuations of our 300-ohm lines are well below the 1 db per 100 feet at 100 megacycles.

VERTROD 300-D, a dumb-bell shaped line, comes closest to the theoretically perfect line consisting of two bare conductors spaced a correct amount and having only air as support. Such a perfect line would have a theoretical velocity of propagation of almost 100%. The **VERTROD** 300-D has a velocity of 79% to 83%.

WARD AERIALS

WORLD'S FINEST FOR CAR AND HOME

Feature

- √ SIMPLIFIED ONE MAN INSTALLATION
- √ UNIVERSAL DESIGNS TO FIT EVERY CAR
- √ RUGGED, LASTING CONSTRUCTION with —
  - Heavy wall brass tubing
  - Weather resistant triple chrome
- √ GREATEST SIGNAL PICKUP with —
  - High "Q" low loss lead cables
  - Positive coaxial connections
  - 100% shielding
- √ PATENTED FLUID TYPE ANTI-RATTLE
- √ HEAVY CARTONS READY FOR RESHIPMENT

SIDE COWL MOUNTS

Two stanchions for sturdy installation. Smartly designed insulators with chrome caps. Conversion kit for torpedo bodies included.

LONG RANGER

4 section, 100 inch, EZ-on installation. A favorite in low signal areas where its extra length provides fine reception.

Model SC-8.....List Price $6.95

Ind. boxed 1 lb. 10 oz.—12 to a master carton 22 lbs.

AIR KING

3 section, 66 inch, EZ-on installation.

Model SC-6.....List Price $4.95

Ind. boxed 1 lb. 5 oz.—12 to a master carton 17 lbs.

CHALLENGER

3 section, 66 inch, shield can type installation. Two smart, bakelite stanchions, coaxial lead without vinylite jacket.

Model SB-3.....List Price $2.95

Ind. boxed 1 lb. 4 oz.—12 to a master carton 15 lbs.

SIDE COWL OR FENDER

FLEX-ANGLE

3 section, 68 inch, EZ-on installation.

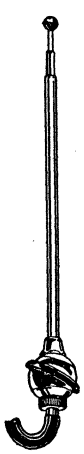
Model CF-6.....List Price $5.45

Ind. boxed 1 lb. 8 oz.—12 to a master carton 18½ lbs.

Tops in popularity because of trim styling and a flexible adjustment so rod can be locked in a vertical position, regardless of body contour. Ideal design for new revolutionary body styles.

TOP COWL OR FENDER

8 BALL



3 section, 56 inch, collapses to 22 inches.

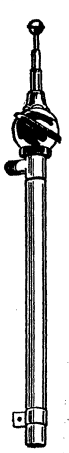
Model TCF-3.....List Price $5.35

Ind. boxed 1 lb.—12 to a master carton 14 lbs.

Smart looking "8 Ball" design developed and engineered by WARD in answer to every installer's dream. Secure installation! Easy to mount! Perfect fit on every car!

DISAPPEARING, Cowl or Fender

PHANTOM



3 section, 56 inch, 3½" exposed when collapsed.

Model DCF-3.....List Price $6.25

Ind. boxed 1 lb. 4 oz.—12 to a master carton 17 lbs.

At last—a disappearing antenna that is 100% shielded from engine noises and completely water sealed. Unique universal split ball design plus popular disappearing feature gives that smart built-in appearance.

EACH MODEL COMPLETE WITH A WARD COAXIAL LEAD CABLE

Made of the finest insulating materials—Polyethylene, wire shield braid, oil and abrasion proof Vinylite.

WARD'S exclusive lead connector fitting provides an easy coaxial connection 100% shielded. Bayonet adapter for pin plug included so lead will fit every car radio.

For models mounted on fender a 12 inch lead extension is required.

Model C-8 List $0.75

54-18 10-46

Covered by one or more of the following Patent Numbers: 104968, 118160, 2152316, 2251889, 2252671, 2269947, 2366634.

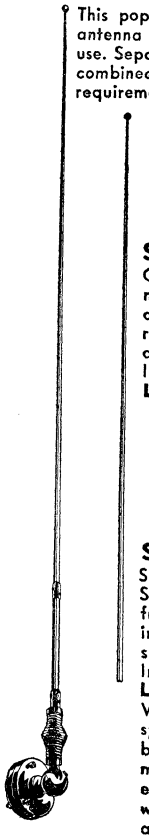
A WARD Development to fit every antenna need!

WARD ANTENNAS FOR SPECIAL COMMUNICATION

UNIVERSAL SWIVEL MOUNT

This popular short wave and FM antenna withstands hardest mobile use. Separate components may be combined to meet all operating requirements.



SPP-3
Cast iron SWIVEL BASE may be mounted on any car at point desired and rod locked permanently in a vertical position.
Ind. packed 3 lb. 4 oz.
List Price $13.25

SPP-3A
SHOCK MOUNTING SPRING provides rod with fullest protection against impact damage at high speeds.
Ind. packed 2 lb. 12 oz.
List Price $7.90
WHIP ROD is made of special alloys developed by WARD engineers for maximum resilience, greatest durability and finest weather proofing. There are two types:

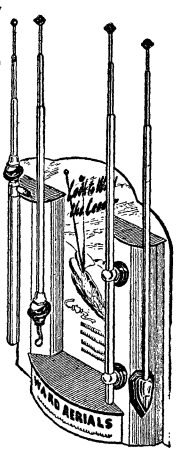
SPP-3B SINGLE ROD List $14.75
Length 84". Ind. packed 2 lbs.
SPP-12 ADJUSTABLE 2 SECTION ROD List $22.50
Length 85 to 103"
Ind. packed 2 lbs. 10 oz.

WARD SILENT SALESMAN

Striking, colorful display board comes completely assembled, ready to go to work bringing in easy, extra sales.

Model CD-4

Packed one to a carton
11 lbs.



DISPLAY FREE!

You pay only for the four fast moving models mounted on the board.

- **1 SC-6...$4.95**
- **1 CF-6...$5.45**
- **1 TCF-3..$5.35**
- **1 DCF-3..$6.25**

Total Price.$22.00

BOOST YOUR PROFITS! . . .

ROOF TOP MOUNT

Revolutionary design for intercommunication on 140-165 Mc band. Only one hole to drill and one screw to tighten. No cutting of car upholstery. Smartly streamlined base with attached 12' coaxial 50 chm. cable and positive ground connection removable 21" whip rod.

Model SPP-18 ..List $11.95
Ind. packed 1 lb.

Pat. Applied For

MOTORCYCLE MOUNT

This flexible and durable antenna gives outstanding performance, 42" whip rod is made of special alloys and mounted in a heavy rubber shock mounting base.

Model SPP-6
Ring Tip (Illustrated)
List $9.25
Ind. packed 1 lb.

Model SPP-6A
Ball Tip (Not Shown)
List $9.25
Ind. packed 1 lb.

WARD ANTENNAS FOR THE HOME

Are vertical, the same as broadcasting antennas, for greatest signal pick-up, finest reception.

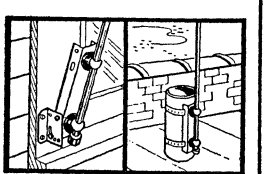
HOUSE MAST

4 SECTION, 12 FOOT, COLLAPSIBLE TO 47 INCHES.

FEATURES . . . Easy installation, Universal mounting brackets, Heavy weather-proof cadmium plating, Built-in lightning arrestor.

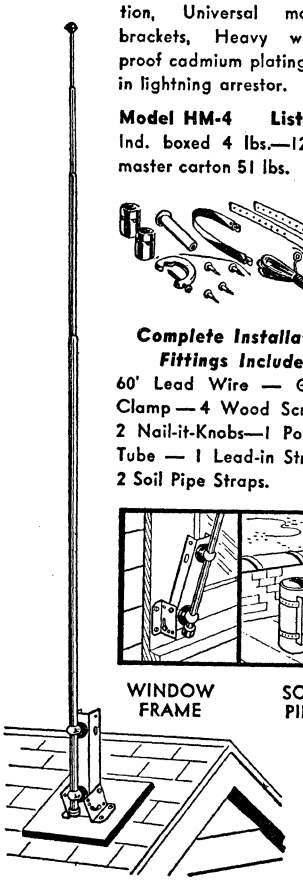
Model HM-4 List $7.45
Ind. boxed 4 lbs.—12 to a master carton 51 lbs.

Complete Installation Fittings Included
60' Lead Wire — Ground Clamp — 4 Wood Screws — 2 Nail-it-Knobs—1 Porcelain Tube — 1 Lead-in Strap — 2 Soil Pipe Straps.



WINDOW FRAME

SOIL PIPE



WINDOW MAST

3 SECTION, 8 FOOT, COLLAPSIBLE TO 42 INCHES.

FEATURES . . . Simple 3 point, 3 minute installation for apartments, homes, office buildings. Two way mounting bracket, 12 inch lead-in strap, and heavy weather proof cadmium plating.

Model WM-3.....List $3.25
Ind. boxed lbs.—12 to a master carton 14 lbs.

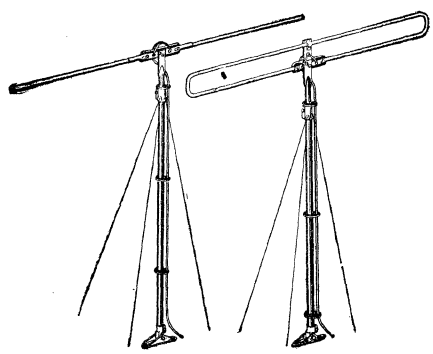
WARD FEATURES
MEAN GREATER VALUES

- Sixty feet of dielectric 300 ohm transmission line.
- Low-loss rubber stand-offs to guide transmission line down mast.
- Six low-loss plastic stand-offs of exclusive Ward design.
- Guy wire ring for secure installation.
- Universal base to mount on any angle.
- Sturdy vertical element revolves or tilts, allowing complete flexibility in orienting for maximum gain.
- Di-Pole element constructed of corrosion-preventive aluminum. Other parts completely weather-proofed.

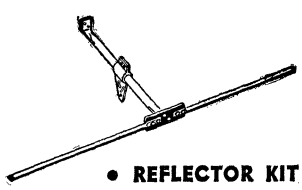
COMPLETELY ADAPTABLE TO ALL REQUIREMENTS

For extra saleability these FM and Television antennas are completely adaptable to the varying requirements of each installation. They provide maximum electrical efficiency needed for finest reception. The ease with which they may be securely installed, plus strong weather-proof construction insures trouble-free operation.



STRAIGHT DI-POLE — FOLDED DI-POLE

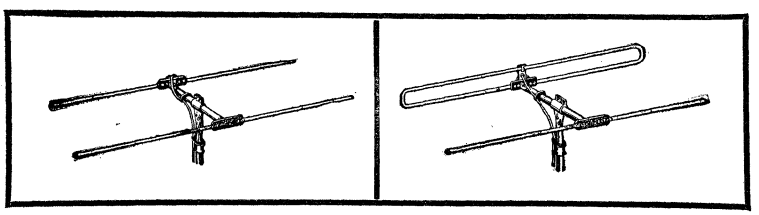
- **STRAIGHT DI-POLE**
  FM for 88-106 Mc. Range.....Model FM-60
  List $9.00
  Television for 44-88 Mc. Range.....Model TV-88
  List $10.35
- **FOLDED DI-POLE**
  Especially designed for broader antenna tuning and matched impedance to the 300 ohm transmission line for maximum response and energy transfer.
  FM for 88-106 Mc. Range.....Model FM-55
  List $10.25
  Television for 44-88 Mc. Range.....Model TV-94
  List $12.00
- **MAST EXTENSION**
  Sixty inch, weather proofed extension to increase height of vertical mast on both FM and Television models.....Model ME-60
  List $2.60



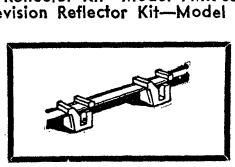
- **REFLECTOR KIT**

Ward's Reflector Kit combined with either the Straight or Folded Di-Poles provides maximum directional gain of the desired signal and eliminates undesirable and interfering reflections. Consists of cross member, reflector, and swivel bracket.

FM Reflector Kit—Model FMR-63.....**List $5.25**
Television Reflector Kit—Model TVR-92.....**List $6.45**



Illustrations show possible combination of reflector kit with either straight or folded di-pole.



STAND-OFF INSULATORS
Unique plastic design. Holds transmission line completely captive, yet cannot pinch line to change impedance. Sold in quantities of 144 in display container.

Model SO-144.....**List $21.60**
Each Stand-off — List 15c

COLINEAR TRANSMISSION LINE
Parallel line of 300 ohm impedance is insulated with polyethylene for highest quality reception. Comes on handy reel.

Model WR-1000—1,000 Feet.....**List $48.50**
Model WR-500 — 500 Feet.....**List $24.25**

AMPHENOL

Mechanically Perfect . . . Electrically Correct

COMPONENTS
for
RADIO AND ELECTRONICS EQUIPMENT

With the return of peace, Amphenol is devoting its full facilities to making products to meet the growing needs and rapid development of electronics for the myriad of new peacetime applications. Amphenol's technical knowledge, acquired through many years of experience and research in the development of radio-electronic components, strengthened by extraordinary wartime production, is reflected in new and improved products with heightened standards of quality and performance. The enviable reputation earned by Amphenol's devotion to high standards of engineering together with the integrity that is built into every Amphenol product is evidenced in the wide recognition and acceptance accorded Amphenol products.

The Amphenol products presented on the following pages are only a few out of the complete line of products and services available for Radio and Electronic needs. For electronic applications requiring unusual or special designs, Amphenol engineers are ready and equipped to develop components which meet the exacting requirements. Inquiries regarding design and production will receive prompt and confidential consideration.

"AN" and "97" CONNECTORS

Amphenol electrical connectors provide a means of quickly connecting and disconnecting one or many electrical circuits. Such provisions were a "must" in war time equipment used in the air, sea and land. The far-reaching application of these electrical connectors represents a great stride in the advancement of electrical equipment design.

To win the war, development work advanced along all lines and production had to go on at top speed. The war equipment had to be made of precision built interchangeable components for many sub-assembly operations. The war machines had to lend themselves to rapid plant and field inspection and testing. They had to lend themselves to quick servicing, maintenance, and installation of replacement units. The war equipment also had to be dependable under the most adverse conditions.

Amphenol "AN" and "97" Connectors and Fittings played their part in making the above features possible. The "AN" types of connectors have been and are now being built to Army-Navy specifications. The Amphenol "97" Series connectors are built under the same general specifications designed primarily to supplement the "AN" connectors.

The features required in war equipment are highly desirable in many electrical and electrically controlled equipments designed not for survival of man but the comforts of man. "AN" and "97" Connectors are NOW AVAILABLE for all applications, offering the advantages of more economical production and testing; and by employing the use of electrical connectors in an electrical device a selling point is added. The device will lend itself to rapid economical servicing. When replacements are needed, replacement units can be supplied and easily installed.

The eight shell types illustrated are representative of the most popular types, although Amphenol builds these same connectors and others to special requirements such as explosion-proof, light-proof, pressure-proof, weather-proof and tropicalized—all in accordance with the high quality specifications of the Army and Navy.

For the benefit of the many who are acquainting themselves with the possibility of using Amphenol connectors on the electrical equipment they manufacture, the plugs are supplied with either male or female contacts. The same is true of receptacles. Receptacles are usually mounted rigidly. Because of this they are designed with a solid base for mounting on a panel, bulkhead, wall and the like. The plugs are usually used on the end of a flexible conduit or cable. Receptacles have external threads and plugs have coupling rings with internal threads. A complete electrical connection requires a receptacle and plug. In completing the circuits, on an average, three fittings are needed—see following page.

Amphenol connectors are produced in a great variety of combinations of shells and inserts, dielectric materials and finishes. The contacts range in size from No. 20 to No. 0 and in number, from 1 to 47 contacts. A catalog of the entire line will be sent to you upon request.

LOW-LOSS 83 SERIES CONNECTORS — U.H.F.

This complete line of low-loss connectors and adapters for use with RG type cables serves all practical applications and they are made in both small and large sizes for coax and twinax cables. They are a very rugged construction, die cast zinc and machined brass shells, heavily silver plated. Low-loss inserts are of mica filled bakelite and polystyrene, and their construction provides for easy assembly and positive connection. Fully Army-Navy approved for use with U.H.F. cables.

SMALL SINGLE CONTACT CONNECTORS

Number		List
83-1SP	— **2-PIECE STRAIGHT PLUG** — With molded low-loss mica filled insert	$1.40
83-1SPN	— **3-PIECE PLUG** — Tapered back shell for .405" O.D. cables	2.04
83-776	— **3-PIECE PLUG** — Like 83-1SPN for RG-58/U and 59/U cables	2.24
83-1R	— **RECEPTACLE CHASSIS OR BOX TYPE** — Low-loss mica filled insert	2.06
83-1RTY	— **RECEPTACLE CHASSIS OR BOX TYPE** — Polystyrene with mica wafer on solder end	1.61
83-1AP	— **ANGLE PLUG ADAPTER** — Polystyrene insert — pin and socket	2.49
83-1T	— **"T" CONNECTOR** — For 83-1R — factory wired polystyrene insert	3.06
83-1J	— **JUNCTION** — For use with 83-1SP or 83-1SPN — double contact	1.94
83-1F	— **FEED THRU CONNECTOR** — Polystyrene insert — pressure tight	2.94

SMALL TWIN CONTACT CONNECTORS

Number		List
83-22SP	— **TWIN PLUG** — With low-loss mica filled dielectric insert	$1.91
83-22R	— **TWIN RECEPTACLE CHASSIS OR BOX TYPE** — For 83-22SP connector	1.40
83-22AP	— **TWIN ANGLE PLUG ADAPTER** — For straight 83-22SP plug	2.84
83-22J	— **TWIN JUNCTION** — Double end contact — for use with 83-22SP	3.16
83-22F	— **TWIN FEED THRU ADAPTER** — Pressure tight to 20 lbs. per sq. inch	3.04

HOODS FOR SMALL CONNECTORS

Number		List
83-1H	— **HOOD** — For RG cables 8/U, 10/U, 11/U, 12/U, 22/U, 63/U, 65/U	$ .23
83-1HP	— **HOOD** — For use with double shield braid wire — RG-9/U, 13/U	.55
83-765	— **HOOD** — For effective shielding of smaller diameter cables	.62

CAPS and CHAINS and ADAPTERS

Number		List
83-1AC	— **CAP** — For 83-1R, 83-1RY, 83-1RTY and 83-22R connectors	$1.84
83-1BC	— **CAP** — For 83-1SP, 83-1SPN and 2 pole plug — 83-22SP connectors	1.06
83-168	— **ADAPTER** — For small cable — RG-59/U, use with 83-1SP connector	.36
83-185	— **ADAPTER** — For small cable — RG-58/U, use with 83-1SP connector	.36

LARGE SINGLE CONTACT CONNECTORS

Number		List
83-21SP	— **PLUG** — With low-loss mica filled insert and rubber gasket	$4.16
83-21R	— **RECEPTACLE** — With two piece low-loss mica filled insert	1.76
83-21AP	— **ANGLE PLUG ADAPTER** — With waterproofing rubber gasket	3.04
83-21J	— **JUNCTION** — Polystyrene insert — waterproof — dust tight	2.64

LARGE TWIN CONTACT CONNECTORS

Number		List
83-2SP	— **TWIN PLUG** — Low-loss mica filled insert — waterproofing gasket	$3.88
83-2R	— **TWIN RECEPTACLE** — One piece flange — low-loss mica filled insert	2.97
83-2AP	— **TWIN ANGLE PLUG ADAPTER** — Polystyrene insert — used with 83-2SP	4.16
83-2J	— **TWIN JUNCTION** — For water and dirt tight connection to 83-2SP	2.94

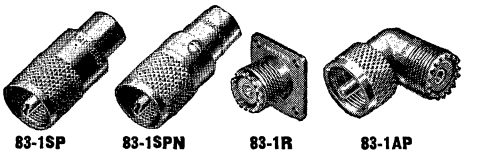
LARGE HOOD and LARGE CAP

Number		List
83-2H	— **HOOD** — For effective shielding, used with 83-2R and 83-21R receptacles	$ .49
83-2AC	— **CAP** — For sealing large 83-2R and 83-21R	1.22

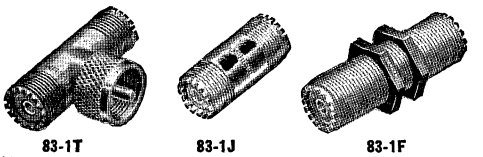
BRITISH TYPE CONNECTORS

Number		List
83-1M	— **ADAPTER** — 83-1SP — SO-153 (110H 585) to 83-1R — PL-P173 (110H 584)	$3.63
83-764	— **ADAPTER** — 83-1SP — 10H 528 to 83-1R — 10H 529, 10H 701, 10H 702	3.52
83-1D	— **ADAPTER** — PL-P173 (110H 584) — 83-1R to SO-153 (110H 585) — 83-1SP	4.44

SMALL SINGLE CONTACT CONNECTORS



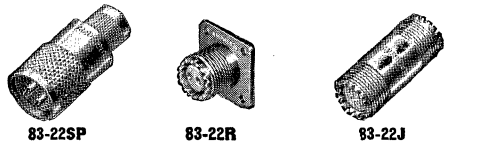
83-1SP 83-1SPN 83-1R 83-1AP



83-1T 83-1J 83-1F

Units above for RG cables — 8/U, 10/U, 11/U, 12/U, 63/U, 65/U — and 58/U, 59/U using 83-168 and 83-185 with 83-1SP.

SMALL TWIN CONTACT CONNECTORS



83-22SP 83-22R 83-22J

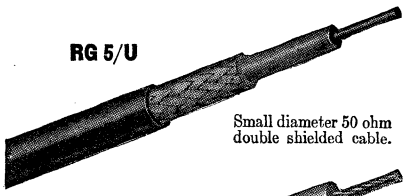
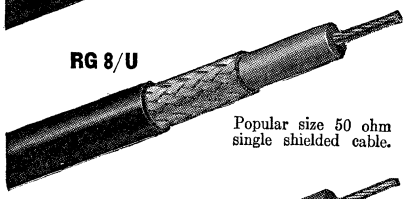
RG 5/U



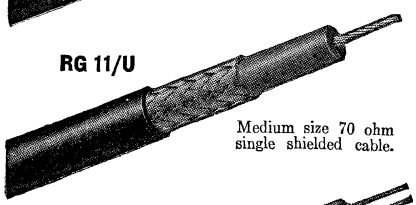
Small diameter 50 ohm double shielded cable.

RG 8/U



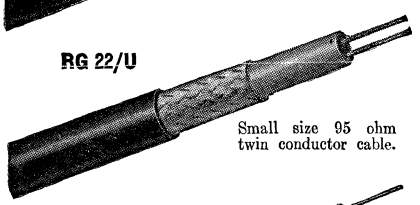
Popular size 50 ohm single shielded cable.

RG 11/U



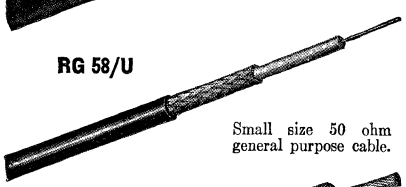
Medium size 70 ohm single shielded cable.

RG 22/U



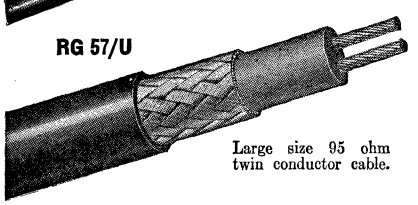
Small size 95 ohm twin conductor cable.

RG 58/U



Small size 50 ohm general purpose cable.

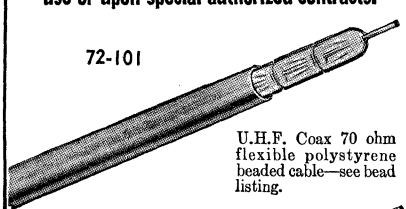
RG 57/U



Large size 95 ohm twin conductor cable.

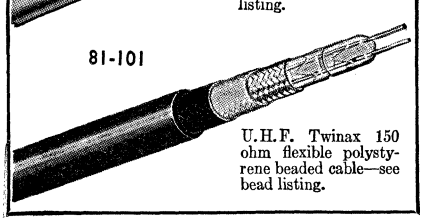
Amphenol also builds U.H.F. cables with polystyrene beads. These types are for non-military use or upon special authorized contracts.

72-101



U.H.F. Coax 70 ohm flexible polystyrene beaded cable—see bead listing.

81-101



U.H.F. Twinax 150 ohm flexible polystyrene beaded cable—see bead listing.

HIGH FREQUENCY CABLES

AMPHENOL COAX AND TWINAX RG CABLES are fully approved and produced in accordance with Army-Navy specifications (JAN-C-17). These specifications utilize the very fine dielectric properties of polyethylene, proven most efficient as a low-loss flexible mechanically stable dielectric. The outer jacket in most of Amphenol's approved types is a tough resistant vinyl protective, nonhygroscopic, and impervious to exposure of acids, alkalis, oils and gasoline. Polyethylene is also used as outer jacket for some of the types listed.

Polyethylene is processed in strict accordance with Bureau of Ships Specification RE-9172. It should be emphasized that unusually strict standards are applied to every processing operation of Amphenol's RG cable types. They are produced for "quality plus." Rigid laboratory tests and other process checking, plus Amphenol's "O.K." certification and notarized affidavit on every unit shipment, is final assurance of extra quality and dependability.

Also illustrated, but not approved for military use without specific authorization, are two of Amphenol's beaded type cables. This polystyrene and mica filled bakelite type of beaded cable is one of Amphenol's early developments in U.H.F. cables and for specific uses, is still in popular demand. The beads, too, may be ordered in bulk and are illustrated and priced on the Synthetics page.

Chart below represents the characteristics of all types of RG cable approved for manufacture by Amphenol. Further specifications and prices upon request.

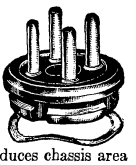
RETAINER RING "S" TYPE SOCKETS and "CP" TYPE PLUGS



— For quick easy assembly to chassis or panel from 19 gauge (.044") to 16 gauge (.062") using No. 4 Amphenol patented tempered steel retainer ring. High dielectric molded bakelite and cadmium plated contacts for easy soldering. Rotation feature for lining up contacts — wiring for short leads reduces chassis area required. Complete with retainer ring.

"S" Sockets	List	"CP" Plugs	List
78-S4 — 4-Contact	13c	86-CP4 — 4-Prong	13c
78-S5 — 5-Contact	13c	86-CP5 — 5-Prong	13c
78-S6 — 6-Contact	13c	86-CP6 — 6-Prong	13c
78-S7S — 7-Small	13c	86-CP7S — 7-Prong Small	13c

78-S11 — 11-Contact	29c		
78-8L — Loktal	21c		

U.H.F. LOW-LOSS POLYSTYRENE SOCKETS

— Extremely low losses even at the highest frequencies. Transparent body molded from "912-A" polystyrene with extra long contact soldering lugs to prevent possible soldering heat damage. High efficiency in operation for temperature ranges not exceeding 200° F. Mounts in 1 5/32" hole with 1 1/2" mounting centers.

54-8 — Octal Socket ..... 48c list

LOKTAL SOCKET

— Made of Amphenol "912-A" pure polystyrene like the octal but with floating contacts for small loktal tube prongs. Takes full advantage of the high efficiency of the loktal tubes which do not have a loss-inducing insulating material base. Mounts in 1 5/32" hole.

54-8L — Loktal Socket ..... 54c list

U.H.F. MINIATURE LOW-LOSS SOCKETS

— Amphenol "912-A" polystyrene 5 and 6 contact sockets for use with Miniature Amphenol polystyrene plug-in coil forms also listed. Greatly reduces U.H.F. circuit losses. Fits Hytron Bantam Jr. tubes. Mounting hole diameter 5/8".

	List
54-5H — 5-Contact Miniature Socket	42c
54-6H — 6-Contact Miniature Socket	42c

No. 54-7P—MINIATURE POLYSTYRENE SOCKET

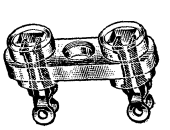
— An ultra low-loss socket to take full advantage of the newly developed seven prong miniature tubes. Molded from Amphenol 912-A polystyrene.

54-7P — 7-Contact Miniature Socket ..... 42c list

U.H.F. TIP JACK OR BUSHING

— Contact accommodates .080" phone tip but contact may be removed and the transparent Amphenol "912-A" body used as a high frequency thru-panel bushing as well. Mounts in a plain round 5/8" hole, and is held in place with No. 2-9 retainer ring included.

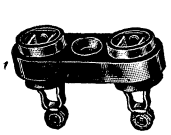
54-1H — U.H.F. Tip Jack ..... 30c list



CRYSTAL HOLDER SOCKET

— Same as 33-2 below except molded of ultra low-loss Amphenol "912-A" polystyrene. Contacts are of phosphor bronze, silver plated to keep resistance at a minimum. Contacts may be removed and the polystyrene body used as a two hole feed thru bushing. Center to center contact 3/4".

54-2 Crystal Holder Socket ..... 36c list



STANDARD CRYSTAL HOLDER SOCKET

— Of black or mica filled bakelite for crystal holders having two prongs on 3/4" centers. Easily mounted and requires minimum area on chassis or panel. Used extensively for crystal phasing in receivers, crystal control of transmitters and test equipment. May be used as dual tip jack on test panels. Cadmium plated contacts.

	List
33-2 — For 1/8" Diameter Prongs (Black Bakelite)	10c
33-3 — For 5/32" Diameter Prongs (Black Bakelite)	10c
33-2T — For 1/8" Diameter Prongs (Mica Filled Bakelite)	17c
33-3T — For 5/32" Diameter Prongs (Mica Filled Bakelite)	17c

MIP MOLDED-IN-PLATE SOCKETS

— World's strongest socket. Sturdy steel mounting plate moulded directly into bakelite body, cannot come loose or vibrate. 1 1/2" Mounting centers. Mounts in 1 5/32" hole (MIP7L and MIP20 in 1 9/32" hole). Molded from high dielectric black bakelite.

	List
77-MIP4 — 4-Contact MIP Socket	12c
77-MIP5 — 5-Contact MIP Socket	12c
77-MIP6 — 6-Contact MIP Socket	12c
77-MIP7L — 7-Large MIP Socket	14c
77-MIP7S — 7-Small MIP Socket	12c
77-MIP8 — 8-Octal MIP Socket	14c
77-MIP9 — 9-Octal Style MIP Socket	18c
77-MIP11 — 11-Octal Style MIP Socket	24c
77-MIP12 — 12-Octal Style MIP Socket	30c
77-MIP20 — 20-Octal Style MIP Socket	61c

MIP LOKTAL

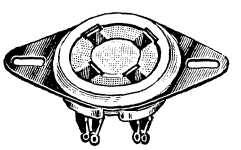
— Molded-in-plate socket for loktal tubes. Identical to standard MIP sockets but is smaller in size and has 1 5/16" mounting centers. Mounts in 1 1/16" hole.

88-8X — Loktal Socket ..... 21c list

MIDGET OCTAL

— Has all the features of the standard MIP sockets, but is smaller in size. For building compact radios and as the companion socket for the above loktal. Mounting centers, 1 5/16". Mounts in 1 1/16" hole.

88-8 — Midget Octal ..... 14c list



STEATITE SOCKETS

—Recommended for high frequency work where high temperatures are encountered such as in transmitters, amplifiers having high output and for extensive replacement service use. Plates have slotted mounting holes to fit riveting centers from 1 1/2" to 1 7/8".

Less Plate	List		With Plate	List

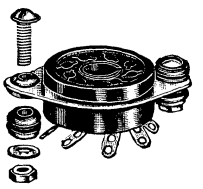
MAGNAL STEATITE SOCKET

— Eleven contact socket of steatite as above. Has 1 5/16" pin circle to accept magnal 11-prong bases as found on many popular cathode ray and television tubes. Has octal style locating keyway. Complete with No. 2-14 ring. Mounts on 1 5/8" hole.

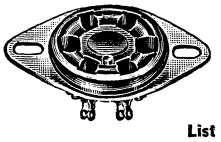
49-SS11L — Magnal Steatite Socket ..... $1.21 list



FLOATING OCTAL SOCKETS

— Completely cushioned. Has enlarged mounting holes in the plate into which live rubber grommets are placed for cushioning the socket to obtain vibration free operation. Eliminates most tube microphonics. Mounts in a 1 5/32" hole with two 1/4" screw holes on 1 1/2" centers. Complete with socket, four rubber grommets, two mounting screws, nuts and washers.

MIP8-FK — Socket With Kit ..... 39c list



REPLACEMENT SOCKETS

— Regular "S" sockets and "CP" plugs (listed to the left, above) assembled with No. 4 retainer ring to nickel-plated steel mounting plate with slotted mounting holes to fit riveting centers from 1 1/2" to 1 7/8". Extensively used by servicemen as replacements.

MICA FILLED BAKELITE SOCKETS

All bakelite sockets and plugs on this page are also available molded from low-loss mica filled bakelite. To order, add letter "T" to catalog number and 7c to list price. Especially desirable for high frequency applications as mica filled bakelite has lower power factor and better dielectric constant.

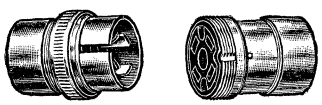
LOW-LOSS COAXIAL CABLE CONNECTORS — for cables up to 13/32" O.D. May be reamed out for cable up to 7/16" O.D. Shell machined from solid brass, plated in heavy polished chrome. Connector elements made of "912-A" Amphenol low-loss polystyrene. Male shells have threaded locking rings for tight connections. Cable units have metal clamp for tight cable grip and safe ground connection. CHASSIS UNIT mounts in 13/16" hole and has soldering lug, lock washer and nut.

		List
93-M	**— Male Cable Connector**	$1.80
93-F1	**— Female Cable Connector**	1.80
93-F	**— Female Cable Connector**	1.80
93-M1	**— Male Cable Connector**	1.80
93-C	**— Female Chassis Connector**	1.51
93-C1	**— Male Chassis Connector**	1.51

HEAVY DUTY POWER CONNECTORS — Has four, flat, heavy brass blades in the male molded bakelite unit for connection with set-back contacts of phosphor bronze in the molded bakelite female unit.



Frequent use is possible over long periods without damage even with heavy current loads of 15 amperes at 125 volts or 10 amperes at 250 volts. Full, body-tight heavy brass shell — bright cadmium plate. Polarized with shell keys and keyways. Terminals of bakelite units are numbered for quick wiring. Strain is taken up by a strong cable clamp grip. Grounding screw in body for safe wiring. Threaded locking ring keeps connections tight.

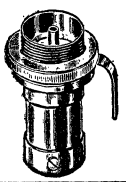
LOW-LOSS "912-A" COAXIAL CABLE END TERMINAL CAP — For connection to Antenna Cable End Terminal as listed below. Molded in an umbrella like design, of pure polystyrene, Amphenol high dielectric, low-loss material. A coat of Amphenol "912-A" liquid polystyrene on the cap threads and wire opening will make the terminal connection weather-tight. Size — 1/2" high and 1 1/32" across.

93-15 End Terminal Cap as above ..... **25c list**
For Liquid "912-A" See Synthetics Page.



LOW-LOSS COAXIAL CABLE END TERMINAL — For connection of coaxial cable to antennas, open wires and matching stubs. For a suspended connection or for connection to bracket or insulator in 25/32" hole without strain on the aerial. May be sweated on copper tube cable and body solder lug may be used for connection to dipole and doublet aerials. When used with terminal cap listed above, connection is weather-tight.

93-M5 Antenna Cable End Terminal ..... **$1.80 list**

HEAVY DUTY CHASSIS OR PANEL RECEPTACLE — With male or female molded bakelite unit for use with Heavy Duty Power Connectors — Use 92-M with 92-C and 92-F1 with 92-C1. Mount in 1 1/4" hole in any material thickness up to 1/2". Complete with lock washer, spacer washer and hex nut. Can be covered with CCC8 cap and chain described below, when not in use.

		List
92-C	**— Female**	$3.01
92-C1	**— Male**	3.01

HEAVY DUTY FLUSH RECEPTACLES — With male or female bakelite unit in strong, steel body-frame. Used with Heavy Duty Power Connectors — 92-F1 with 92-M2 and 92-M with 92-F2 — in regular wall switch boxes. Full, open connection end will come thru wall plate 1/8" for good connection to grip locking ring or for cap and chain described below for a closed outlet when not in use.

		List
92-M2	**— Male**	$3.14
92-F2	**— Female**	3.14
84-2CH	**— Wall Plate for use with above**	.90

CAP AND CHAIN — Heavy Duty Chrome Plated Brass Cap with bead chain similar to CCC1 and CCC3 but larger in size, to be used with chassis and flush receptacles above and chassis units of heavy duty radio connectors below.

79-CCC8 Cap and Chain ..... **61c list**

ANTI-MICROPHONIC KIT — Socket cushions and all the necessary parts for making floating connections using Amphenol MIP sockets. Contents in an envelope with complete instructions consist of four live rubber cushions, metal washers, mounting screws and nuts. Used to overcome tube microphonics wherever cushioned sockets are necessary, especially in photo-cell work, ultra-sensitive circuits, and for some battery tubes.

11-3K Kit Less Socket ..... **24c list**

Copyright by U. C. P., Inc.

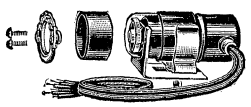
PREFOCUSED LAMP RECEPTACLE — For medium-base prefocused lamps as used in movie projectors. Also adaptable for using prefocused lamps in floodlights, beacons, searchlights, etc. and for experimental work. Molded from special high heat resisting bakelite to withstand temperatures to 450° F. Special air cooled design. Conservatively rated at 1000 watts, 110-250 volts. Listed by Underwriters Laboratories. Heavy brass contacts assure minimum resistance for maximum light intensity. Can be installed in most movie projectors without drilling new holes. Heavy fiber insulator to cover terminals after wiring included with receptacle alone, not needed with cap.

Insulating cap for receptacle available for use when socket is suspended or to add 1/2" to height of socket or to insulate wire terminals from panel.

	List
98-8 —Receptacle Only	$1.93
98-8A —Receptacle and Cap	2.48

MAGIC EYE ASSEMBLY— For the easy adapting or replacing of a six-prong magic eye tube in any radio having automatic volume control. Also for FM receivers, test instruments, signal tracers and as volume level and modulation indicators. Includes one-megohm target-plate resistor wired into socket and five wire color coded cable 22" long. Mounting bracket is slotted for tube adjustment. Complete as above with antique bronze escutcheon and necessary hardware for assembly. Tube not included.

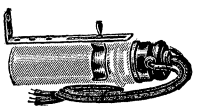
58-MEA6 Complete Magic Eye Assembly ..... $1.51 list



OCTAL MAGIC EYE ASSEMBLY— Similar to the above, but for octal type magic eye tubes. Has a shorter bracket for the smaller tube size. Complete with 6 wire 22" long color coded cable and full vision type antique bronze escutcheon and necessary hardware for assembly. Tube not included.

58-MEA8 Complete Octal Magic Eye Assembly ..... $1.51 list

CATHODE RAY ASSEMBLY — Widely used for mounting 902, 913 and similar cathode ray tubes. Bakelite socket mounted in a protective metal shell, completely wired with eight wire 22" long color coded cable. Adjustable "L" bracket for mounting on panel front or base. Tube not included.



58-913 Complete Cathode Ray Assembly ..... $1.21 list

MAGIC EYE ESCUTCHEONS — No. 10-102 hood type, large size for mounting over panel or cabinet hole. No. 10-2 Octal base full vision type. Brass with antique bronze finish.

	List
10-102 — For 6-Prong Single Eye Tube (Plastic)	15c
10-2 — For 8-Prong Double Eye Tube (Metal)	36c

TAP CHANGE SWITCH — An 8-position single pole continuous switch with white numerals clearly visible in window cap. Supplied with markings 1-2-3-4-5-6-7-8 or impedance markings 0-2-4-8-16-250-500. Side set screw locks switch-arm in position, preventing accidental tap changes.

	List
36-1 — With Numerals 1 to 8	90c
36-2 — With Impedance Markings	90c

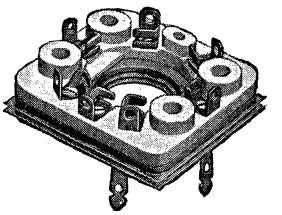
BULB TESTER SOCKET — A standard 7-contact combination socket for large and small 7-prong tubes and has a large center contact for testing miniature bulbs, either screw or bayonet base types.

	List
78-7CD — With Retainer Ring	53c
78-RS7-CD — With Mounting Plate	54c

UNIVERSAL GRID CAP — A grid cap of improved design, wired or unwired, for universal use with tube grid caps from 1/4" to 3/8" diameter including standard glass and metal tubes. Spring brass contacts in bakelite body.

	List
63-1 — Unwired	18c
63-1W — Wired	24c

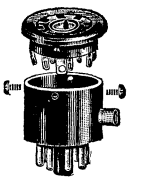
ACORN SOCKETS



5-Contact Acorn Socket complete with cathode and bypass assembly, for mounting directly on chassis. Grounding plate cannot be used. Bronze contacts.

151-001 ..... $2.20 list

UNWIRED ADAPTERS — A simple way to make adapter units which may be used for modernizing tube checkers and analyzers, adapting new tubes to old circuits — for connections to output meter, phonograph pick-up, headphones, extra speakers, recorders and other adapter uses.



ADAPTER SOCKET TOPS ONLY— 24c list

LOKTAL ADAPTER BASES — Similar to small bases above but have metal band and lock-in stud like loktal tubes.

44-13 Loktal Base (No side hole or side stud) ..... 66c list

MINIATURE TUBE ADAPTERS — Unwired for testing miniature tubes. 44-17-8 socket top for 7-prong miniature tubes, 44-12-8 socket top for Hytron Bantam Jr. 5-contact tubes, and 44-26-8 socket top for Raytheon 5-prong miniature tubes. All have octal bases.

44-17-8 for 7-Prong Miniature Tube ..... 61c list
44-12-8 for 5-Contact Hytron Bantam Jr. Tube ..... 61c list
44-26-8 for 5-Prong Raytheon Miniature Tube ..... 61c list

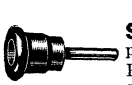
BLANK SOCKET — "S" type socket as listed on another page for mounting in the standard 1 11/64" "S" type socket hole. Used primarily as a dummy or spare socket on tube checkers and analyzers so a new "S" type socket can easily be added when a socket for new type tubes is required. May be used as a bakelite bushing by drilling a hole in the center.

78B Blank Socket ..... 7c list

SINGLE CONTACT SOCKETS— Of molded bakelite for mounting in 3/8" hole — held firmly in place by Amphenol Retainer Ring No. 2-11. Contacts recessed approximately 1/8" below the top of the tip jacks prevent accidental shorts from contact to chassis. The bakelite body may be used as a feed thru bushing by removing the contact. Seven colors and 4-prong diameters for quick wiring identification.

Red, green, blue, yellow, gray, walnut or black. If no color is specified, black will be furnished.

	List
78-1P — For .080" Phone Tip	9c
78-1S — For 5/32" Plug	9c
78-1M — For 1/8" Plug	9c
78-1L — For 5/32" Plug	9c



SINGLE PRONG PLUGS — A small but extremely useful plug in colors, for connection with sockets listed above.

Red, green, blue, yellow, gray, walnut or black. If no color is specified, black will be furnished.

	List
71-1S — For 5/32" Socket	6c
71-1M — For 1/8" Socket	6c
71-1L — For 5/32" Socket	6c

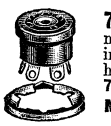
MINIATURE SOCKETS

78-7P RCA— For 7-prong miniature tube series. Metal shell in socket center for grounding to chassis. Mounts firmly in place in ⅝" hole with No. 2-9 retainer ring.

78-7P — 7-Contact
Miniature Socket.....21c list

For socket as above but molded in U.H.F. polystyrene see listing on another page.



78-5P RAYTHEON — For 5-prong miniature tubes of the Raytheon hearing aid tube types. Mounts firmly in ½" hole with No. 2-10 retainer ring.

78-5P — 5-Contact
Miniature Socket.....21c list

78-5H BANTAM JR. — For 5-prong Hytron Bantam Jr. miniature tube types with ⅜₂" diameter prongs. Also in 6-prong types for coil forms and plug connections.

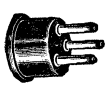
	List
78-5H —5-Contact	21c
78-6H — 6-Contact	21c

For socket as above but molded in U. H. F. polystyrene see listing on another page.

78-S3S PHOTOCELL — With contact spacing for practically all three prong miniature photocells — RCA Pee-Wee, Cetron, etc. Mounts firmly in ⅝" hole with No. 2-9 retainer ring.

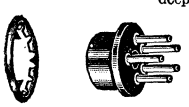
78-S3S — 3-Contact.....17c list

MINIATURE PLUGS



Cable Plug

CABLE TYPE — Extremely compact plugs, used extensively for speaker connections in compact midgets. Also ideal for all plug-in connections where space is limited. Plated brass prongs are deeply recessed in individually molded pockets, preventing shorts due to insulation pulling back. With molded finger grip. Fit miniature sockets above.



Chassis Plug and Ring

CHASSIS TYPE— Mounts in a plain round hole ⅝" in diameter. No screws or rivets required. Held firmly in place by the No. 2-9 tempered steel retainer ring. Use with female miniature connectors (MPF types) on preceding page.

Chassis	Cable	Prongs	List
86-CP-3S	**71-3S**	**3**	15c

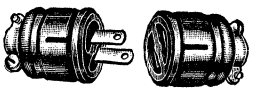
SHIELDED CABLE CONNECTORS



110-250 VOLT CONNECTORS — With 79-CC-4 cable clamps for cables up to ½" in diameter. Clamp take up cable pull and relieves soldered connections of strain. Extremely practical for plug and cable connections of power lines. Fully shielded cable terminals in molded bakelite connection units encased in a tightly covered drawn steel cap — snaps on and fits securely — easily removed. Available without clamp also but with rubber grommets for protection against abrasion.

With Clamp	List Price		With Grommet	List Price

86-PM-20 — 20-Prong Plug	90c
77-MIP-20 — 20-Contact Socket	61c

ACCESSORIES FOR CABLE CONNECTORS

CABLE CLAMP— — Designed primarily for cable strain relief. Used with 78-PF and 86-PM connectors and 60 and 61 series. Simply remove rubber grommet for connector and slip this grip into place. Relieves soldered connections of strain. Also used on panels and chassis, to anchor cables firmly in place. Slips easily into any shape hole from 7/16" to ⅜". No screws or rivets required.

79-CC-4 Cable Clamp.....12c list

PULL-PROOF LOCKING SHELLS

CABLE TYPE— Cadmium-plated steel covers which can be slipped over "PF" and "PM" Connectors and 60 and 61 series 110-250 volt Connectors. Locks connectors firmly together, preventing accidental pull-aparts. Especially suited for public address work. Also used extensively in shops, etc., to pull proof connections in power cords. Set consists of one male and one female threaded shell.

CABLE SET 15-C-CHA

CHASSIS SET 15-C-CHA

15-C-CAB — Per Set.....30c list

CHASSIS TYPE — Similar to the cable type in design except that one section is a threaded shell which fits under "S" type socket or retainer ring type 60 and 61 series. The other shell slips over the cable connector.

15-C-CHA — Per Set.....30c list

RECEPTACLES AND PLUGS 110-250 VOLT

Compact receptacles. Molded from high dielectric black bakelite. Rated at 15 amperes, 110 volts, or 10 amperes, 250 volts. Female type has both soldering lugs and binding screws; male has binding screws. 2-Pole type accepts any standard electric plug. Mounts in 1¾₂" hole.

RETAINER RING TYPE (Receptacles)	List
61-F — 2-Pole Universal	30c
60-F — 3-Pole Polarized	42c
WITH MOUNTING PLATE (Receptacles)	
61-F1 — 2-Pole Universal	34c
60-F1 — 3-Pole Polarized	46c

Retainer Ring Type (Plugs)	List	With Mounting Plate (Plugs)	List
61-M — 2-Pole Standard	30c	**61-M1 — 2-Pole Standard**	34c
61-MP — 2-Pole Polarized	30c	**61-MP1 — 2-Pole Polarized**	34c
60-M — 3-Pole Polarized	42c	**60-M1 — 3-Pole Polarized**	46c

Style similar to 61F above except has molded in plate like MIP sockets. 1½" mounting centers.

MIP-61F Receptacle.....30c

MICA FILLED BAKELITE SOCKETS

All bakelite sockets and plugs on this page are also available molded from low-loss mica filled bakelite. To order, add letter "T" to catalog number and 7c to list price. Especially desirable for high frequency applications as mica filled bakelite has lower power factor and better dielectric constant.

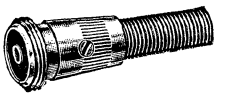
MC1F



MC1M

SINGLE CONTACT MICROPHONE CONNECTORS — SHIELDED CABLE TYPE

— Unbreakable machined brass shell chrome-plated: with coupling ring for tight connections. Spring cord protectors accommodate cables to 1/4" diameter.

	List
75-MC1F — Female	**55c**
75-MC1M — Male	**44c**

SIDE CABLE OUTLET — Designed to be placed between a microphone and stand having 5/8" 27 standard threads. Its purpose is to provide an outlet for the microphone cable where it is not desired to run it through the stand tubing. Efficient cable grip relieves strain. Heavy metal castings, finished in polished chrome.

57-SCO3 ..... **82c list**

CHASSIS UNIT — Use in holes — .385" to ground to chassis or 1/2" for 2 independent circuits. Has extruded fibre washer, flat fibre washer, flat solder lug washer and locking nut. Use MC1F or MC1F-A cable connector.

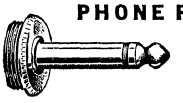
75-PC1M — 1-Contact ..... **33c list**

PRESSURE CABLE CONNECTOR—Like MC1M listed above but center insulated contact is enforced by a heavy coil spring at the back for positive connection. Used for any unit fitting MC1M. Supplied with spring cord protector for cables to 1/4".

75-SP-MC1M — Pressure Connector ..... **55c list**

ANGLE CONNECTOR UNIT — For cable connection at right angles to chassis. Used on amplifiers, transmitters, and other apparatus with PC1M, SP-PC1M or CL-PC1M. No need for long bends in cable with this unit which prevents breakage of cable shields and center conductors. Shell portion, polished chrome. With spring cord protector for cables to 1/4".

75-MC1F-A — Female Angle Connector ..... **66c list**



PHONE PLUG ADAPTER For MC1F and MC1F-A connectors and any standard phone jack — no soldering or wiring.

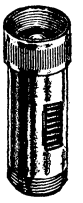
75-MC1P — Phone Plug ..... **49c list**

CLOSED CIRCUIT CONNECTOR Same as PC1M but circuit closes when cable connector is removed, eliminating open circuit grid howls. Same thread and hardware supplied as on PC1M. Contact is spring-actuated. Use MC1F or MC1F-A as the cable connector.

75-CL-PC1M — Closed Circuit ..... **44c list**

PRESSURE CHASSIS UNIT — Like PC1M Chassis Unit, but heavy coil spring enforces center contact. Fits same connectors as PC1M.

75-SP-PC1M **44c**



MICROPHONE SWITCH — Compact, unbreakable microphone switch. Male threads fit the MC1F and MC1FA. Coupling ring fits any other 75 Series connector having coupling threads. No tools or wiring required. May be connected directly to any mike which has the PC1M installed, also between amplifier and mike cable, or between two cables connected with MC1M and MC1F. PUSH-TO-TALK, and release the button for stand-by; or SLIDE SWITCH forward for permanent connection. Switch short-circuits mike. Shell machined from solid brass, chrome plated.

75-MC1S — Switch ..... **$1.10 list**
